

THE PRISON

Tawny Tomsen

AviIntamed.com

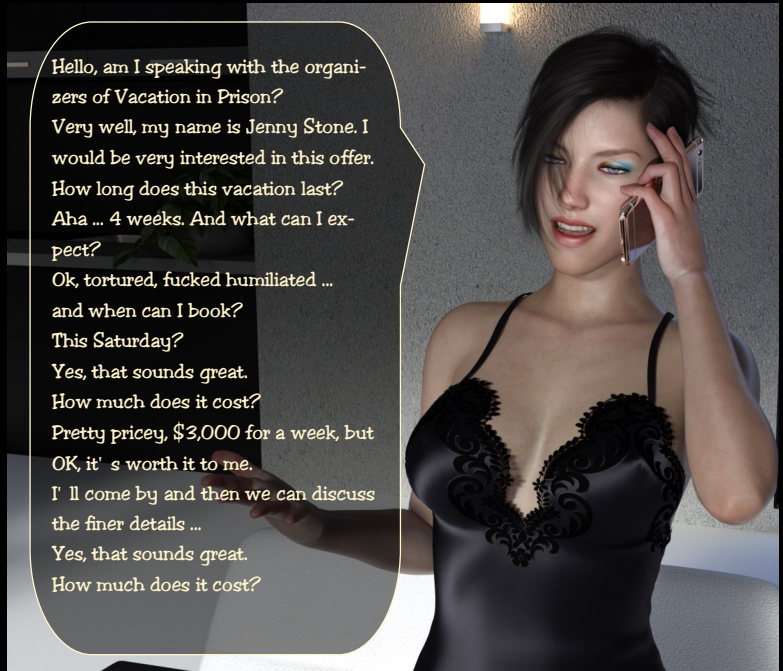

I don't know why I have so much bad luck with my partners. They all think I'm crazy and some wanted to send me to a psychiatrist. But I need it harder and only being tortured during sex turns me on. Am I really not normal? I always thought that being a masochist is no longer unusual ...

Oh, that sounds interesting: "Do you want to take a vacation in a real torture prison for women? We guarantee permanent staff supervision and attention. If this interests you, call ...". Well, it's worth a try.

Hello, am I speaking with the organizers of Vacation in Prison? Very well, my name is Jenny Stone. I would be very interested in this offer. How long does this vacation last? Aha ... 4 weeks. And what can I expect? Ok, tortured, fucked humiliated ... and when can I book? This Saturday? Yes, that sounds great. How much does it cost? Pretty pricey, \$3,000 for a week, but OK, it's worth it to me. I'll come by and then we can discuss the finer details ... Yes, that sounds great. How much does it cost?

Oh my God, what have I gotten myself into. My mind says I'm out of my mind and my body just tingles when I think about it.

Good afternoon, I'm Jenny Stone and we spoke on the phone a few days ago

Yes, I remember, you are right on time. Please think carefully if this is what you really want, because once you've made up your mind, there's no going back for 4 weeks.

What kind of prison is this?

It is an unofficial purification facility for women, where the only rule is that no permanent physical harm can be done to the inmates. Otherwise there are no rules for the staff. The guards do not know that there are participants who are not real prisoners. That means you are treated the same as everyone else.

The agent has just lied. All the participants have been brought in voluntarily. But neither the inmates nor the guards know that. But everyone is supposed to stick to this belief to increase the thrill. Apart from that, many of the punitive measures would not be allowed by law.

That sounds very interesting. Do I have any influence on how I am treated?

For sure. If you lie and rebel or act defiantly, you can make your situation worse. If you are a model prisoner, then it will be easier for you. And yes, sucking up also makes the situation worse.

What kind of people are on duty there?

I'm glad you asked that. They are exclusively hard women and men, all of whom are chosen sadists. So insisting on humane treatment won't be much use.

Yes, I want to do that.

Very well. Then sign the contract in front of you where you announce that you have voluntarily submitted to this treatment and agree to follow all instructions and have no more rights. You will also take nothing with you and your private belongings will be stowed here. You are forbidden to have any contact with the outside world.

