# THE END!

Just kidding... it **didn't stop** there... Mommy continued  
growing bigger and bigger... keep scrolling

She outgrew her own house....

Then her city... she went from eating her boy toy,  
to eating masses of people at once...

*She got even bigger... and started eating buildings...*

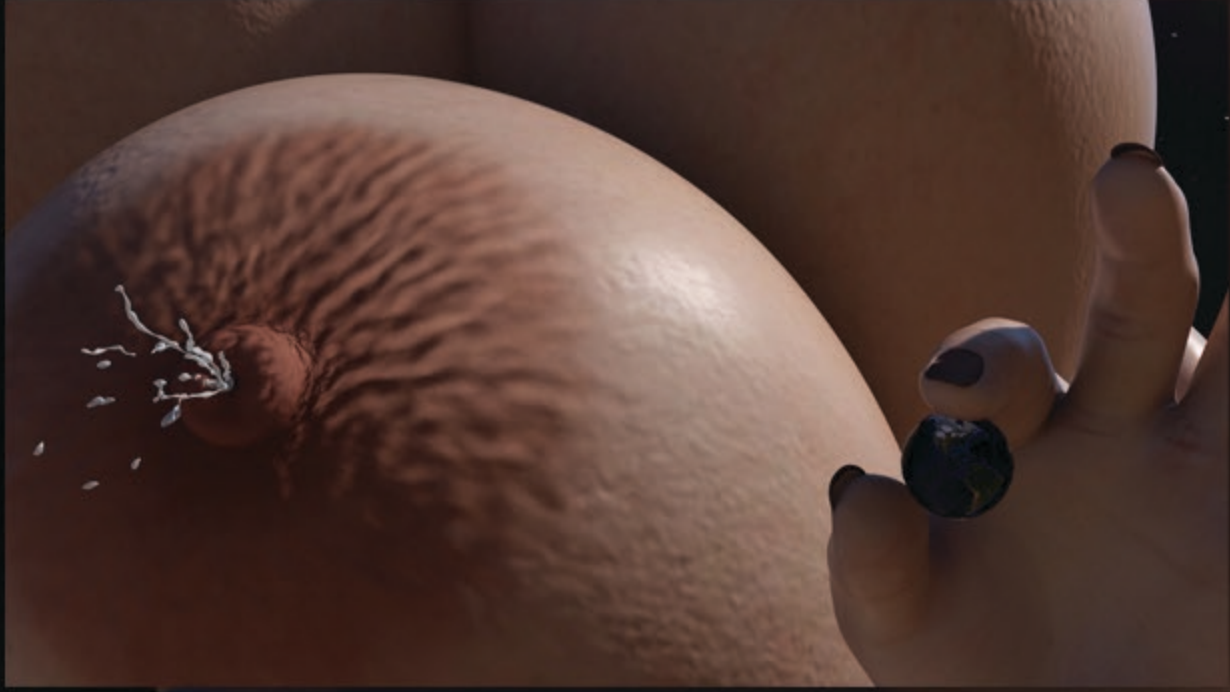

then cities... She was loving it... soon, the whole world would be able to see her...

After a few days of eating millions and millions of people...  
Mommy finally outgrew earth itself...

She still didn't feel full though... so she went and ate other planets and saved Earth & the sun for last... the end?
