Episode 23 - Chapter 2

## Samy get Trained

Samy was still fast asleep on the couch on which Innka and Tao had laid her to undergo the first modification to her breasts. The slight rise and fall of Samy's breasts showed that she was still fast asleep and unaware of the changes to her body. The after-effects of the procedure were still lingering.

Tao checked the effects of the last treatment again and was very pleased with the result. The skin showed no signs of irritation and the initial swelling had reduced as expected. „You see,“ Tao said to Innka with a satisfied smile, „the procedure is still having an effect.

The tissue is stretching evenly and I think it will stretch a little more in the next two to four hours. That means we can achieve the desired effect sooner than planned." Innka nodded in agreement.

Tao could now move her finger more than halfway in and played with it a little to test the elasticity of the fabric. „You see,“ she said to Innka as she watched the movements carefully.

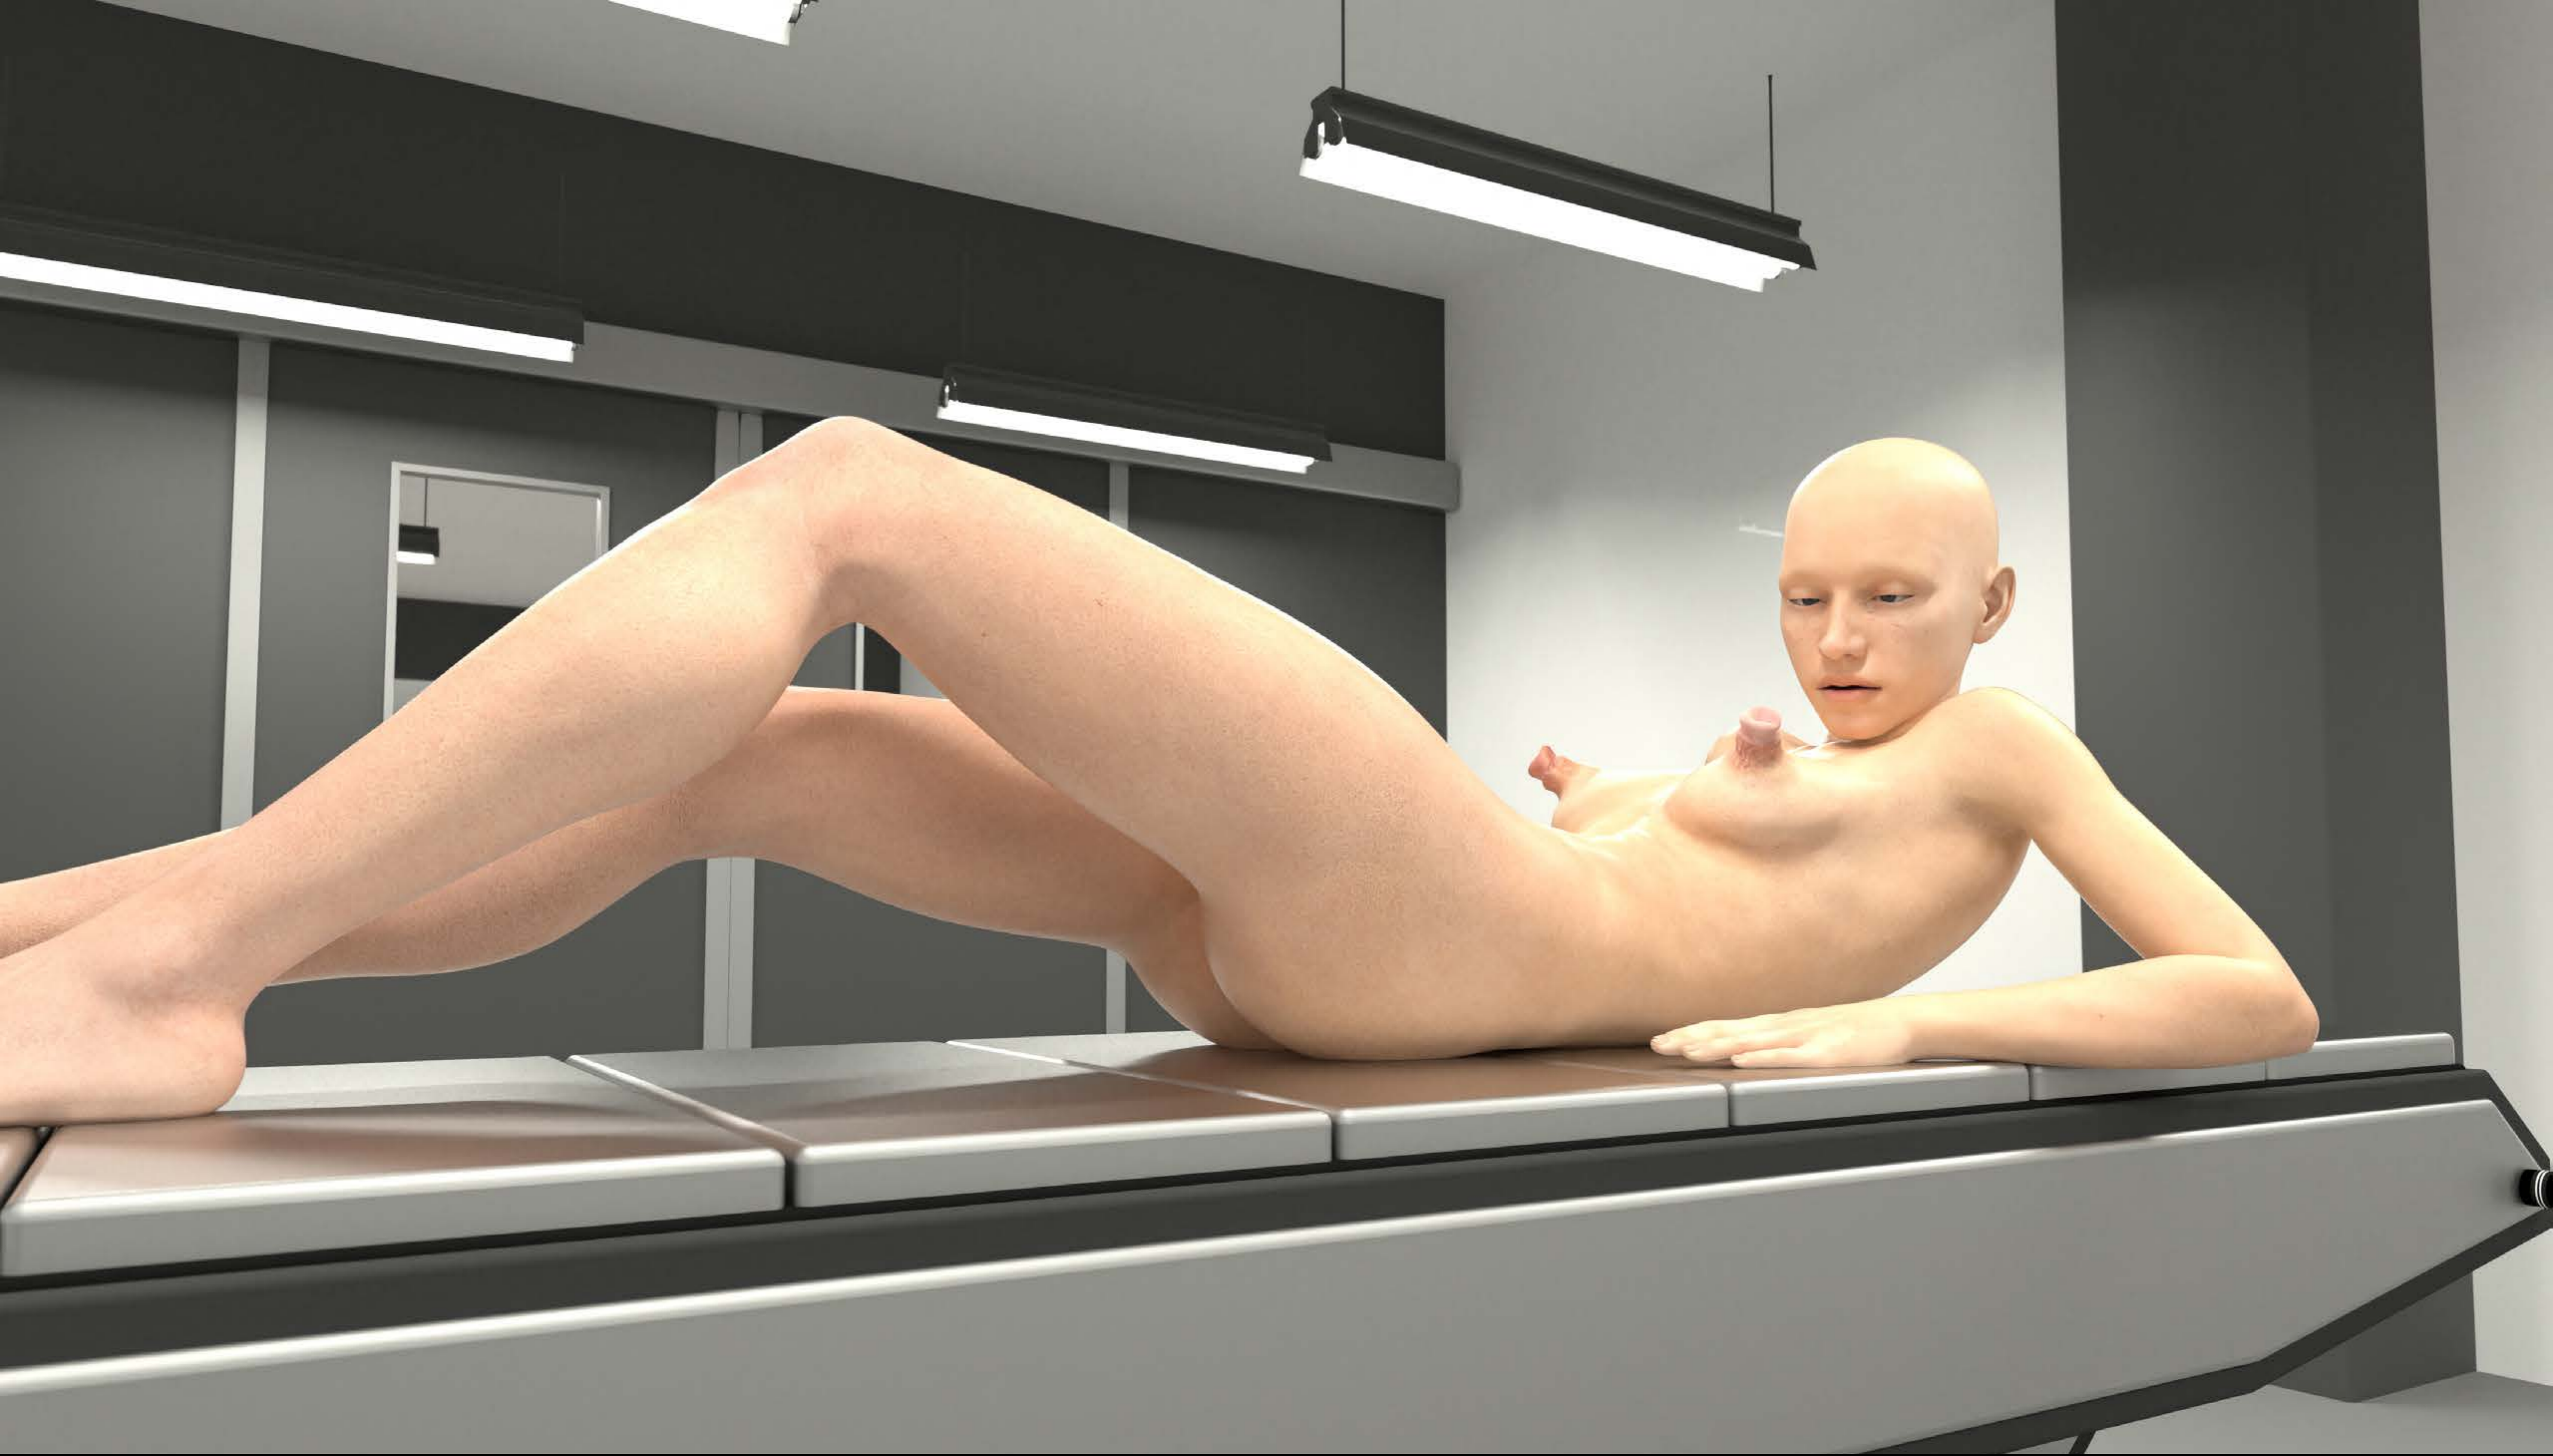

Innka watched attentively and asked Tao: „Can I test it too? Are you aiming to be able to insert several fingers later?“

