

Sure Marl, the client told me that we are allowed to visit her place. Also as it is her property, we will be working for her. She wants to destroy that old house, but all the workers disappear. And rumours had spread around that this place is cursed. We really should investigate it. What do you think?

And?

Alright. You are scared of this place. But can we really let another Ghost Hunter Team handle this case?

That is fine Jack, but did you read about the houses' past? It's very damn old. That house was built in the 18th Century. The legends tell that witches once lived there. They came after Salem burned. Look, this book has everything we need to know.

And? Do you know how many investors have bought that damn ground? They are all missing! Plus, I have never heard of that Mrs. DeLimbo, our supposed client. Surely she should have a name in her industry... but I have never heard of her before!

Of course not! We are the best team around, and we finish our cases! Now and forever!

Jack Cheong  
Age 38

Jack, a selfmade man. His parents moved from China to Belmont, CA, in the 80's. Her son, Jack, was only a little child back then, and grew up as an American boy. He is a genius in math and after graduation he started to work in a Physics laboratory. This is where he first came in contact with paranormal phenomena. One of his Colleagues recorded an Electronic Voice Phenomena on his recorder: Jack's own mother, who died 2 years earlier.

Marlon Ray Washington III.  
Age 28

Marlon is a typical young man. After he finished college, he found a job in a trading company. One day at work, there suffered a Blackout, or so he thought. He watched as a person walked into a wall... and vanished. At first he thought it was his senses playing a joke on him, but rumours soon spread around the company that different people had seen the same vision. A ghost? No that wasn't possible, so he started investigating. One month later, a new wing was built. During construction, the workers found a skeleton in the wall where the visions had been seen.

Later that evening, the Ghost Researcher Team had not travelled far from home, but the landscape had already changed. Belmont is just a small city, but there is... well just... nothing. Some farms, but mostly woods. Really old woods, the dark type.

Seriously Marl. Why did you put the magnetic signs on my car? This is a single case... there is not going to be any press or TV guys around.

Maybe. Maybe not. If there is someone around we can get some PR, and that is important.

Look around, there is nothing here! Why would there be anyone at this place?

Sure...but it ca...

Sorry, hang on a second, phone's ringing.

I liked her. She was funny and had so much sexapel. I hoped that the girls at my school were the same... but they were truly boring.
