Name: Subject H515

Age: 24

IQ: 139

Height: 155

Weight: 45

Body Type: Skinny

Race: Caucasian

Description:

Capri known as Object H-515 is another "Quick Bunny" on the Doll project. She was convicted of excessive violence and illegal drug dealing. The Pink Bunny Corporation bought her last second before execution. Now we have to decide what kind of research will be conducted on her.

Story info:

Capri Black was sentenced to capital punishment. The "Pink Bunny" corporation bought her for their own purposes. Now, as subject H-515 she shall be used in scientific research on new technologies used in the manufacturing of sex dolls. In exchange, her punishment was reduced to five years of being deprived of human rights.

LOCK 5

Capri Black was sentenced to capital punishment. The "Pink Bunny" corporation bought her for their own purposes. Now, as subject H-515 she shall be used in scientific research on new technologies used in the manufacturing of sex dolls. In exchange, her punishment was reduced to five years of being deprived of human rights.

Drug Doll: Drug doll is always on drugs. Substances are administrated by remote controlled implants and chosen according to the occasion. Powerful hormones, aphrodisiacs and euphoric agents are only a part of them. With only one click on the remote controller user can make her happy, afraid, angry, dumb, excited or whatever he or she wishes. Of course hormones are used to modify her appearance.

Blown Doll: A simple project resulting in the subject being pumped beyond all limits. The subject is fattened with high-caloric gruel which includes hormones. At the same time it's lips, breasts and buttocks are synthetically enlarged. Blown Doll is an ideal solution for brothels and lazy owners, who lack the patience to bind their lover every time they want to rape her. After some time, her proportions become so huge, she cannot resist at all and binds become unnecessary.

