14	J					Fluffy the werewolf from Johnny Bravo, where we see her initial transformation some time before she meets Johnny.
15	Fordlover68					The forces of nature transform Pocahontas from the Disney film into a werewolf.
16	Era2987					Pomni and Jax from The Amazing Digital Circus becoming werewolves. Basically, Pomni and Jax are a couple and its been a year since they were first attacked and transformed. With this being the one year anniversary the comic has them transform in style, NSFW if you want to include it, and it ends with the now transformed Werewolves embracing each other and resting for the night. The tone is less shock and horror and more like Lover Bear where they know the TF is happening and are embracing it. The art style could be similar to the style used in God Blessing on This Wonderful Moon, Lover Bear, and Lycanball where it's more Cartoon/Anime than realistic. I can see a lot of good opportunity for some great parts of the transformation like hands, feet, paws, tail, and face.
