*Leonard was a slightly more experienced pilot than Monica, and technically it was he who was supposed to be in charge of maneuvering the ship for landing ...*

... he would have done it if he had been at a normal height; but his short arms and small fingers were not entirely adequate, so he limited himself to supervising and directing every action of the girl on whose thighs he was sitting, like a toddler.

*Few minutes later, the ship entered Neweder's bluish atmosphere. It was not a bumpy descent, no hurricane Force winds, and no thunderstorms. On the contrary, the huge shuttle progressively decreased its altitude until it landed gently on the planet's surface.*

We did it!!!!

Unbelievable...

*Upon landing, they both looked at each other and smiled.  
They had succeeded.*

*One of the riskiest parts of the mission had been accomplished without the slightest mishap, and this encouraged the pair of pilots to think that, perhaps, their survival in this new world would not be so difficult.*

*And now ... should we  
wake up the others?*

*Well, according  
to the mission  
program is what we  
are supposed to do  
after landing. We  
should wake them  
all up ...*

*I suppose the best  
thing to do is that I'll be  
waking up the girls...  
And you the boys.*

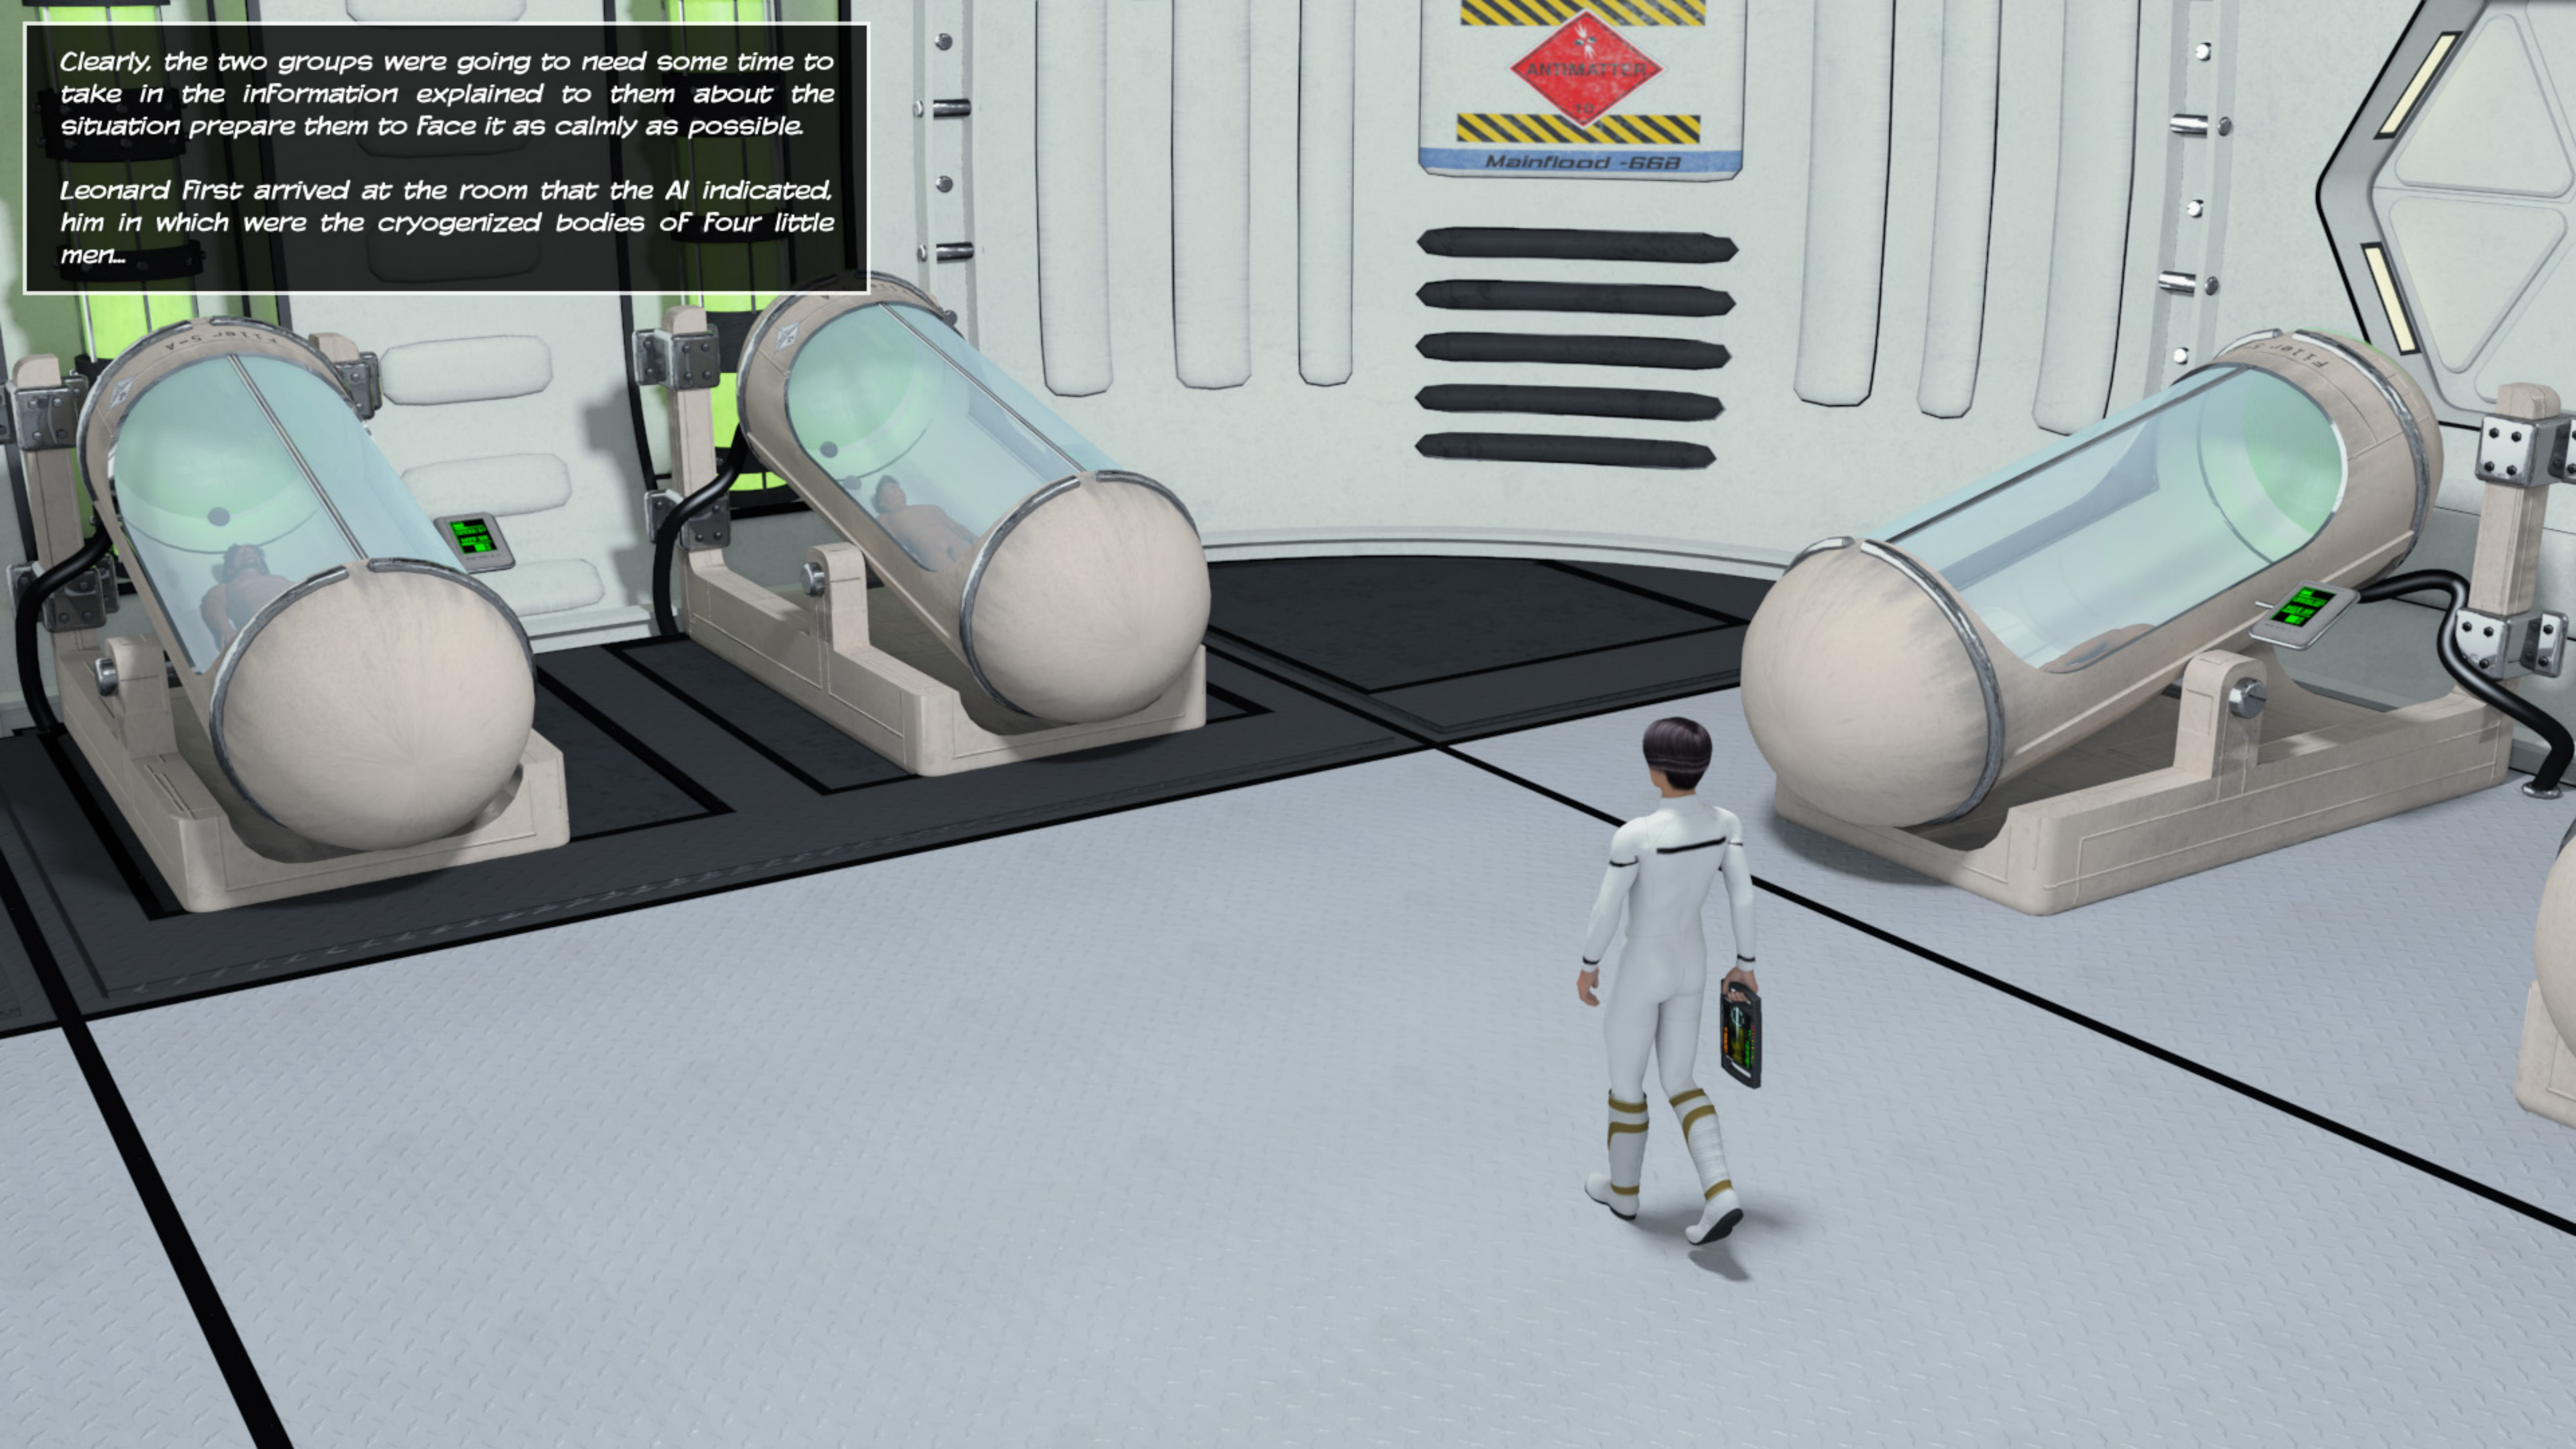

*Yeah, that sounds sensible: the men do not know what happened to their bodies, and I will have to warn them, while you do the same with the women.*

Clearly, the two groups were going to need some time to take in the information explained to them about the situation prepare them to face it as calmly as possible.