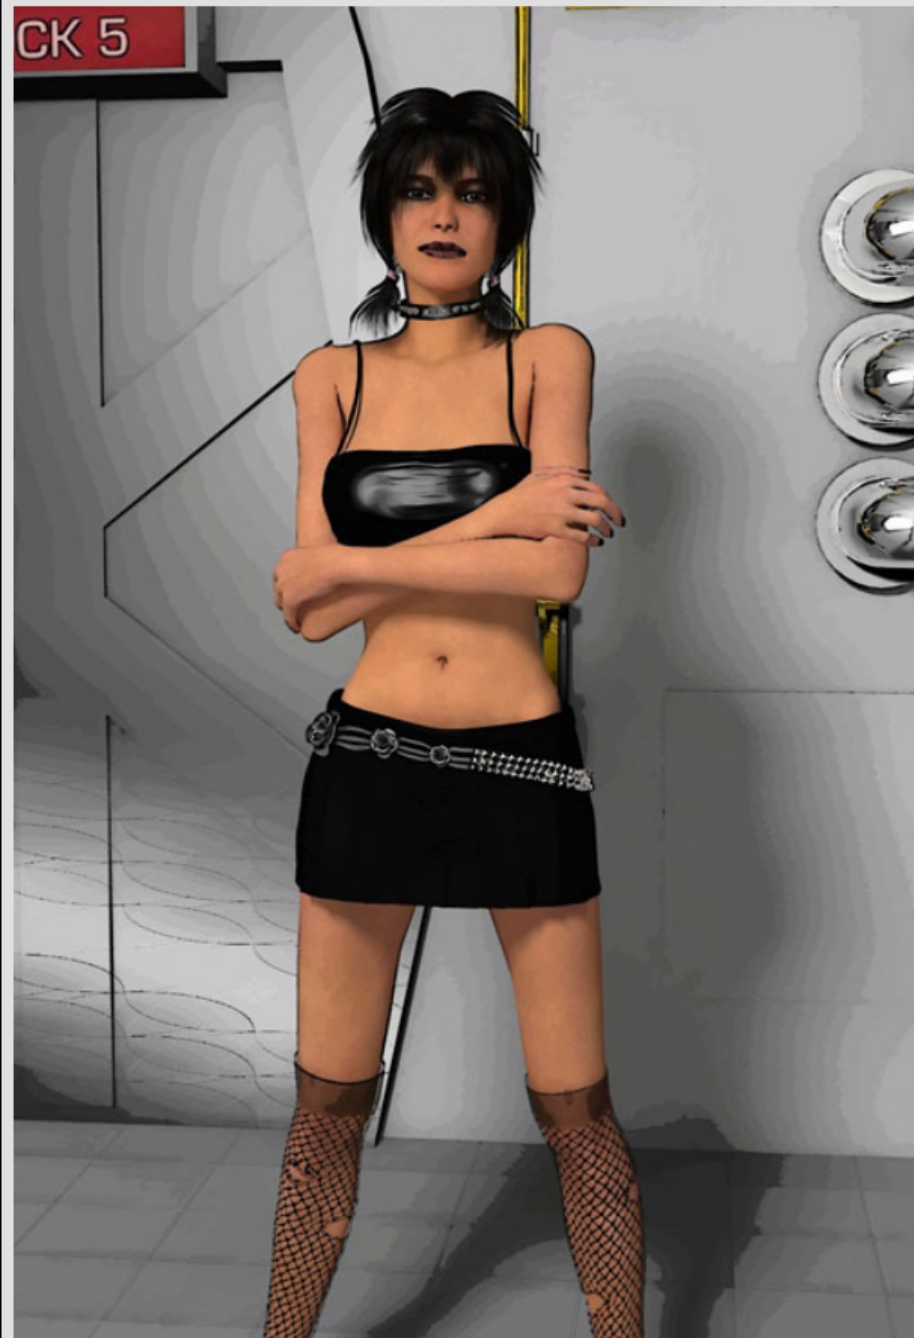

Beast In Heat: The last option is all about drastically increasing appetite for sex and unnatural increase of subject's muscle tissue. The treatment creates a woman with huge strength, who thinks only about sex. She is so horny she will do everything to be sexually satisfied. Designed to be kept in a cage as an exotic wild animal. She is a perfect tool for punishing disobedient slavegirls. Being locked together with the beast is an unforgettable lesson for them.

Piggy: Piggy eats all the time whenever she want it or not. She's becoming fatter and fatter day by day. Strong hormones in her fodder causes her breasts to grow immensely. Her anus and vagina are being constantly stretched and enlarged in order to mach her giant proportions.

Pussy pet: This girl Is addicted to her heavy modified vagina. Her pussy is huge and full, it can accommodate very big toys. There are way more different ways to pleasure her flower then any woman could imagine. Super enhanced pussy dominates pets entire live

Tamagotchi: The subject which has undergone the tamagotchi shall require constant attention from its owner. It has to be taken care of, regularly milked and its other needs have to be satisfied, otherwise the tamagotchi feels very severe discomfort. It has to be helped in many mundane tasks such as movement and masturbation. Tamagotchi feels pleasure much more strongly than a normal woman, which is why the person having sex with it has to be very careful.

CK 5

Capri's small nipples were pierced by big rings and they were constantly irritated by them. Special remotely controlled collar was mounted on her neck. It was design for dispensing substances into the bloodstream. Since that time, H-515 is constantly under the influence of various drugs administered according to uploaded program.

Capri was so horny that she couldn't think about anything but sex. Her pussy was permanently wet. Her only dream was to achieve orgasm. Special machine penetrated and stimulated her without mercy but although she was still on the edge, she could not reach her climax! For some reason, it was out of her reach. All she could do was howling and moaning with unspeakable lust.

The whole time she was aroused, her sexual marathon lasted for 26 hours and H-515 still had so much energy that she couldn't fall asleep or pass out. She writhed and begged for pleasure. At that point she would do anything in order to achieve orgasm.

Hormones (permanent effect)

Hormone cocktail that makes her breasts grow

Decoration

Tattoo (Drug Doll)

Current Psycho Active Drug

Will make her Dumb

Current Instinctive Drug

Will make her horny and very hard to reach orgasm

Scene

Scientists experiments on her drug enhanced body

The next phase of work on subject H-515 was the hormonal treatment causing rapid growth of breasts. Her flat chest soon started to expand.

After some time, hormonal treatment gave the expected results. Her breasts grew larger and heavier. For the first time in her life she felt what it is like to have a real bust. She also had her first tattoo done that time. The inscription on her chest proclaimed "Drug Doll".

