

No... I need to breed in order for my species to survive...

MY GOD?! D-Daniel... is that you? What the fuck is happening?

I've been waiting for you step-father. I was hoping we could create offspring together.

That scent... OH GOD... I NEED YOU!

I'm so happy my pheromones lured you in... We can finally become one!

No need to say more baby. I'll fill you up really good!

I'm glad you see it this way.

Fuck, you're draining my balls!
... huh, my body feels numb...

After breaking
you down, you'll
be a perfect basis
for my babies.

...

Wow.
You actually
filled me up
nicely!

Almost fully
absorbed!
Soon my eggs will
form!

I can already feel
the 1st one!
How many will it
be? 6? maybe 7?

I wonder how long it will take before my species dominates this planet...

THE END