Leonard first arrived at the room that the AI indicated, him in which were the cryogenized bodies of Four little men...

*As he approached each cryogenesis chamber, he read the information about each of his new partners; like Monica, she paid special attention to her first name, as it was the one she was going to use to address them...*

The first to be awakened, Barry Lammer: an exobiologist expert in New Eden forms of life. He seemed like an introverted and shy guy. In his file, it could be read that his height when entering the ship was 1.63 meters: he was quite short.

■ NAME: BARRY LAMMER  
■ AGE: 35 YEARS  
■ NATIONALITY: GERMAN  
■ OCCUPATION: EXOBIOLOGIST

CLANCK

CLANCK

The neighboring capsule was the one of HÉCTOR CAMPOS:  
A mechanic capable of repairing any damage to the ship  
with his own hands. He seemed like a very happy guy,  
although Leonard wondered if he would remain so when he  
Found out what they had done to them.

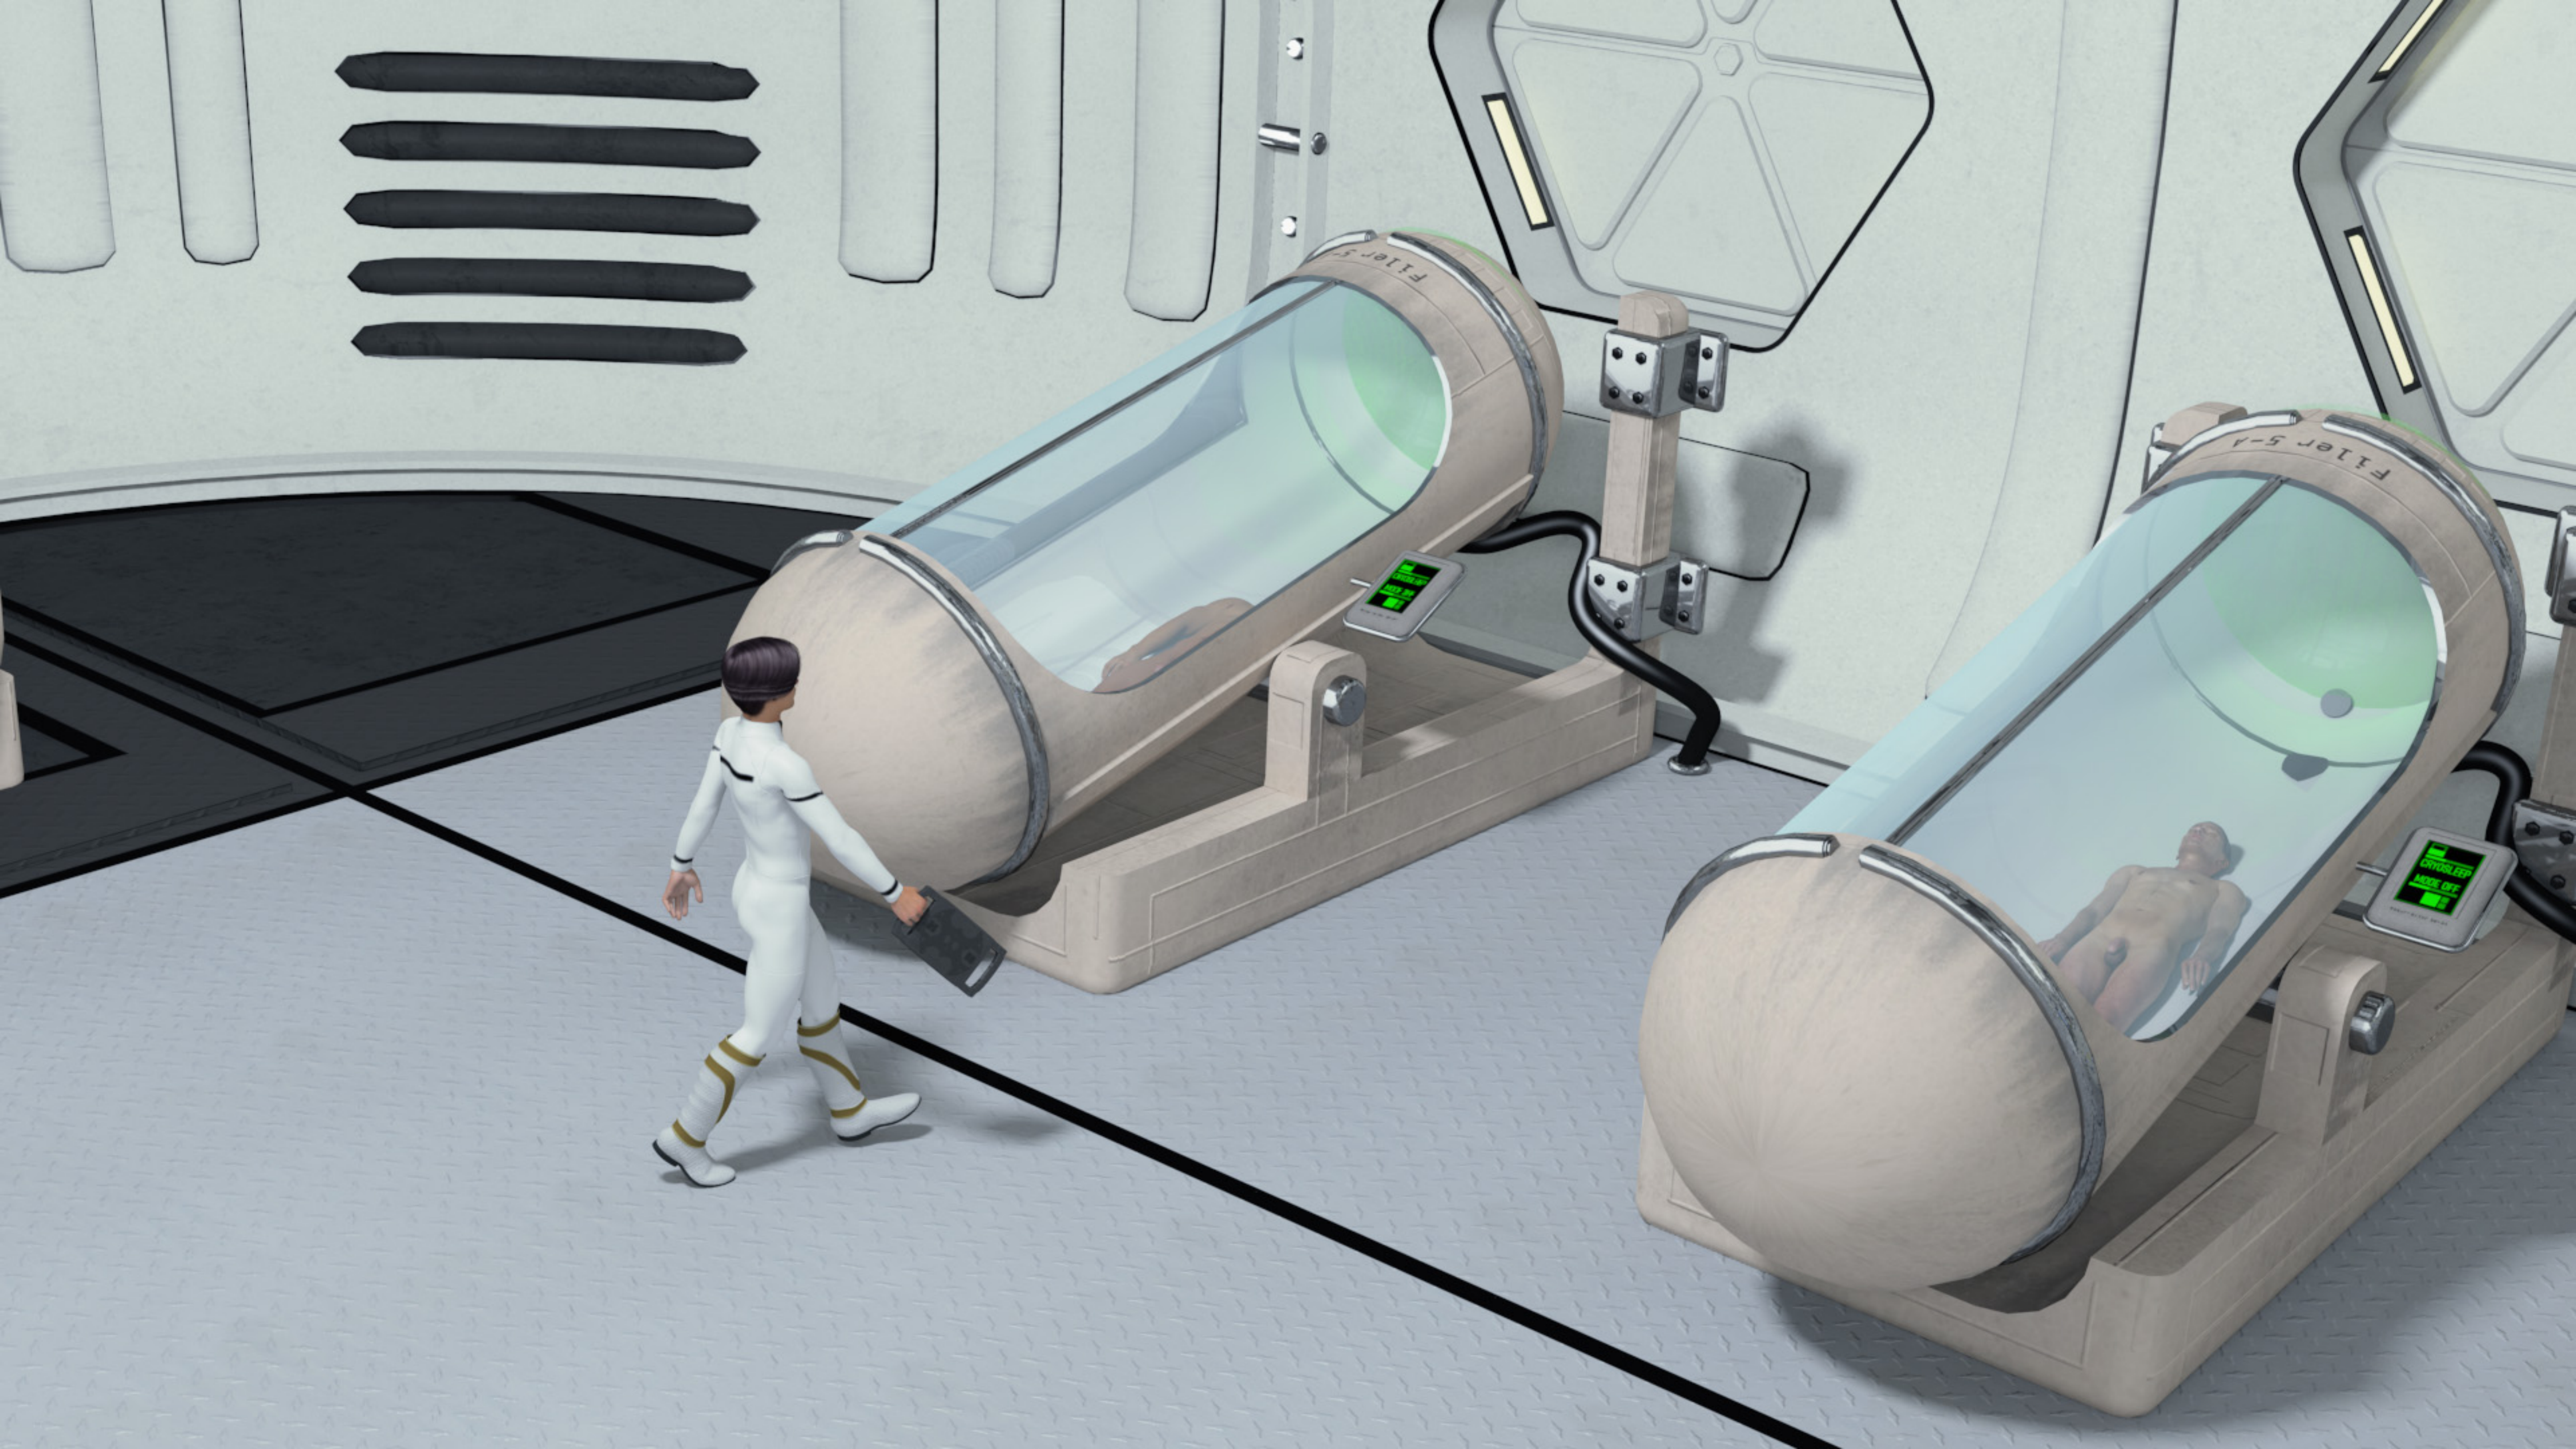

■ NAME: HECTOR CAMPOS  
■ AGE: 30 YEARS  
■ NATIONALITY: ARGENTINE  
■ OCCUPATION: REPAIRMAN  
■

TABLET PC COMMUNICATOR 413-3

Leonard went to the capsules located at the other end of the room, in one a mature-looking man, COLONEL RAY BELLICK, slept; clearly members of the military Forces had to be present too.

■ NAME: RAY BELLICK

■ AGE: 49 YEARS

■ NATIONALITY: AMERICAN

■ OCCUPATION: ARMY COLONEL

TABLET PC COMMUNICATOR 413-3

And in the last capsule, a man older than the rest, JOHN COOPER. Leonard was initially surprised that someone that age had been chosen for the mission, although his resume clearly explained why: he was a professor of theoretical physics and had so many degrees that Leonard did not bother to count them.

