7.2k words

Well, Sue had gotten in touch with Iceland's office of the President, and they were very much interested in a casual private party on the Yacht. They did mention the newly crowned Norwegian King and Queen, would be visiting at that time and Sue was all about inviting them as well, figuring to save us a stop on our NATO familiarization trip.

Sue did mention the Embassy was an optional clothing and free use with permission Yacht and both the President of Iceland and the King of Norway were comfortable with those revelations.

OoO

About halfway through the trip to Iceland, general quarters was sounded for no known reason. Up on the Bridge, Red was on watch when coms announced, "XO! The AI software has detected a potentially hostile submerged craft. It is suggesting we slow down and put out the towed array to analyze it."

"Roger that, Coms, approve the suggestion."

10 minutes later the AI came back with the diagnosis: "XO, the AI is stating it is a new Chinese hǎiyāo (pronounced HayYow') or Kraken and it is taking an aggressive posture. The AI is asking for rules of engagement for this scenario."

"Coms, sound general quarters. Call the Captain, and the Ambassador to the Bridge. Have the AI program two VLWT torpedoes and open outer doors. Do not engage unless fired upon at this time."

Roger, XO. Scenario loaded." General Quarters sounded and Coms got on the horn, "Captain Barnes and Ambassador Walker to the Bridge. This is not a drill. Repeat, this is not a drill, Captain Barnes and Ambassador Walker to the Bridge." Coms then announced, "XO VLWTs in tubes one and two are programmed and outer doors are open."

"Comms, Does the AI think we need to keep the towed array out?"

"Negative, XO. It suggests retrieving it to free the ship for evasive maneuvers."

"Very well, retrieve the towed array."

"Eye XO, retrieving the towed array."

Captain Barnes and I got to the Bridge within seconds of each other. The two LTs not far behind: "XO, sitrep!"

"Captain, we have an underwater contact which the sonar AI has identified as a new Chinese hǎiyāo or Kraken and it is taking an aggressive posture. We have two VLWT torpedoes programmed, and

outer doors opened. The towed array was deployed and is being recalled as we speak to allow for defensive maneuvering."

I asked, "Kraken?"

Barnes relayed, "It is a fully autonomous, unmanned submarine drone. Capabilities unknown but it does carry anti-ship and anti-sub torpedoes. It may be trying to get a type on us, being something not in its list of known ships."

I responded, Yeah, given all the shit we have dealt with lately, I am not comfortable with this thing. XO, you said it is taking a hostile approach?"

"That is the AI's assessment, Ambassador. It launched from its station on the seabed as we passed and is pulsing sonar. I suspect if it is trying to fire a torpedo at us it is having trouble getting a lock with our current speed."

Coms called out, "Captain, towed array is secured."

Barnes nodded, "If it opens an outer door or launches anything at us, take it out and go to flank speed."

"Eye eye Captain." Red articulated, "I have already had the AI load that scenario and it is operating autonomously at this point."

"Good, XO. I fully approve of your anticipating my command. This can get dicey really quick..."

Just then we felt the slight motion of torpedoes launching. I looked at Barnes, "What the hell?"

"Captain! The AI is announcing a torpedo launch from the drone! Sonar confirms!"

Barnes yelled, "All ahead flank! Put that fish directly behind us!" Coms! Advise on the fish with all updates!"

Coms replied, "Helm should adjust to 94 degrees true, Captain!"

"Helm! Turn to 94 degrees true!"

"94 degrees true, Eye Eye Captain! Ship is accelerating to all ahead flank!"

"Captain, the Chinese torpedo is a Yu-4B traveling at a speed of forty-five knots! The two VLWTs, one is CAV one is CRAW are reaching 200 knots. CAV intercept in 5 seconds, CRAW in 15 seconds. The Kraken has gone defensive."

"Helm! Current speed?"

"Captain, the ship is passing through 45 knots and climbing, Sir!"

Barnes smiled, "Even if we miss, there is no way the torpedo can catch us. We just have to maintain speed until it runs out of fuel."

Just then there was a muffled explosion, "Captain, the CAT torpedo has eliminated the Yu-4B torpedo. CRAW torpedo is tracking and ignoring countermeasures. Impact in 4, 3, 2, 1..." Another muffled explosion.

"Captain, direct hit on the Kraken! She is sinking."

