

Emily's Diary by **Pleasure3DX (C9)**

Dear diary this is Emily,

my jaw still feels sore after last time

so today I'm going to shift my focus from up here

to down there.

I already ran some tests with my dildo this morning

you know for science again

these tests while partially successful

unfort fortunately just confirmed that

I'm more than unprepared to take Marvin without significant training

Twitter
@Pleasure3DX

they did however leave me curious about

Twitter
@Pleasure3DX

what exact size I'm dealing with and how much I'd mean to be stretched.

So in order to find out I went to Marvin's Paddock

and brought a ruler a notebook and

Twitter
@Pleasuree3DX

left my panties at home.

Twitter
@Pleasuree3DX

As always Marvin greeted me with his meat on display

to be honest by now I wouldn't want it any other way.

Now it's time to satisfy my curiosity

in a soft State he's about 24 in long

probably a bit longer if you would measure up to the very end of his shaft.

Twitter
@Pleasure3DX

In diameter he's about 3.5 in thick

Twitter
@Pleasure3DX

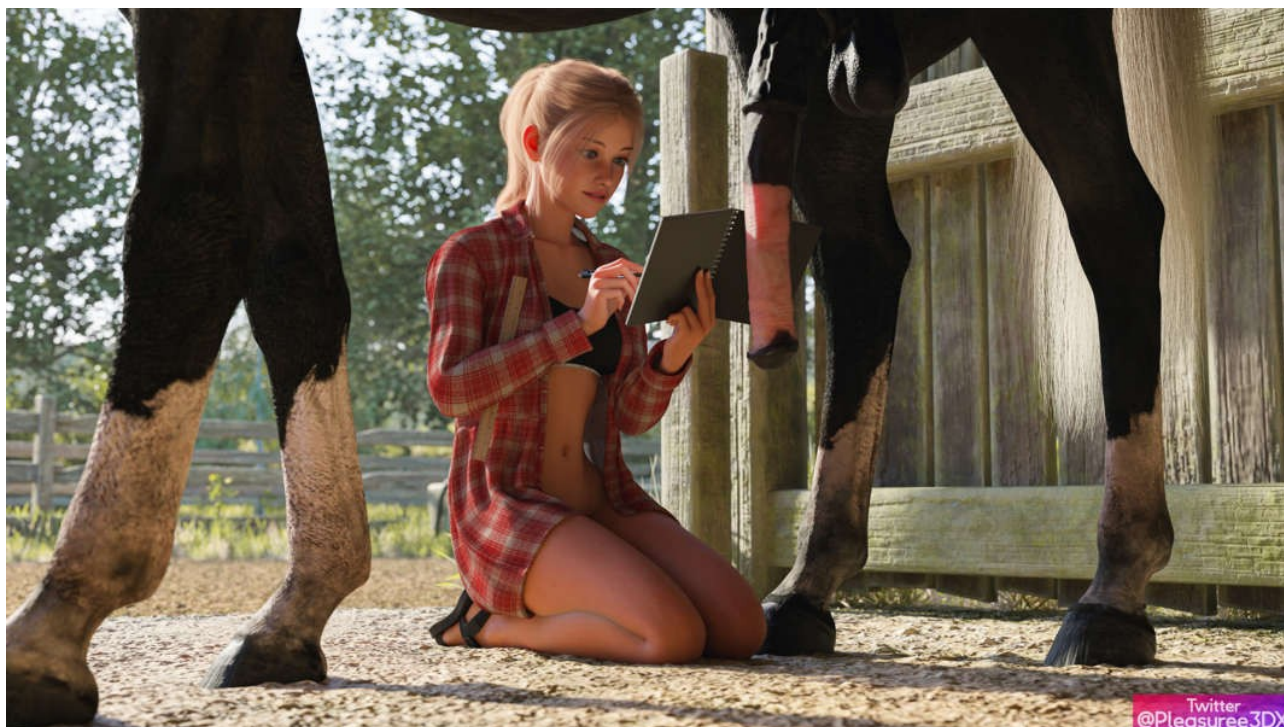

and his head about four

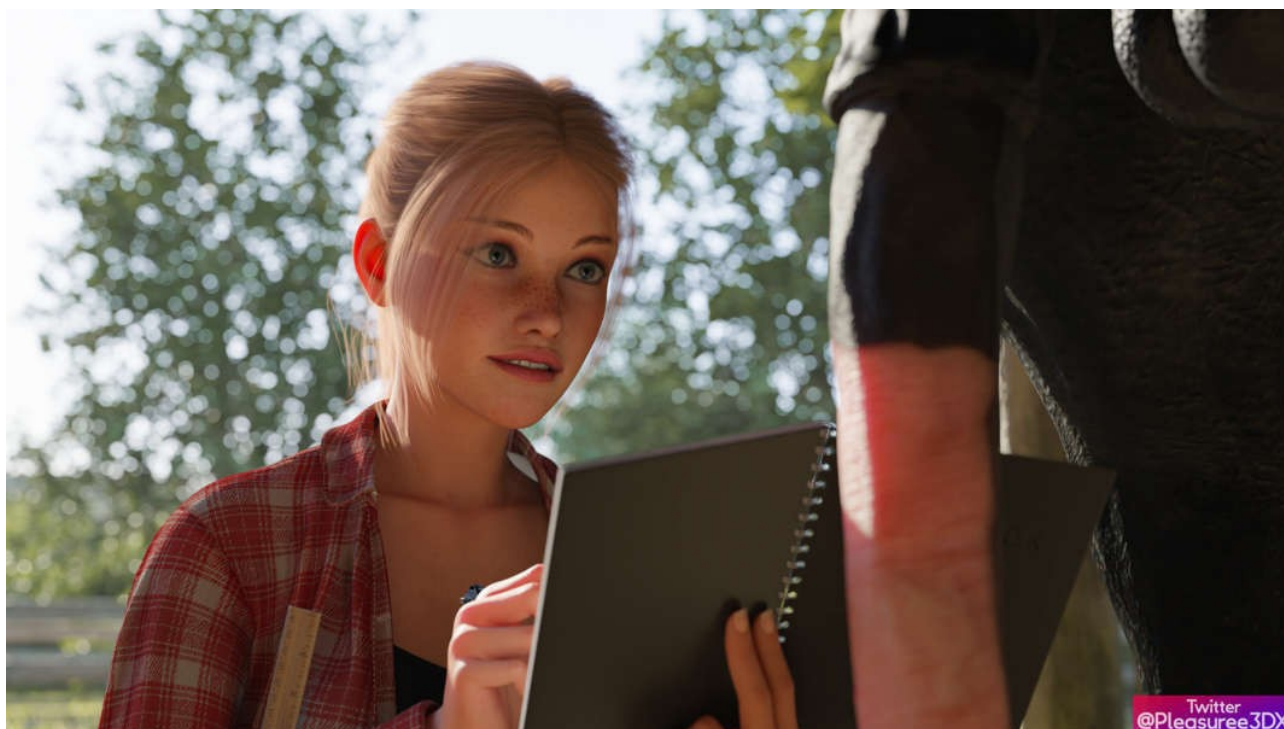

this obviously changes once he gets hard hard and his head flares

I wrote down those measurements like

the good scientist I am and next I needed to get him hard.