■ NAME: JOHN COOPER

■ AGE: 63 YEARS

■ NATIONALITY: ENGLISH

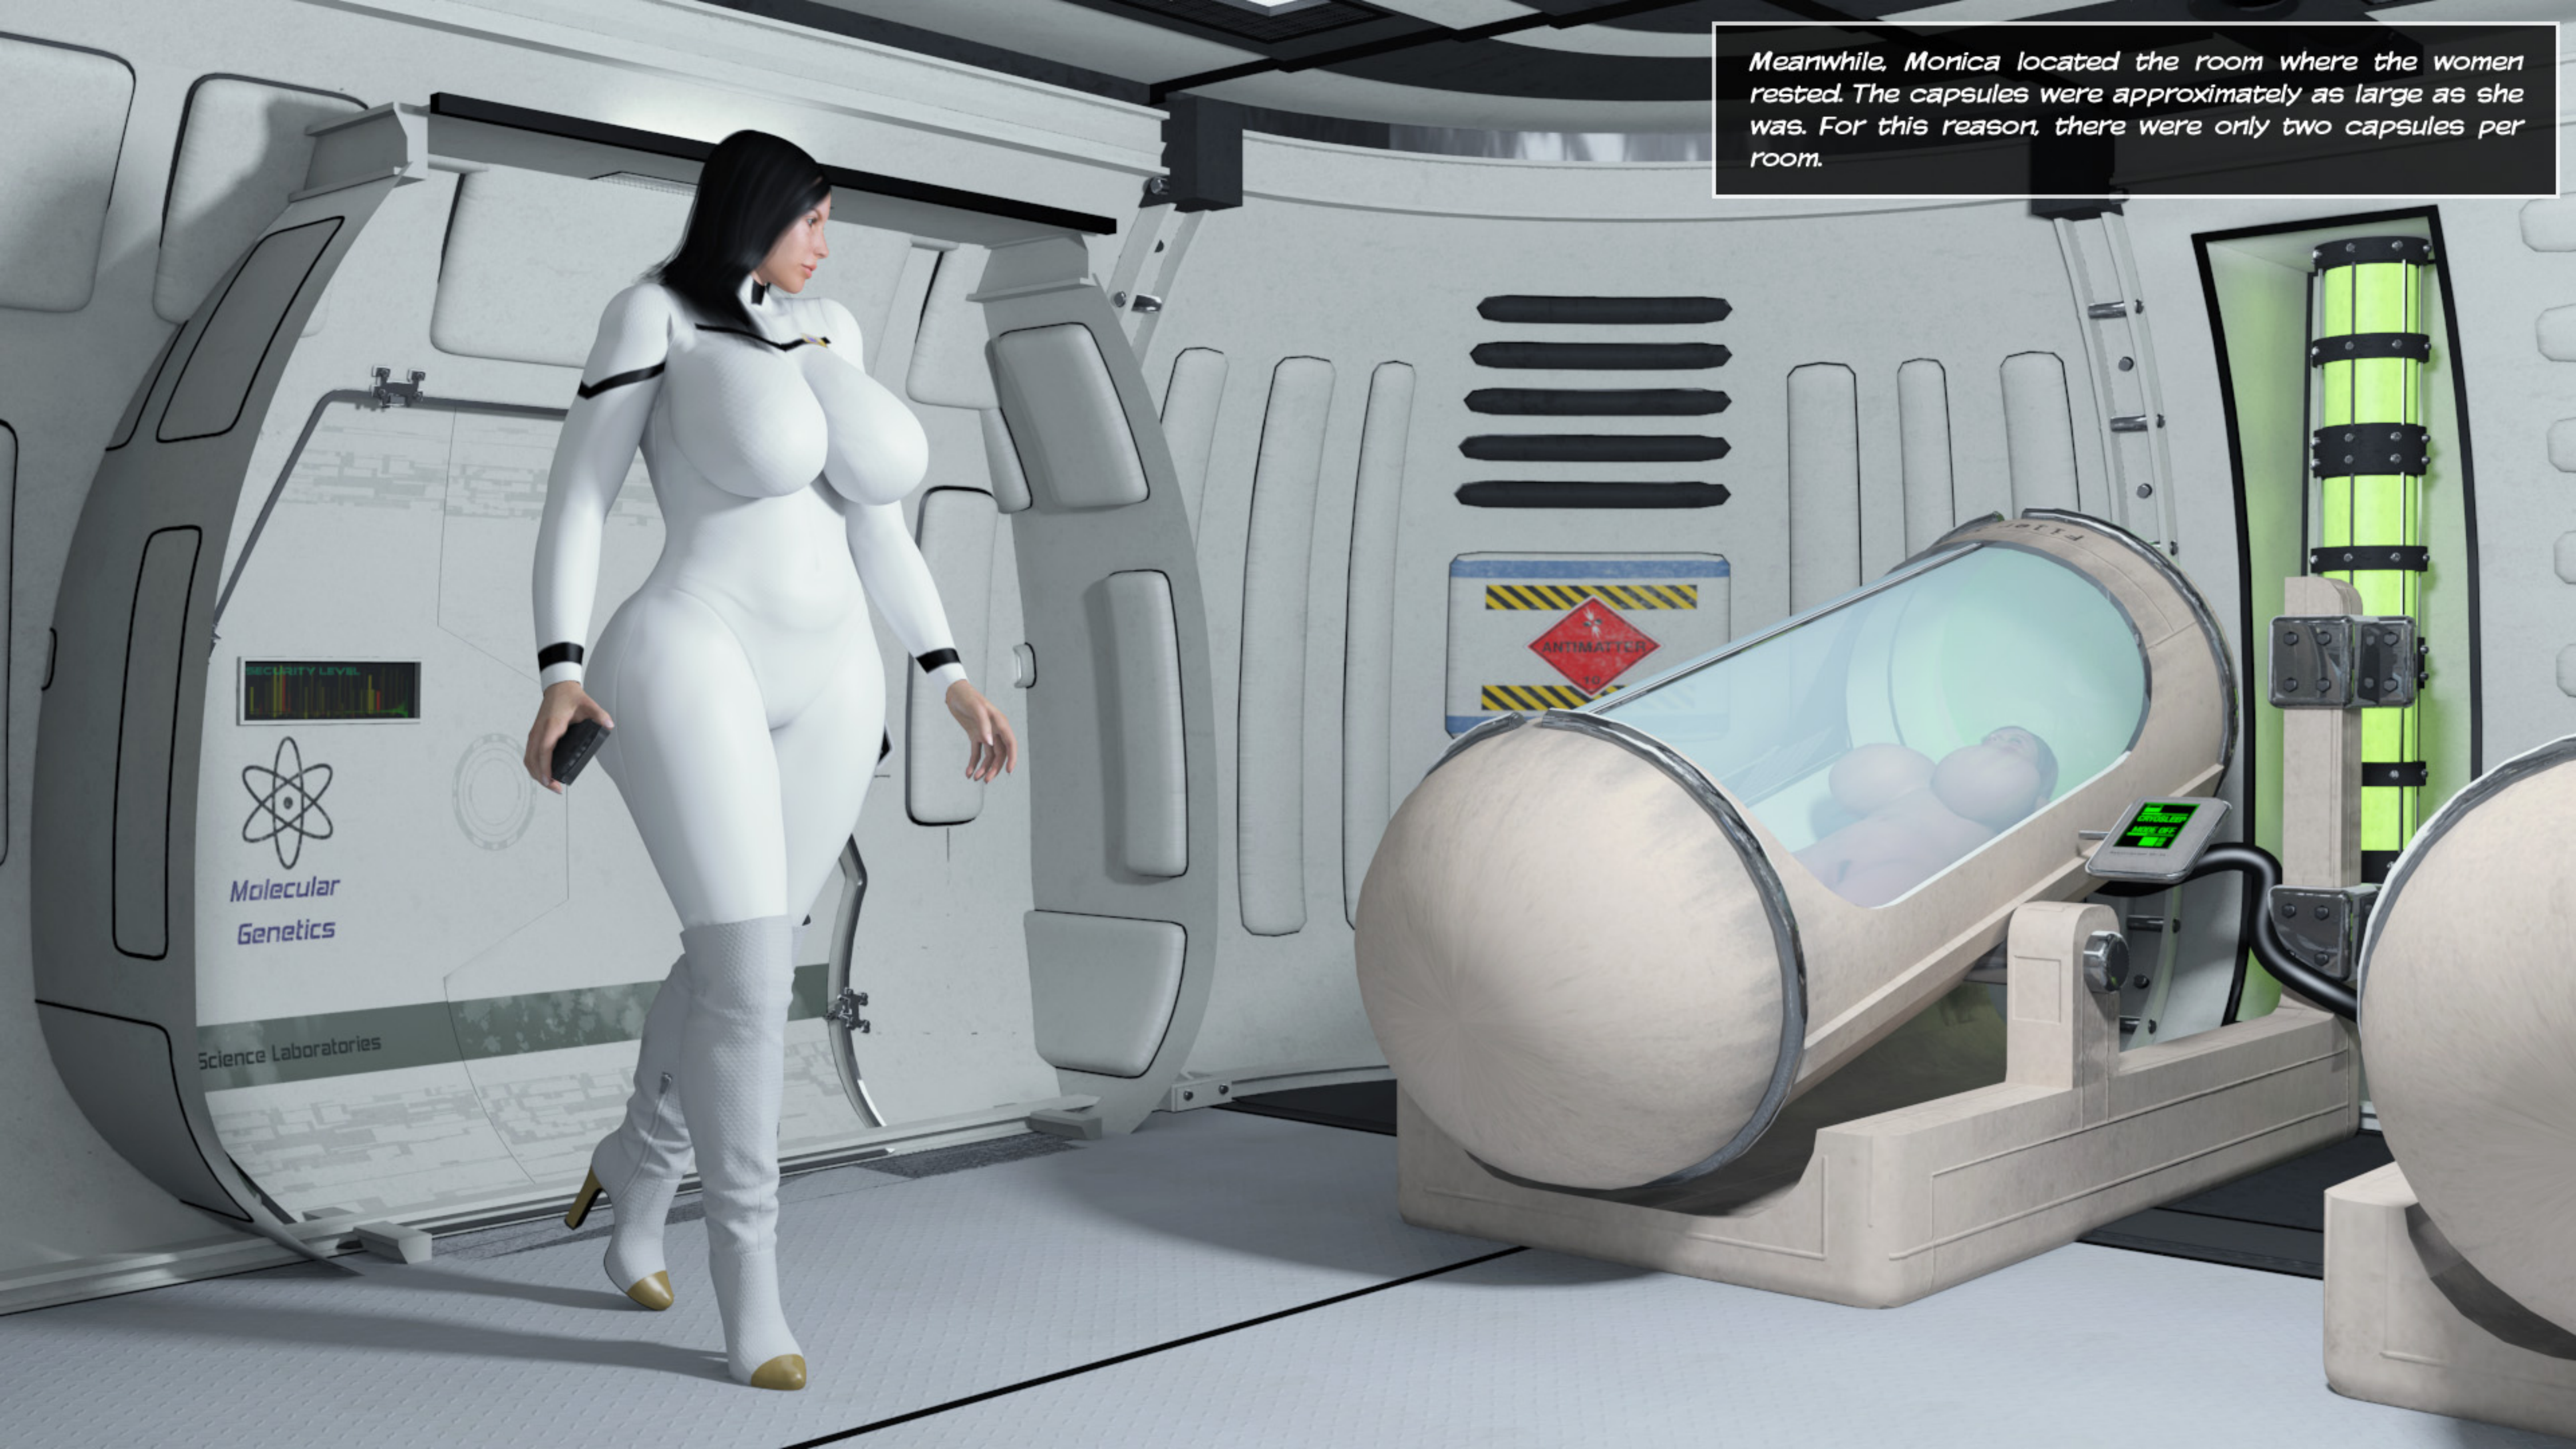

■ OCCUPATION: ENGINEER PHYSICIST

TABLET PC COMMUNICATOR 413-3

Meanwhile, Monica located the room where the women rested. The capsules were approximately as large as she was. For this reason, there were only two capsules per room.

*She read the information corresponding to each one, in order to be able to give them a decent welcome and to know a little about those who were going to be her companions For a long time; she memorized the first names of each of them and the occupation they were going to carry out in the mission ...*