"Coms, have the AI mark its range and bearing and calculate its landing place as well as the location of its base. When that is done, get me COMSUBLANT, the State Department, and the Joint Chiefs on a secure satellite feed. Any more fish in the water?"

"No more contacts, Captain. AI is chewing the numbers, Sir. Contacting COMSUBLANT."

"Very well. Helm, bring our speed back to 35 knots and resume prior heading. Coms, Secure from General Quarters in 5 minutes if no other contacts are recognized."

"Eye, Sir! COMSUBLANT, the Secretary of State and Chairman of the Joint Chiefs are on the line, Captain."

"Put us on speaker, Coms."

"COMSUBLANT, Mr. Secretary, Mr. Chairman: this is Captain Barnes aboard the Embassy Afloat. We have just been fully engaged by a Chinese Kraken. Unprovoked, it fired a Yu-4B torpedo at us. We took out the torpedo and the Kraken which is now sinking to the floor of the Atlantic at location..." Barnes looked at coms who gave out the predicted landing spot and the location of the base which Barnes repeated.

"If we act fast we can likely get to the wreckage and base before the Chinese even know what happened."

The Joint Chief said, "Get a group together immediately and send them. I will get the President and rest of the Joint Chiefs together and have them confirm those orders to you. Make this happen yesterday!"

"Eye, Sir! We have some assets in proximity including a Seawolf returning from its latest mission. We can be there in less than 12 hours."

Barnes asked, "It is all recorded, who gets the file?"

The Chairman said, "Send it to Homeland under need to know, I will advise them it is coming. Give me five minutes."

"Eye Eye Sir. Transmitting in 5 tics."

When it was just the Secretary still on the line he chuckled, "Damn if you boys don't keep our asses on our toes. Just try and not start World War Three while you are in Europe. We will be in touch."

Barnes hung up and looked at me with a smile, "Still leery of the AI, Harry?"

"Yes, but it just earned major brownie points. We likely would not have had time to react without it."

Red nodded, "Roger that."

0o0

Barnes and I headed to the auditorium. "Coms, release from GQ and let everyone know there will be a debrief in the auditorium in 5."

"Roger that, Ambassador. I will be sending the file to Homeland in 4. Want a copy?"

"Affirmative. Hand it directly to me when you get a disk burnt. Barnes, Red, it will be in my office if you want to review it for your AAR's which I will want a copy of as well."

0o0

The auditorium was packed... including the reporters.

Barnes began the meeting, "Ladies and gentlemen, it seems we were attacked by an underwater drone of Chinese manufacture working in isolation as an AI empowered device. At this time we believe the machine malfunctioned and attacked us without provocation or instruction to do so."

"Our AI controlled defensive suite responded faster than would have been humanly possible and defeated a torpedo launched at us, which we would have just outrun if ours had missed, and also disabled the launching platform or drone that initiated the attack. The proper authorities have been notified and are seeking all the answers as we speak. Ambassador?"

"Yes, well, while it is a serious situation, none of us was really in imminent danger. Our speed would have allowed us to both outrun the drone as well as the torpedo it shot at us. Our AI detected and identified the stealth drone prior to hostilities, and everything was under control from the outset."

"We do not know at this time if this was an intentional act by some faction within the Chinese military complex or if it was just a rogue AI or if it was a programming malfunction of their system. However, there are U.S. naval assets in route to its final resting place to gather intelligence and claim what can be salvaged according to the appropriate rules and regulations of the open sea."

"Does anyone have any questions?"

The lead reporter asked, "What can we print?"

Barnes replied, "This has been deemed top secret, need to know only, at this time. I would suggest you document everything and Ambassador Walker or I will advise you when or if any of that changes. To that end, talking about this outside of this room would be considered a violation of the Official Secrets Act which carries very stiff penalties up to and including death."

"How far away was the drone before we spotted it?"

"I am sorry, but I know you understand when I say that is classified information. That is something we would not want the Chinese, or anyone else for that matter, to know."

"Is Washington involved?"

"The President, Joint Chiefs, Homeland, and State Department are all aware of the situation."

"Was this an act of war?"

"We cannot answer that question at this time as we just do not know."

"Are we still in danger?"

"While the overall threat level still needs to be determined, we believe the threat level is very low at this time. When we get to Iceland, anyone wanting to do some sightseeing needs to go in groups of 4 and carry your diplomatic cards with you and maintain situational awareness."