The researchers once again dozed H-515 with arousal amplifier. At the same time another drug was introduced to decrease her extraordinary intelligence to the level of dumb bimbo . Further drugs tucked into her bloodstream made it very difficult for her to reach orgasm. Capri turned into a horny blunt slut, desiring a strong fuck. The scientists went on to experiments.

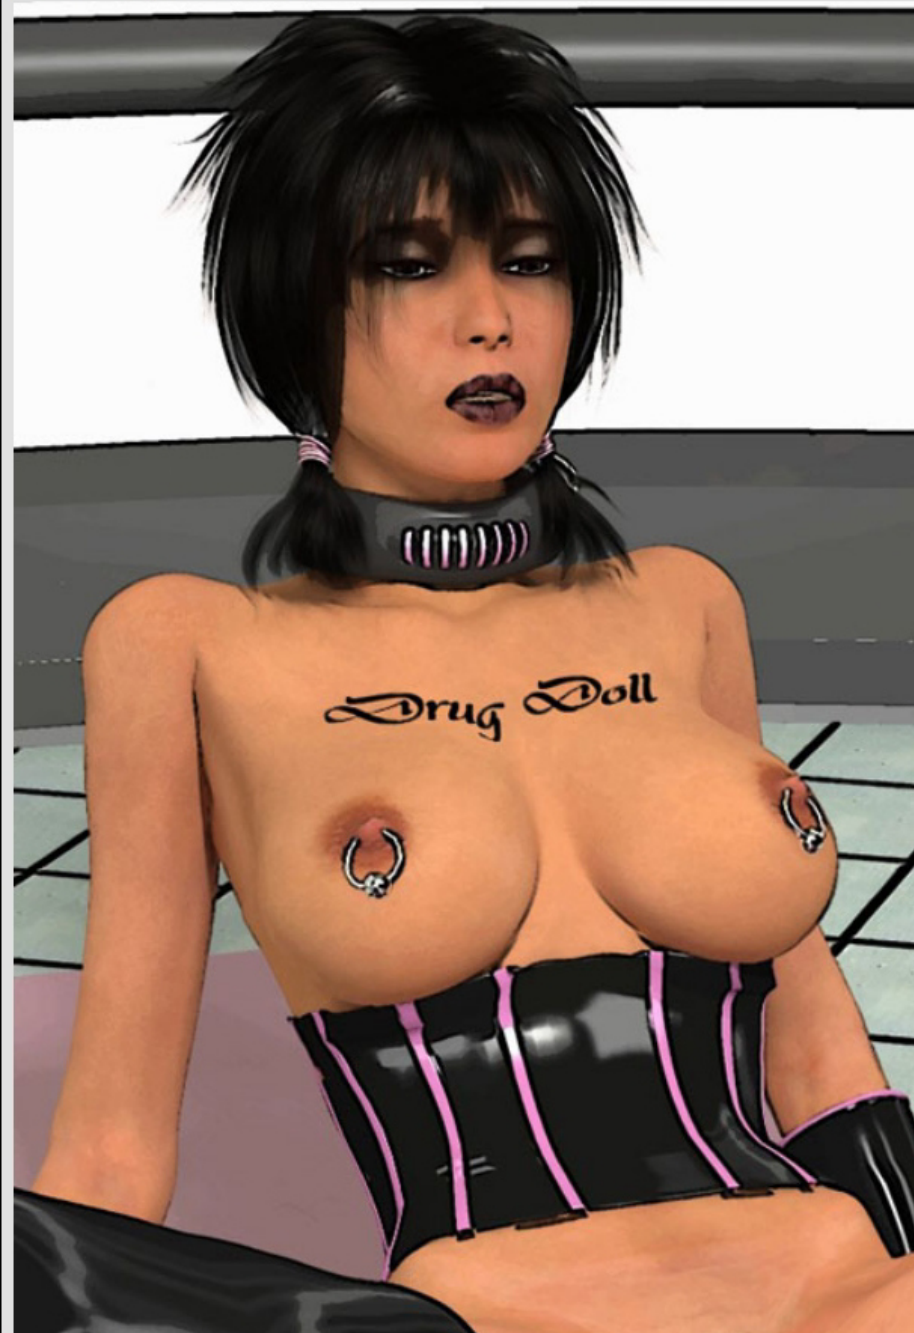

The first experiment was to check how long the drug doll must be stimulated in order to reach orgasm. It turned out that the doll required about 90 minutes to reach climax. After that her pussy was red and swollen.