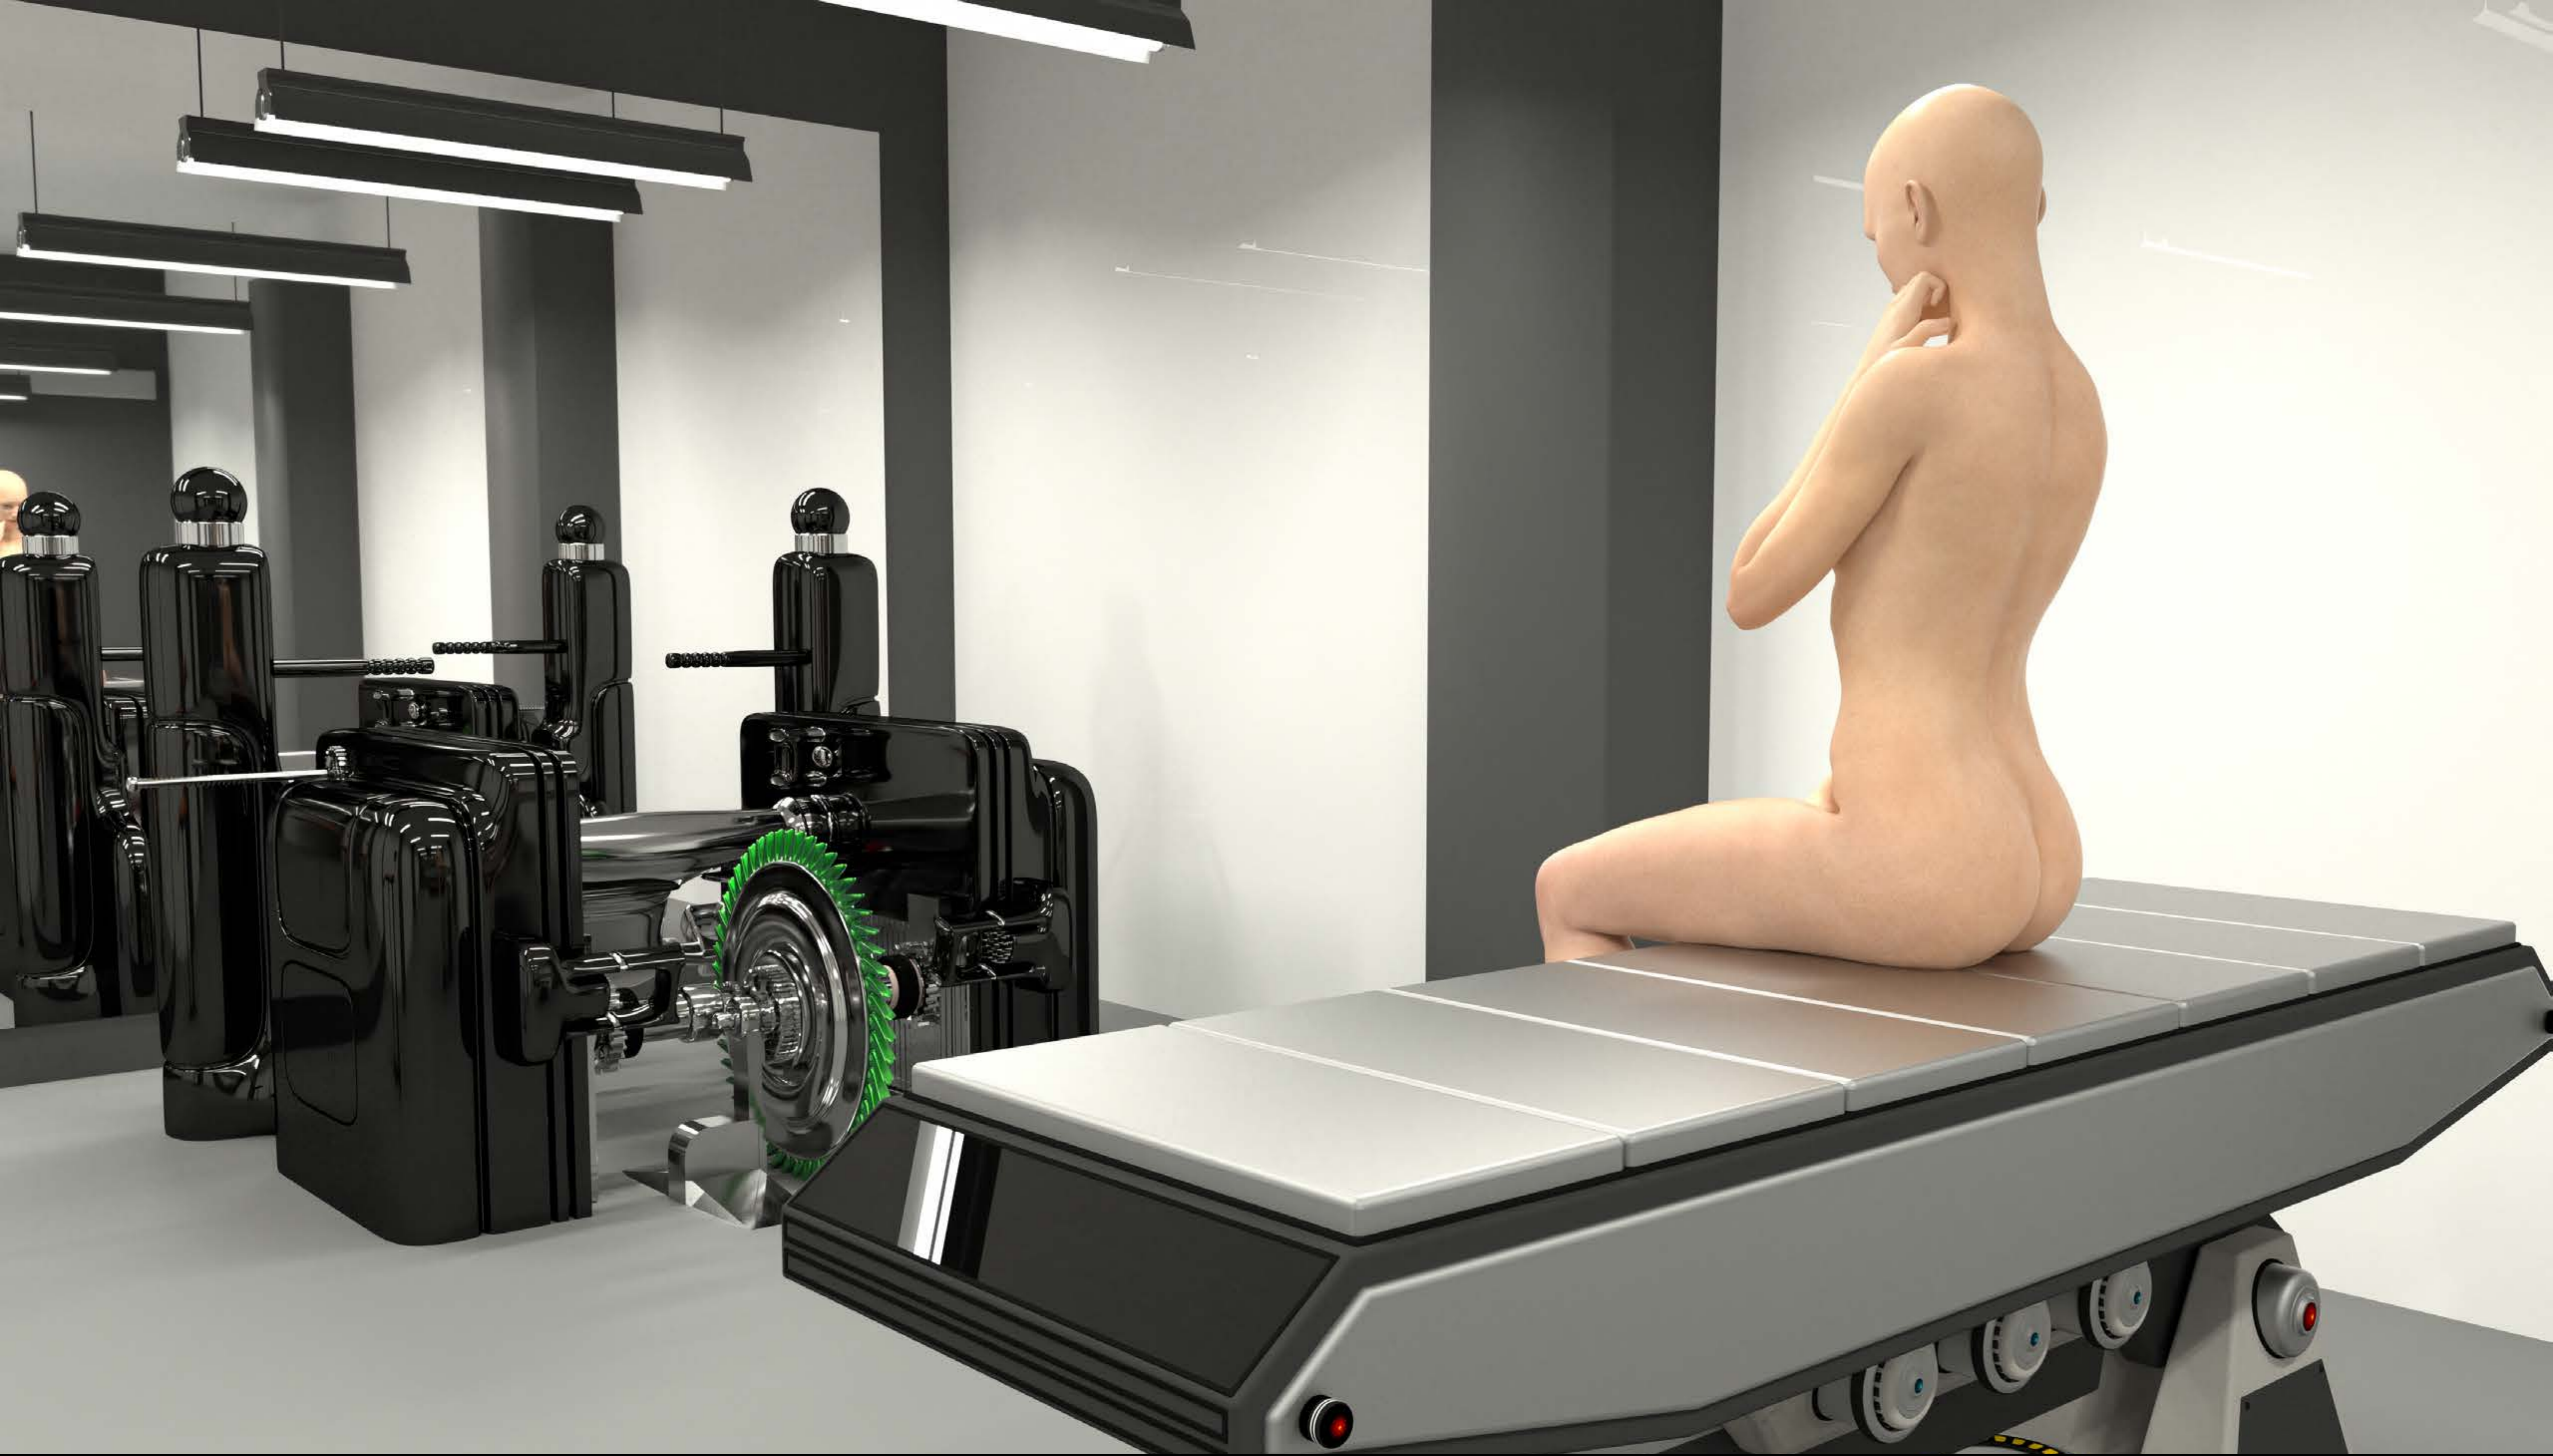

Tao looked at Innka and said with a meaningful smile, „Dear, we’re not just aiming to be able to insert several fingers, but the whole hand.“ She held Innka’s gaze and added, „Our goal is to make the fabric so flexible and stretchable that there are no limits. Every movement and every stretch we test now is a step in that direction.“ Tao slowly withdrew her finger and showed Innka how the fabric contracted again to demonstrate its remarkable elasticity.

Shortly afterwards, they left the room to make the necessary preparations for the next stage of the process. In the meantime, Samy slowly woke up and tried to sit up in a daze. She blinked a few times to become more aware of her surroundings.

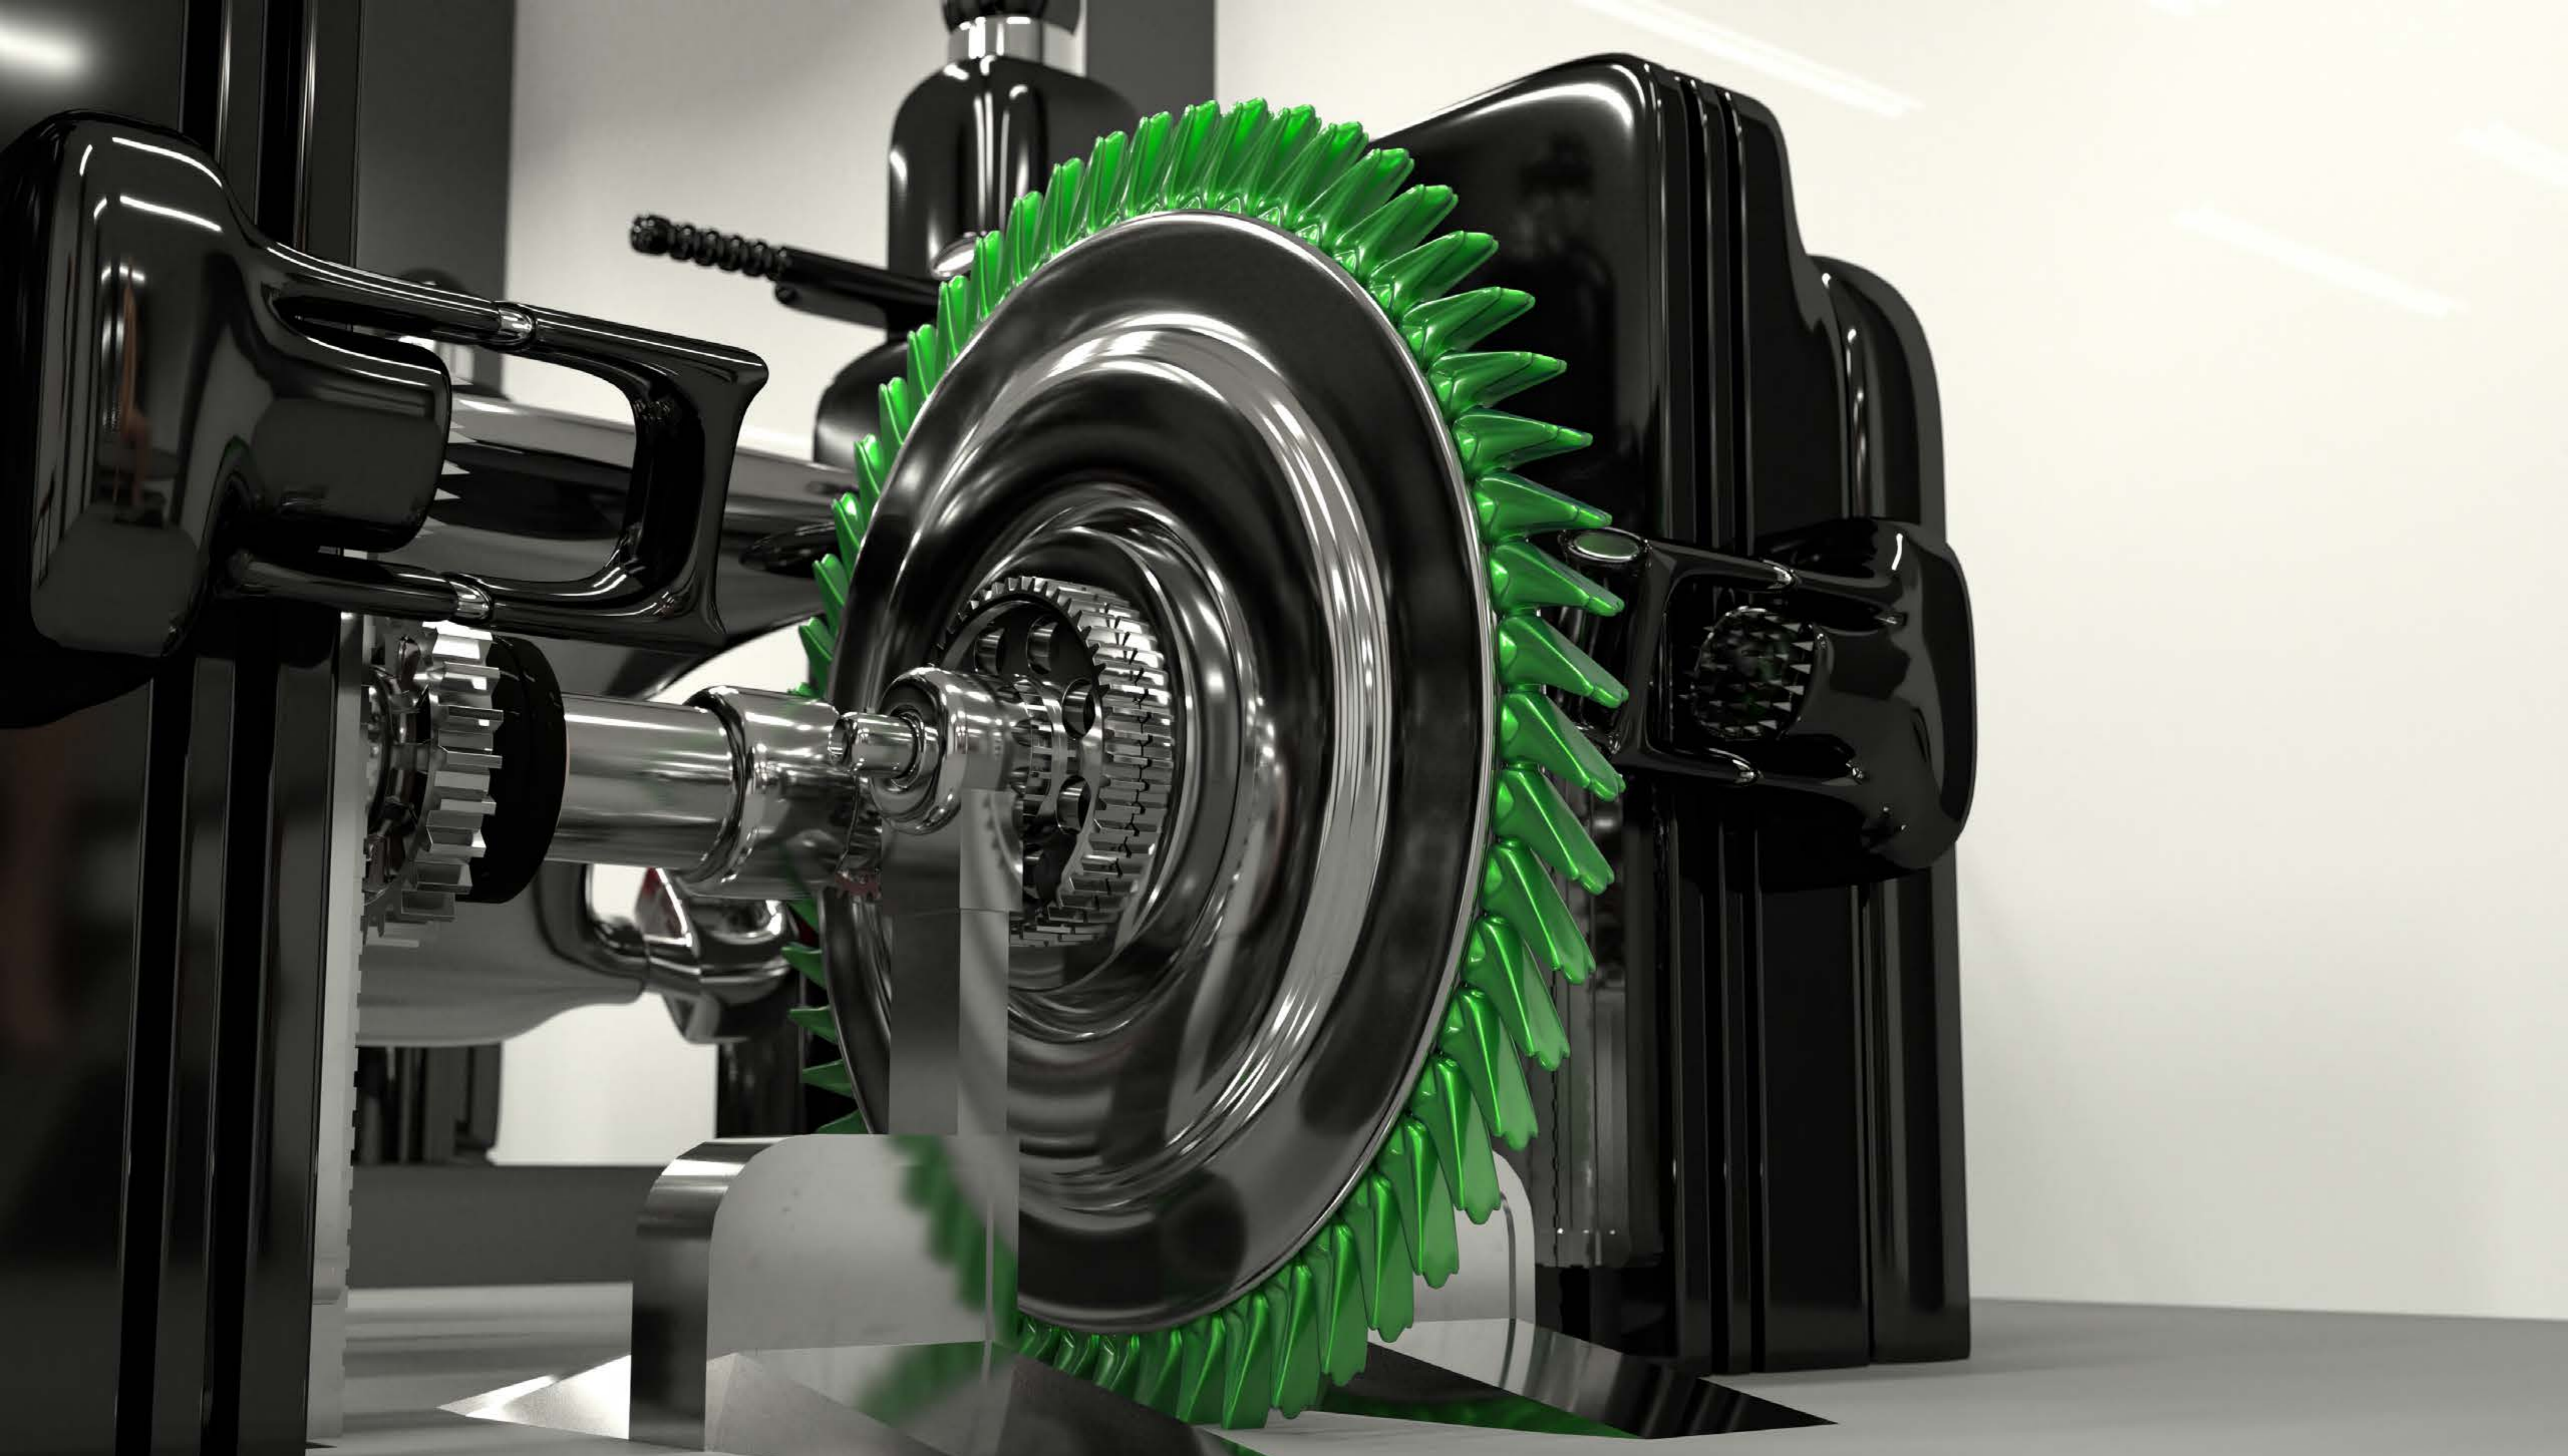

She looked around a little and then tried to sit up a little further. With trembling arms, she leaned on the couch and managed to slowly straighten her upper body. Her eyes wandered around the room as she tried to organize her thoughts and shake off the drowsiness.