"Please also carry a panic button the SEALs will distribute to you should you find yourself in need of rescue. It will note and send its location, is small enough to be swallowed and will still work, and pressing the button once activates it. If swallowed, it will pass through your bowels in about a day."

0o0

That night the yacht held a masked ball... as in a mask was all you could wear. Crew, guests, staff, and security all participated and while it started in the auditorium, it soon ventured throughout the entire ship. The women of the ship got to draw lots and each man got a number assigned at random. I was number 69, my favorite. (Yes, that part was rigged, so sue me!).

The grapevine had let everyone know that Izzy, Xi, Penny, DC, Dennis, and I, along with all the SEALs knew how to Chi enhance orgasms so there were a lot of excited people who got our numbers. It was a tribute to the sexual equality on the ship that the masks didn't hide anyone's identity; but it was fun to play as if it did.

0o0

When we arrived at the port of Reykjavic Melendez and three other female agents were waiting for us at the dock, having flown into the United States' Air Force military base located near the capital city. I personally invited all four ladies aboard, shaking hands and giving each one just enough Chi to make them horny.

"So, ladies, I know Melendez but who might you three be? I am Ambassador Harry Walker, but while here, please address me as Harry."

Melendez gave the introductions: "Harry, these ladies are Haley, the deputy director of our analysis directorate, and Ginnie, deputy director of our operations directorate, and Minerva, deputy director of our support directorate within the Agency. We are here to debrief you on the situation you had while at sea. Do you have a secure area where we cannot be overheard?"

"Indeed I do. Please follow me, ladies."

I was wearing a very tight, tailored, opaque, white silk, long sleeve shirt with personalized cuff links. The top three buttons were unfastened and the shirt easily flared open to show off my chest. I wore a pair of Charles Tyrwhitt tuxedo pants in black twill and a matching vest with just the bottom three buttons fastened. I was also wearing thin black cotton socks with black, highly polished (as with a mirror spit shine), TIMBERLAND PRO Oxford leather shoes which worked with the ensemble as well as being good, non-slip shoes for the deck.

This gave me the appearance of smart luxury that was dressed down to sensual casual. Judging by the irises of the four ladies, my choices had the desired effect.

I stood in the middle of the elevator and had the four ladies take up station around me as we ascended through the decks to my auxiliary command and control center on deck 4. Along the way we passed the hot tub and pool, each being occupied by several nude family who were being very friendly.

Upon entering, I closed the door and had each lady sit in a deep cushioned leather chair as I leaned against my desk, legs slightly parted, my semi-hard cock very evident through the tailored pants. "Ladies, this room is soundproof as well as shielded. So feel free to be direct without fear anyone could eavesdrop on our conversation."

I casually walked behind the three new ladies and touched each one under their ear from behind, giving them enough Chi to make them cum hard for me and temporarily numb their legs so they could not stand up on their own.

I then stood before them, not saying a word, and lowered my pants and underwear, slipping off my shoes, and stepping out of my clothing, "Melendez, my pet, come lean over the side of the desk and provide access to your pussy, please? Your master wishes to reward you."

Without missing a beat, Melendez threw off her clothes, being now in shoes, thigh high nylons and a garter belt. She leaned over the edge of the desk and spread her cheeks, "Master, your sex toy is ready to service you."

"You are such a good girl, my pet. Turn your head so these deputy directors can see your face as I make you cum for me." With that I slipped my cock into her very wet cuntie and took her in long, lightly forceful, and Chi filled strokes as she loudly moaned.

"Mas-ter! Yo-re sex sla-ve has nee-ded her mas-ter's cock so bad-lee!" Was all she was able to say as I sent her on a 5-minute-long orgasm. Just before she passed out, I helped her sit down and walked over to stand in front of Ginnie.

I touched the side of her neck, Chi softly flowing through my fingers as my erect, hard cock covered in Melendez's pussy juices wavered just under her nose. "Ginnie?" She didn't answer, her out of focus gaze staring at my cock. "Ginnie, would you like to lick Melendez's pussy juices off of my cock before I slip it into your pussy or would you prefer just to lean over my desk and let me take you like I did her?"

Ginnie was crying her frustration, "I know I shouldn't, but I cannot say no." She pushed me back a bit, stood up, moved to the desk, lowered her pants and panties, spread her cheeks and blushed, "Just take me, now!"