Doll was fucked all day with a blunt expression of satisfaction. She fell after the sixth orgasm that took place after 9 long hours of fucking in both holes. Researchers have noted that at this rate her pussy and anus would quickly turn into a loose holes.

The test results clearly showed that long-term powerful stimulation of the object will lead to permanent IQ drop. At the same time her privates would quickly become loose and much larger tools would be required to satisfy her.

Another set of tests and modifications.

Decoration

Several new dirty tattoos

Another round of experiments

Give her arousal amplifier and toys that are way too big. Then watch Capri stretch her holes.

Hormones (permanent effect)

Hormone cocktail that makes her breasts grow

Additional treatment

Pump her lips with a lot of nano-tissue

Further tests and continuous sexual arousal were slowly changing Capri. Her body was getting used to various stimulants flowing in her veins and 515 began to feel the physical need for sex. Finally even without drugs her system demanded it, she has become physically dependent of penetration and had to fill her pussy in order to calm down.

Under the influence of hormones continuously pumped into her blood, Capris breasts grew more and more. Finally they became so big that they started to affect all her daily activities. Capri was a small girl all her life and she was not used to carry such a large weight on her chest. She couldn't handle it. Her back hurt all the time and heavy bust hindered at every opportunity.

Her breasts grew and required more and more attention. The researchers decided that the rest of her body should match them. That is why they decided to enlarge girls lips. They had to become very full and puffy. H-515 was to become a fuckdoll after all. Scientists also took care of a permanent makeup tattooed on her face and a few more tattoos emphasizing her new role. Her appearance slowly begun indicating what was her only purpose in life.

The researchers decided to investigate how much H-515 has changed under the influence of drugs that the collar were constantly pumping into her system. They wanted to see how strong her sex penetration addiction has become. She was dozed with a strong aphrodisiac and presented a bunch of toys too big to fit inside her.

Capri was horny and she needed to fuck her holes with something. Unfortunately the toys were too big and it hurt when she put them inside. She knew it was another experiment, but could not control her lust. Moreover the stimulants flowing in her veins made her so aroused that the thought of fucking her cunt with such large object excited her even more! With difficulty she pushed the toy into her sore pussy. With each thrust stretching her poor hole more and more.

Another set of experiments.

See voting results below.