Samy took a deep breath to gather her strength and absorbed the first impressions of her surroundings. Slowly, her memory returned. After another brief effort, she managed to sit up completely. Her eyes wandered to the huge device in front of her, which she now examined more closely.

The huge wheel with the many green tooth-like projections attached to it looked intimidating, but at the same time they aroused a strange fascination in her. Samy tried to understand the functions of the device.

She couldn't imagine what exactly this device was used for. At first, she tried to understand how a person could fit in it.

A voice behind Samy said, „Hello Samy, I see you’ve woken up. How are you?“

Samy turned slowly and saw Tao standing in the doorway. „I still feel a little woozy, but I’m fine,“ she replied as she straightened up. „This device here... I’m trying to figure out exactly what it’s used for. It looks pretty complex.“

Tao walked up to Samy and smiled reassuringly. „I understand that. It really is a fascinating device. It's designed to stimulate the tissue to increase elasticity. We'll use it in the next phase of your treatment.

„How are you feeling? Does anything seem strange or are you in pain?“ Tao asked as she looked at Samy with concern. Samy took a moment to listen to herself. „I feel a bit woozy, but otherwise I’m fine,“ she replied. „There’s no pain, just a slight pulling sensation in my breasts. Somehow I feel like I’ve had a climax.“

Tao nodded in understanding. „That’s normal after a procedure like this. The slight pulling and the feeling of pleasure will soon subside. It’s a sign that the tissue is responding to the treatment.“ Samy took a deep breath and asked: „And what happens now? What’s the next step?“

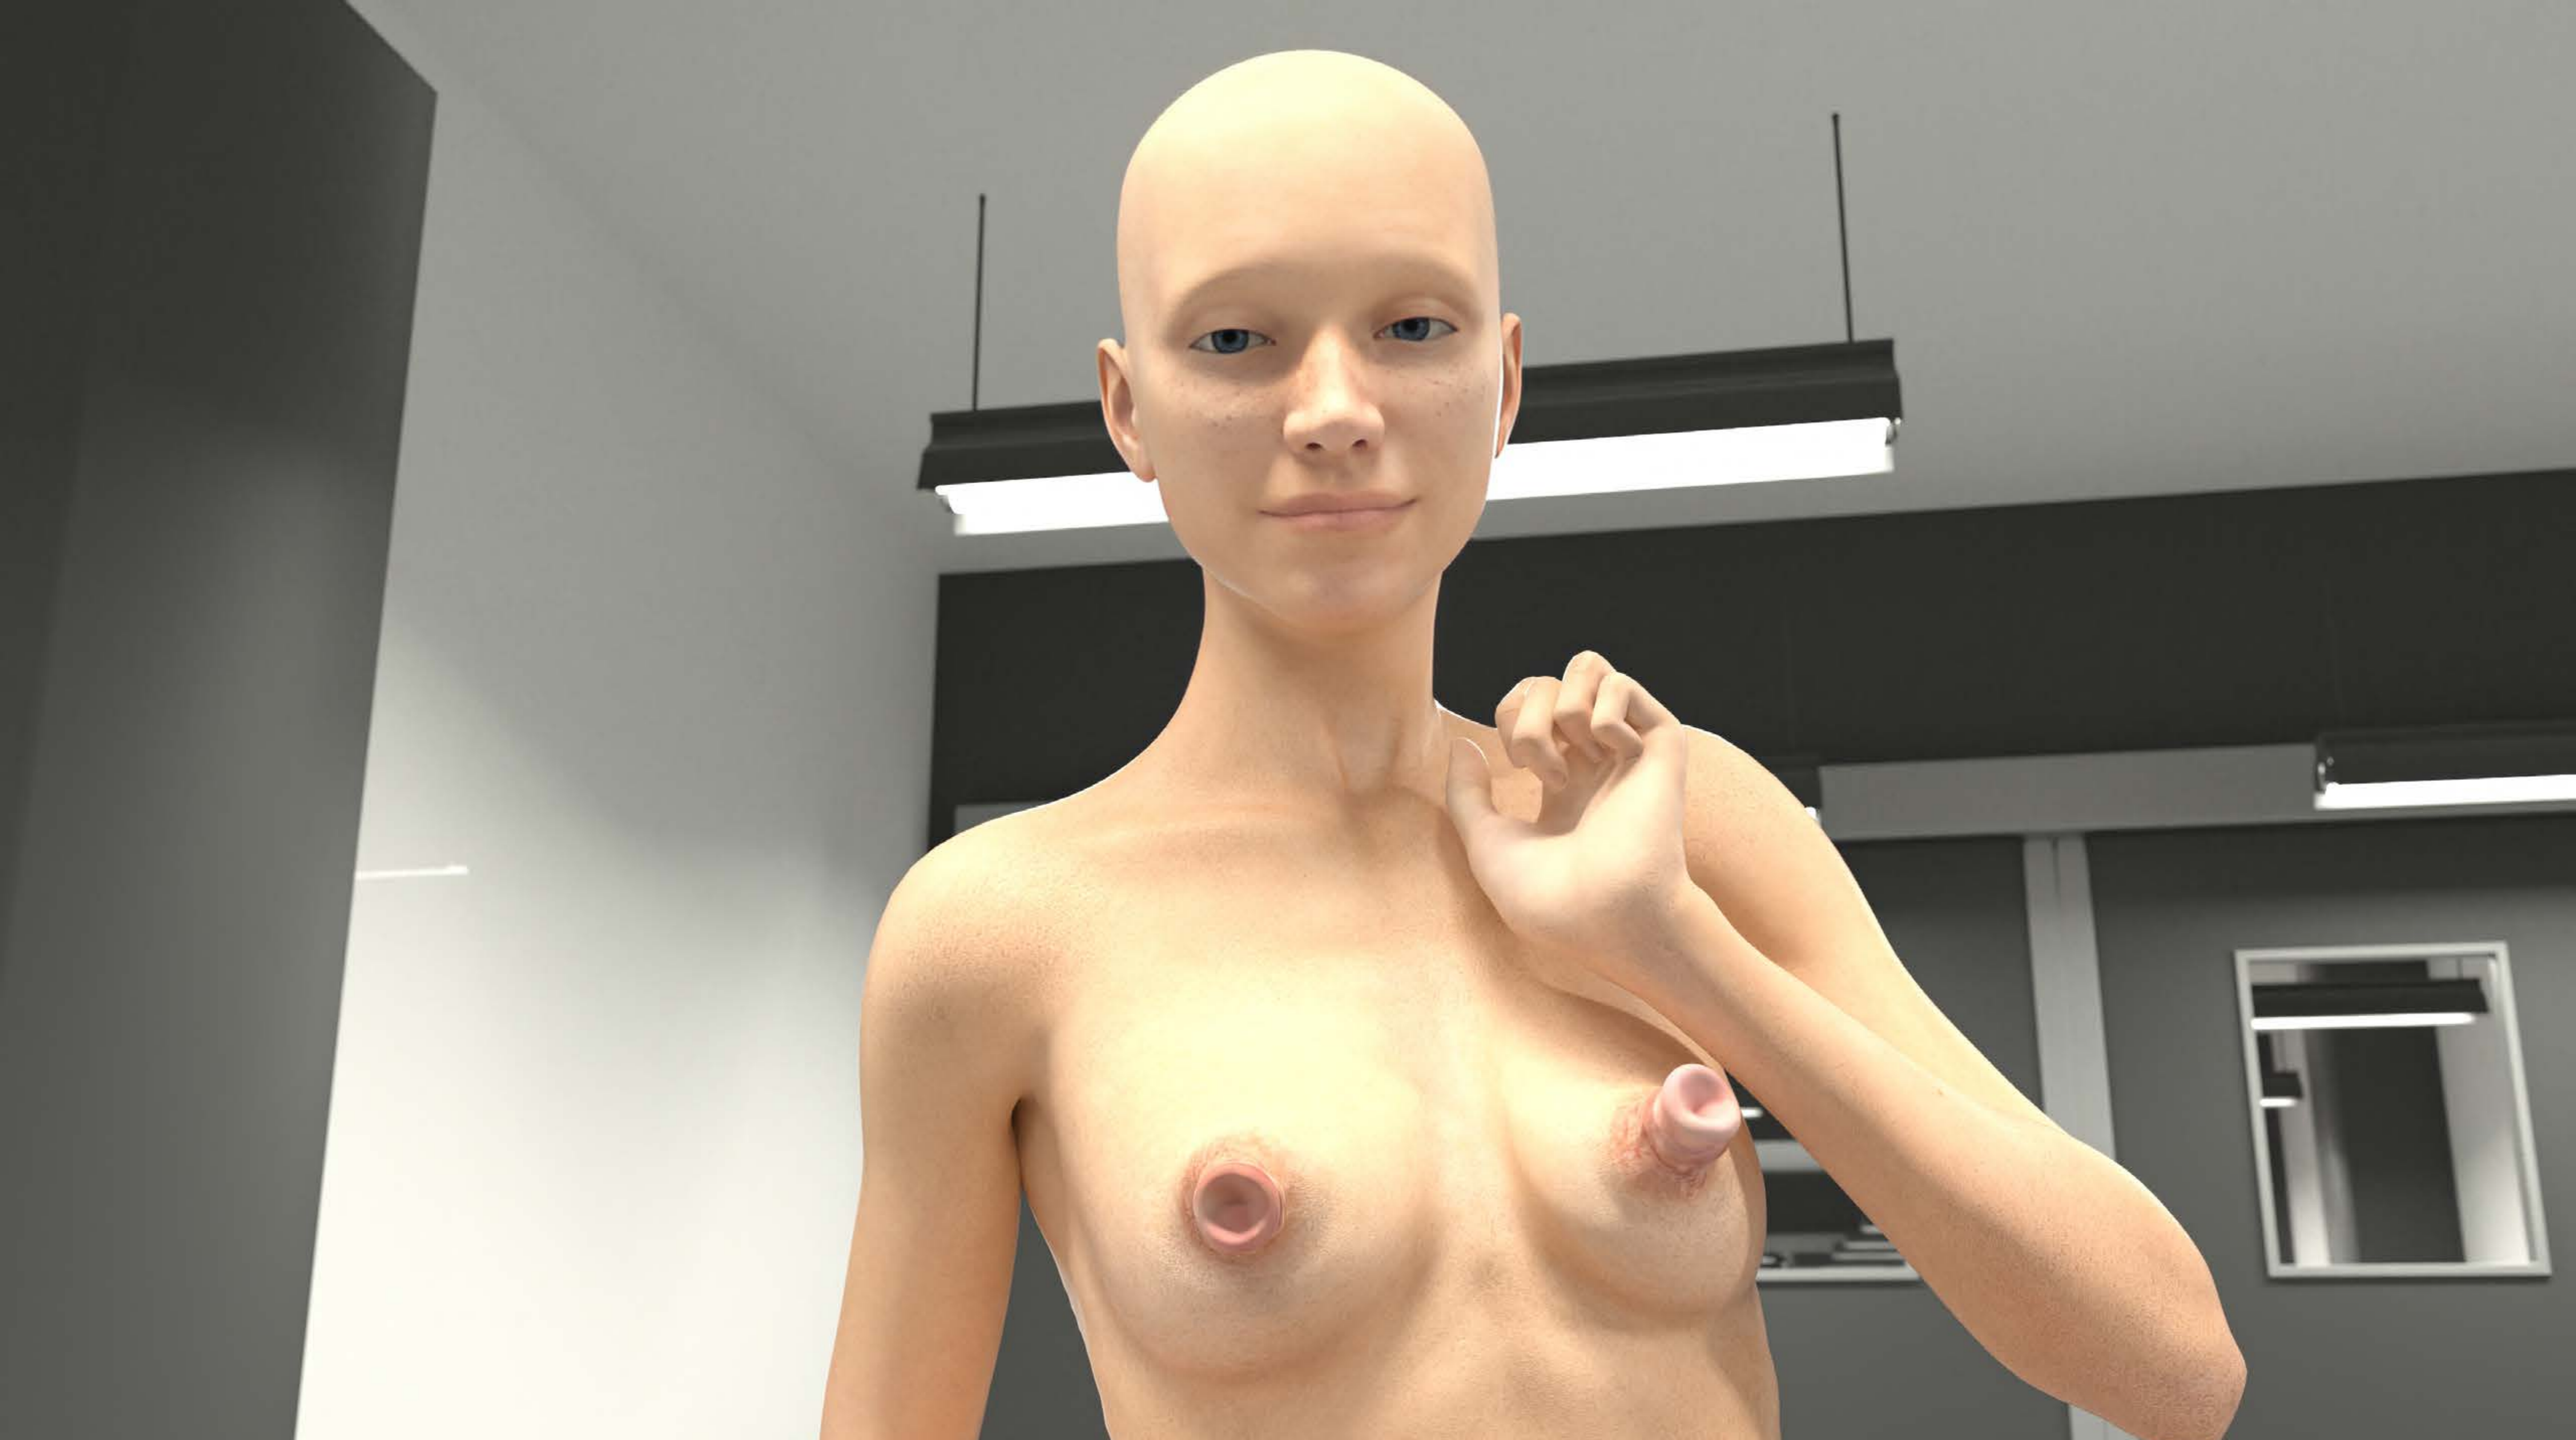

Tao smiled reassuringly. „The next step will be for me to explain the device to you in more detail and show you how it works. You’ll be thrilled. Its effects will make you very happy.“ Samy nodded, feeling a little more confident. „Okay, I’m ready. Let’s get on with it.“

„You must have noticed this huge wheel with the green rubber lips, right?“ asked Tao. „This wheel will turn later - sometimes slowly and then again very quickly. The rubber lips can also change in length and direction.“ Samy looked at the wheel again, now with a clearer understanding. „Yes, it’s hard to miss.