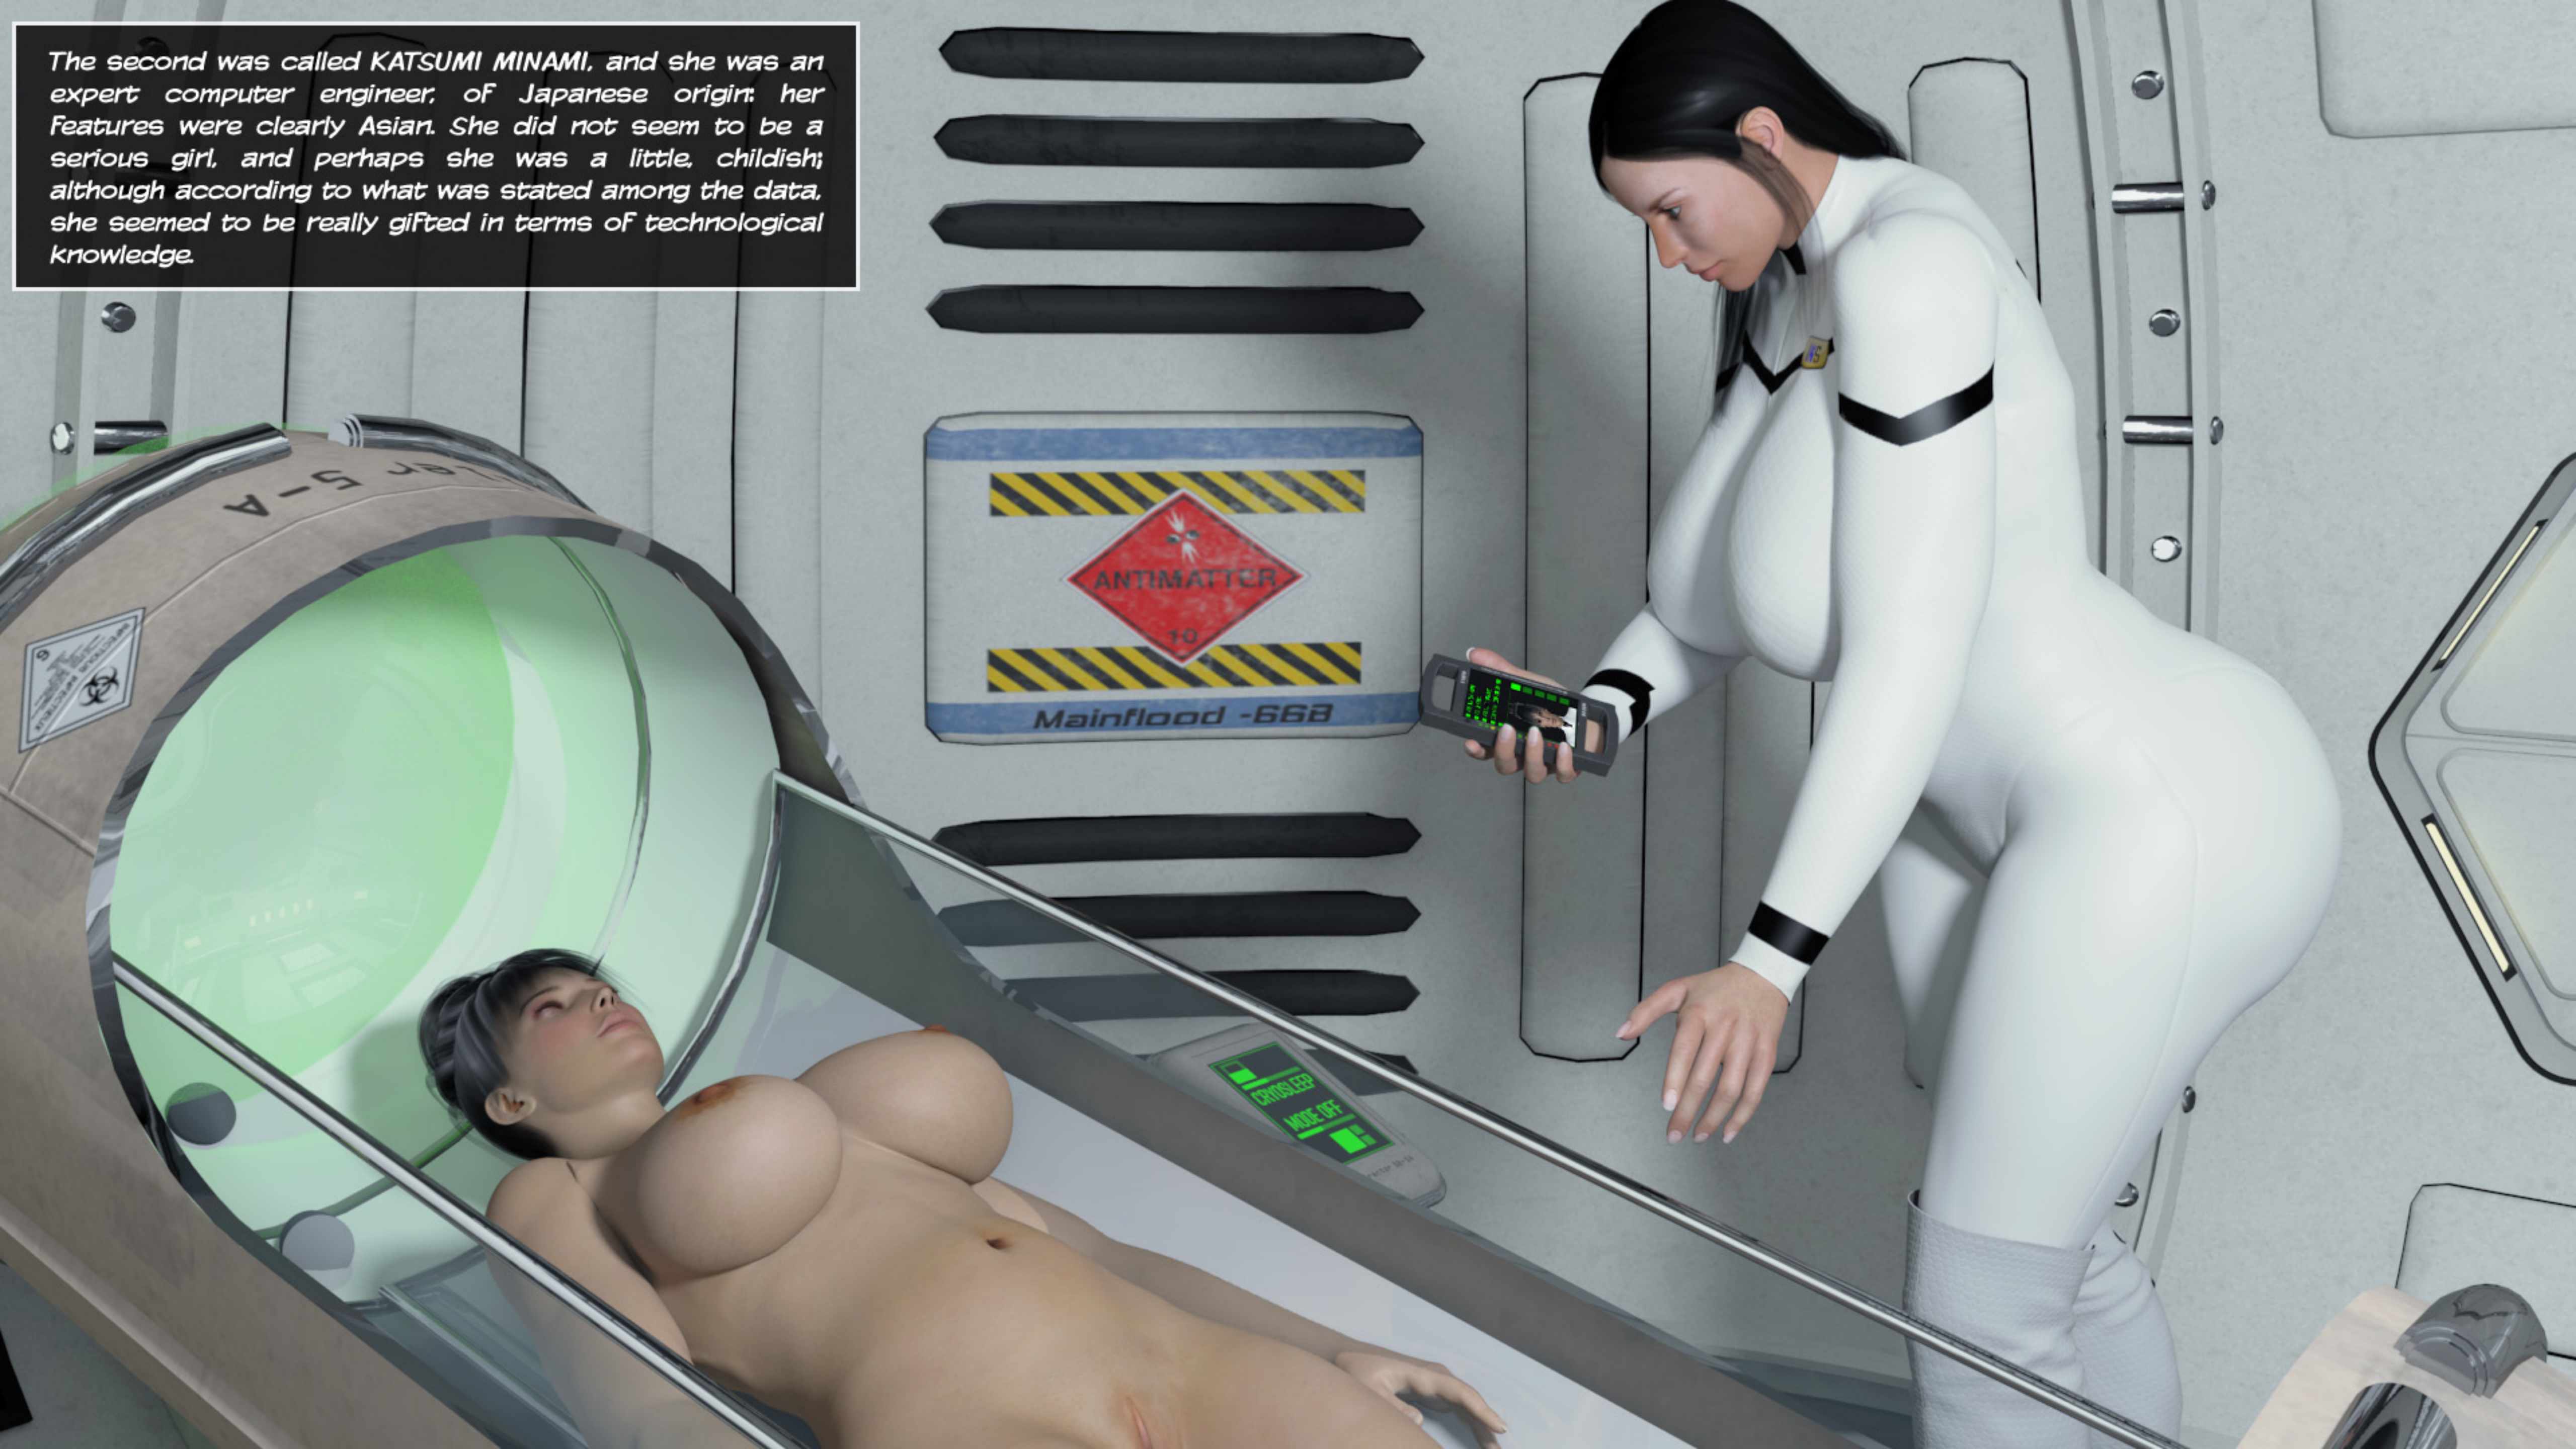

The first woman was ELENA SANCHEZ, an exobiologist who had specialized in collecting from Earth all the information sent by robotic explorers regarding Neweder's life forms. Without a doubt, she would be essential to survive in this new world, since she was more familiar than the rest with anything they could find.

The second was called KATSUMI MINAMI, and she was an expert computer engineer, of Japanese origin. her features were clearly Asian. She did not seem to be a serious girl, and perhaps she was a little, childish; although according to what was stated among the data, she seemed to be really gifted in terms of technological knowledge.

■ NAME: KATZUMI MINAMI  
■ AGE: 26 YEARS  
■ NATIONALITY: JAPANESE  
■ OCCUPATION: COMPUTER ENGINEER

BOING

Ouch, such discomfort ... As in laboratory tests, the change of state in our bodies is manifested in all vital organs ...

*Girls, we have reached  
Neweden. But before  
I welcome you, let me  
go to the other room  
to wake up the others...*

These are our new companions.

Wooow! They are so big!

CLANCK

CLANCK

This is SONIA WILSON ...

Monica was concerned about Sonia Wilson's description. She was an army woman, with experience in combat and survival in hostile environments. If they considered it so essential that a female soldier should come, the organizers of the project really foresaw a clear danger, but what was the danger? Perhaps Sonia was the person chosen to impose order in case of internal conflicts.

Monica Found it Funny to see how she had almost guessed the personality of each of the girls, despite the fact that all of them were still asleep and she did not know them yet; she had a sixth sense For these things.