Yes, it sounds good. I'll sign it now.

Jenny signed the paper and handed it to the agent. Suddenly the agent's tone changed to a harsh commanding tone.

Get up from the chair and undress completely.

Yes sir

And now turn your back to the door, head tilted towards the floor and hands behind your back. I don't want to see any more movement from you.

Jenny tries to stand very still and she doesn't dare to move. After a quarter of an hour she hears the door open behind her.

Attention, this is a very dangerous person. Her name is Raquel Miller and she must be brought to the institution well secured.

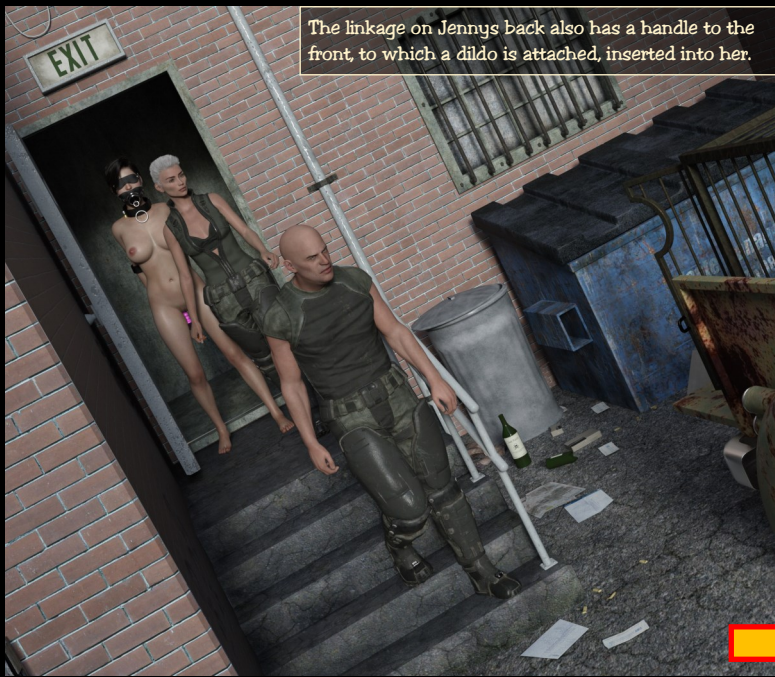

As a foretaste of what awaits Jenny, she has to lie backwards on the table and gets fucked by the guard.

... after that she may give the agent a blowjob.

After this foretaste, Jennys hands are forced into a frame at her back, which is connected to a ring around her neck. At the same time, a blindfold and something similar to a gag is put on her.

The linkage on Jennys back also has a handle to the front, to which a dildo is attached, inserted into her.

The guards transport her outwards using this handle.

The car ride takes long and drive through bumpy terrain for a very long time. Especially the last part of the drive was very painful for Jenny.

She had to climb into a narrow cage and that is very tedious with this linkage, especially as this dildo also arouses and distracts her very much. So, she has what she wanted. Her head is secured in this cage and a cloth is spread over her.

STOP
PROCESSING FACILITY E-8
1. DIM HEADLIGHTS
2. COME TO COMPLETE STOP AND TURN OFF VEHICLE IGNITION.
3. DRIVER MUST CHECK IN WITH GUARD ON DUTY.
4. VEHICLE WILL BE INSPECTED. PROCEED WHEN GATE OPENS.
AUTHORIZED PERSONNEL ONLY BEYOND THIS POINT!