This time I wanted to try something

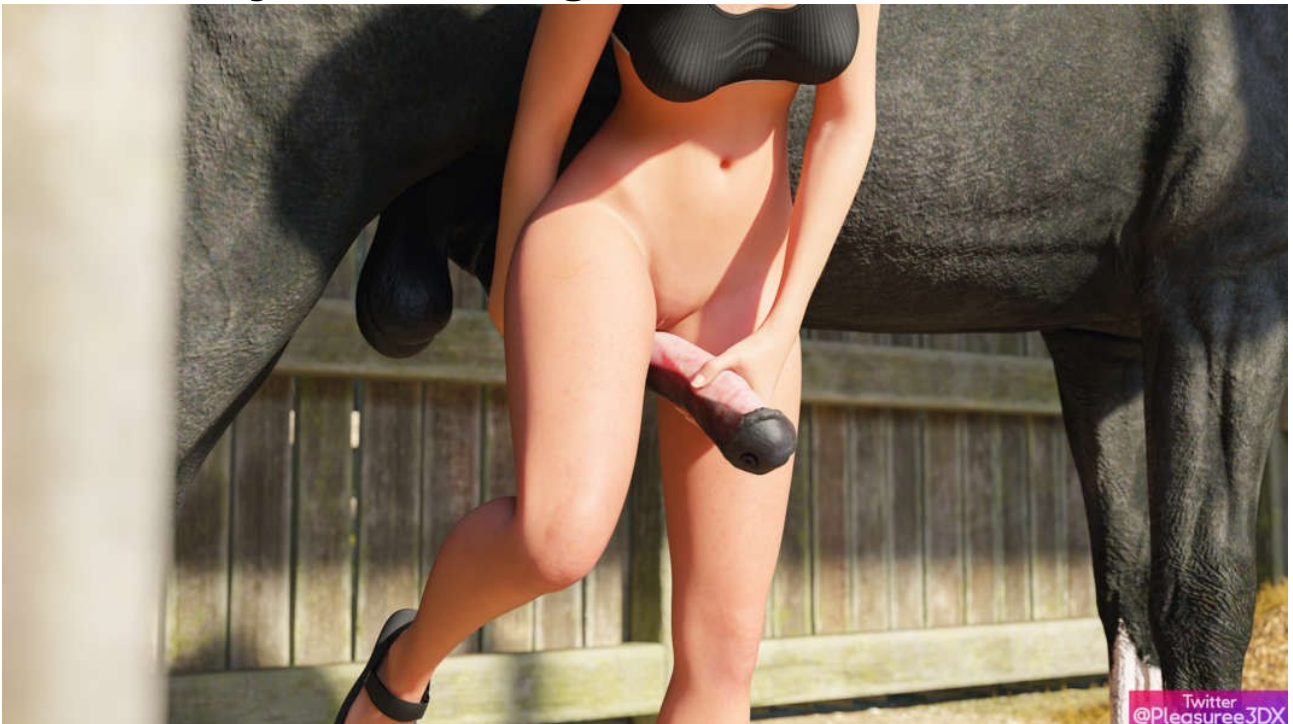

a bit more unconventional.

I dropped my stuff grabbed him from behind and stuck his cock between my thighs at first.

It felt really weird having

so much warm meat between your legs

I guess that's how it must feel for guy all the time,

but it allowed me to control the front half of his cocok and jerk it real good.