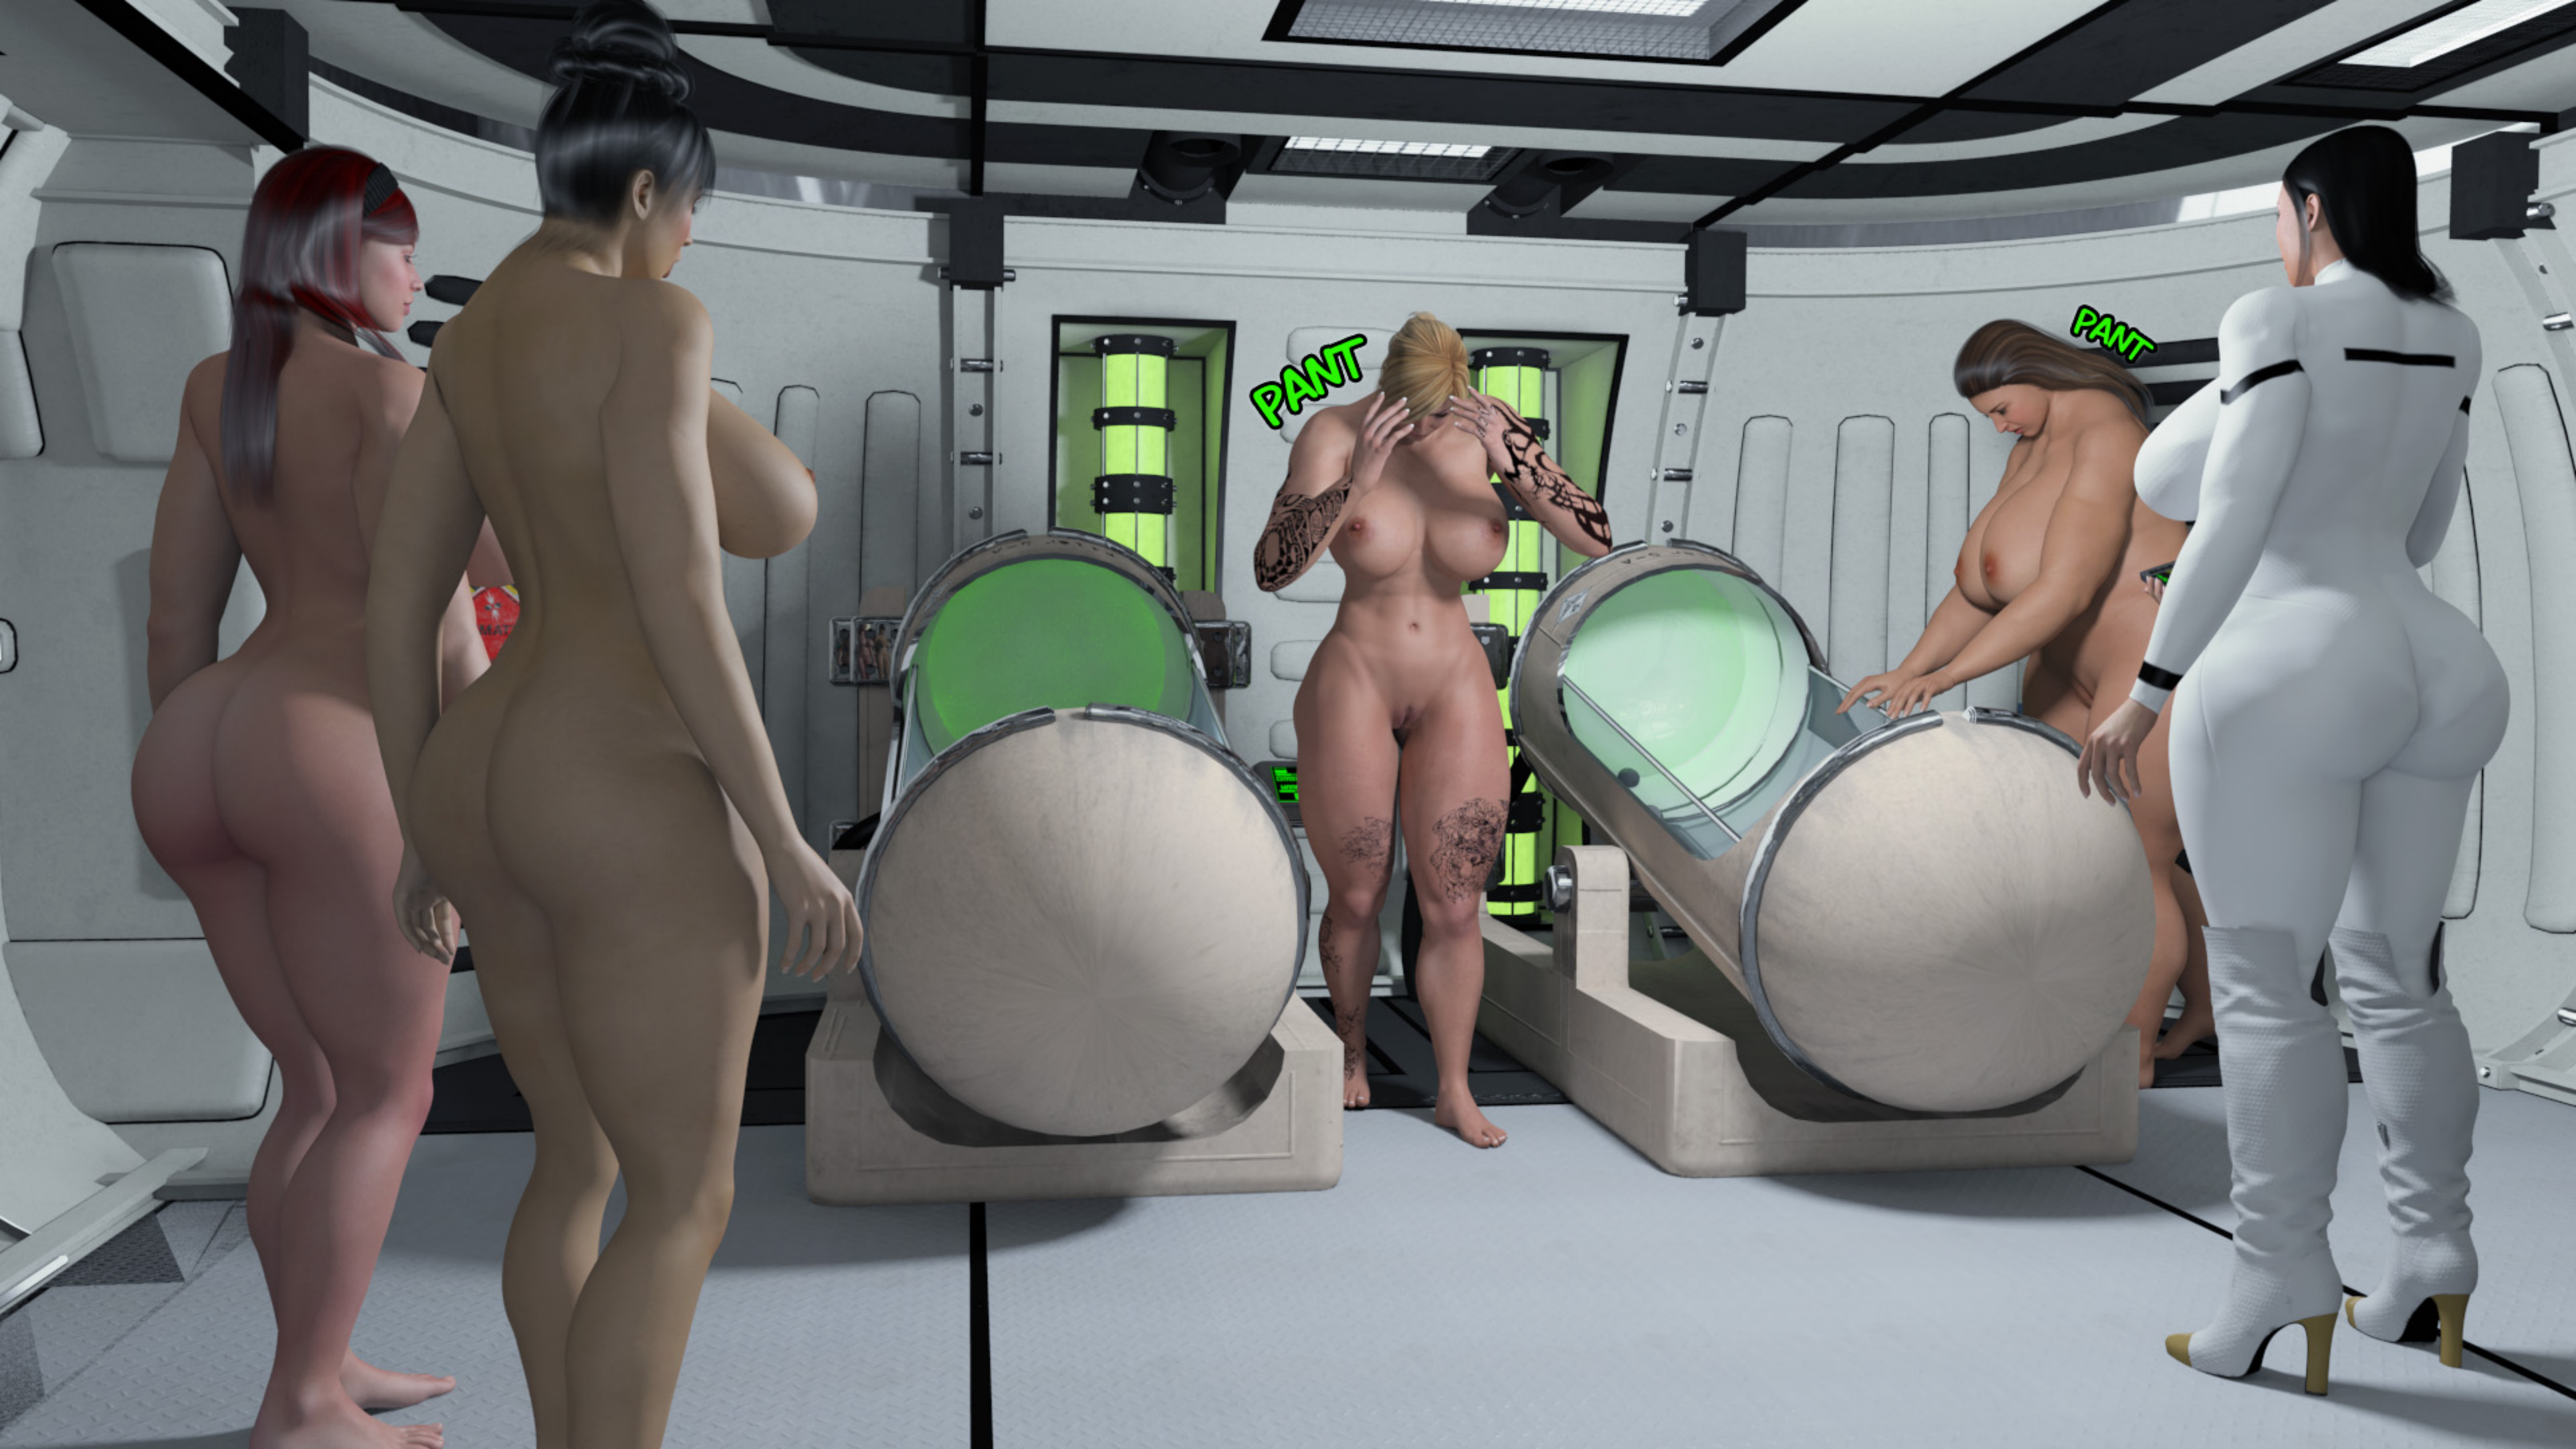

The next woman, named MARIE FONTAINE, was a medical doctor. Just like Katsumi seemed to her to be a somewhat crazy and fun girl, while Sonia had seemed colder and more serious, Maria seemed to be an extremely calm and pleasant woman.

Ouch, what a  
headache ...

PANT

PANT

PANT

What the hell! I just  
woke up and I feel my  
body hard as a rock ...

PANT

PANT

PANT

Wooah! Incredible...

*Well, now that you are  
all listening, Welcome to  
Neweden, girls. I hope  
you have slept well  
these ten years ...*

*I'm still sleepy!  
I think I could sleep  
ten more years!*

*I think that none of us  
is going to be able to  
afford that luxury...*

*Hahaha!*

*Sonia was the first to move, her expression seemed as serious as in the photographs. she scanned the entire room and then knelt down looking for something...*

What is this?  
My weapon looks like  
a toy, or my hands  
are huge!

Subject 5 Main - Frequency

What happens here? Why are the cryo-chambers and our equipment smaller than when we boarded?

Well, this is something I  
wanted to tell you...  
It is because you are  
bigger now ...

A... weapon!

Are we bigger?  
Why?!

*It's part of the project,  
don't worry. Now we are  
going to get dressed and  
then we can watch a video  
by Dr. Arroway which will  
clarify all your doubts.  
I just must warn you that  
the Five men traveling with  
us are... smaller now.*

*Wait, wait...  
How small?*

*Very... very...  
small... Their  
height reaches  
our knees...*

*Unbelievable. Why are  
they so small? That  
makes no sense.*

A 3D rendered image of a woman with long, dark brown hair, looking slightly to her right with a concerned expression. She is unclothed, and her breasts are disproportionately large. She is in a futuristic, metallic environment with grey walls and panels. Her right hand is raised to her chin. A speech bubble is positioned to her left.

*Poor things ... Was  
there a problem?  
Are they ok?*

*Girls... I have already told you that you will understand everything while watching the video. Now chose your clothes on the holographic printer and we'll meet the men to watch the video all together.*

*Girls please, when you see them avoid jokes about their size, this must be difficult For them.*

Meanwhile, the Four men had already Fully awakened, and Leonard welcomed them in an atmosphere Full of tension and awkwardness...

Come on, spit it  
out! What happened?  
Has something gone  
wrong? Why the hell  
is everything so  
**big?!**