HALT, LOADING CONTROL ...
What do we have here?
Fresh fuck-meat.
Very good. OK, move on

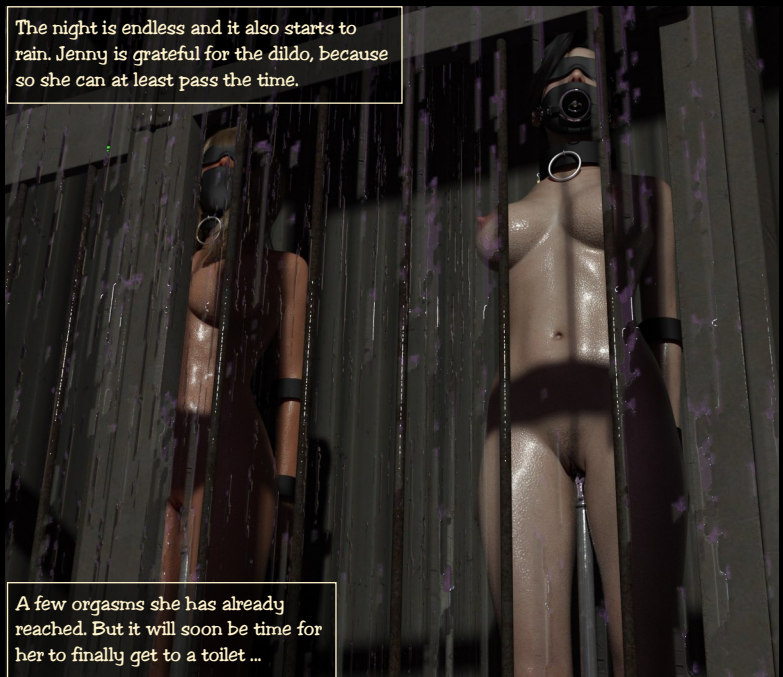

The car has finally come to a standstill. Jenny has absolutely no idea where she is. She has to leave the cage and with difficulty she climbs off the wagon.

The guards lead her into a cage where her ankles are tied tightly with cuffs and a dildo is inserted into her.

We still have to pick up 2 prisoners. In the meantime, you will remain here until tomorrow when the interrogations will begin.

The night is endless and it also starts to rain. Jenny is grateful for the dildo, because so she can at least pass the time.

A few orgasms she has already reached. But it will soon be time for her to finally get to a toilet ...

After a very long wait, Jenny is finally taken out of the cage. The dildo is removed and a belt is put around her which also contains several plugs.

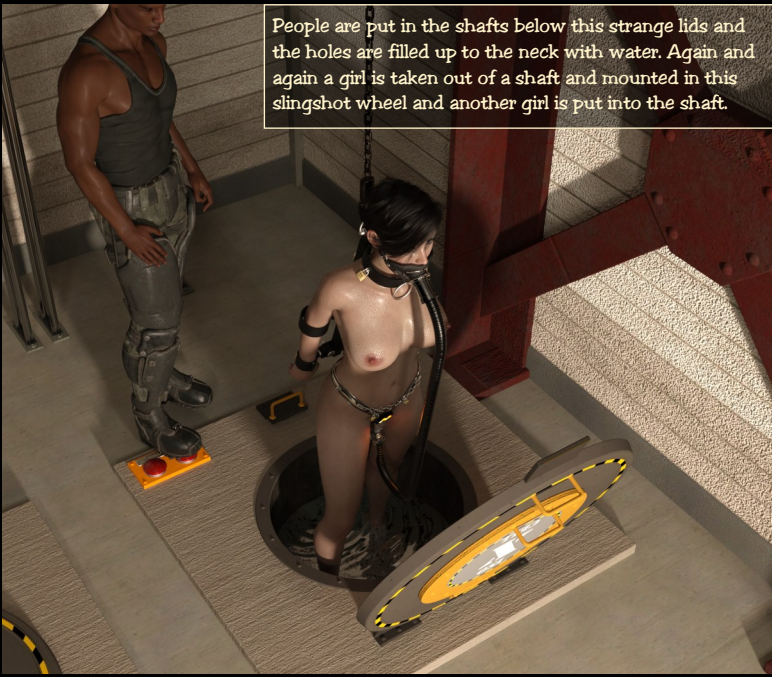

Hello Lisa, you bring us fresh meat again?

Jennys eyes widen in horror as they enter a hall where girls were put in yoke bars. These strange lids in the floor also irritate her. But even more her gaze is captured by the girl in the wheel. She is turned in all directions and already looks pretty much done for.