I slipped into Ginnie's pussy with Melendez's juices still slathered over my cock and went balls deep into her. I sent continuous Chi pulses into her as my balls lightly tapped her exposed clit and pussy lips. Ginnie lasted for about 4 minutes before she partially collapsed on the desk, wailing like a banshee who had met her match.

I then offered my hand to Haley who took it without hesitation. She stood, dropped her dress and panties, stepped out of them, turned her back to me and spread her legs before leaning over the padded leather arm of the chair. "Please." was all she said.

I slipped into Haley as her hand went between her thighs and rubbed her clit. Soon she was drooling on the seat of the chair, giving out animalistic grunts as I took her very wet pussy in fast, hard strokes. My Chi had her climaxing on the first stroke and her whole body shook as she had a 6-minute-long orgasm before she passed out. I pulled away enjoying the scene of three now gaping pussies as I walked over to Minerva.

I moved behind Minerva, cupping her breasts through her clothing, sending Chi through them. "And how about you, Minerva? Do you need me to make you cum, too?"

"Harry, I'm married and ovulating. My husband and I were going to try to have a child when I returned tomorrow."

"I understand. You can still do that with your husband. But, it will be my child you will be having, won't it."

Minerva whooshed out her breath as her body absorbed my Chi before breathing deeply again, "Yes. It will be your child, Harry. My husband will never know."

"Good girl, Minerva. And any time we are able to get together again, I will take your body and send you back to nirvana."

Minerva brightened at the play on words, lifted her hips, slipped down her pants and panties, slid forward in the chair with her knees to either side of her head, exposing her wet, shaved lips and just waited for me to take her.

"I am going to give you my baby cream, Minerva. Your child will be a constant reminder of the sensual pleasure you are now going to receive."

"Yes. Claim my sex, my body, my baby for your own, Master."

My cock slipped into Minerva as if it was sucked in by her sex. My pelvis pressed against her large, exposed clit as I moved the deeply rooted head of my cock inside her. My Chi caused her to climax continuously and gush for a good while as I pulsed my cock inside her.

Melendez had recovered and stood to the side, holding and massaging my balls as I took her body and made it mine. "Cum in her pussy, Master. Make her baby yours. Claim her mind and body to serve you."

Melendez slipped a finger into her wet pussy then slid it into my ass, reaching for and rubbing my prostate as I quickly mounted the wave. Minerva, at some level, knew I was about to cum and she ground her teeth and groaned, "YESSSS!" as my cock exploded and filled her sex with my baby cream.

As I was cumming inside her the other two women joined us and offered soft encouragements, congratulating Minerva on receiving the honor of carrying their new Master's child. Each one wishing they too were ovulating.

Seeing the desire in their faces I smiled, "When I get back to the states, let me know when you are ovulating and I will give each of you a baby, too."

All their faces lit up and promised they would let me know.

After a bit, I pulled out of Minerva and leaned against the desk, "Okay, my pets, time to clean up your Master."

The ladies took turns licking my cock and balls clean, even sucking out what little bit of cum was still inside me. After I was clean, I took off the rest of my clothes and the ladies followed suit.

"Ladies, we are not finished with our sex, here. I need you to sit back in your chairs so you can just enjoy yourselves." They all did as asked, and I helped two at a time climax for minutes on end as I fondled their breasts until they passed out.

When they all came to again Minerva looked at Melendez and said, "You planned this from the beginning. Didn't you. You knew we would be enthralled by him and become his sex slaves just as you had."

Melendez smiled, "Yes, I did. Master said if I did so he would reward me with his cock again. Would you have done any different knowing what you know now?"

All three shook their heads no.

"Ladies, if you wish not to become my sex slaves and do my bidding within the CIA, you need only say so now. Of course, that will terminate our relationship."

Haley shook her head, "Fuck that! Even knowing what Melendez did, knowing what you have done, I will never stop craving your attention, Master. Anytime, anywhere, public, private, or in a porno film... just say the word and you can have me."

All the ladies agreed with Haley.

"Ginnie half asked, "Okay, you are subverting the CIA for a reason. Please, can we know the depth of our treason?"

