Come on, come on, you
will be with me in the
days to come0

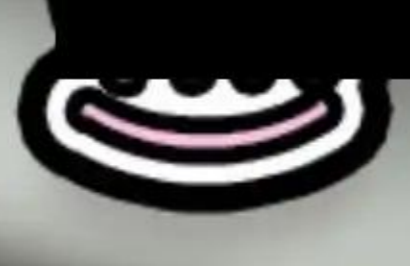

After that incident, I have to replace Sihan and maintain her normal lifestyle. Even her clothes cannot be changed much in the near future.

Although in terms of research work, I may not be able to conduct QQ for her, but generally the working environment is quite familiar.

SP_XXX

(Probably not very good at dressing up.)
Fortunately, I usually secretly observe all Q Sihan's living habits and preferences. I never thought it would come in handy one day...

by looking at the
back view.

carefully.

Is there
anything I

help you?

When I got closer, I saw that she was really quite petite.

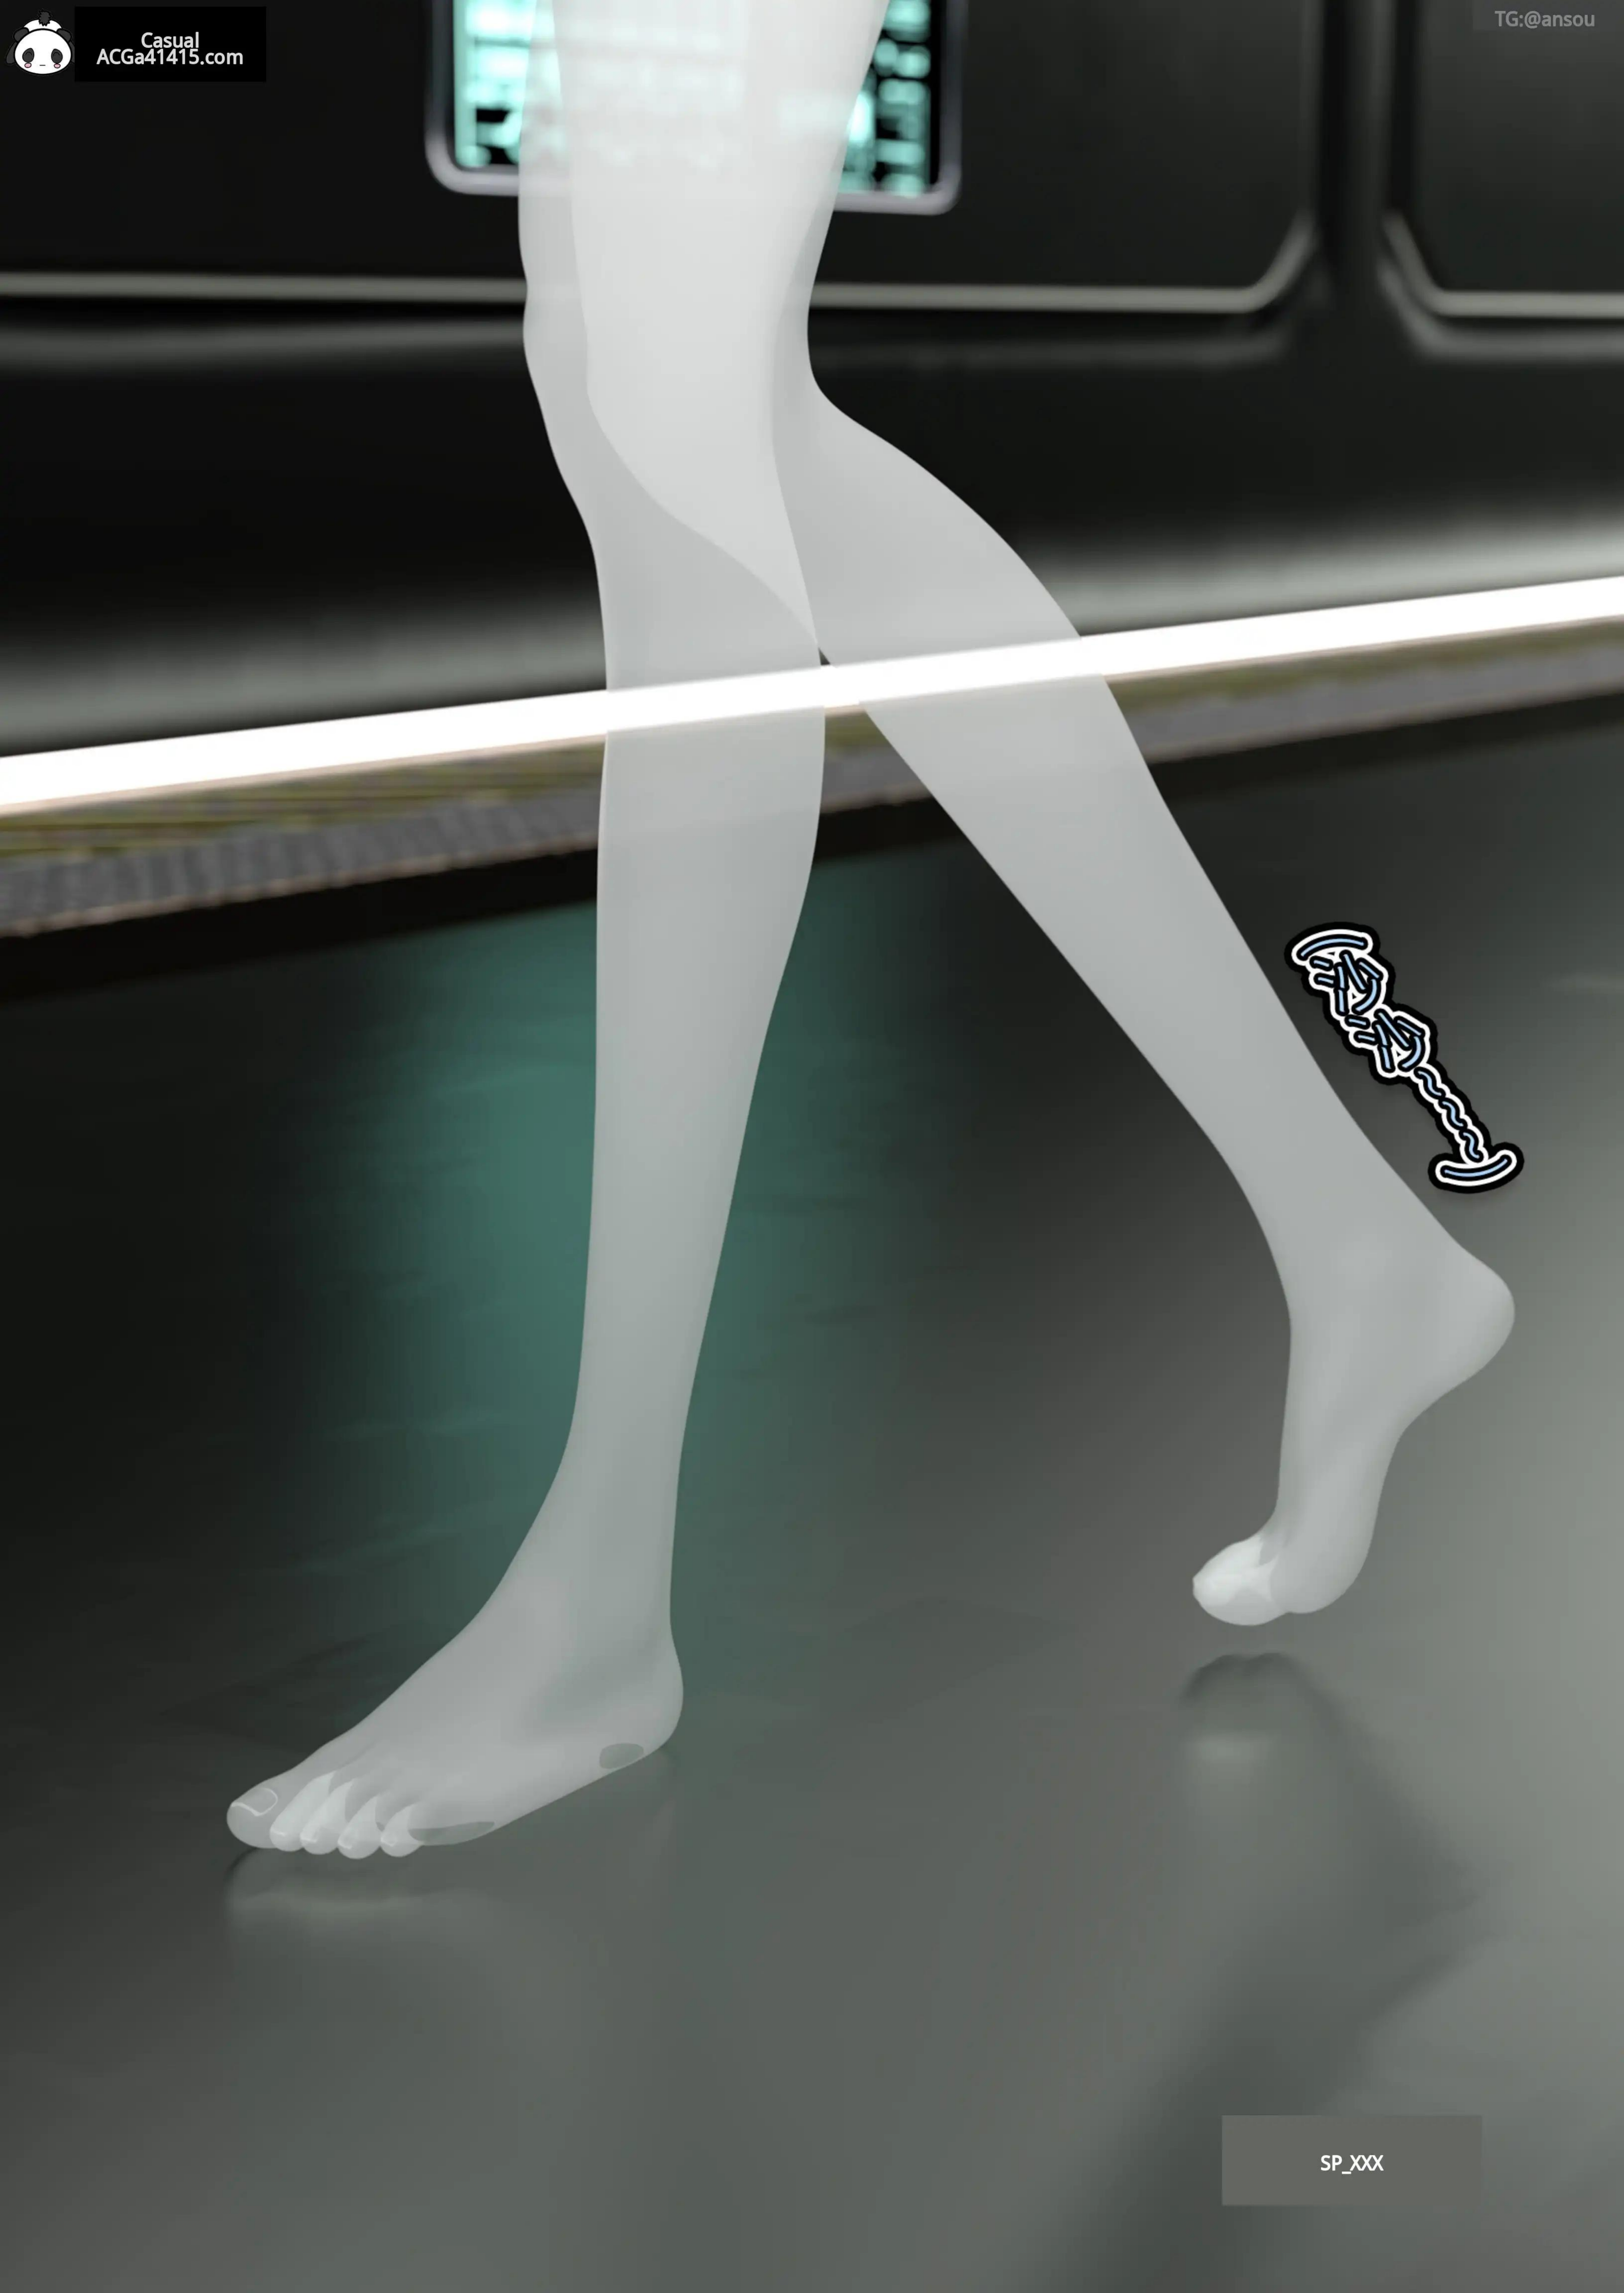

Actually, I'm on my way...

SP_XXX

I'm sorry that work time has delayed you! I want to go to the Quantum Simulation Center to get the information. I still have to go to the Changsheng Nano Research Laboratory to deliver materials.

Dansou turns out to be like this. This relationship doesn't matter. 0000 I just came here? I also often get lost. Just going to work every day consumes a lot of energy in finding my way.

I should call you Senior Sihan~~ But I might be more pregnant. My friends all jokingly call me the Lost Immortal.
