The place: an old warehouse somewhere in a former Soviet Republic. Doctor Miklos Orloff and his nursing assistant (and lover) Ute Brandt find Emil, a petty drug dealer, smiling at the struggling human package he had ready for them...

Dr. Orloff worked on some deranged experiments with their origins in Nazi' scientific research on human body regeneration, and he needed a constant supply of special lab animals... human guinea pigs! To ask for volunteers was out of the question, so they contacted the local mafia. The criminals soon reached an agreement: Orloff's lab would produce chemical drugs to pay for the "human research subjects" his lab needed.

April 6th, 2006

"Good afternoon, Doc! Here's your bitch... Her name's Maryna. She came from some distant dump to the city to become a pop star... so no relatives here to worry about. I met her in a dirty disco and I gave her a spiked drink and promised an audition tomorrow, and she went to la-la-land with a silly smile in face..." Emil said. Winking at the buxom nurse he added "I think we deserve a bonus... she's a virgin!"

"Don't worry, hunk. She'll soon lose her cherry... and it'll be fun, for us at least. Our last guinea pig was too skinny, but this one is a hot bitch... Redheads are usually horny playthings, what d'you say, honey?" Ute asked while the doctor gave a briefcase full of drugs to Emil who nodded in approval. He had a nasty, wicked smile on his face.

Once at Dr Orloff's lab, they tied Maryna spread-eagled. The doctors had fun stripping the frightened girl. "Bring these vials fast, Frau Brandt. We need to inject your grandfather's formula in the subject before we begin with our own experiments." Dr Orloff said as he rammed a needle into Maryna's neck...

"This first shot is always the funniest for me, know you bitch? We discovered Hans Brandt's formula has a curious side effect... it keeps the subject horny for hours and little by little, as we inject more drugs into our female guinea pigs, the subjects crave more and more for wild sex... Dr Braun here said we must do our best to get rid of that side effect, but I convinced him to produce a potent sex drug instead. Rich sadists would pay a fortune to inject it into unwilling victims to turn them into sex crazed slaves..." And he added, laughing, "soon you'll be begging us to put our cocks in your hungry fuckholes!"

"Stand still, you dumb slavewhore! Let us finish and I'll ram my cock into your mouth. Male jizz will be your main food and drink from now on, apart from our injections!" Dr Braun barked to a near comatose Maryna. He turned to Nurse Brandt and ordered "keep track of how many times our hot slut cums in your loving, gentle hands. This bitch is the horniest guinea pig we've had in months!"

"Dr Braun, put the gastric probe deeper into the subject's stomach before she hurts herself! She'll stop struggling once we open the conduct to release the serum into her body. Then we'll be able to taste her dripping cunt to check out the sex drug effects on her!"

"You’re nothing but a dirty sow! Can't you keep our serum inside you, bitch? We even added bull sperm to make it tastier... Lick it up and get it back to your stomach, whore! And when you’re done I want my shoes spotless! This tongue exercise is pretty good to enhance your mouth skills... Later I'll test your oral services and you’ll have to please me.”

"This bitch has a really tight asshole. Maybe I should have chosen the spiked strap-on to drill her ass instead of this one, although the nettle juice I spread on it makes her jump like a wild horse... A pity we can't hear her screams!" Nurse Brandt said in a wicked tone, while Dr Braun prepared his thick cock to rape Maryna's cunt "Well, we must prevent our guinea pigs from biting their tongues when we test their fuckholes... Once Dr Orloff's given this one another shot I'll check her vaginal reactions!"

"Jump, fight all you want, you dumb slut! Your own weight helps me to slip the metal probe into your fuckbox. Once inside scores of half-inch nails will spring from it tearing your cunt walls! This way we'll record your body reactions to pain and internal wounds and we'll see how the serum works on you!"

"All right, whore! You bit Dr Orloff's hand when you were riding the dildo seat, so now we do it the hard way!" Nurse Brandt yelled, releasing an electrical discharge onto the terrified captive.

"Scream, yell, cry all you want, bitch! Guinea pigs like you must suffer to help scientists..." the devilish nurse said, and pressing the cattle prod against Maryna's spine, she added with a nasty grin "... and you must please me too. Next one will be right into your cunt and later I'll roast your ass till you become a mindless babbling piece of fuckmeat!"

"Come on, welcome Dr Braun's cock properly!" Dr Orloff said laughing at Maryna's useless struggle. "We gave you a good rest in a nice bed after Ute ran all the tests on you, so now we deserve a reward too. Deep-throat his dick nicely and then we'll fuck all your whoreholes. We know you're craving for it... and don't worry. No electronics devices at all now, just plain, homespun fucking tonight..."

But next morning the deranged scientists tied poor Maryna again to their weird machines... Long, thick metal probes filled her holes, pouring Dr Orloff's devilish serum into her mouth, womb and bowels and sending random electric discharges across her tortured body... From time to time, one of her torturers came to check the computer readings, and the sadist nodded, pleased... "Want some more action, slut? wanna get the full dose?"

Two days later, they strapped their guinea pig to a stretcher-like device. Maryna stood in an upright stance, legs painfully bent upwards and a big ring-gag keeping her mouth fully open. Dr Braun spoke to the other scientists, while pointed to the girl's fully healed and well-moistened cunt.

"As you can see, our serum healed the subject's wounds and keeps her cunt in a constant state of arousal. Now it's time to check the serum capabilities to heal more extensive damage. First we'll do a cliteridectomy on the subject, and then think we can gang rape her for a few hours hours. I want to check the guinea pig’s reactions to sex after the excision of her clitoris... I wonder if she can have full vaginal orgasms..."

A week later, Dr Braun grinned lecherously at the same time as he rammed his cock into Maryna's healed cunt. "You're a really lucky bitch! None of our guinea pigs lived so long and reacted so well to the serum! I can see your naughty little love button growing again, so now it's time to do another test, isn't it Dr Orloff?"

The deranged doctor nodded, rubbing his cockhead all over Maryna's lips. "I agree, Dr Braun. I'll use these clamps to rip the subjects nips and we'll see if her body can regenerate them the way it heals her arm and leg wounds..." And crushing one of the girl's tits in an iron cramp added, amused "Open wide, bitch. I don't like feeling teeth while I face-fuck my lab animals... Unless you want me to remove your teeth too to see if they grow again!"