I smiled, "I am sure some of you know what happened at GITMO when my people were put in danger. I will not have that happen again. I want each of you to do your jobs just as you have been. When and if I become President, you will be heads of your departments or better. All I ask is you give me a heads up if my family or my people are going to be put in harm's way or sabotaged so I can prepare and defend everyone."

Ginnie laughed, "That's it?"

I nodded, "That's it. I just want to protect what is mine from those who are stupid enough to not leave me alone."

Haley responded, "And for that, we get to fuck you whenever the opportunity presents itself?"

I smiled, "You are all beautiful women. I would love to have meaningful relationships with all of you, clandestine or otherwise when the opportunities arise. And when I am in the Senate or White House, regular consultations will be the norm."

Realizing they didn't have to betray their country had all the women smiling from ear to ear.

Haley then got down to business, "Harry, that sub was fully autonomous. However, there is a Chinese director, an underling of the person you killed, who had a programmer put in the sound signature of your ship with a directive to sink you if the opportunity arose."

Ginnie nodded, "A surgical strike has been authorized, should you wish to pursue it. But it would be strictly black box, off the books, and would be fully denied by all departments in Washington. We have a person in-situ who knows their itinerary and can coordinate with you via secured satellite phone at this number (she handed me a slip of paper)."

"Anything you need for the mission will be channeled through the base here. No paperwork. Call the base commander personally and let him know what you need at this number (another slip of paper with the name and number of the commander). Your code word for recognition is hammerhead. Do not use any names or ranks when speaking to avoid identification should the system be hacked."

I nodded and asked, "Is it acceptable if I leave a notice?"

"Be discrete. We don't want anyone in China to think it was us killing one of their high military officials. Very bad optics."

"They will never see me coming or going."

With the business concluded I noted four sets of hungry eyes on my cock, and I thought to myself, * Thank goodness for Dad's erection meds. This is going to be a long 'briefing'. * I snickered at my unintended pun.

I grinned and asked, "Which of you ladies would like to try anal with her new Master?"

All four hands went up and I reached into my top left drawer for the 4 butt plugs and Dad's anal muscle relaxing lube.

Long story short, the one I was taking anally was laying over the desk on their back with one woman suckling each nipple and the fourth lowered her sex over the recipient's mouth for some clit smacking pleasure. I forbade anyone else touching their clits as I wanted them to fully experience an anal orgasm. Each one cried or whimpered their way through one and it was the first anal orgasm for all of them but Melendez as she had her anal virginity taken back at GITMO.

It was getting time for lunch and I asked the ladies, "Do any of you have second thoughts?"

A chorus of nos filled my ears. Good. Let's go to my quarters and get bathed for lunch. Leave your clothes here and a maid will pick them up and clean them for you so they will be ready before you have to leave."

"Harry, can your people be trusted? We will all be nude."

I nodded, "Yes, without reservation."

0o0

All of us walked to my quarters, each of the ladies sporting butt plugs, and the family all waived at them, giving them a warm reception without guile, jealousy, or reproach.

Haley commented in the shower as I was washing her body, "This is a whole different world, ladies. We are not in Kansas anymore."

At the end of the shower I mentioned, "You are safe to take out your butt plugs now, Ladies."

Melendez drew a line down my cheek with her finger, "My dear Harry. Your sex slave WANTS everyone to know you fucked her in the ass. This girl will be keeping hers in all the way back to Washington."

The others agreed, thinking that was a wonderful way to remind them it was not a dream.

0o0

The women literally pranced to the table where the family had made room for them to sit near me. All four of the ladies proudly showed off their butt plugs to the family, too much encouragement. Xi spoke up and asked, "Dragon Master, have you had sex with them while manifesting your dragon form? If not, you really should."

Sue laughed, "Xi, I'm not sure new additions to the harem are quite ready for that. It might scare them to bits."

Well, THAT was the wrong thing to say. All four of them begged me to show them. I sighed and backed away from the table, stood up, channeled my Chi to full and released my dragon aura with a great, deep roar.

Melendez and Haley were closest to me and both women screamed as they had spontaneous climaxes. Jinnie and Minerva both had whole body flushes and Jinnie drew in deep breaths saying, "My! How can I be so horny again? I just came a dozen times!"

Minerva was just stunned and meekly replied, "And I am having his baby."

This stunned all the family and all the women, including Izzy and Penny, approached her and gave her a huge hug and congratulated her. Xi whispered in her ear, "Dragon Master is very virile and very potent. He will give you a strong child."