Jenny is also strapped into an empty rack and a ring around her neck ensures that she has to stand on tiptoe and can hardly move.

People are put in the shafts below this strange lids and the holes are filled up to the neck with water. Again and again a girl is taken out of a shaft and mounted in this slingshot wheel and another girl is put into the shaft.

Before the guard sinks her into the hole, he presses a few buttons on her belt and the built-in dildo becomes active and penetrates her cave again and again.

And then he sinks her until she touches the bottom with her feet. The chin touches the water surface. Jenny was already afraid because of her hairstyle. The guard closes the lid and wishes her much fun in the whirlpool.

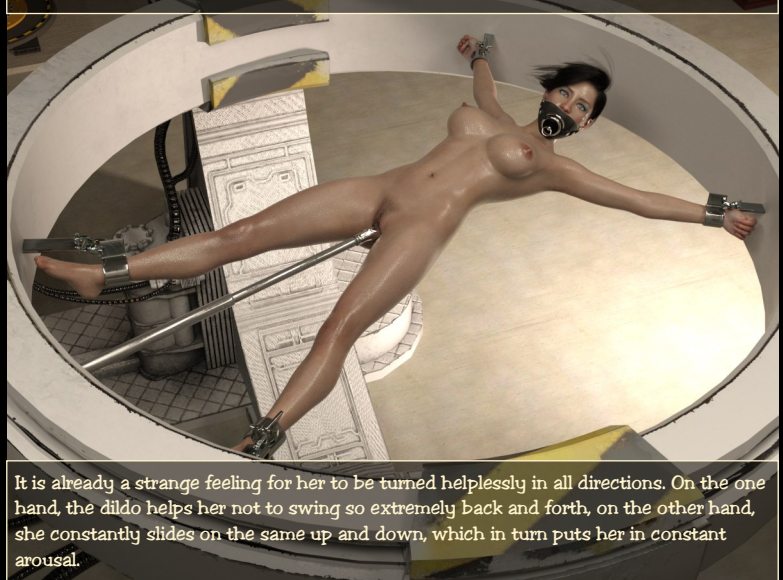

After Jenny is stowed in the pit and the lid is closed, the guard exits the room and leaves the remaining girls to the devilish devices.

From all sides spray nozzles massaging her body. Also the surface on which she stands begins to rotate slowly. Jenny thinks that it is a little oppressive, but with the dildo that fucks her incessantly and these spray nozzles it is also incredibly horny.

And after seemingly endless time Jenny is freed from her narrow prison. The armbinder and the belt are taken off her and she is fixed in this wheel. The dildo rod is inserted into her cave and the wheel is set in motion.

It is already a strange feeling for her to be turned helplessly in all directions. On the one hand, the dildo helps her not to swing so extremely back and forth, on the other hand, she constantly slides on the same up and down, which in turn puts her in constant arousal.

But after a short time one of the guards comes and stops the wheel so that she remains in upside-down position. He takes off his shoes and pants, comes closer, takes her gag off and puts his hardened cock in her mouth.

To prevent him from going down the throat too many times Jenny tries to use the only movable thing in her mouth, her tongue, as much as possible. But she can't quite prevent it. He fucks her until he cum in her mouth.

After all, it is the first food since yesterday at noon that she gets. So that he is satisfied, she cleans his cock with her tongue as best she can.

After the guard was orally satisfied by Jenny, he turns Jenny into upright position and fucks her again.

After that he puts her belt and her gag back on and gets a strange device with tubes that he attaches to her belt and gag.

This is very nutritious and would keep you strong. After all, we still want a lot from you.

The liquid is pumped with pressure into Jennys mouth and it's hard to swallow with her mouth open. But at least they don't want to let her starve.

After he thinks she has taken enough food, he removes the device with the tubes and reconnects her belt and gag with another tube. In the meantime Jennys bladder is full to bursting. She hoped that he would now unhook her from the wheel but ...

The boss has no more time today and since you haven't been assigned a room yet, you'll stay here overnight.

Then he presses a few buttons on her belt.