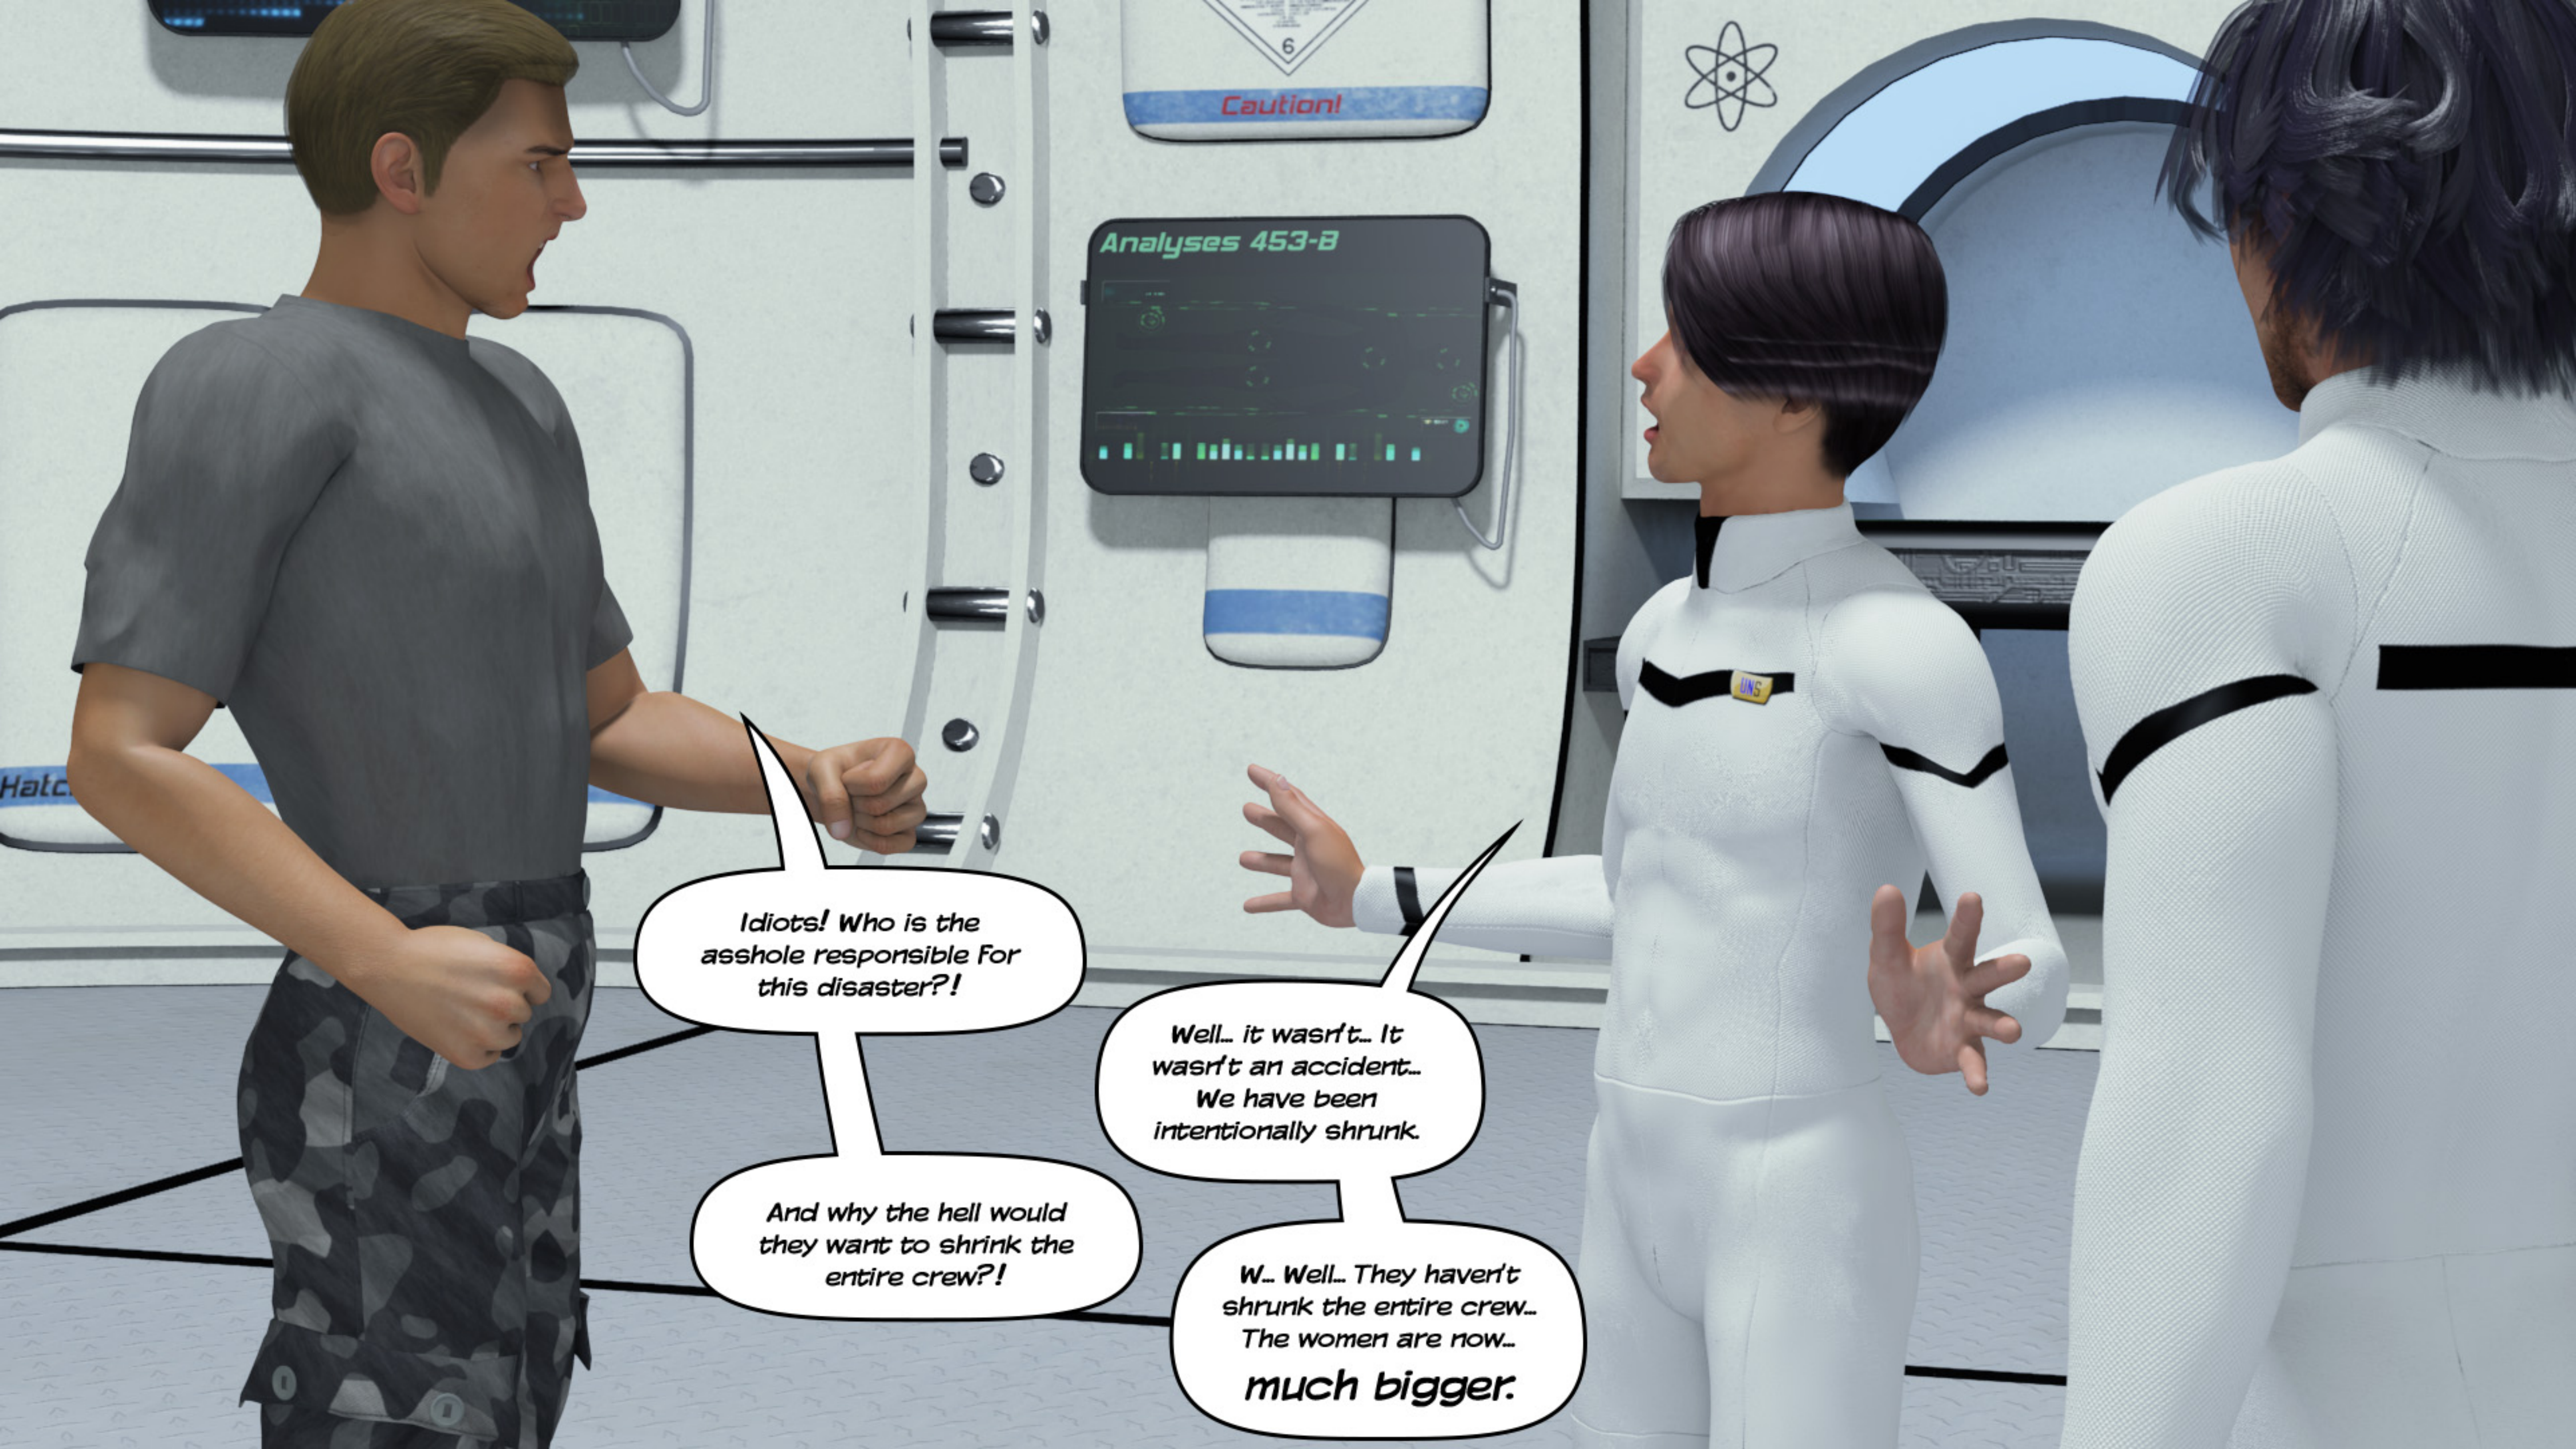

Sirs.... The  
reality is that  
we have  
shrunk...

What? Why? Fuck!  
Nobody had warned  
me about this!

Molecular  
Genetics

*Idiots! Who is the asshole responsible for this disaster?!*

*Well... it wasn't... It wasn't an accident... We have been intentionally shrunk.*

*And why the hell would they want to shrink the entire crew?!*

*W... Well... They haven't shrunk the entire crew... The women are now... much bigger.*

*What?!! Holy cow...  
How bigger?!*

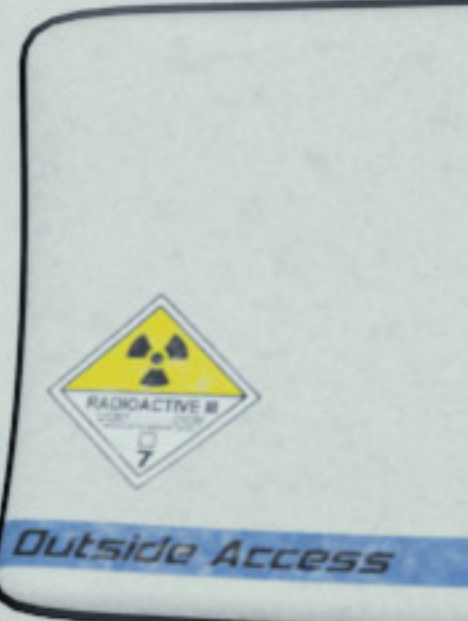

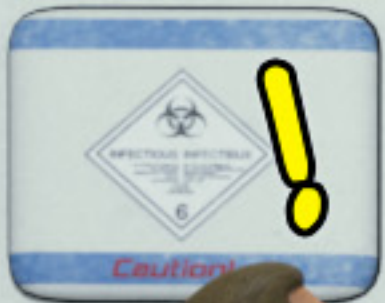

More than three times  
our height... Look, I can  
only tell you that when we  
see Dr. Arroway's video you  
will find out why she  
decided to shrink us...

Was it that  
Arrowway bitch?!

I'm afraid that the one who  
"screwed" us, Dr. Arrowway, is  
light years away from us, and  
that we can't do anything  
against her...

*It seems that Arrowway has Finally Fulfilled her dream, after so many conversations with her... It's almost Funny that she's done it... She told me several times that a world of women would be much better than the world of men we lived in... Although clearly I never thought that someday she would put her theories into practice.*

A world of women?!  
That bitch is not going  
to screw me like that.  
This isn't over!

Well, well... We'll have time  
to talk about it. For the  
moment we'd better go  
and meet the girls and  
watch the video.

Warning!

Hatch 33-B

Ok... Ok man... I... I'm  
only warning you because  
I woke up before you ...  