Hormones

Cocktail that would make her booty grow

Additional treatment

Change her mouth into O-ring fuckhole

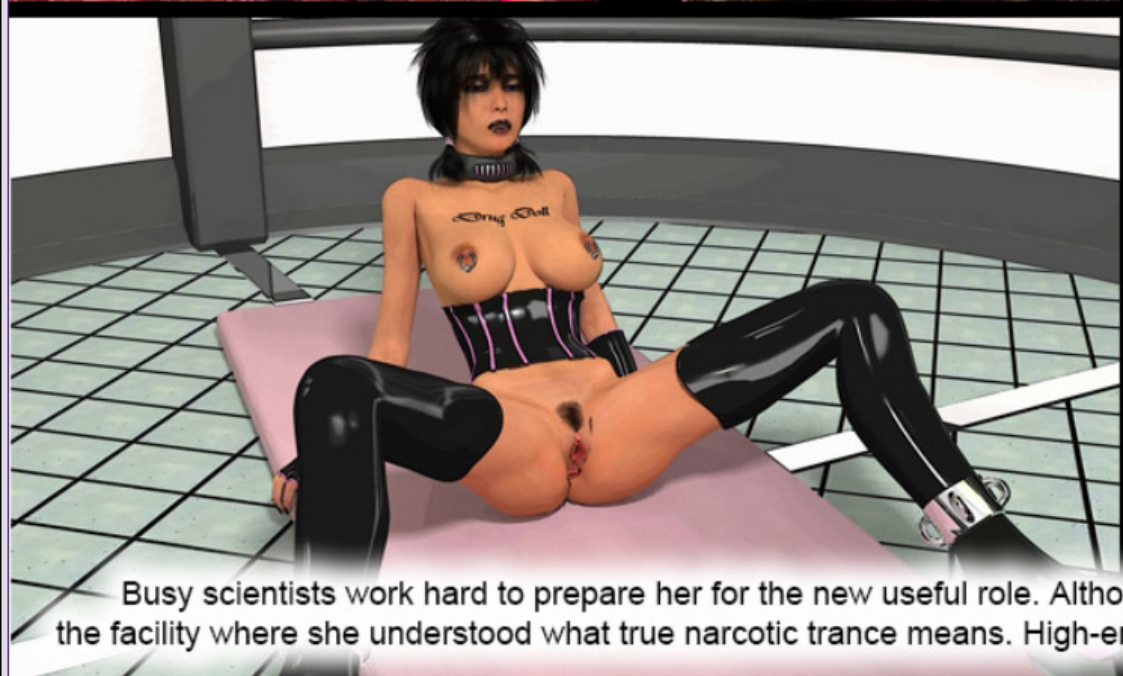

Another round of Experiments

Inject her clit with drug that cause immense itch if she doesn't message it.

Not so long ago she was a dangerous criminal, they called her Capri Black. Cold-hearted and cold-blooded she was shaking the whole drug gang. Looking at her face of a young girl you would never tell that this woman is a brutal criminal.

Fortunately, those days are over. "Pink Bunny" corporation provides her new role in society. Much more useful.

Busy scientists work hard to prepare her for the new useful role. Although the drug trade was her main occupation it was in the facility where she understood what true narcotic trance means. High-end substances slowly transform her into an ideal fuckdoll.

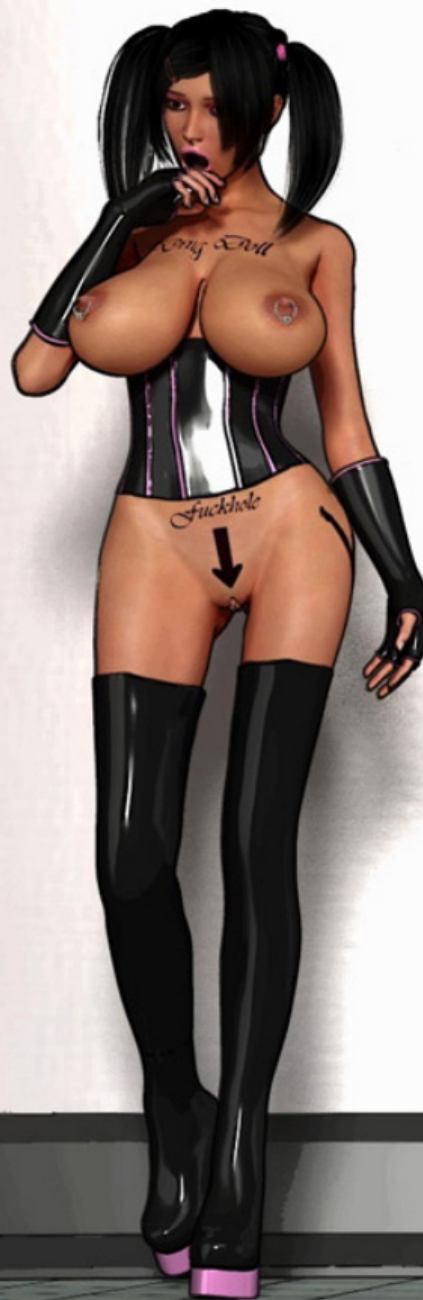

Her desire and pleasure have become so powerful that they dominate her life now. She didn't even imagine that a woman can feel so strongly. At the push of a button her body is filled with lust so strong that even she can't control it. Capri's body has been permanently changing into fuck addicted instrument.

The drug collar was taken off. Subject has to rest a bit before another phase - implantation of permanent artificial glands.