Tao stepped closer to the device and pointed to the various parts. „The green rubber lips are flexible, but they also have a certain firmness. You will be positioned in the device so that it is between your legs.“

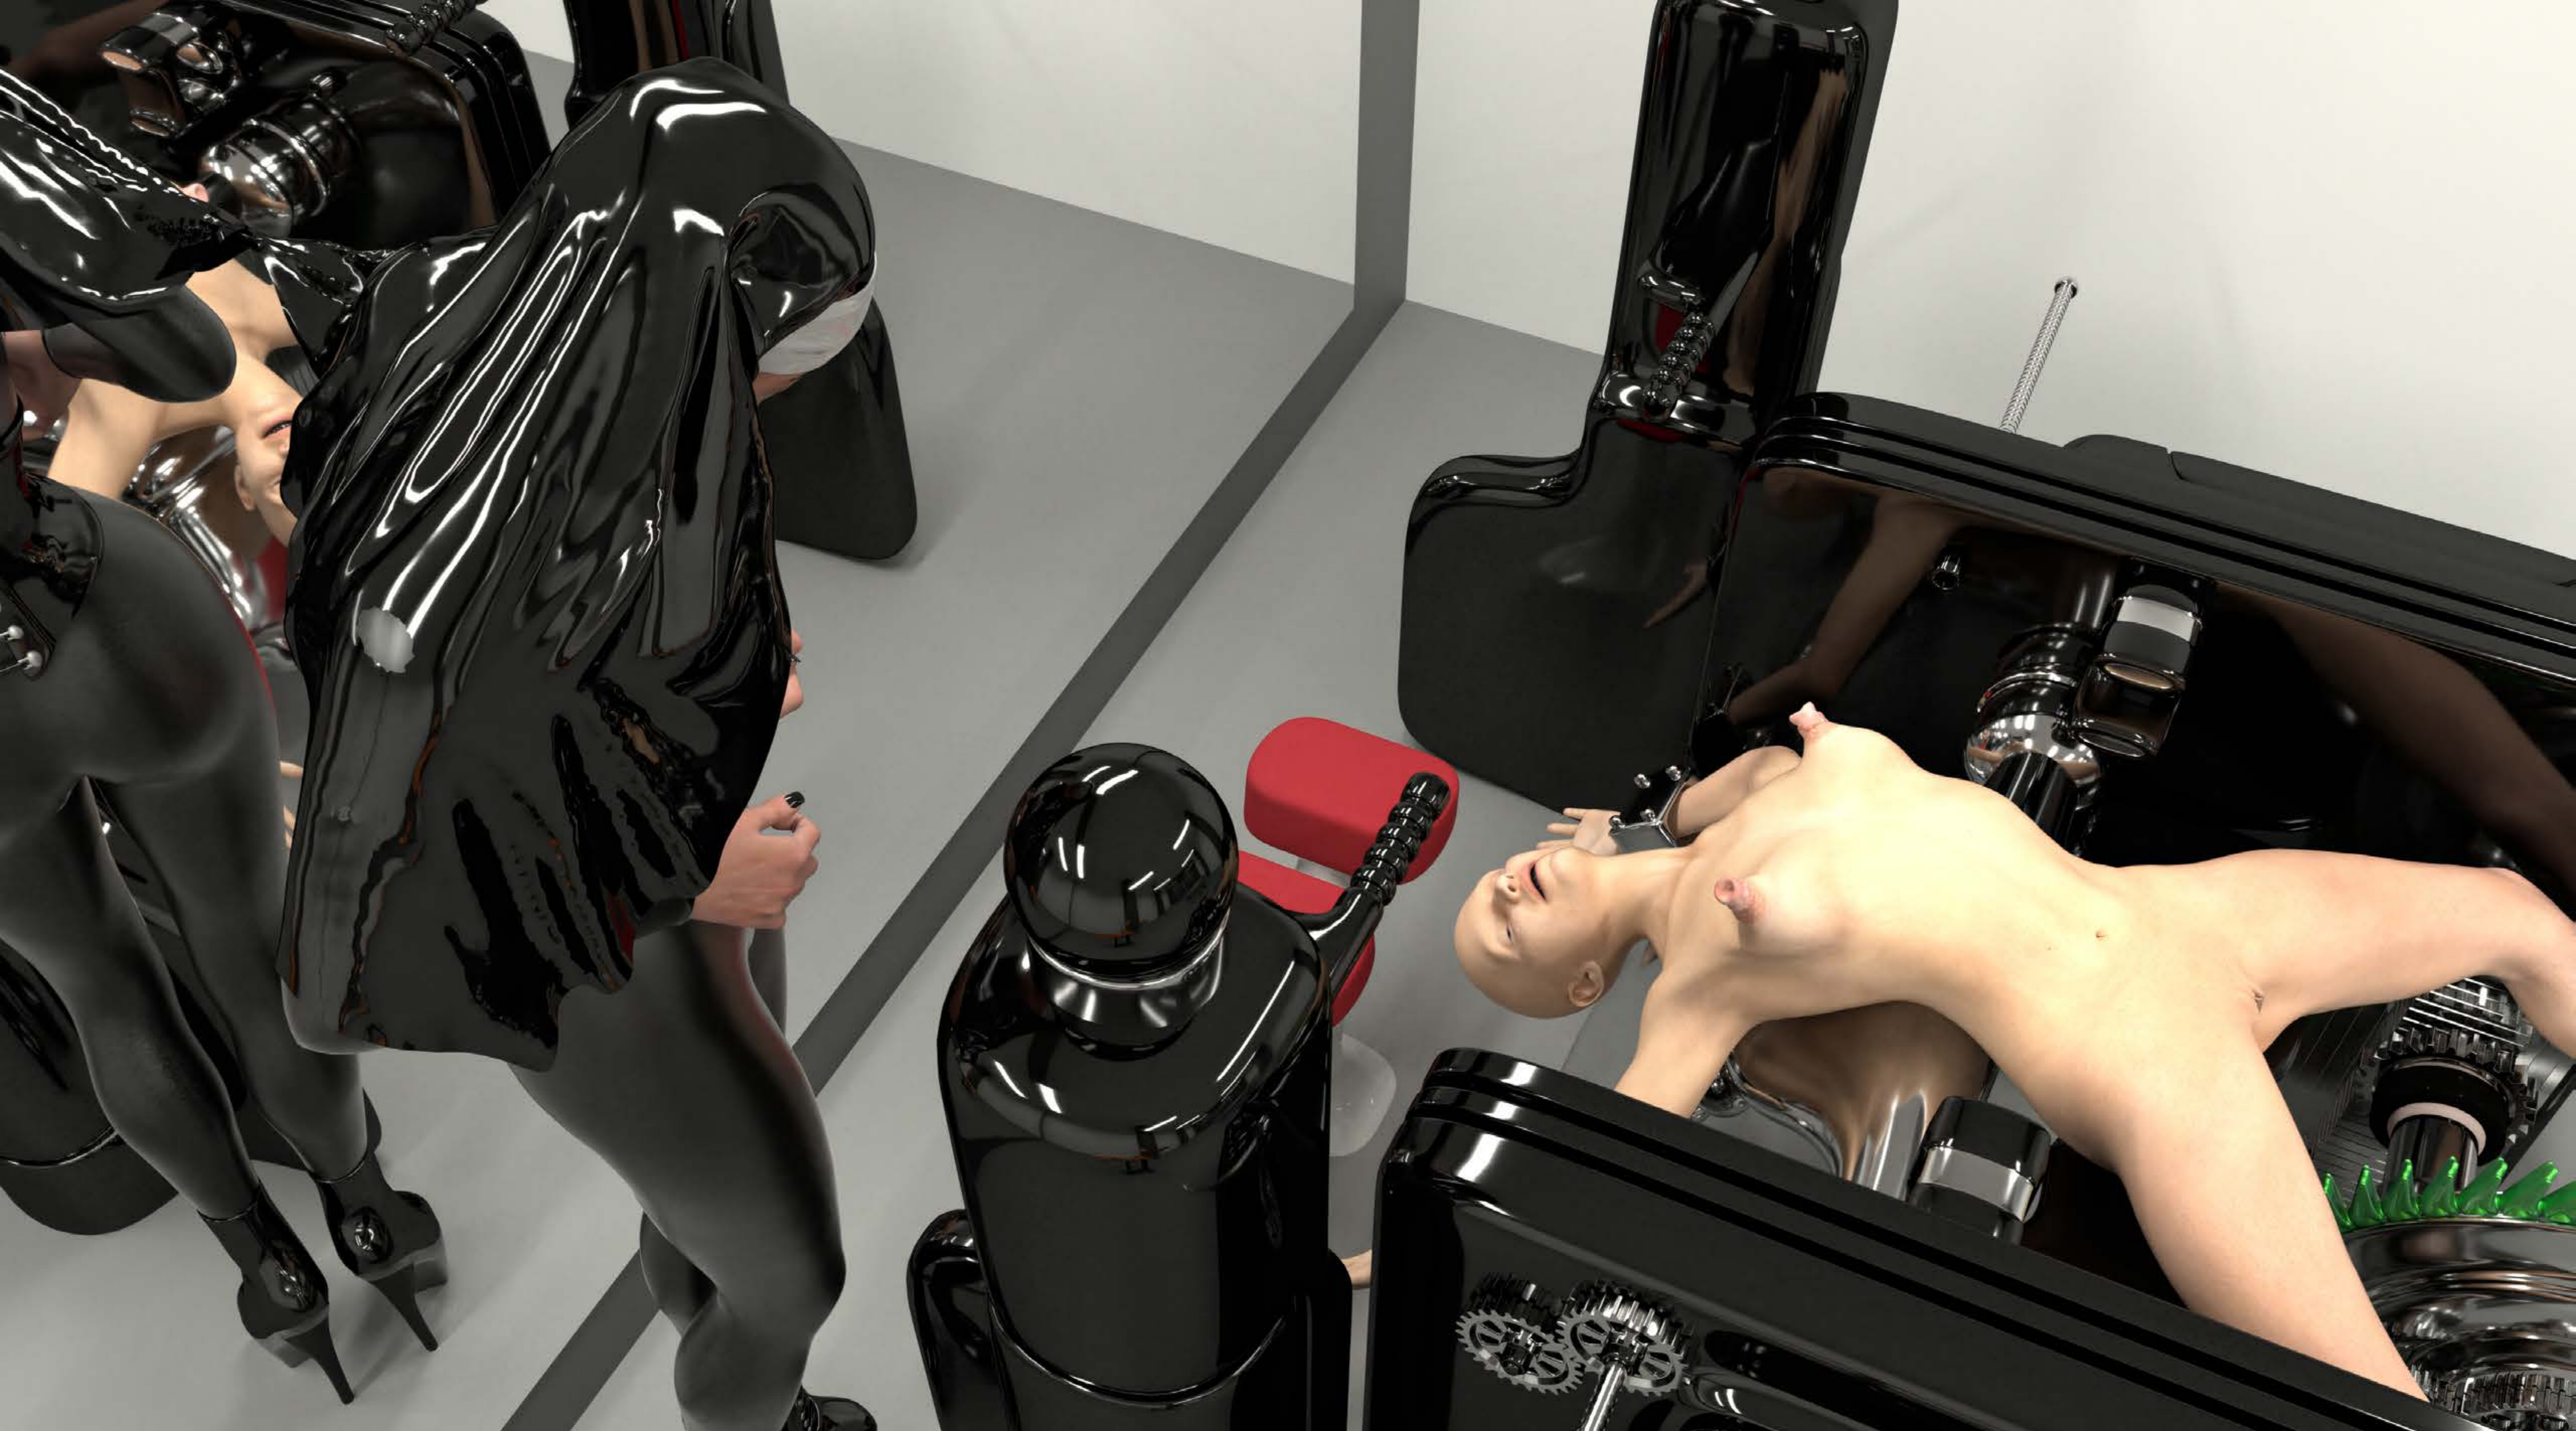

Samy watched intently while Tao continued to explain. „Once you're in position, the rubber lips are gently pressed against your skin. They are designed to change in length and direction to distribute the pressure evenly and make the tissue more flexible.“