But do not get me, Follow  
me and we will meet the  
women...

*They walked down the long hallway that led to the monitor room, the door opened before them and... there they were.*

*Well gentlemen,  
these are our... new  
companions...*

*F...Fuck!!*

*Shit ...*

Unbelievable..

The meeting was shocking for everyone, except for Leonard and Monica, obviously. Silence invaded the room as the two groups looked at each other, neither the men nor the women believing in what their eyes saw. The women were standing, at one end of the room and the men at the other, from a prudent distance, staring at each other in amazement without conceiving how superior these ladies were in height. They were simply colossal.

Hi... guys...

Awww! They... they  
are so tiny!

Wooow!

*Monica was the one who dared break the ice, walking up to the group of the five men.*

*Well, as you know I am  
Monica, the co-pilot of  
this mission...*

*And these are Marie, Katsumi, Elena and Sonia. I know that the situation is incredibly...weird...but we are going to try and cope with it and...*

*I won't cope with anything!  
I promise that things won't  
stay the way they are, kid...  
I don't know how that  
Arroway bitch screwed us,  
but I'll go back to my  
normal size!*

Well...but... while we  
look For a solution, we  
will treat you with the  
respect you are entitled  
to, without considering  
our size difference...

TUMP

SLEEPINGROOM

Awwwwww! Such  
Little cuties!

Woah!

Oh!

Hey! What do you  
think you are doing?  
Nooooo! Let go of me!

Hi little one..  
What's your  
name?

P...please!

