

# TROUBLE IN THE BACK ALLEY

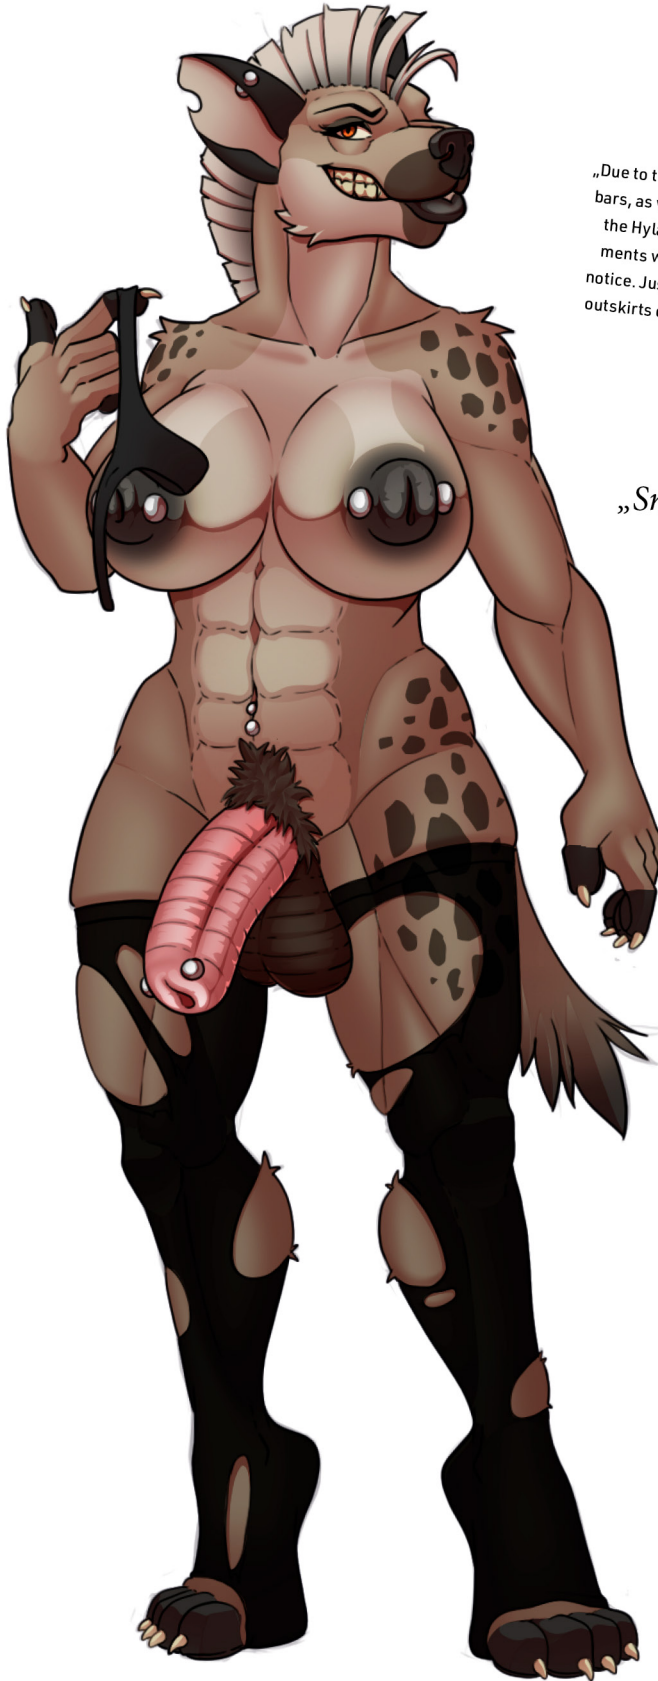

**HYLAR  
HYENA**

**Before**

### Decree of the Inquisition:

„Due to the increasing number of fights in restaurants and bars, as well as the disappearance of several city guards, the Hylars are prohibited from entering the establishments within the city walls of New Tinora until further notice. Just like the Soras, Hylars only have to stay on the outskirts of the city after dark. Failure to do so will result in overnight preventive detention.“

„Smelly like a Hylar's den“

Tinorian proverb for poorly ventilated rooms and changing-rooms.

# HYLARS

Hylars like being messy. Naturally loud-mouthed and incomputable in their behavior, they either make perfect, or very problematic comrades in any adventure.

Most Hylars are very dominant and love to take risks. They search for the "next thrill" and also often have no respect for others except their closest friends. Hylar females are often loners, seizing every opportunity to play their humiliating sex games with others, especially after consuming alcohol. While being not the sharpest tool in the box most of the time, their sheer size and unscrupulousness often makes them the „Muscle“ of a group that even takes on a fight with a Tizzian or Snapper.

Male Hylars are seldom more than Toy-boys to the stronger and often bigger females and are rarely seen strolling through the bars. They prefer to keep their heads down, since the females of the species are often significantly bigger and stronger.

In their mating season, female Hylars often make no difference between male or female "partners" (- who are often chosen by them alone, having no word in this decision). They often like to taunt male partners, since their protuded Hylar-cunts outmatch most penis-sizes, which often results in forcing her partner to give her smelly snatch a blowjob while bitch-calling them- often ending in the male turning into a female Hylar as well, if no condom is used.

With girls, Hylars are still very dominant, but in a softer way. They enjoy to "corrupt" their female partners by turning them as slutty as possible, resulting in a transformation into another Hylar eventually by feeding them liquids from their lewd cunts while dressig them in slutty outfits that leave no room for speculation.

Hylars see the transformation into one of their kind as the ultimate gift of corrupting to a lawless and free life - in their oppinion, they "free" their victims from the tight bonds of a prude society. In addition to that, their origin of being carrion-feeders makes them sexually aroused in filthy and smelly areas. The fact that they can degrade their victims with their kink and strenght often sends them into a frenzy of hornyness.
