

"Gah!" yelled Power Girl as she struck the center mass of tentacles with her fist followed by unleashing a beam of lasers from her eyes into the who she made. This elicited a squeal from the tentacle creature she was fighting. From the other side of the creature, Wonder Woman struck down with her sword, the blade punching through its flesh and into the brain. With a convulsion of tentacles and a final squeal, the creature sagged to the ground, its tentacles going through their death throws before finally ceasing all activity.

"Thank Hera its finally dead," said Wonder Woman as she pulled her sword free and wiped the green blood off of the blade.

"Uh its disgusting. Good thing we stopped it before grabbed any more women," said Power Girl as she looked

over to the sewer tunnel where the police, Ems and hazmat crews were helping newly freed women walk out. The creature had captured over a dozen women in two days, keeping them bound and gagged with a liquid slime of some sort. At the moment, the women seemed fine but were going to be checked over for any injuries while having their minds checked.

For the next hour, the two women helped out as much as they could before they were free to go. Wonder Woman went in one direction to complete her patrol while Power Girl went in the opposite direction to do some more flying beneath the full moon in the night sky. Unknown to Power Girl, a tiny portion of the tentacle creature had latched onto her one piece, white leotard and begun to integrate itself into leotard. From there it began to spread, taking over the fabric and replacing it with tiny, thin tentacles that began to grow in

size but not enough to alarm their new captive. It spread upward like a tidal wave, going over Power Girl's large H-cup breasts and into her red cape. The only places it could not reach at the moment were her blue gloves and blue boots. For now. Power Girl flew on, unaware of the impending danger to was facing, unaware of the fate that was about to befall her. She bore a smile upon her face, enjoying the wind blowing upon her face as she flew across the night sky with the moon acting as a backdrop.

slurp

"What the fuck!" exclaimed Power Girl in shock as what felt like a tongue lapped at her pussy. It was quick and fast, yet it was full of sexual energy that she felt her body starting to react to it. She nearly fell out of the sky when it happened, not expecting anything of this nature

slurp

"Shit!" she yelled, this time her hands flew down to her crotch as the feeling of the tongue lapped at not only her pussy but also her clitoris. Power Girl used her enhanced vision to look between her legs, bending over to see what was happening as her fingers began to tear at her own suit. It was then that she saw a tentacle sticking out of the fabric of her leotard and before she could react, two of them slithered into her cloves. Power Girl cursed as she quickly tore her hands away with the intent of tear her gloves off and throwing them into the air so she could hit them with her laser eyes. But it was not to be as the tentacle creature sensed what was about to happen and thus, forced a growing tentacle into Power Girl's pussy where it began to twist and twirl, spreading slime all over her inner walls of flesh. The

slime itself was a fast acting aphrodisiac that soaked immediately into the superheroine's skin and into her blood flow. At the same time, two tiny tentacles began to tease her nipples, twisting and caressing them.

"Fuuuu!" Power Girl's eyes rolled up into her skull from the fast penetration of the tentacle into her pussy and the playing of her nipples. Her body felt like it was on fire, and her pussy was begging for more. The rational side of her brain was desperately trying to fight back and she managed to regain control of her mind and eye sight. She opened her eyes and saw something in the corner of her eye sight in the distance. To her surprise and hope, she saw Super Girl flying parallel to her position but was looking away. Power Girl made to shout out when her right gloved hand suddenly shut up to her mouth, hand gagging her.

"Mmnggh!" she screamed into her hand before deciding to fire a laser beam in Super Girl's direction. The tentacle sensed this and Power Girl's other hand clamped over her eyes, trapping her in darkness. The superheroine wrestled with her clothes, shocked to find that she was not strong enough to resist her clothes or that of the tentacle creature that seemed to now be in control. Power Girl began flying towards the direction she believed Super Girl was in, but the tentacle sensed that too. Her long red cape suddenly wrapped around her entire body like a blanket with the tip just barely touching the top of her boots. It was enough of a reach that a tentacle was able to cross over into both boots.

From there it took over her boots, completing its control over her clothing where it then enacted its next plan. Using

its own replicating ability, Power Girl's tentacle uniform began to spread over her body. Her boots spread up her legs while her gloves began to spread up her arms. As this was happening, the tentacle pleasuring her insides grew in length and girth in the blink of an eye. The tip of it pushed past her cervix and into her uterus while another tentacle, acting like a tongue firmly engulfed her clitoris.

"Mnnng!" Power Girl let out a moan of pleasure that over ride her sense of rationality as a powerful orgasm suddenly struck. In doing so, the tentacle was able to fully take control of her body and flew it away in the opposite direction of Super Girl who was none the wiser of close she was to saving her friend. Forth from the clove clamped over Power Girl's mouth came a mass of tentacle that forced their way into her mouth and throat, sealing off her mouth and acting like a gag. She was

unable to resist them as she was basking in the orgasm, her mind lost in pleasure as the aphrodisiac was now fully in her bloodstream and body. More tentacles began to spread out from the other glove hand and from the neck of her leotard, encasing her head in a swirling of tentacles that left behind a thick slime. In seconds, Power Girl's entire head was encased in slime, leaving her blind to the world as the tentacles continued to draw pleasure and orgasm from her.

Around the front of the cape wrapped over Power Girl's body, appeared a large green eye that began to scan the land below. Searching for a new place to hide and start all over. A new place begin breeding. As it searched, the creature began to pump its tentacle faster and faster into its captive's pussy, drawing more moans of pleasure from her. Despite the haze she was in, Power Girl could

sense the tentacle pulsating, a sign that it was going to cum. She struggled with the last ounce of control she could muster in an attempt to fight back but it was no use. The creature sent a tentacle straight into her ass, shoving it in that Power Girl went cross eyed from the unexpected intruder. Then the tentacle came, filling her pussy with a white fluid that was immediately sent to her ovaries where it quickly fertilized.

"Mng!" Power Girl let out a muffled moan from the flowing sperm into her body as it continued flow nonstop. Then without warning, then tentacles in her mouth began sliding in and out of her throat and mouth. Her body reacted to it, feeling pleasure from the movement. The creature laughed to itself at how easily it had tricked and trapped this strong but fertile human female. Then it spied a spot below in the forest. A cave behind a waterfall.

The perfect place. With Power Girl trapped by her own uniform, the creature guided its breeding captive into the cave where it began to set up shop. The one mighty superheroine known as Power Girl was no more. No longer a superheroine, she is now a seedbed for her tentacle captor.