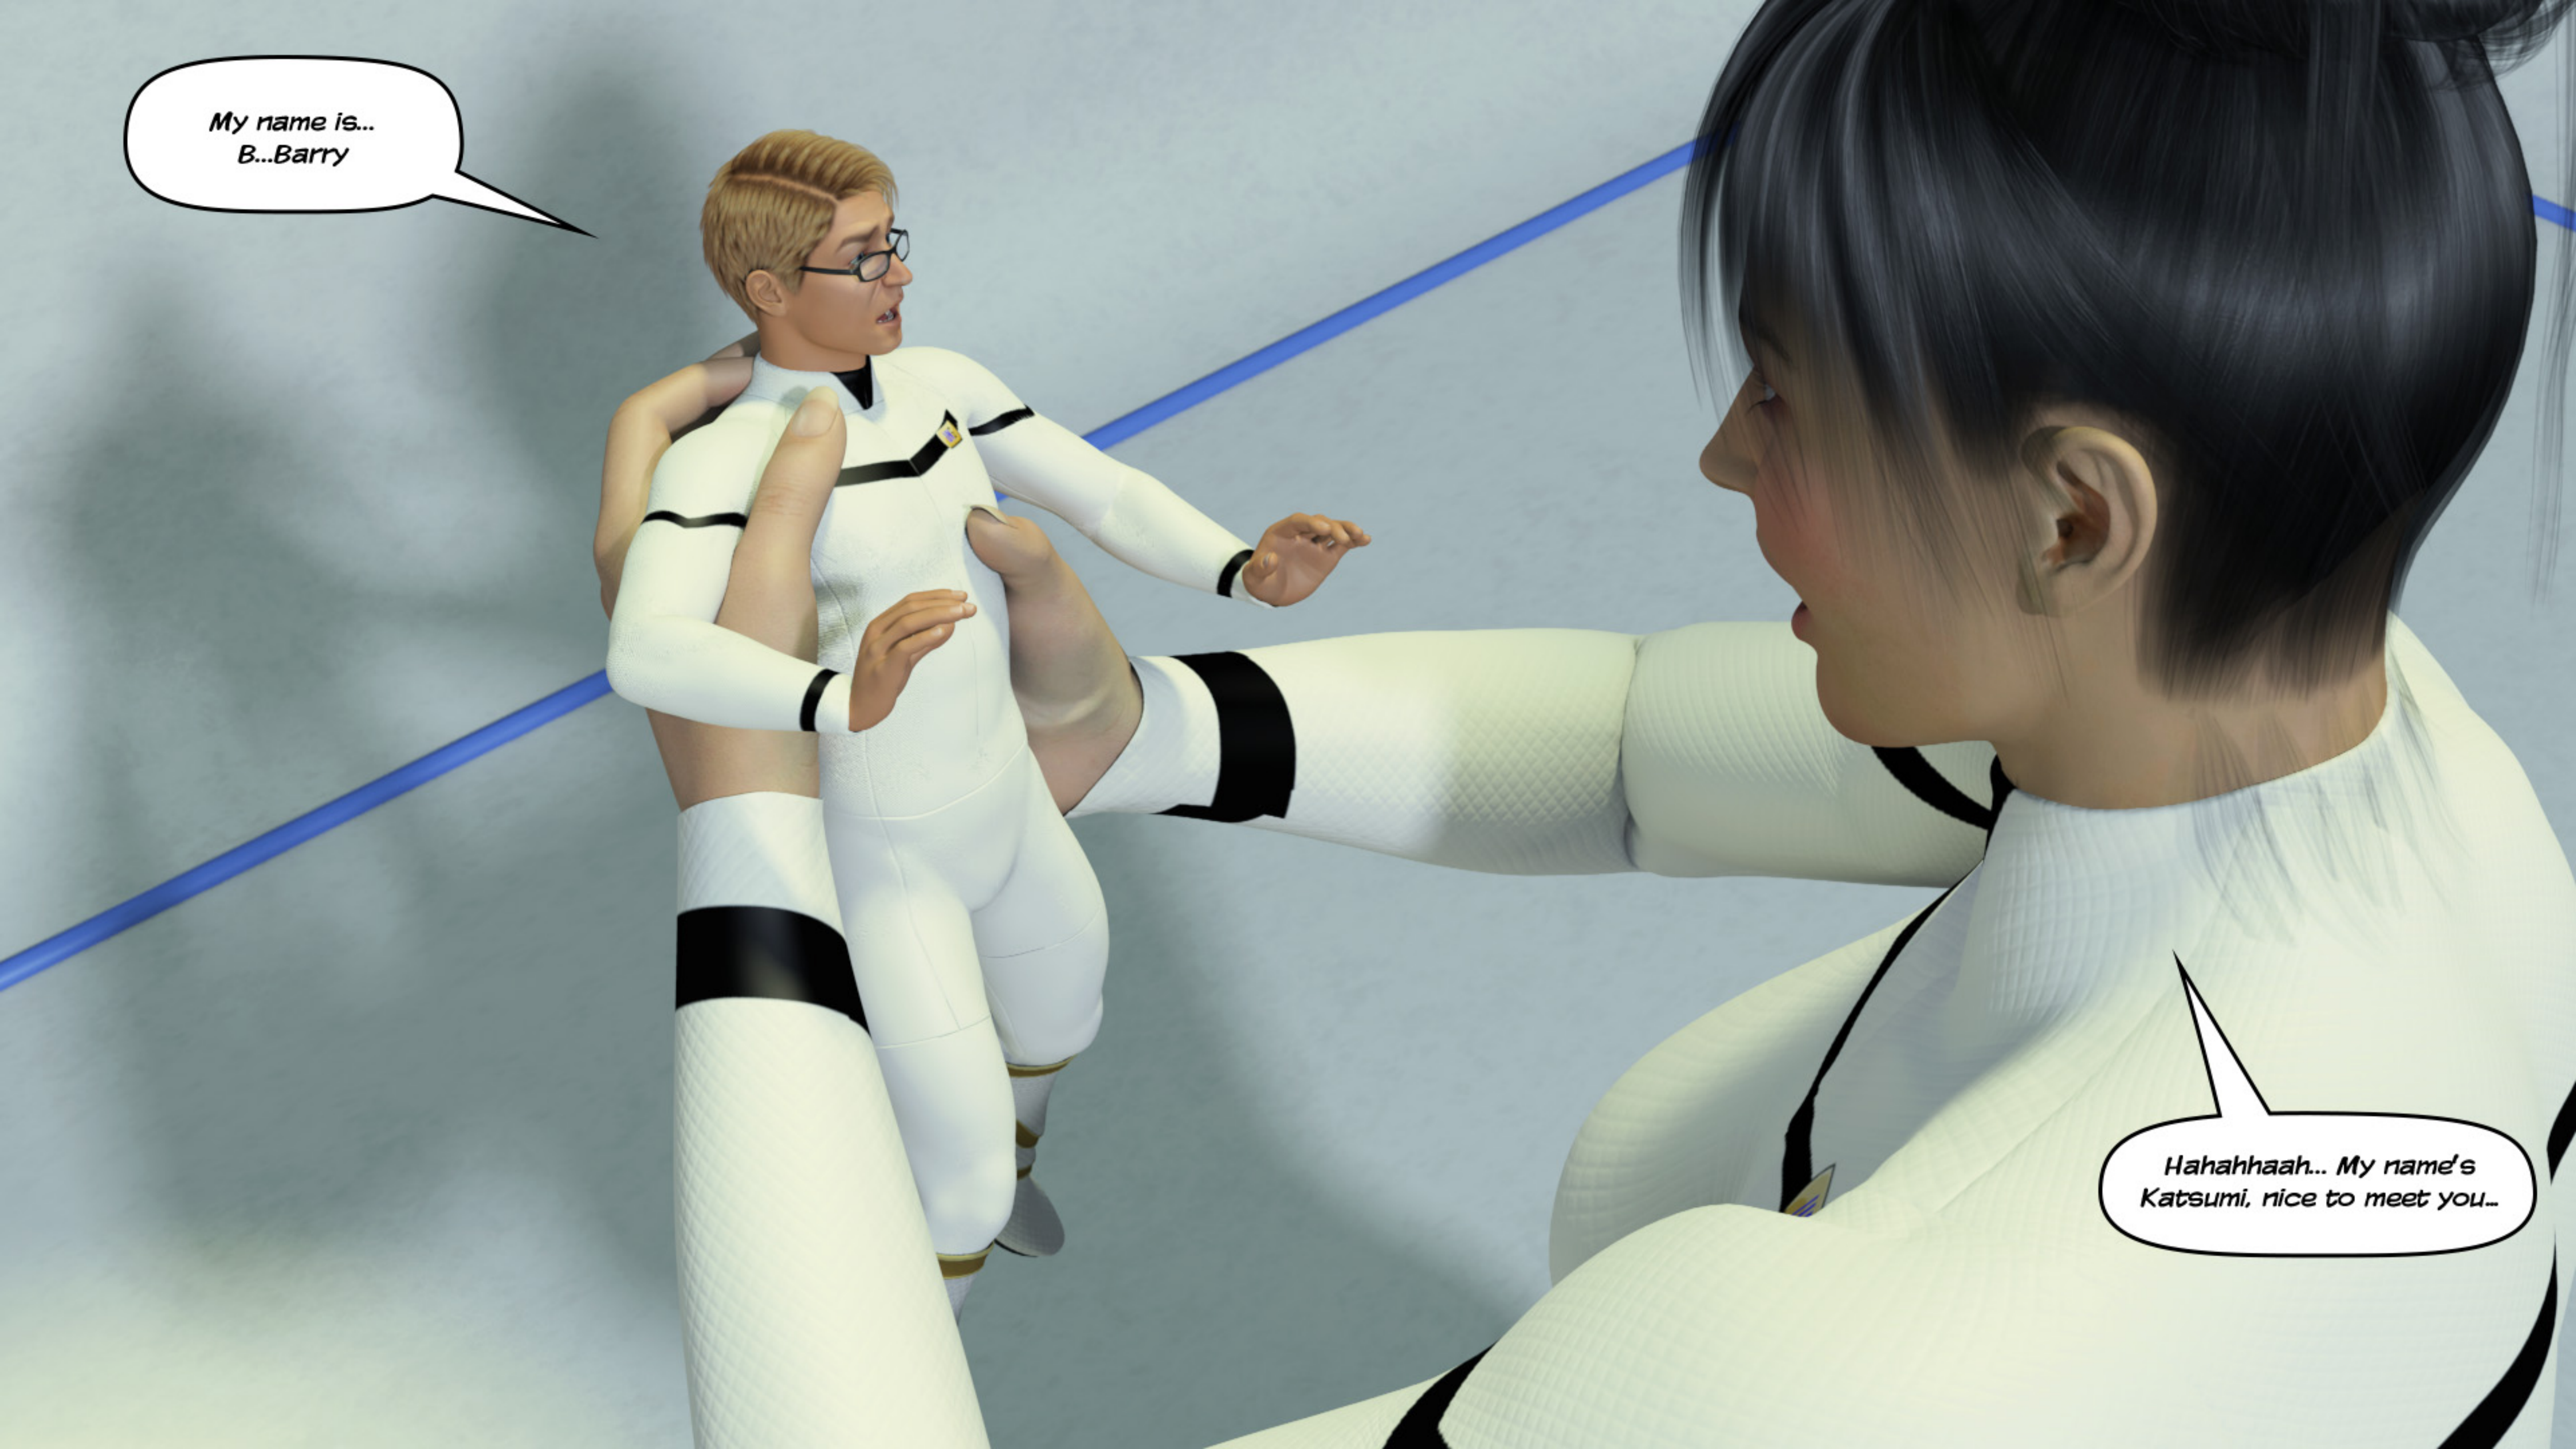

*Come on little one, I'm not a monster...*

*My...my name...*

*My name is...  
B...Barry*

*Hahahhaah... My name's  
Katsumi, nice to meet you...*

Don't be afraid  
little one, I would  
never hurt such a  
pretty little  
thingy!

Oh... T...Thank you!

*Katsumi! Please, put this man on the ground...we are trying to deal with the situation in the most normal way possible.*

*Ops... OF...of course...*

*I'm sorry,  
little one...*

**KISS**

TUCK

Well, now let's have a meeting all together and we'll play Doctor Arroway's video for you. When you have seen it, you will know about this matter as much as Leonard and myself.

Let's go, guys  
I know Monica and  
I trust her...

To be continued...