But this is not the end of the work, there is still much to be done. Good fucktoy must not only work efficiently, but also have the appropriate look. Her sex starved body must provide users with maximum pleasure. Even if her changes will go so far, that she will never be able to function as a normal woman again. One day her body will be suitable only for sophisticated sex. She will forget about any rebellion and become a fully functional fucktoy that can be sold with a large profit.

Once again the scientists upgraded her mouth. This time however they have gone much further. Her mouth was changed into a warm soft opening suitable only for giving pleasure. From now on H-515 will use it for that purpose only. Speaking became extremely hard and feeding must be done with a special tube.

Some time ago her microscopic breasts turned into soft, massive udders while tiny nipples were slowly stretched by heavy rings. Now a hormonal cocktail caused Capri's lean bottom to grow. She slowly began to take proper feminine shapes. As a free gift scientists offered her a new sexy hairdo. They concluded that it better fits with the soft pleasure hole her mouth became. New, lush ponies on the sides of the head are quite strong to serve as a handle while face fucking.

Scientists did not forget also about the tests. She was injected with something special. The latest product of enzymatic bioengineering. It only works on certain areas of the body. Causes severe itching of her clit and labia minoris.

If she doesn't fondle her pussy often enough, it begins to itch harder and harder until the feeling becomes unbearable. Therefore, H-515 has to cuddle her demanding pussy many times a day. Her drug enhanced body is so prone to caress that most of the time that simple fondling becomes a masturbation.

The researchers don't give her any more aphrodisiacs and her desire significantly weakens. Despite that her own impatient pussy forces her to pleasure herself over and over again.

The tests has come to an end. Now scientists has to decide what kind of a fuckdoll she will become. The drug collar was removed, instead she will be implanted with bioengineered glands that will pump substances into her bloodstream. Some of them can work constantly some other can activate in reaction to certain activities or in a given time of a day.

See voting results below.

Body of obedience

Huge and heavy udders. So sensitive that she can't run anymore.

Permanent artificial glands (first set)

Erogenous Growth Gland – This gland works all the time slowly causing her main erogenous zones to grow. (pussy, anal entrance and nipples). They will grow slowly but steady until they reach final proportions. (Even scientists doesn't know how big she would grow)

Decoration

Bright pink bigger eyes

The first thing on the list of the changes was a facial plastic surgery. Capris eyes became bigger and bright pink. Her irises were also expanded to achieve more doll like look.

Scientists started injecting hormones to induce her bust growth. Her breasts started to grow rapidly steadily increasing their size, weight and sensitivity. They became truly gigantic and began to seriously restrict her. Not only because walking with such a burden is difficult but also because they have become very fragile, moving with them too vigorously caused painful swinging and bouncing.

But the Scientists didn't stop the injections. H-515 should always remember that she is a fuckdoll and nothing more. They wanted her to be overwhelmed by her own giant udders.

After that she was implanted with a special gland which now constantly pumps bioengineered hormones into her bloodstream. They caused a gradual growth of her nipples, pussy and anal entrance.

The first changes came quickly. The privates and nipples, not only began to grow but also became more sensitive to stimulation. Fondling her body became more and more enjoyable. Capri was afraid of how far those changes will go. It was an experiment and even scientists did not know how will her perverse body develop.

Eventually her huge and delicate udders became so restricting that researchers decided to test their effectiveness in practice. They ordered an exercises involving a rape of the object. Two employees of Pink Bunny Inc. were instructed to have sex with the doll, regardless of her will. During the exercises H-515 was not bound in any way. Scientists wanted to check if her own fuckdoll body is sufficient for the bonds.

Despite her giant delicate breasts and a small stature it appeared that H-515 defends vigorously and it is very hard to have sex with her. Fortunately her modified mouth makes speaking very difficult.

Otherwise, employees would probably have to face the worst tirade of curses, while they were just trying to do their job properly. Scientists have noted that her body needs further submission modifications.

Another set of experiments.

Voting finished! See results below.

Body of obedience

Huge heavy butt impeding walking

Permanent artificial glands

Squirting Gland – Her natural glands would be enlarged to giant proportions making her squirt like fountain each time she orgasms. She would have to make herself squirt regularly to prevent overflow.

Decoration

Bright Pink Hair and a pink Blush