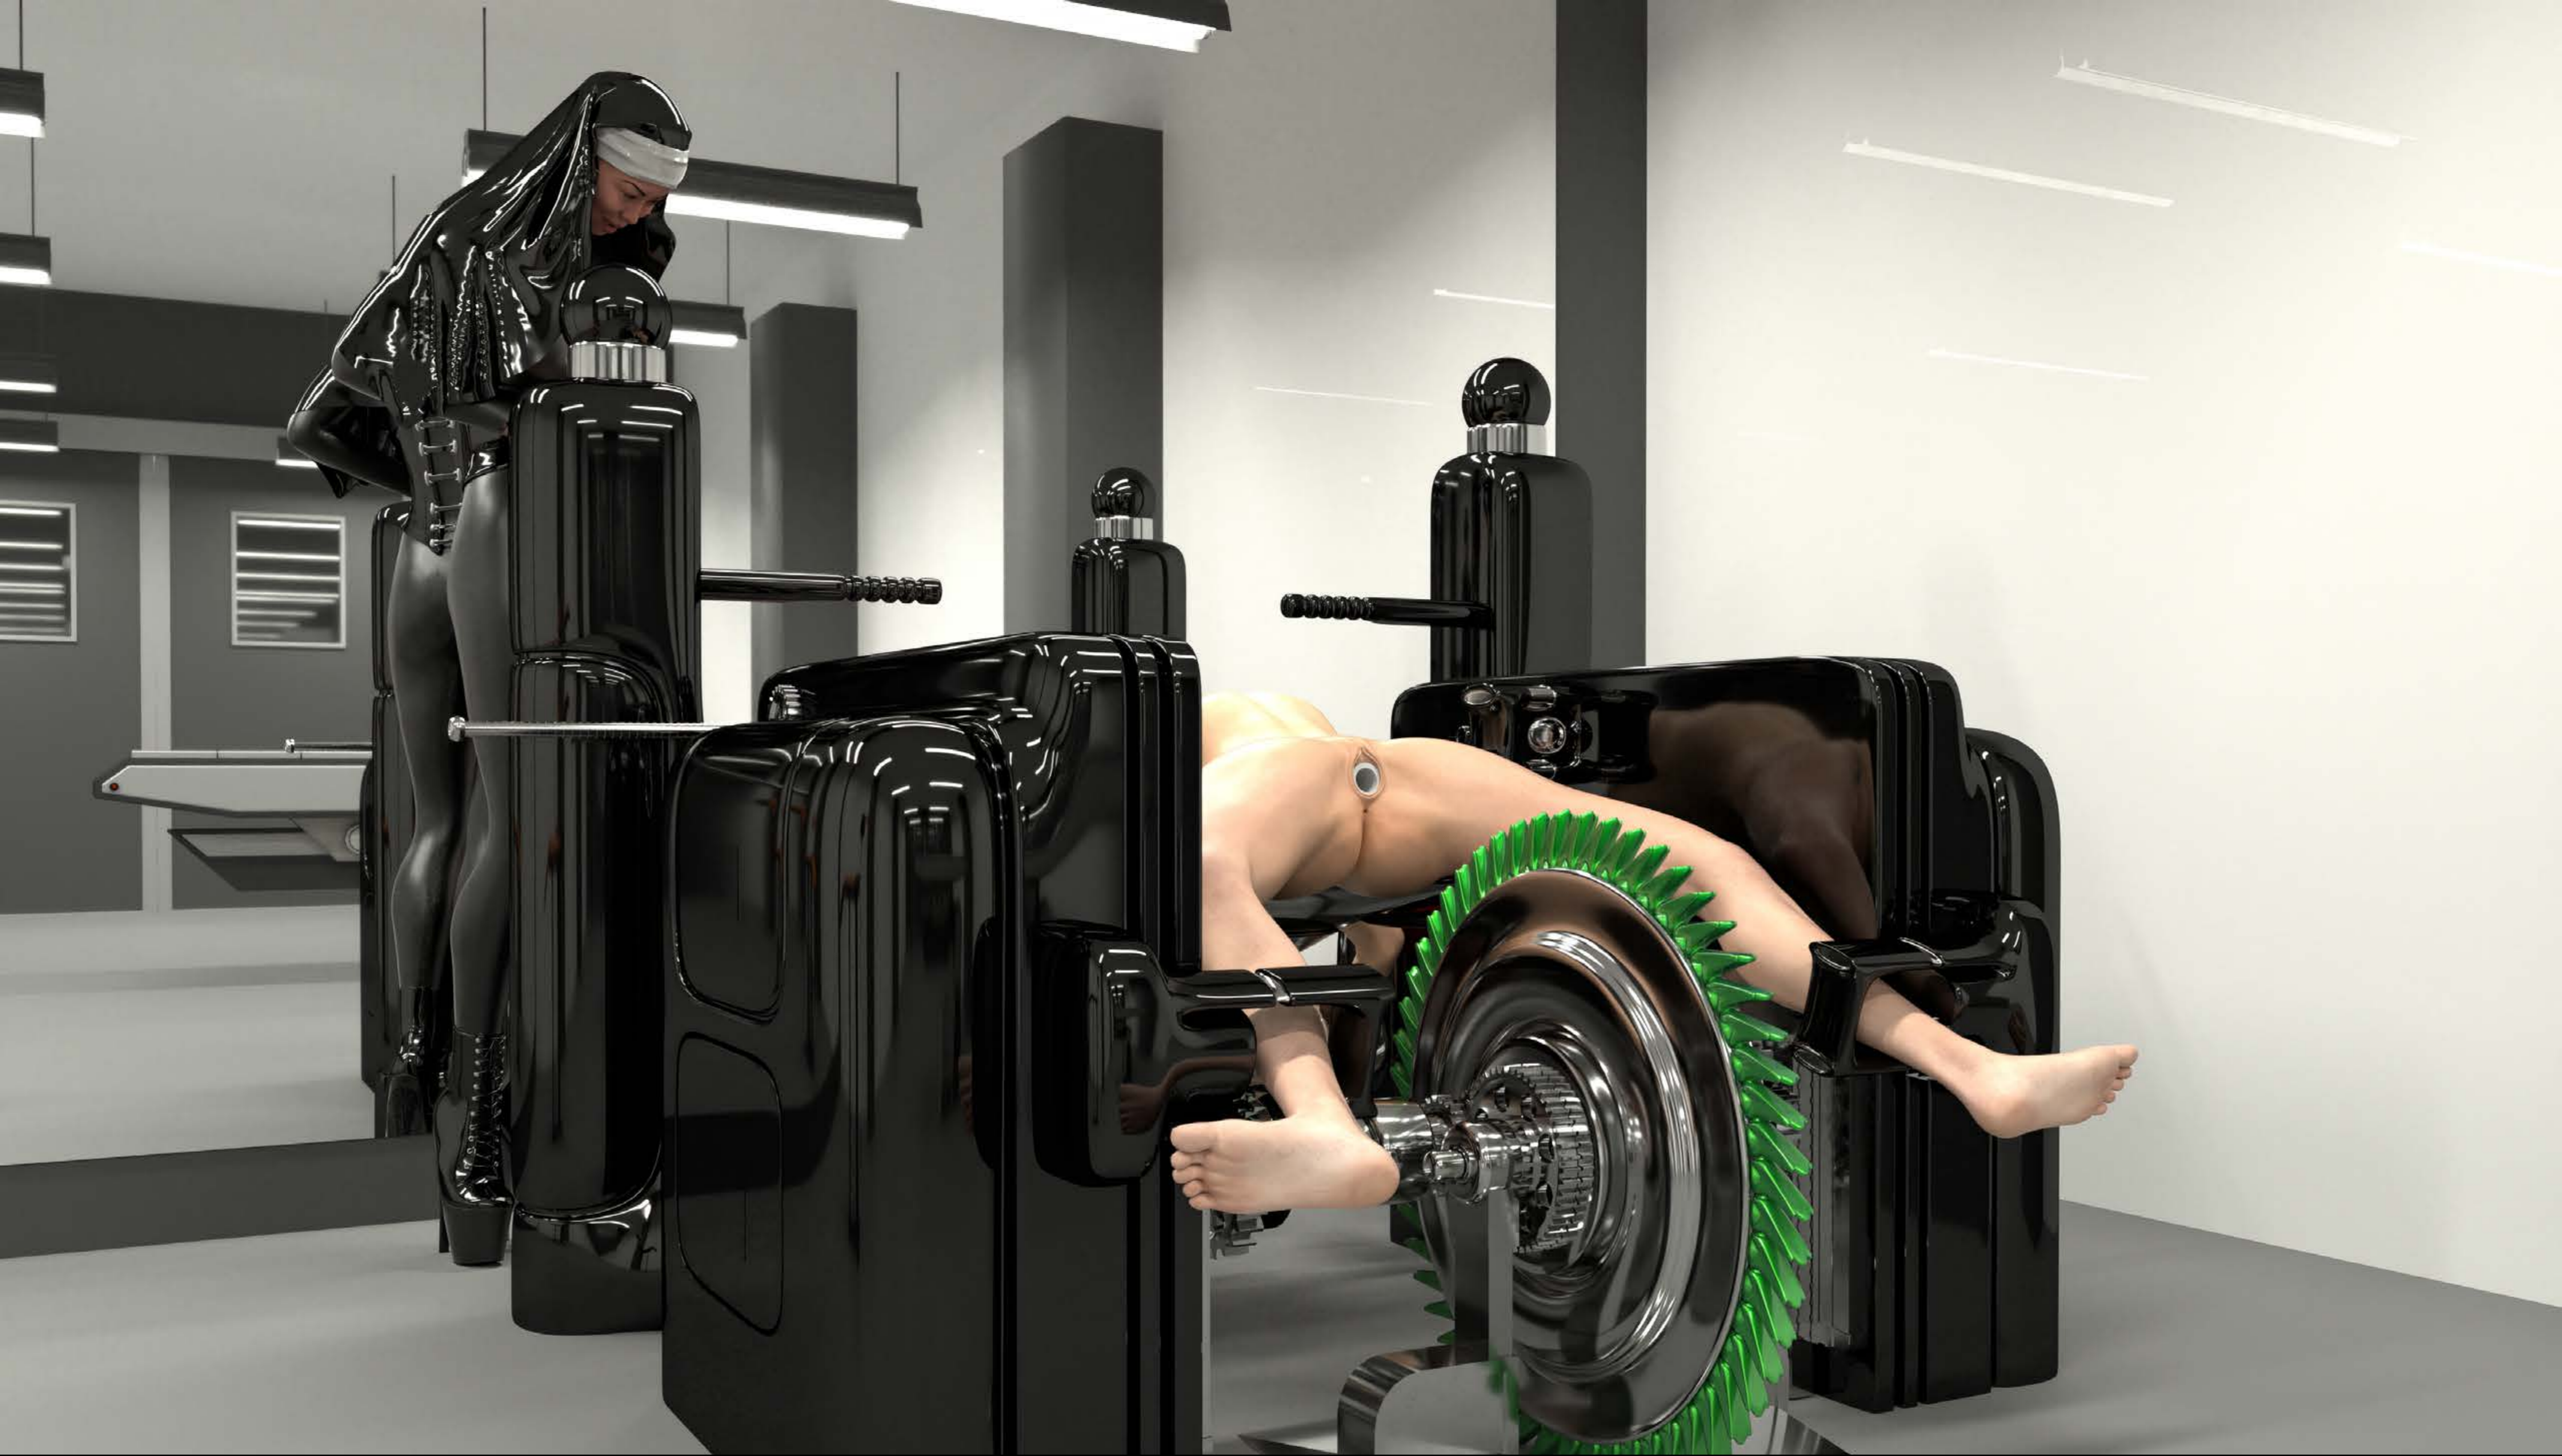

Samy had now positioned himself on the device. „It will miraculously loosen your pubic area,“ Tao continued. „The tissue is virtually massaged.“ Samy watched with interest while Tao explained how the device worked. „The green rubber lips gently massage and stretch the tissue, making it looser and more elastic. This targeted massage stimulates blood circulation and promotes flexibility.“

„If we don't get the desired result with one pass, then we'll just repeat it,“ Tao continued. „You can sit back and relax now.“

Samy nodded and leaned back carefully while Tao continued to prepare the device. The position was a little awkward, and Samy lay with her mid-back resting on the surface that sloped steeply backwards. It was not only awkward, but also uncomfortable. She tried to move a little to find a better position, but the position remained difficult.

„Try to get used to it a little, Samy,“ Tao said reassuringly. „I’ll fix your hands now and then we can start right away.“

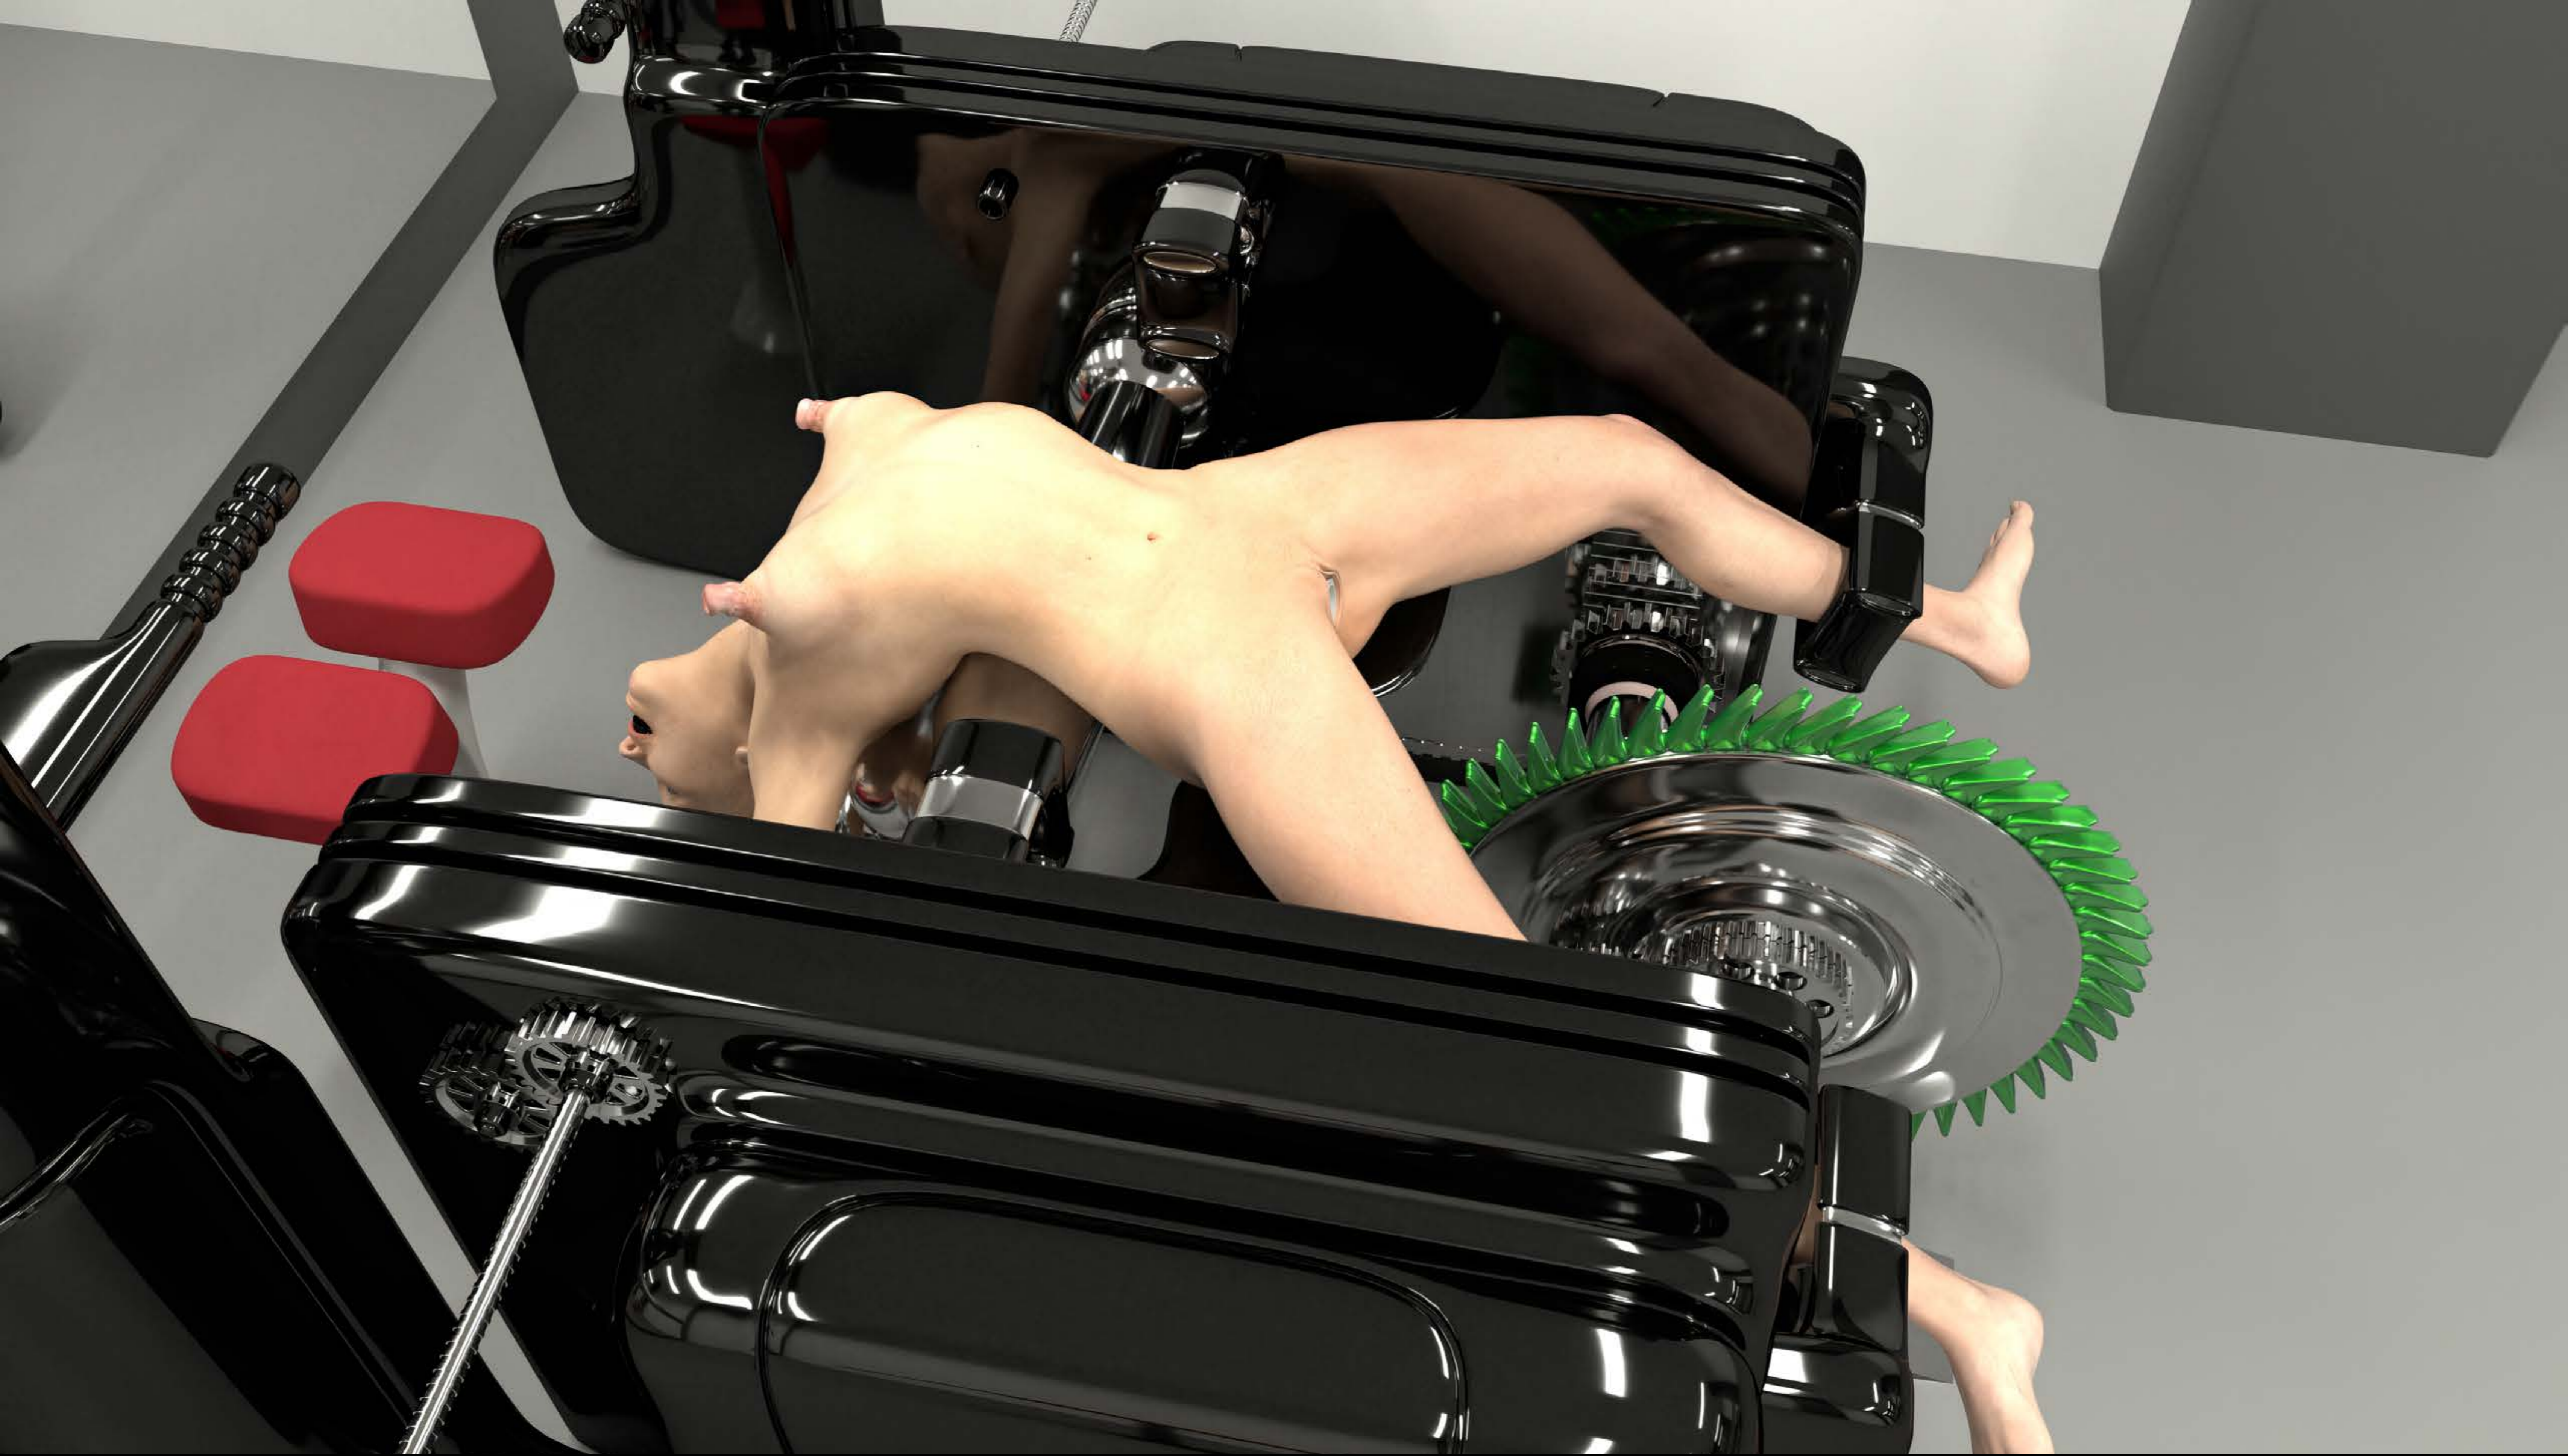

Samy nodded slightly and tried to get used to the position, while Tao gently placed her hands in the holders provided and secured them. The restraints were softly padded to ensure they remained comfortable and didn't exert any additional pressure. „All good?“ Tao asked as she checked the final fixation.