I am not sure why, but every woman at the table then felt it was important to share their first experience climaxing with my Chi manipulation. Sue making sure I was embarrassed by mentioning the first time I took Xi with my dragon aura out, cutting and bruising her ass in the process.

Xi had my back, though, "It was GLORIOUS! I was so overwhelmed by his power and majesty!"

The four ladies then demanded I take them again after dinner while manifesting my draconic aura. I asked if they were sure, as I tended to be a bit heavy handed when I did that. Damn if my confession didn't make them want it even more!

OoO

Dinner was very good, as usual, and all of us decided to visit the sauna to sweat out some of the calories. There was a lot of teasing going on with us guys since we couldn't maintain an erection in the moist heat of the room. But my four new sex slaves gladly joined in the showing off of bare pussy lips and hard nipples. That certainly didn't prevent us guys from being hands on and giving our verbal appreciation.

At one point I had all four of my enthralled CIA ladies two abreast, ;-,) and facing each other. I slipped a thumb into two of their pussies as Xi did the same with the other two. The ladies fondled each other's breasts and had long, deep kisses with each other as they came several times before having to sit down.

After getting a bit over heated, we all jumped into the pool to cool off and rinse off the sweat before I got out of the pool and motioned for Melendez, Haley, Jinnie, and Minerva to follow me to the Master Lounge area. Sue, Xi, Cathy, and DD came with us.

I had the four newbies sit in a long couch on a separate leather cushion, had them slouch so their pussies were right at the edge, and open their thighs to expose their sex to me for my viewing pleasure.

The others just sat around to watch.

I looked at the four and said, "Repeat your safe word which is APPLE." which they all dutifully repeated with nods. After their verbal response I backed up and manifested my draconian aura to

its fullest extent. I looked each of them in the eye and noted the fear, but also the trust and the danger lust they all were expressing.

I went to Melendez first and expressed these words in a deep, guttural voice of power, "What is your safe word!"

Melendez tried to swallow before answering, "Apple."

I knelt on the cushion before her, threw her legs over my shoulders, and took her. I let my aura leak just a tiny bit so everywhere I touched her was like an electric charge flowing over her skin... including inside her vagina when my cock slid to its root and from my balls as they bounced off her ass cheeks.

As soon as I took her, Melendez's body tensed as if she had grabbed hold of a 20-amp circuit and she jerked explosively with each clench as she was instantly surfing her waves of continual climaxes. When she stopped trying to breath I pulled out and moved to Haley. Without asking she proffered, "Apple," and I entered her the same way I did Melendez.

Haley's reaction was the same, but I did enjoy that she kept eye contact with me. While Cathy and DD were making sure Melendez was okay I wantonly sluiced Haley's pussy until she also quit trying to breath. And I moved over to Jinnie who whispered, "Apple" as she lifted her ankles to my shoulders.

Last came Minerva, her eyes reflected pure awe and devotion as she also whispered, "Apple."

"You, my pet, will receive your Dragon Master's seed. Bear our child with honor, raise him well." With that I entered Minerva and after just a few strokes, while she was still breathing and coherent as her body convulsed in ecstasy, I came hard, and my balls flushed her sex with my cum.

Minerva slumped as she felt the hot, potent cum of her dragon master bathe her womb... there being no doubt in her mind she was now pregnant.

The ladies soon guided the four to the hot tub to help mitigate the trauma their muscles had just endured, advising them to soak for a bit as max doses of Ibuprofen were administered with electrolytes.

As the rest of us lowered ourselves into the hot tub, Minerva asked, "You aren't really human, are you?"

Sue giggled, "Oh he is all man, Minerva. Just a very exceptional one."

Haley said, "None of this can go in his file. If the powers inside the CIA, FBI, Homeland, or certain circles in Congress catch wind of what he can do, they will stop at nothing to eliminate the threat."

Melendez smiled, "Which is why I said nothing to you prior to meeting him."

Jinnie blew out a deep breath, "Yeah, good call on that one Melendez."

Haley said, "No mentioning this out loud on the plane or in our vehicles or anywhere near our phones. The Agency has everything tapped, recorded, and watched."

Jinnie murmured, "Oh shit."

I laughed, "This ship is secure. Nothing gets in or out without being allowed on an individual basis. We are an elite black hole."

