

LOCKDOWN EXPERIMENT

CREATED BY

Lockdown has been tough on both me and my housemate. We're at our wits' end.

We went from being two very social guys in their prime to a couple of hermits who do nothing but eat, drink and masturbate!

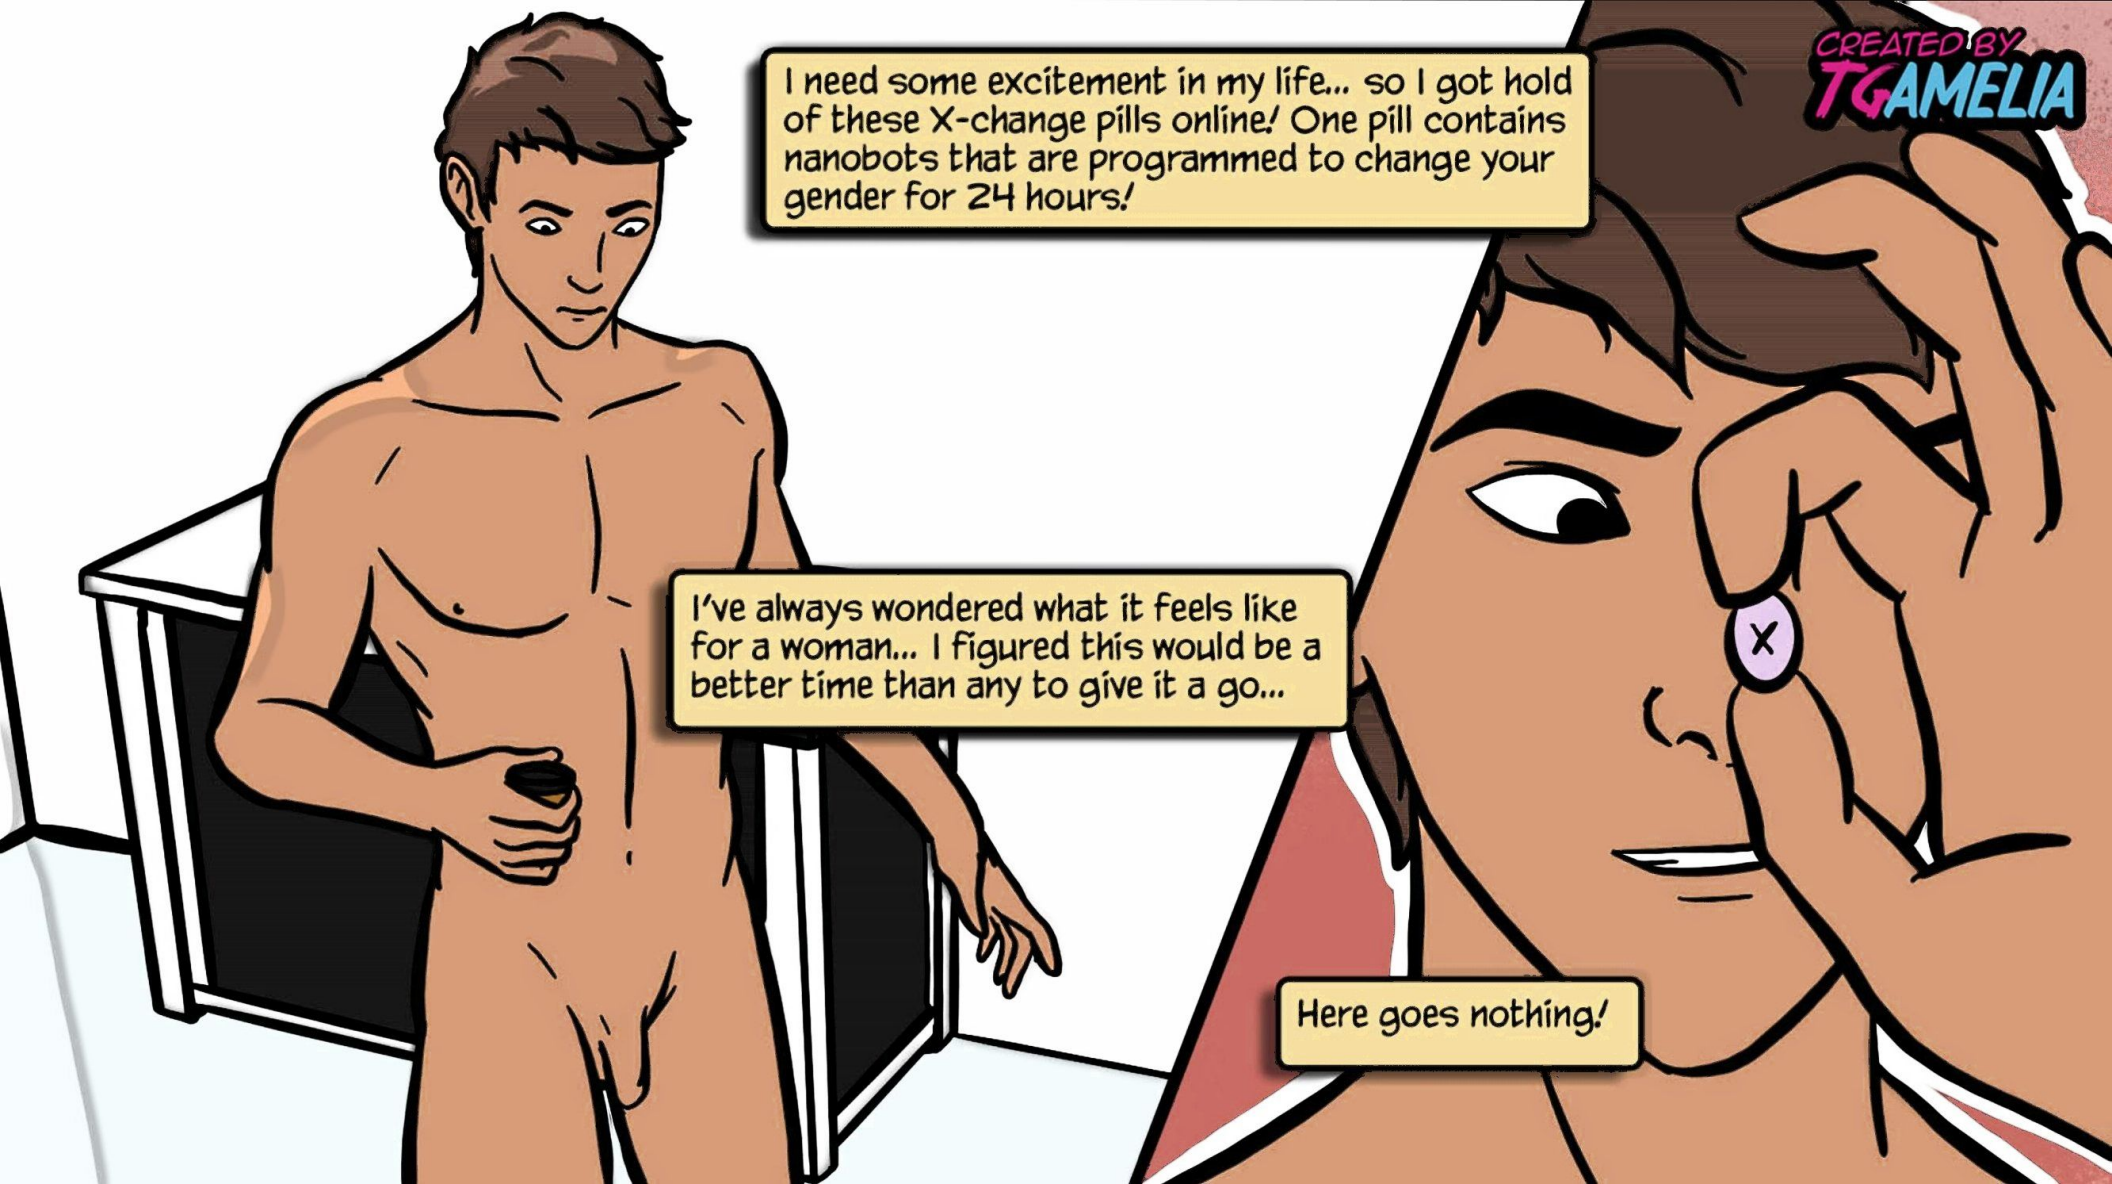

I can't take it anymore!