Twitter
@Pleasure3DX

As a bonus, the vibrations from every jerk

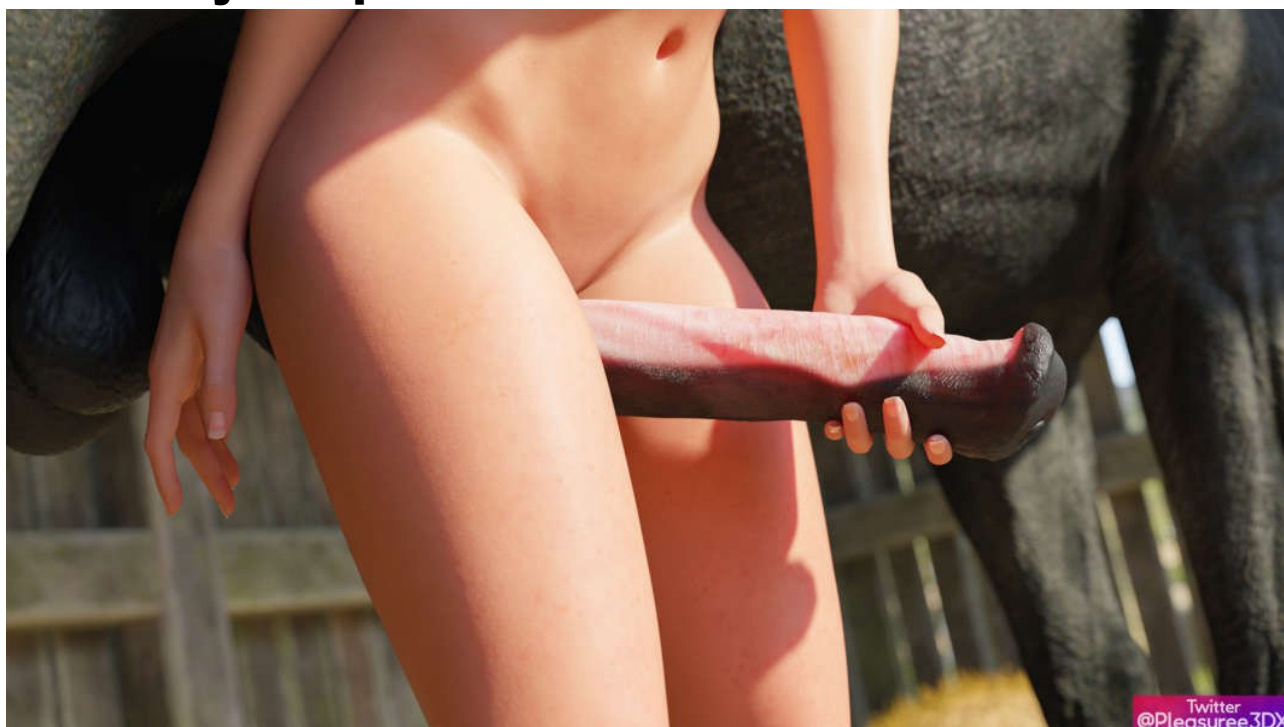

Twitter
@Pleasure3DX

especially when his cock twitched, so there I was stroking this massive cock between my legs trying my best to get it hard, and to no one's surprise

I didn't have to wait long he quickly hardened and his veins popped out even more I couldn't help but move my hips and rub myself on his hardened cock leaning into every bump.

I wonder if he got the same amount of pleasure out of it than

I did it, felt amazing but I had to remember why

I did this I was on a science Mission.

I grabbed the ruler once again

and measured his FL flared head which was still sticking out from between my thighs

almost 5 in

that is the average length of a guy but in diameter

Twitter
@Pleasure3DX

if I truly wanted to take that

Twitter
@Pleasure3DX

it wouldn't happen anytime soon and probably not without some help that would be a problem for another time though. What really went through my mind in that moment was just his massive cock and how I wanted to feel it on my naked skin.

There's something so powerful

and at the same time humbling about

serving a cock like that 24 in of pleasure

probably even more

Twitter
@Pleasure3DX

now that he was hard and I can do all I want with it

Twitter
@Pleasure3DX

I wanted to feel it between my breasts

and feel it pulsate when I move it's skin

I was so turned on by how soft it felt yet how hard it was how heavy it was yet how easily I could control it at that moment I just wanted to worship it.

I love his thick shaft how it hardens when it senses me how it reacts to my touch.