Haley nodded, "Be that as it may, what happens if you are attacked by a nuclear device?"

I nodded in understanding, "Well, we are fully EMP shielded. We have a decontamination wash down system embedded all around the ship exterior, and even the windows are quadruple layered with an external layer of transparent aluminum with a mated sheet of RS-250 lead infused glass to the inside of that sheet, a nitrogen gas filled void, leading to a layer of barium--borate--fly-ash glass which is mated to the outer layer of transparent aluminum."

"The result is a transparent 6.5 inch window that is impervious to 50 caliber rounds as well as fully reflective/absorbing of gamma radiation. And with our height, width, and length, even a 100 foot tidal wave would not be able to topple us. So, barring a direct hit, we would survive."

"And getting a direct hit would be difficult." We can kill incoming torpedoes with our VLWT torpedoes, incoming missiles, even hypersonic ones, with our SM-5 loadout, and our outer walls are impervious to 20-millimeter Vulcan phalanx rounds."

"Impressive," Jinnie replied, but what happens when the Navy wants its ship back?"

I laughed, "I own this ship outright: lock, stock, and barrel."

All four ladies raised an eyebrow to that one.

0o0

All too soon it was time for the ladies to leave and catch their flight home. Their clothes freshly cleaned, the hot tub had lessened the soreness of their muscles, though not quite eliminated it, and they were able, with concentration, to walk properly.

I went to my command room to call the base commander as the ship got put in shape to accept our guests. Last minute I found out the King and Queen of Norway were visiting and had also been invited to dinner.

0o0

"Yes, this is hammerhead. I need two replacement VLWTs and a GBU 39 discretely delivered dock side at 3:00 am local as well as a crane to assist with."

"Understood hammerhead. They will be there at 0300 local."

I hung up and got hold of our Chief, "Chief, I need you in my command center, please."

0o0

"Oh shit! I motherfucking knew better!"

"What's up Chief?"

"The Ambassador, the husband of the woman we fucked in the engine room, wants to see me in his command center. Fuck! Well boys, I will take the heat for all of us. If I don't come back, light a candle for me."

The Chief did a walk of the dead to the command center, "You wanted to see me, Ambassador?"

I looked at Chief, a bit confused, "What's the matter Chief?"

"Sir, I should have known better than to mess with your wife. It is all my fault. The boys under me were just following my lead."

"Um, spell it out, Chief."

"I'm sorry I fucked your wife, Sir. She seemed so enthusiastic and well, we don't get many visitors in engineering."

I raised an eyebrow, trying my best to not laugh, "Chief, how many times have you had sex with my wife?"

He looked at his shoes and softly said, "Twice, Sir."

I nodded and called Sue and Xi to the command center. They quickly walked in and stopped short, knowing something was up by the waves coming off of Chief. "Hon, Chief is telling me he has had sex with you on two different occasions, is that correct?"

Sue immediately caught on and smiled, "Yes Harry, I did."

"Did he treat you well? Did you enjoy it?"

"Oh, yes, I enjoyed it very much. He was very complimentary."

"I see. Well, Chief, what am I going to do with this oversight?"

"Just let me take it for the crew, Sir. I was in charge."

"Hmm, I don't see how that would be quite fair. Sue, Xi, I am very concerned about our Engineer and his mates not getting enough sex. Would the two of you please make sure they get some attention either personally or by making suggestions to others on a regular basis for them?"

Chief flustered then, "Wait! What?"

"Chief, I am sorry you and your personnel have been so sexually neglected. We will make sure to rectify that situation."

"You... you mean you didn't call me up here to kill me for having sex with your wife?"

"OH HELL NO! My wives can have sex with whomever they wish! I needed to let you know that at 0300 we will have a crane on the pier and two torpedoes that need loading and a GBU 39 glide bomb that needs storing for a week or so."

Poor Chief had to sit down and wipe his brow. "I am sorry I caused you so much stress there, Chief! You going to be okay?"

"I thought I was a dead man walking, Sir."

"Okay, stop with the Sir crap. It's Harry."

Sue and Xi walked over to Chief, and both gave him a big hug. He was still hesitant, and I just shook my head and laughed. Sue stood and said, "I know how to get past this immediately! Chief, stand

up please?"