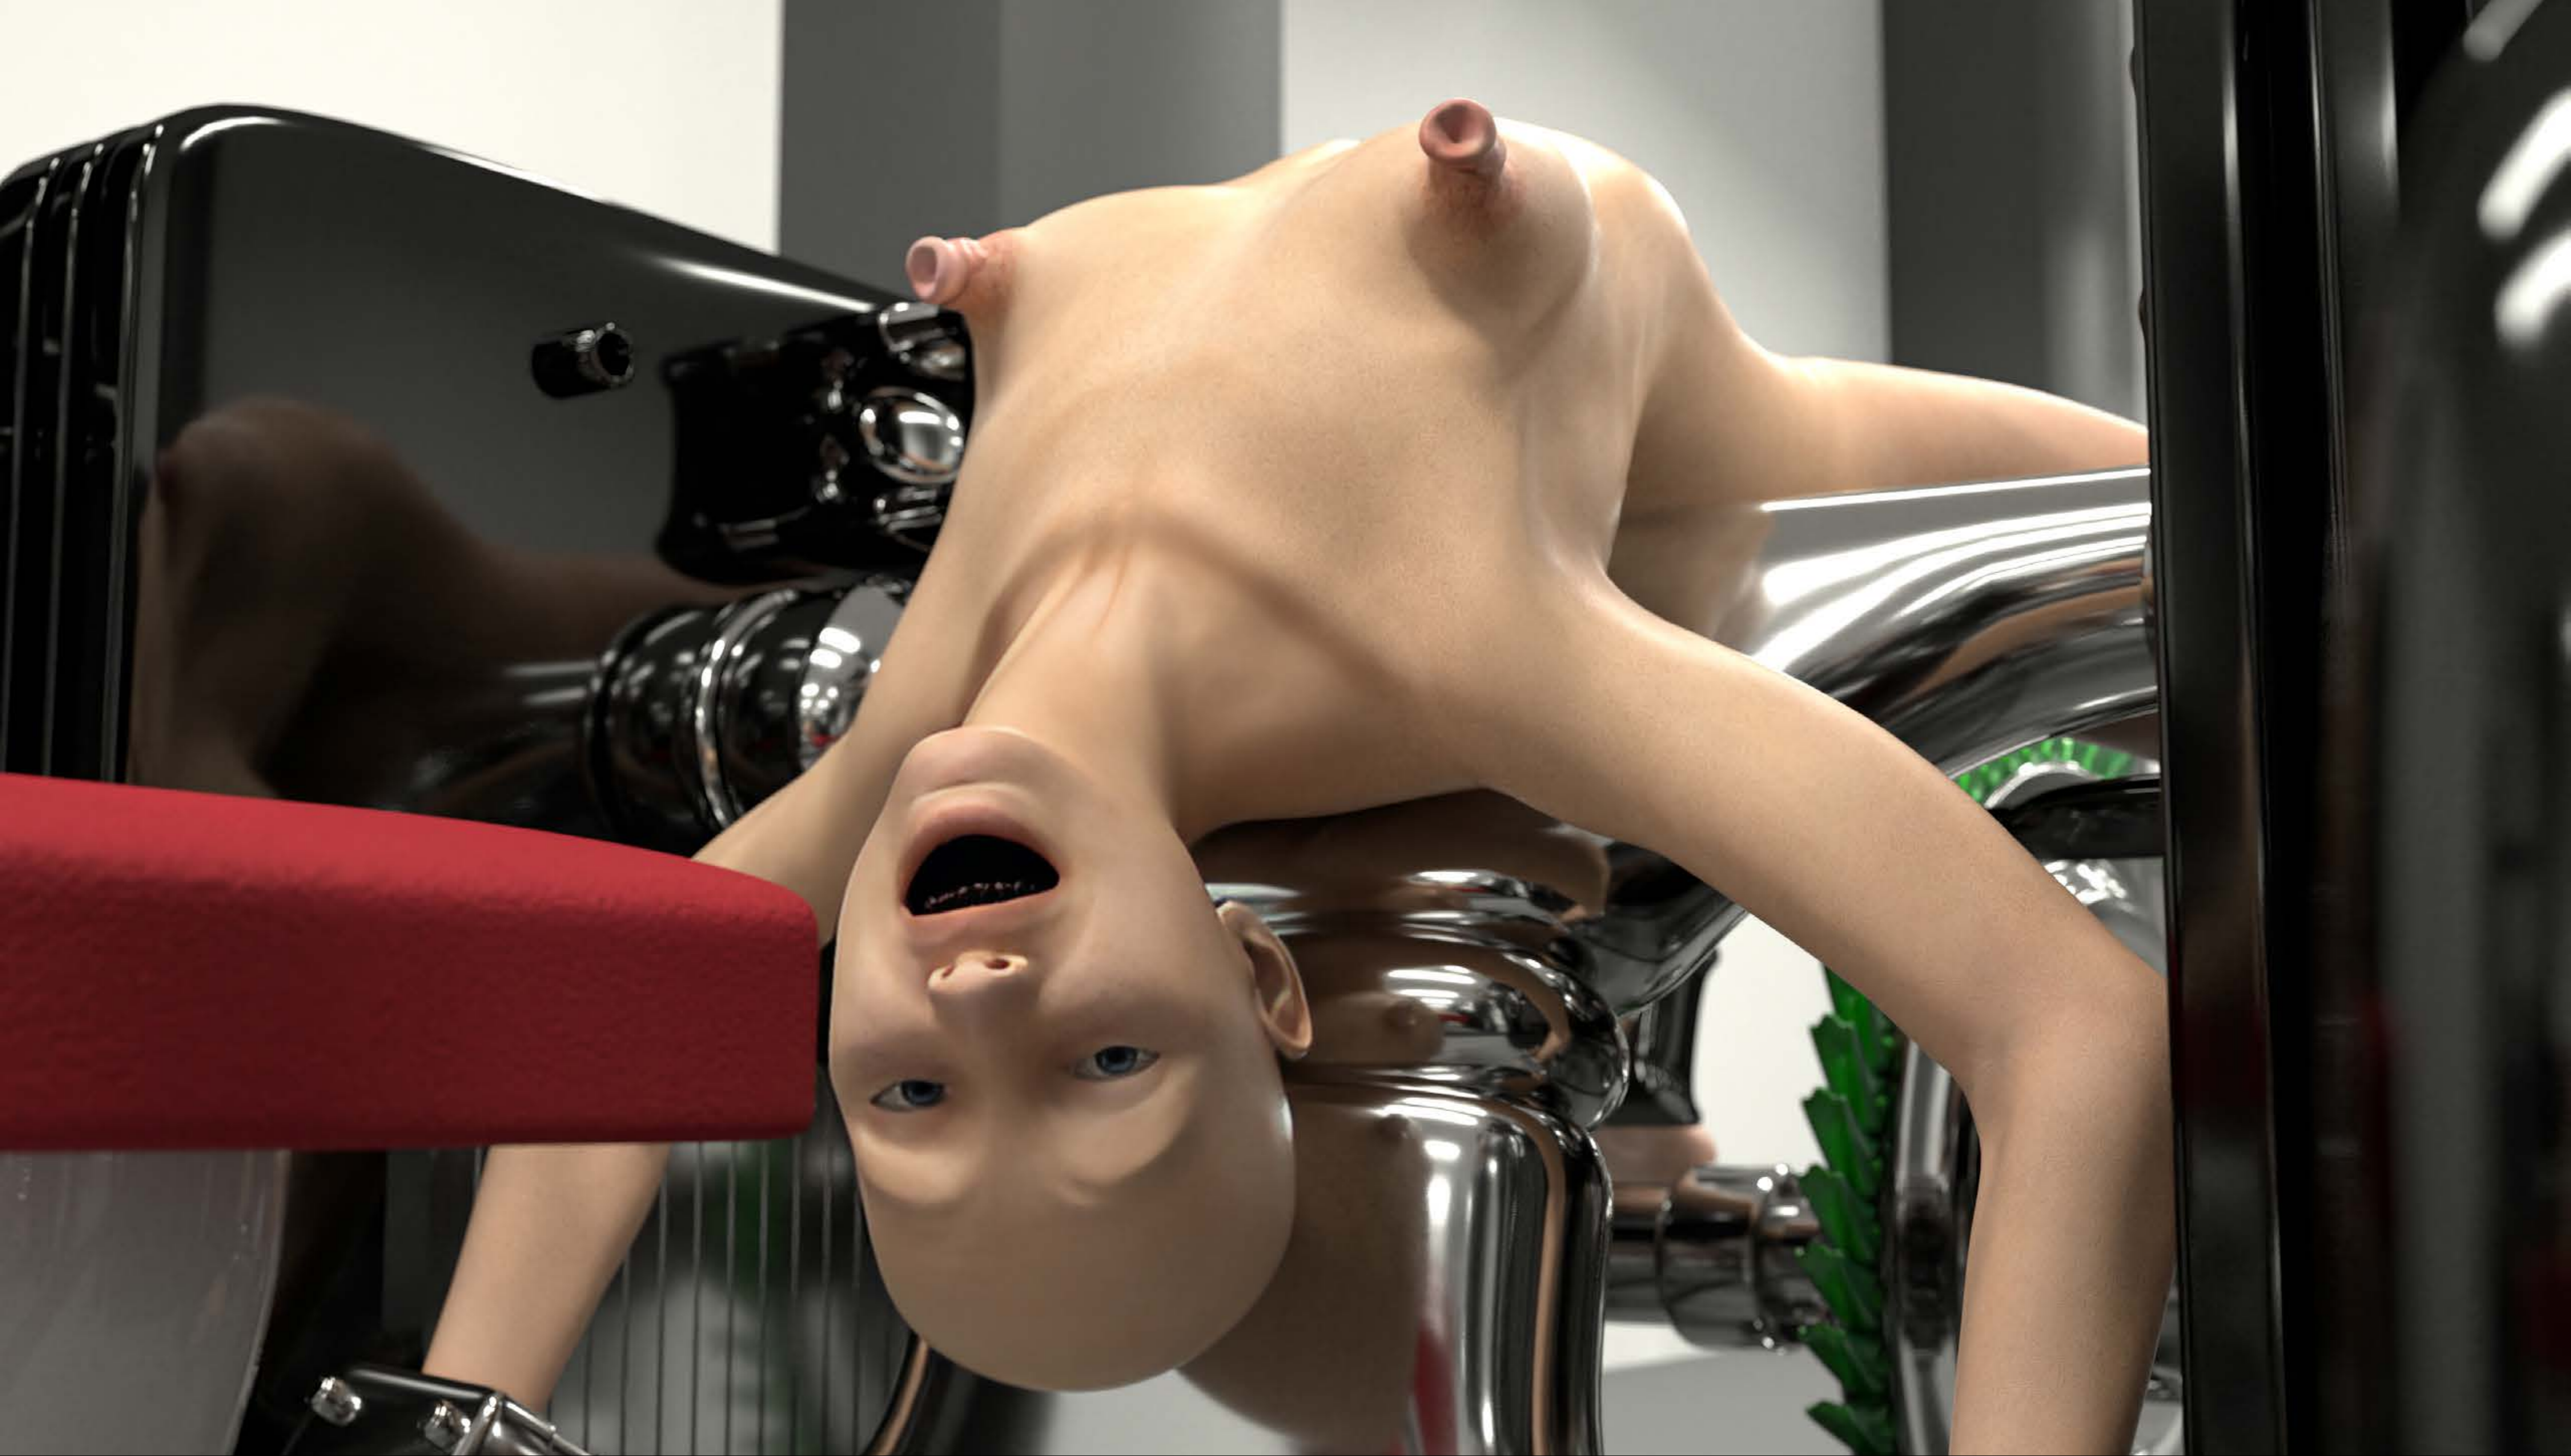

„Everything okay?“ asked Tao as she checked the last fixation. „That was the easy part. When Innka gets back, we'll remove the pipe and start the process. Before that, though, I want to tell you a few more details.“

Without Tao having finished her last sentence, Samy felt her position change once again. Her back was bent further backwards, which she could feel more than clearly in her spine. An uncomfortable pressure built up and she could feel the tension in her back. Tao only commented on what was happening with an „Oops, I forgot to mention that“.

„Tao, this is quite uncomfortable,“ Samy said with a mixture of concern and discomfort in her voice. „My back feels too bent.“

„Samy, I’m sure you’ll get used to it over the next seven hours. That’s how long the process will take in the first round,“ Tao explained with a hint of mischief-  
vousness in his voice. „It starts with a wonderful feeling, then becomes very uncomfortable until you finally feel nothing.“ Samy swallowed nervously and felt  
her body tense up. „Seven hours? That sounds... intense.“

Innka arrived shortly afterwards and was pleased to see that Samy was already in position. She snippily remarked: „Is that all the stretching you can do?“ Tao gave Innka a quick glance and replied coolly, „We’re working on it. The process has to be gradual to make sure the tissue isn’t overstretched.“

„Innka, you can remove the pipe now. We don't need it any more. She'll get a new one later," said Tao.

Innka nodded and replied snappishly: „Shall we just push it in deeper? That’s much more fun.“ Tao gave Innka a warning look and replied coolly, „That’s not our goal, Innka. We need to make sure the process is effective and safe. We don’t want to damage the device.“

The pipe slid out with a soft smacking sound and Samy moaned gratefully, „Thank you.“ Innka took a quick glance at the removed pipe and grinned slightly. „Now the real fun can begin,“ she said as she looked at the almost dry pipe once more and then put it aside.

Tao ignored the comment and concentrated on calming Samy down. Samy took a deep breath and tried to relax further. „What’s next?“ she asked with a mixture of curiosity and nervousness. Tao calmly explained, „Now we will adjust the device to begin the massage.“

Innka positioned the wheel so that the green rubber lips rested against Samy's pubic area. Tao watched carefully and admonished her: „Don't overdo it, Innka. The program will vary the rubber lips and if you set it too intense, Samy will have a very hard time.“

Inka nodded reluctantly and made some adjustments to reduce the intensity. „It’s okay, I understand,“ she murmured. Samy felt the touch of the rubber lips and took a deep breath to prepare herself for the sensations to come.