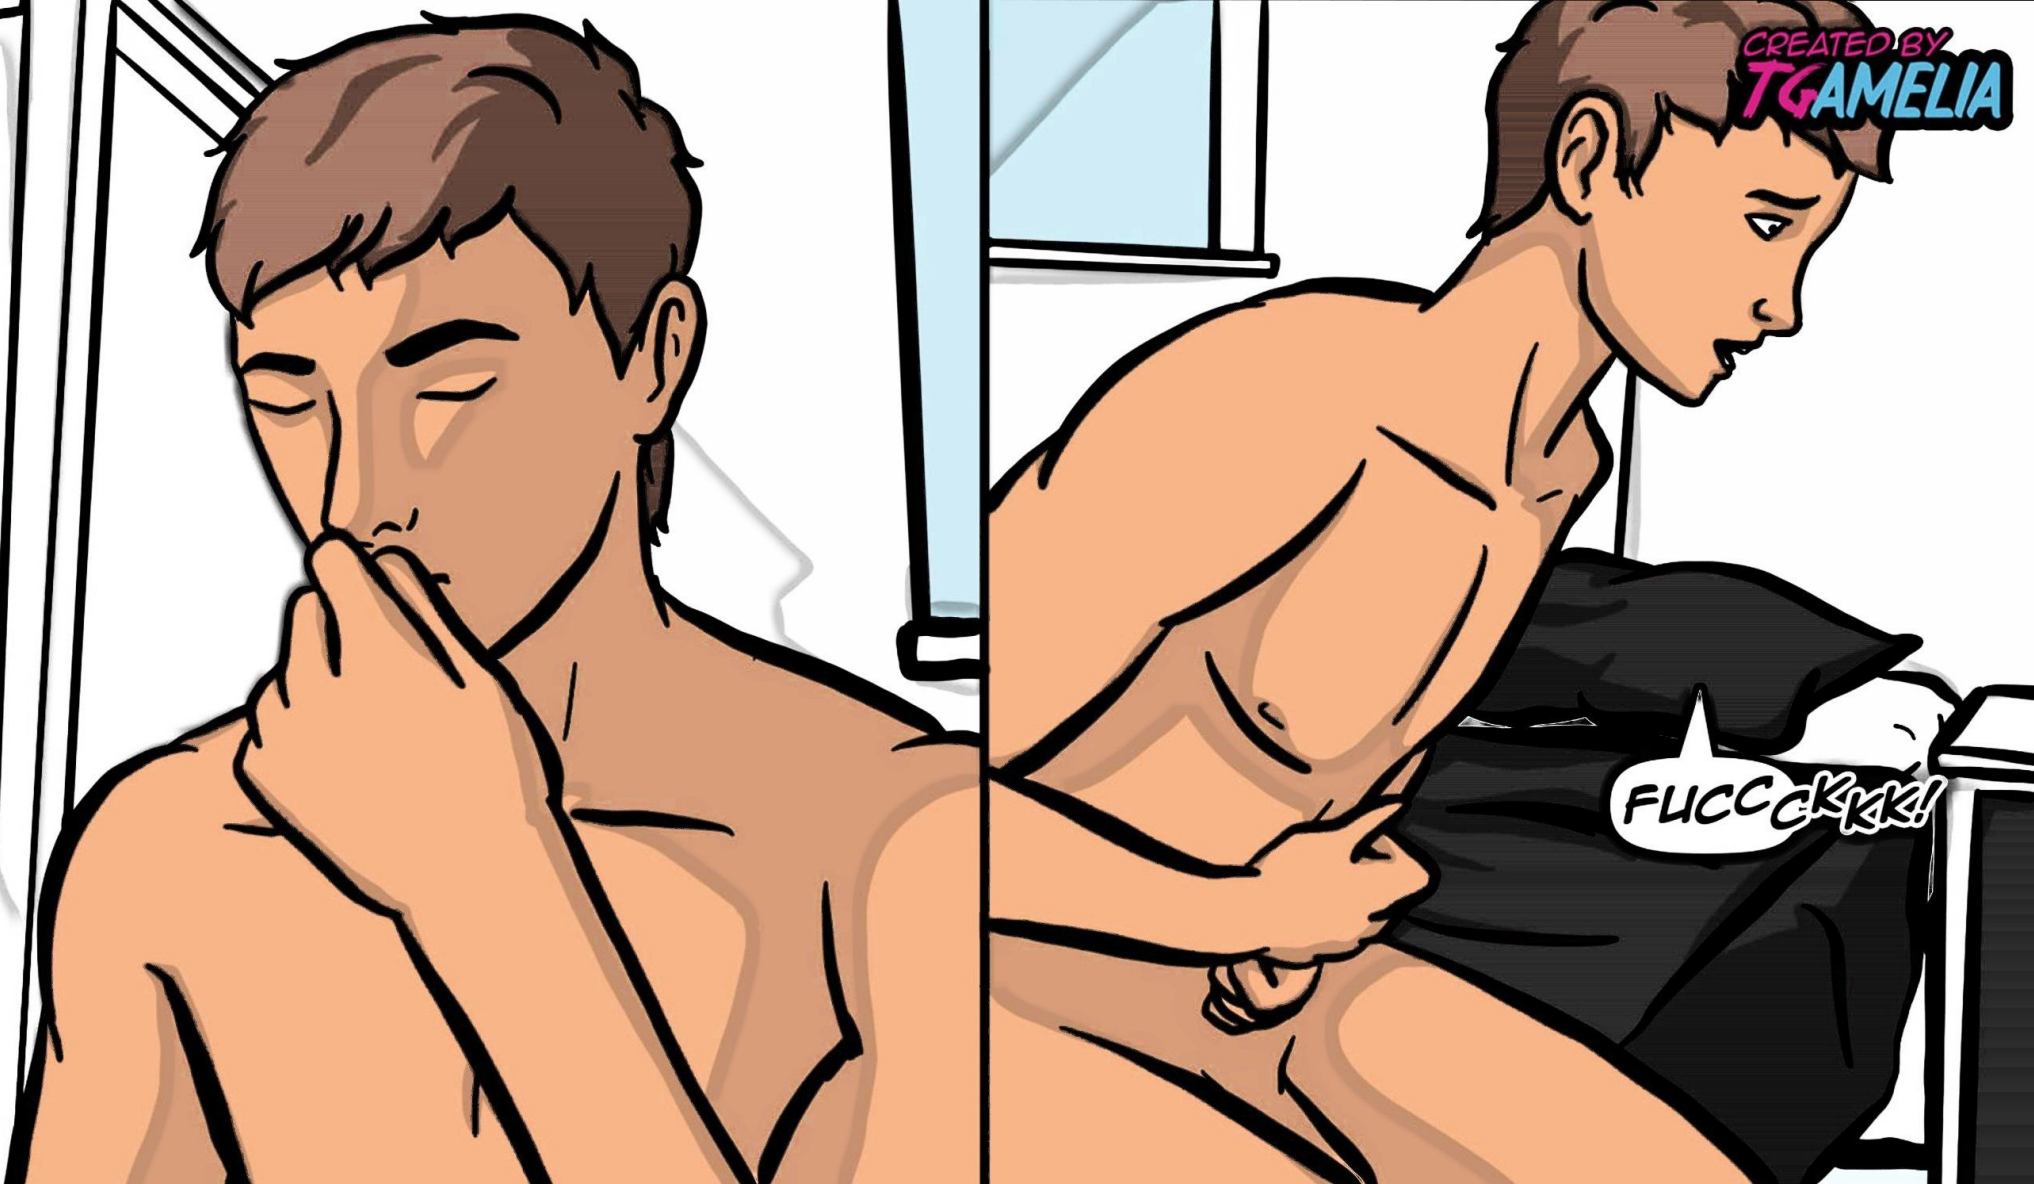

I need some excitement in my life... so I got hold of these X-change pills online! One pill contains nanobots that are programmed to change your gender for 24 hours!