He did so and Sue leaned over the desk, spreading her cheeks, "Slip it in, Chief. Just like you have before. I know you have a kink about taking a pregnant woman."

Xi helped Chief to drop his trousers and move him towards Sue. Thing is, he couldn't get hard. Xi looked at me and I nodded yes so she leaned over and took him into her mouth, sucking on his thick cock to get him hard for her sister/wife.

"Cool, Chief! Now you have had your dick in both my wives!"

Chief just said, "Fuuck!" as Xi used her skills to get him hard in record time. She then guided his cock to Sue's bare pussy, and he did the rest; taking hold of Sue's hips and rapidly taking her as I watched.

I had Xi come around the desk and present her pussy for my relief and Chief and I fucked both my wives until we came inside them.

Sue then came over to clean my cock as Xi moved over to the Chief to clean him up. I looked at Chief and asked, "My apology accepted?"

"None needed, Amb... Harry. It was all my misunderstanding."

"Well, no matter the issue, I want you to feel comfortable talking to me about it. We are good?"

"Sue was right, Harry. After fucking her and cumming inside her slick pussy in front of you, I would not be hesitant to talk with you about anything in the future. And my boys will get the munitions loaded for you without issue."

"Thank you Chief. Let your people know I very much appreciate all the good work they do."

Xi smiled and said, "With Dragon Master husband's agreement, Xi would like to take both mothers, Izzy, Penny, DD, Cathy, Beth, Red, and Sue down to Engineering and fuck everyone's brains out."

I was so proud. This was the first time Xi had gone there. "My beautiful flower, your husband would be upset if you didn't. Make it quick, though as we have guests coming for dinner!"

Xi giggled, grabbed Sue and Chief and rushed out the door with them both in tow.

I got hold of Comms, "Please have all the engineer's mates meet in the port side bow engineering space for a meeting."

0o0

Word spread like wildfire about Chief being called up to the command center. When the call came out for all the mates to meet in the engineering center, asses puckered.

They all got there in record time and the speculations ran rampant... up to and including the murder of their Chief. To say everyone was surprised to see 11 nude, smoking hot women, 5 of them wives and almost all family members of the Ambassador, walk in with the Chief leading the way would be akin to saying the Atlantic Ocean was full of water.

Chief smiled and announced, "If you are still wearing pants, you are a damn fool!"

"Chief! You da MAN!"

OoO

Barnes had asked me if we wanted to play the official songs for the President of Iceland and Queen and King of Norway as they boarded the Yacht. I thought about it for a second and decided that would defeat the whole idea of a relaxed, informal dinner so I nixed it. And I am glad I did.

As the two middle aged couples approached the ship, it was obvious they were all dressed very casually. It had not gotten cold yet so their heavy coats were open in front and showed colorful light sweaters, casual pants, and such. I was so glad I had decided to change into a tan pair of jeans and a matching vest over a pull over top.

Both Xi and Sue were dressed in short skirts and colorful sweaters so everyone immediately began to relax.

I walked up to the entourage and made introductions: "May I present both my wives, Xi and Sue Walker. I am just Harry, please. It is an honor to receive you for dinner and some entertainment this evening.

The President of Iceland introduced his group: King Harold VI and Queen Anne and I am Aron and my friend Silvia.

I offered my hand to King Harold and he took it, smiling broadly, "I am just Harold, Harry. Well met."

"Thank you, Harold. M'Lady." I bowed politely.

"In the theme of the evening, please, just Anne." She smiled as she offered her hand. I took it and softly kissed her hand.

"Anne it is. Thank you both for the courtesy."

I then shook hands with Aron and Silvia, kissing her hand as well. "Aron and Silvia, it is a distinct pleasure. We are so happy all of you could make it." Xi and Sue gave their pleasantries as well, Xi speaking fluent Icelandic and Nordic, pleasantly surprising them both.

"Please, shall we offer you a tour of the Embassy?" All four were looking forward to it and I let Xi take the lead, being the only native speaker.

As we began the tour, Silvia mentioned, "You have submarines. I have always wanted to have sex in a submarine, I think it would be very exciting."

I mentioned, "If everyone is interested, right after dinner we can set that up with both subs facing one another if you like."

Anna smiled, "Perhaps with Harold and Aron in one and Myself and Silvia in the other with some agreeable partners?"

I winked at Anna, "I can see no issues with that at all."

As soon as we were inside...