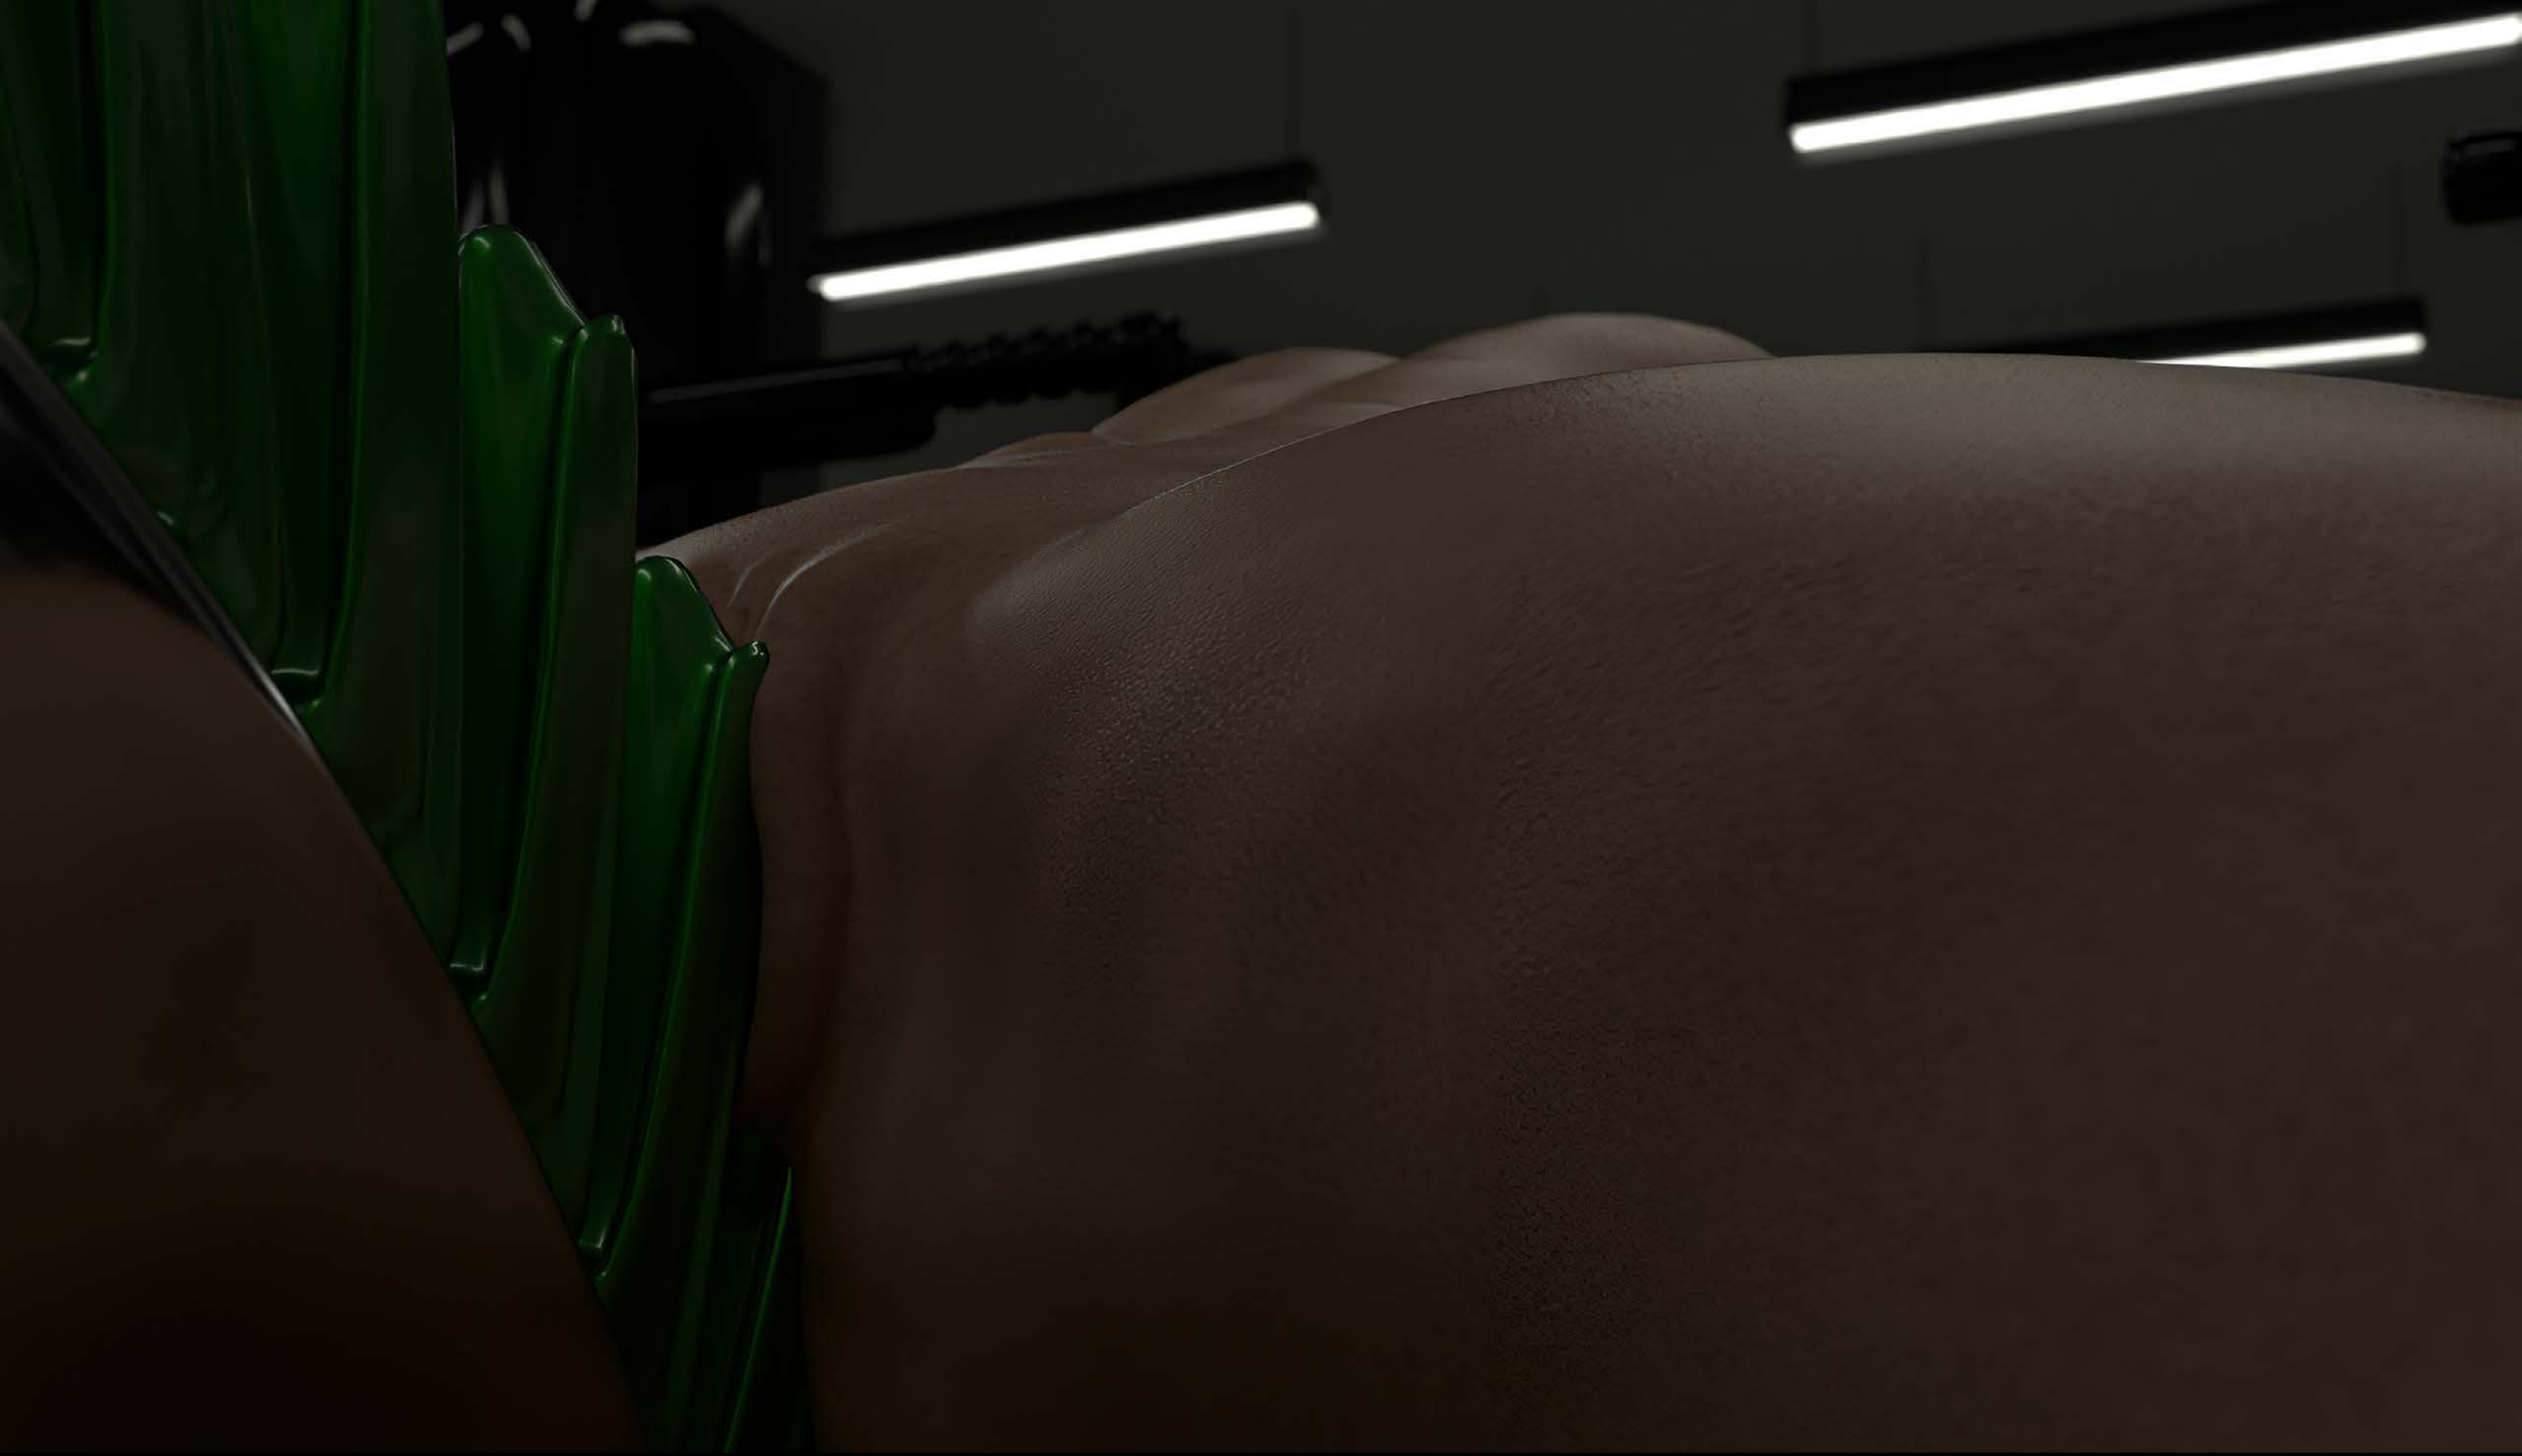

With one last look at the settings, Tao activated the program. The green rubber lips began to move slowly. At first the sensation was pleasant, almost soothing, but after a few moments the intensity increased and the penetration became more noticeable. „Not too hard, I told you!“ Tao exclaimed when she saw that Innka had made the adjustments too intensely. Innka just smiled at her with amusement.

Shortly afterwards, Tao and Innka left the room, leaving Samy to her fate. The green rubber lips continued to work tirelessly, penetrating the tissue without ceasing. The pleasurable, pleasurable part of the experience overwhelmed Samy after just a few minutes, and soon the intensity began to increase.

The initial pleasure slowly turned into a more intense joking feeling that grew with each passing moment. Samy clenched her rubber teeth and tried to concentrate on her breathing as the device continued to do its work.