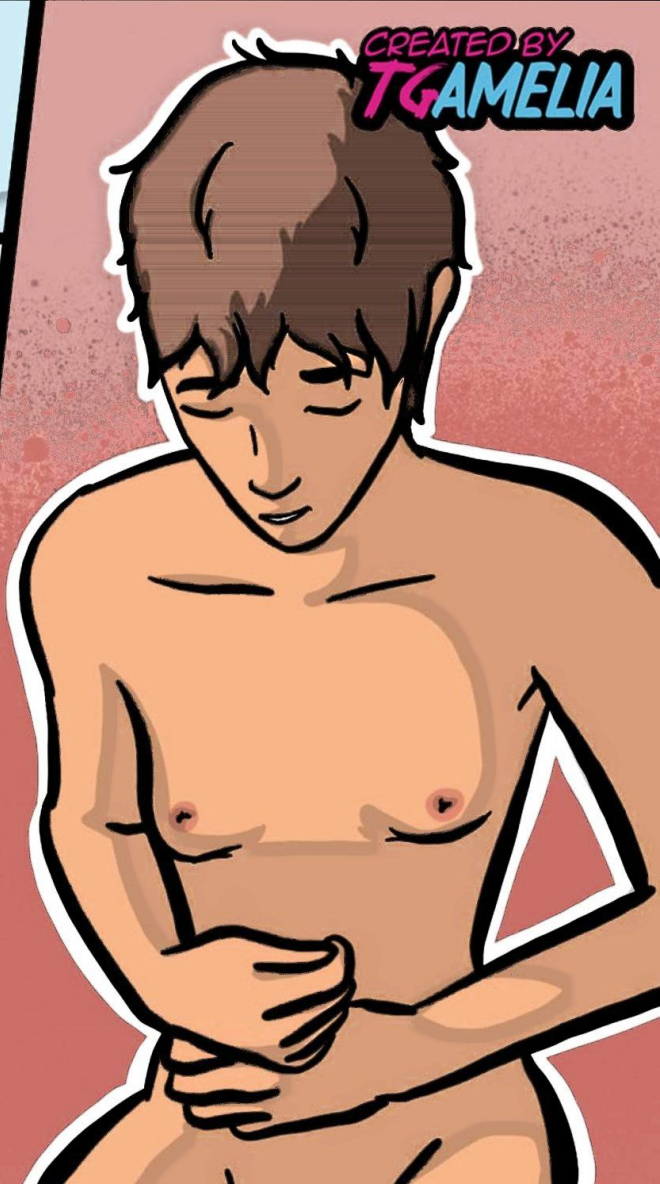

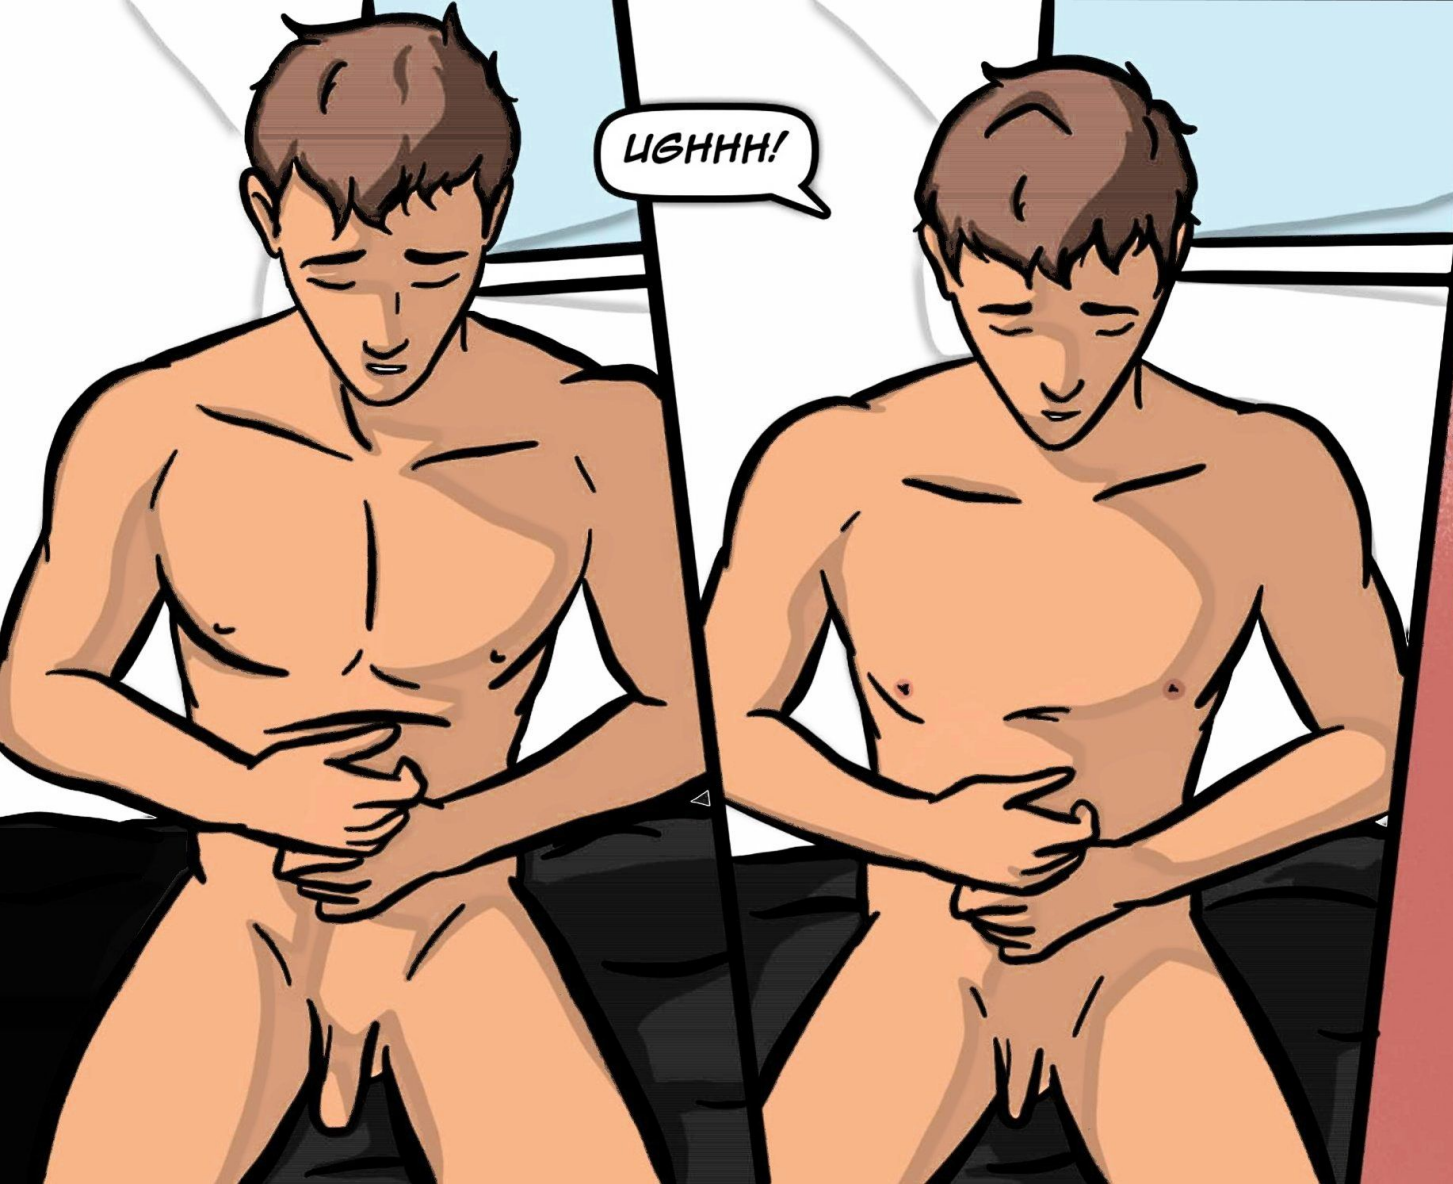

I've always wondered what it feels like for a woman... I figured this would be a better time than any to give it a go...

Here goes nothing!