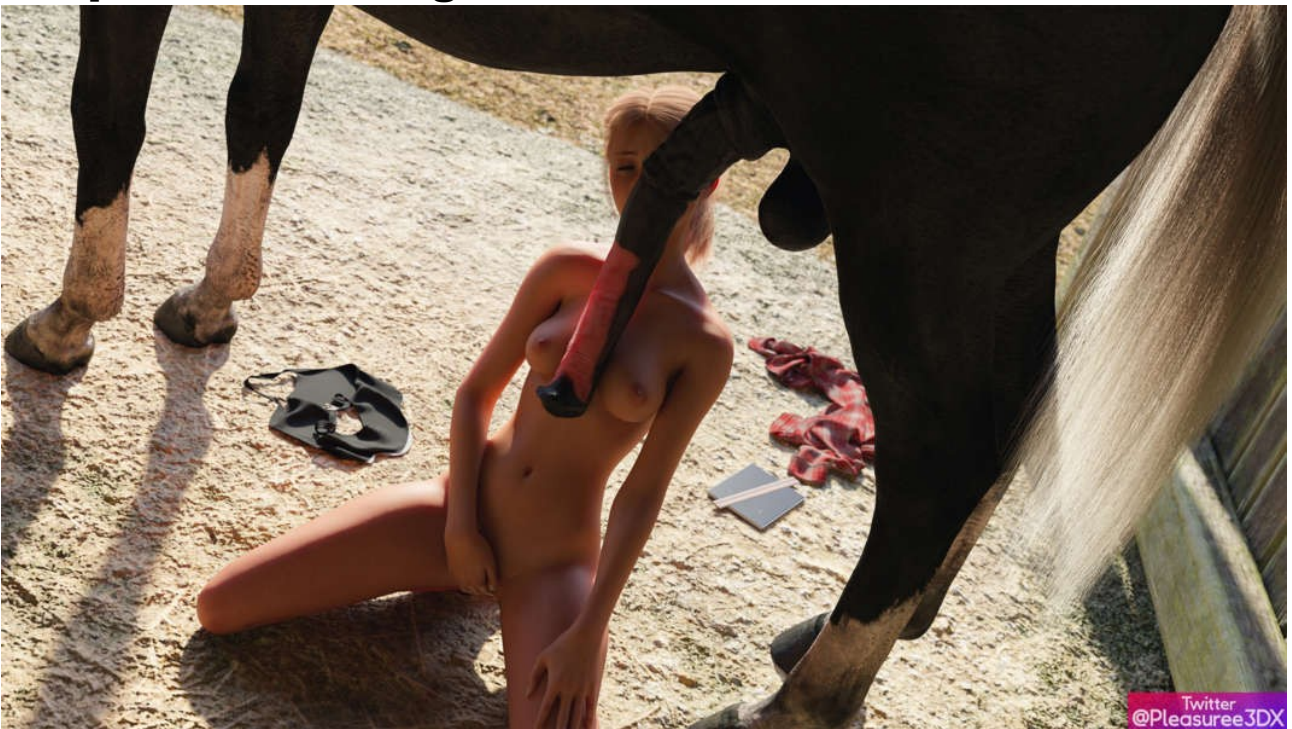

how it wants more after every stroke.

Twitter
@Pleasure3DX

I kept masturbating...

Twitter
@Pleasure3DX

with all those thoughts in my mind...

it was mesmerizing it was so good...

in fact that I fell into another trance.

I think this time I was out for at least an hour or so

it felt like a wet dream and in one form or another it was

I love this cock so much

and I will make it fit inside of me

sooner or later, with or without help

but for today...

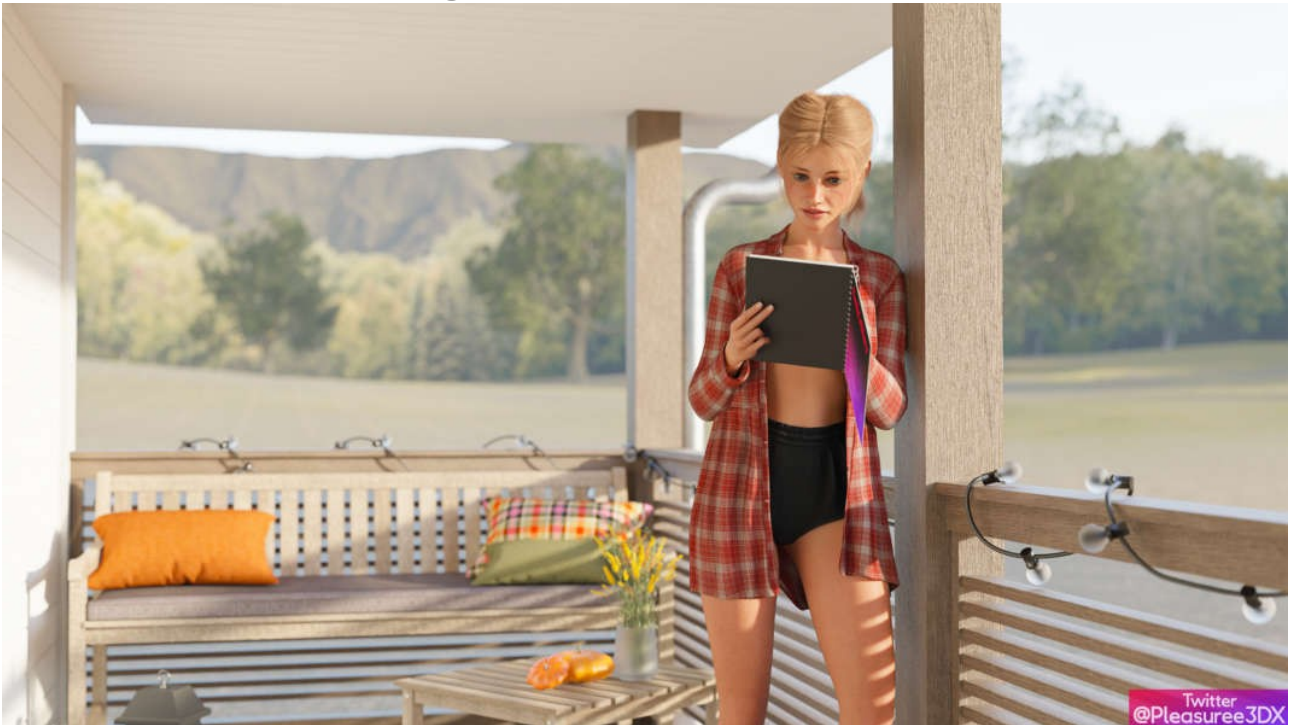

Twitter
@Pleasure3DX

that was it was time to head home and get some chores done.

Twitter
@Pleasure3DX

I know I'm kind of blue balling Marvin right now but trust me that's for good reason

because for what I'm planning to do next I need more than just a small sample size of his

liquid for...