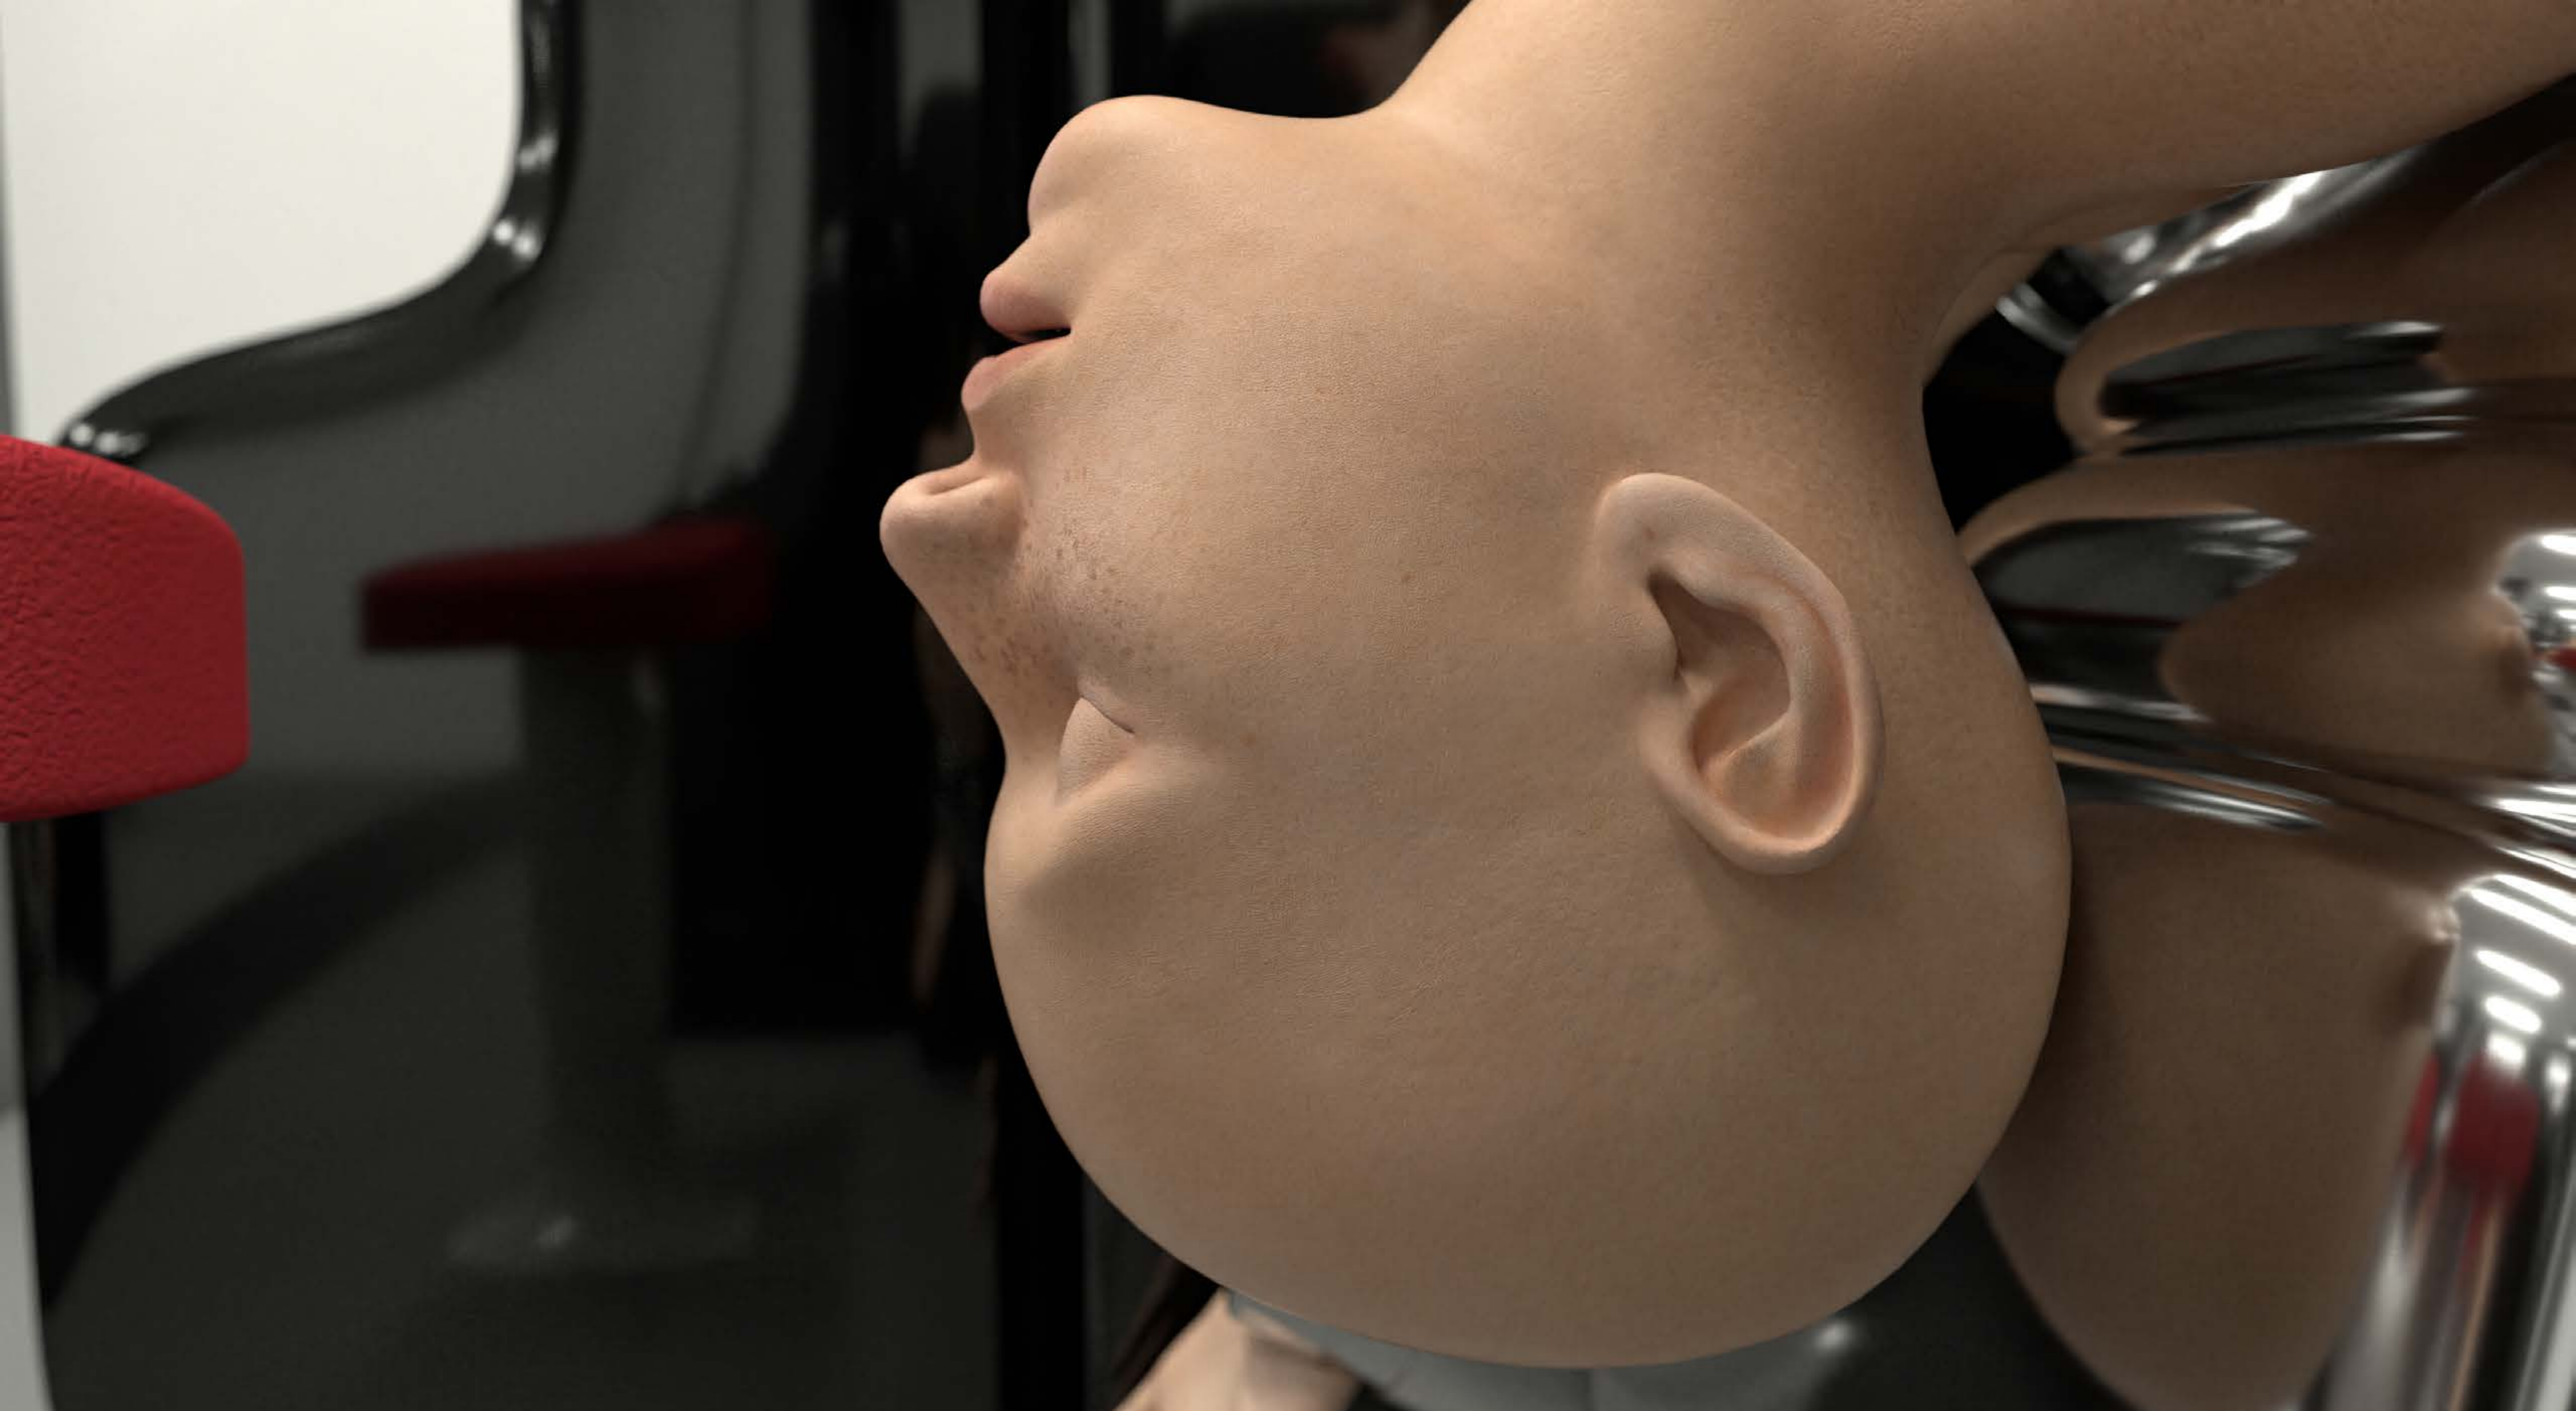

With her eyes closed, Sammy experienced a range of sensations - from lustful pleasure to intense pressure that pushed her to her limits. Without pause, the firm rubber lips rubbed against her clitoris and labia.

Then it went completely dark around her. She was alone with this unstoppable feeling between her legs. The wheel turned very slowly at times and then again so quickly that she almost fainted. She lost all sense of time. The constant interplay of speed and intensity brought her to the edge of her endurance.

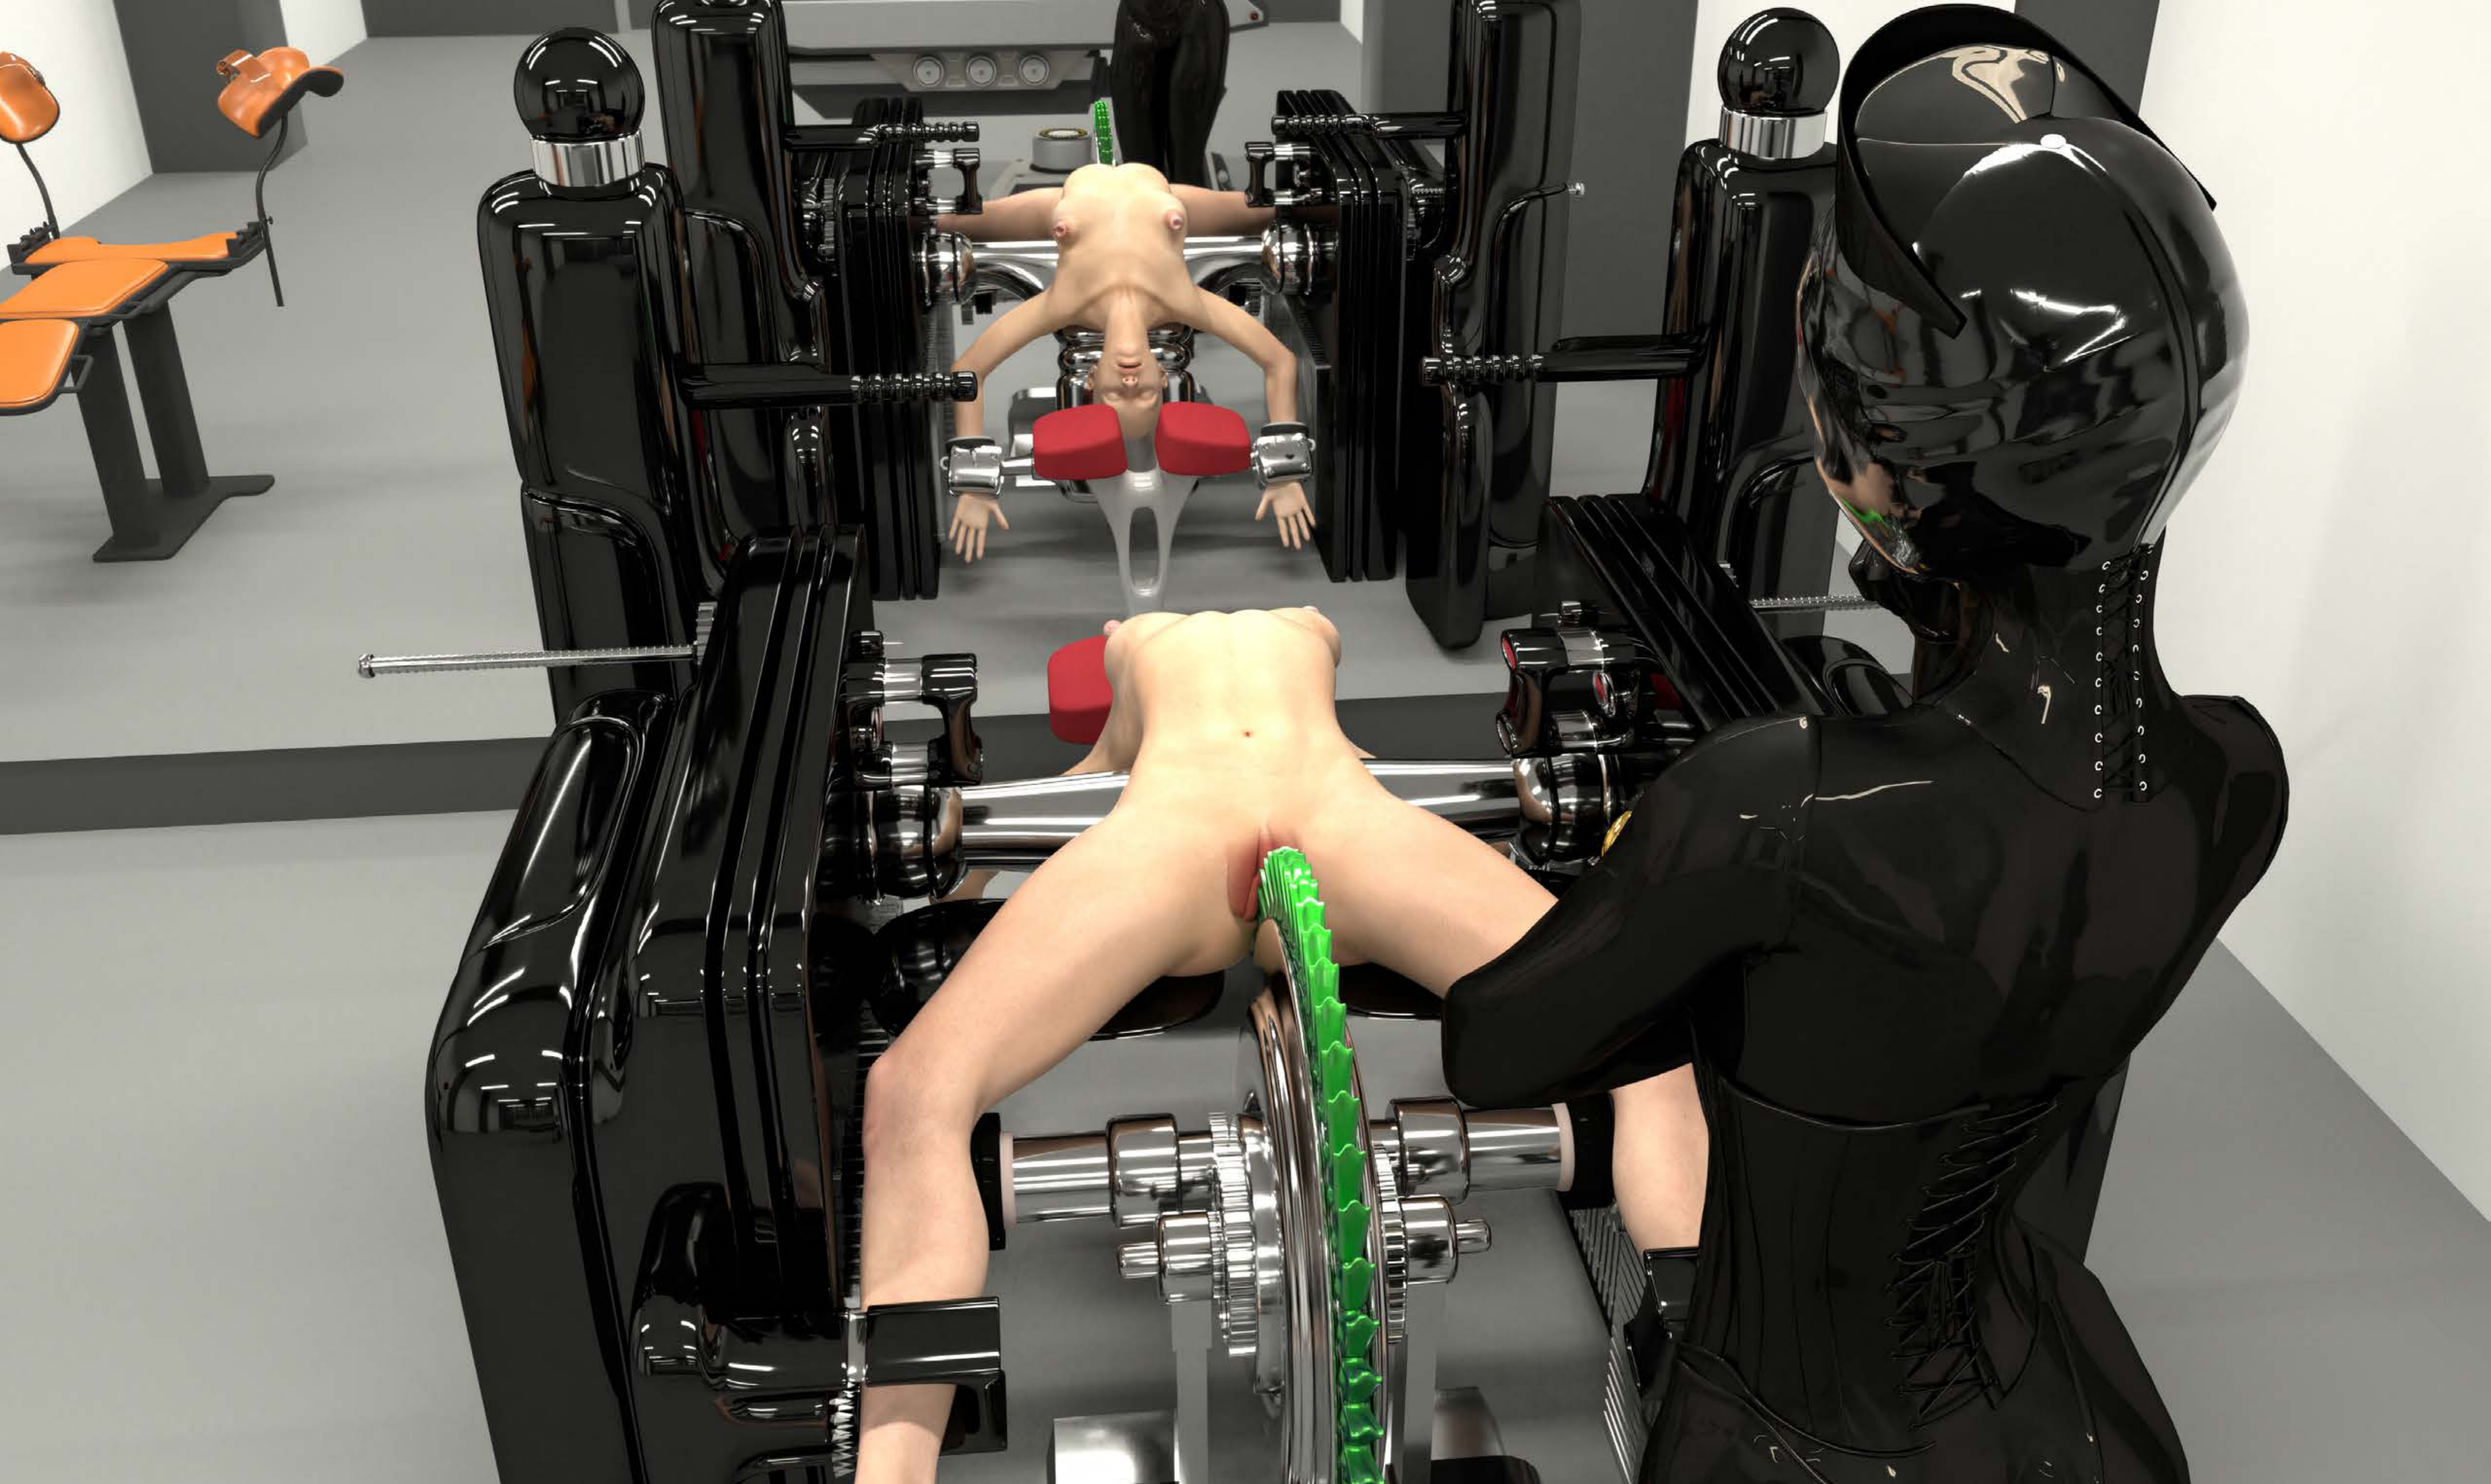

The slow movements offered brief moments of relief, but the sudden accelerations took her breath away and left her whimpering in pain and exhaustion. The feeling of isolation intensified her despair, as she did not know how long this state would last. With her eyes closed, Samy tried to organize her thoughts and somehow distract herself.

When the lights came back on hours later, Samy had passed out. She had endured the ordeal for hours, but finally her body shut down to protect itself. The wheel continued to turn, albeit very slowly. The tissue was very red.

However, Samy didn't notice any of it. Even if she had been awake, she wouldn't have been able to feel anything. Her body was completely exhausted and numb from overstimulation.

Innka entered the room and went over to Samy. She didn't think about stopping the wheel. She would have liked to start the next run straight away, but knew that Tao would have punished her for it.

She stood in front of the device for a moment, watching Samy, who was still in an exhausted sleep. Innka could feel the temptation to continue, but she knew it would be irresponsible not to give Samy time to recover.

Innka sighed softly and muttered: „You’ve done really well, Samy. But there’s still a lot to do. If it were up to me, we would continue here for many more hours. With wider rubber lips, of course. I want to see your tissue really swollen.“

Innka stopped the device and left it in place for a while. Let Tao free her from the device. She had already devised a plan to convince Tao to use another machine, one that Samy would certainly not like, but Innka would like all the more.

With one last look at the calm Samy, Innka left the room and went to Tao, who was busy in another part of the facility.

Elsewhere, Mr. Bright and Scar were still in Ms. Bright's personal retreat. It was obvious that Mr. Magnus was not thrilled with their approach, even though he is a master of deception. Even he has his limits. Mr. Qwan had taken Anna with him and promised to take good care of her.

Ms. Bright looked at Scar and asked, „Do you think Mr. Magnus could be a problem? Should I take care of it now?“

„We should keep a close eye on him. As we know, he will walk over dead bodies, even if he has become calmer over the years. We must not underestimate him.“

Scar hesitated for a moment with his answer: „Ms. Bright, I don't think it's enough just to keep an eye on him. I'm sure you're familiar with his companies and their structure - it's like an octopus. Too many situations have been happening lately that I can't foresee the long-term effects, to say the least.“

Not too far from Ms. Bright, Mr. Qwan stood with Anna in a long corridor. He had brought her this far and stood in front of her after the gate had closed behind them.

„Hello Anna, I'm pleased to see you again. It's been months since Mr. Qwan took you into his care. I see he's been pushing your development, regardless of your record. You look lovely," said Mr. Qwan.

„Mr. Magnus has done a very good job, but his interpretations don't match my ideas. I will inevitably have to adapt some of my ideas.“

„But believe me, you will appear in a whole new light when I have finished my further improvements. You will enchant everyone who visits my exhibitions. It's still a long, hard road, but together we will reach your goal.“

To be continued
