Later I learned that Xia Yuxuan was a graphic model, had taken photos for many Nazhi, and was a famous ginger makeup artist in a certain book. No wonder when I first saw her, I was so nervous that I couldn't speak.

The ordinary girls I meet around me are completely incomparable to her. She seemed to be surrounded by a halo of halo as she stood there. Even if she was just wearing a casual white T-shirt, her hair rolled up casually and going downstairs to buy something, she still exuded a confident and proud temperament.

Pixiv: www.pixiv.net/users/100328105

Lin Luzi

My favorite part of every day is when the cat is behind the door, secretly smelling the fragrance through the peephole, and how she appears in the corridor. Even through the peephole, you can still smell the lingering scent of lily of the valley in her hair.

I figured out the schedule of their fiancées, and every time they were not at home, I would secretly bring in the shoes at the door and play with them. What I look forward to most every time is from spying on Xia Yizhou to wearing the shoes she changed.

My frequency of masturbating while wearing women's clothing gradually got out of control, and I would do it almost once a day. But as time goes by, the stimulation brought by Zeng Shi's women's clothing becomes weaker and weaker, like scratching an itch that's just missing the mark, and it's always a bit uninteresting.
