

Kathrin, the face of the Humilk ad campaign

Kathrin, can you tell our readers why you've chosen this life?

Life as a dairy cow just sounds so wonderfully simple.

And... I just love the thought that people out there will get fed by my milk...

8 weeks after injection...

Kathrin, there's a calf back there looking at you.

How does it make you feel that you'll soon carry one of it's siblings?

Well... it's a necessary step for me to get pregnant in order to produce milk...

It's not like he's starting to look attractive to me or anything... can you smell it's musk...?

12 weeks after injection...

Kathrin, you've just been bred for the first time. How do you feel?

Good... is good. Kathi Calf now?

Well... most likely! You seem to have dumbled down a bit. Is this the simple life you wanted?

Gud Life? Me eat and walk and sex.

34 weeks after injection...

MOOO...

Kathrin, is now too much of a cow to answer any of our questions, but just look at her happy face.

The people at Humilk sure treat their cows well!

40 weeks after injection...

MOOO...

Kathrin is now one of many cows just like her. Humilk is already one of the biggest dairy suppliers of the country. Check for Code 144605 to see if your milk product was produced with some of Kathrin's milk.
