I liked this concept sketch for the house so much that I ended up just pasting the original sketch into the comic!

FURNACE!

TEMP!

Two early concepts for the house's heart For this comic I was inspired by "Monster House" and "Mother!".

Here I played with a couple of interiors, some of which I used more than others.

I'm a little upset that I forgot to add the weird cat sculpture from my grandmother's house, now that I'm looking back at this sketch for the bedroom.