So you don't get bored overnight, the belt will fuck you every half hour for 5 minutes. You are supposed to have a little fun.

People here have a strange concept of fun. And then he turns on the wheel rotations again which moves Jenny with slow motions into all possible positions.

The light has been dimmed and for hours she is turned and turned. Jenny no longer knows how many orgasms she has had. And still there is no end in sight. She could also no longer hold the contents of her bladder and thus everything poured into the hose, which she then got poured over this in the head over positions into her open mouth. But she doesn't care

Again and again she falls from exhaustion into a short fainting. And what scares her most is the fact that she still find this situation incredibly horny

Jennys mind switched off ...

So sweetie, off with you to the initial interrogation ...

In the interrogation room Jenny is tied to a special chair and a fucking machine is inserted into her pussy. Cable clamps with corresponding cables are attached to her nipples.

Who do we have here?
Aha, a traitor ... those are my favorite ...
What' s your name?

The guard removes Jenny' s gag and the only answer Jenny could give was: „blubb“

It looks like someone is still sleeping. A little electric shock through your breasts will wake you up

Oups ... that might have been a bit much. Alaric, mount the prisoner on the special chair and we' ll wait for her to wake up.

Oh my god ... where am I? ... who am I? ... why am I tied up? ... who is this woman? ... ah, now I remember ... I am in this prison and was in this wheel ... and then I was gone. Now there' s something stuck in my pussy and in my anus again. I' m afraid they want to keep my holes permanently plugged.

Good morning Raquel, I hope you slept well and enjoyed your stay with us so far ...

Good morning Miss ... what about me? What are you up to? Why am I in this chair?

Silent ... I ask the questions, traitor. Now let' s just see if you can do a good job with your mouth, too.

The boss folds a chair over Jennys head and she can no longer move her head.

Jenny is stuck in this chair. Then the boss sits down and Jenny has her pussy right in front of her mouth. Jenny is clear what she expects from her and starts to work on her labia and clit with the tongue what is acknowledged on the bosses part by a voluptuous moaning while Jennys pussy and anus is penetrated by the machine.

Jenny is constantly fucked by the two dildos that are inserted in her pussy and anus while she licks the pussy of the boss.

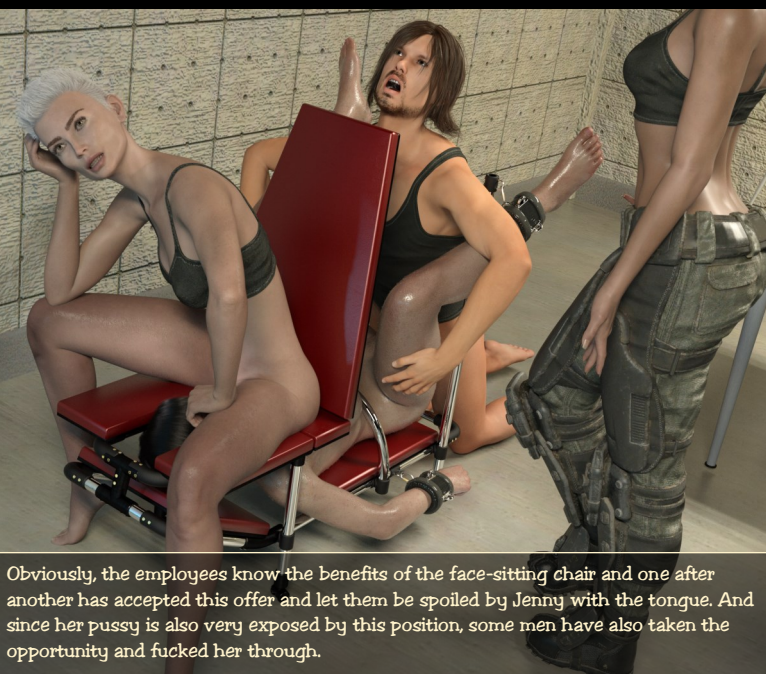

After the Boss had her orgasm she gets up, but the machine continues fucking Jenny.

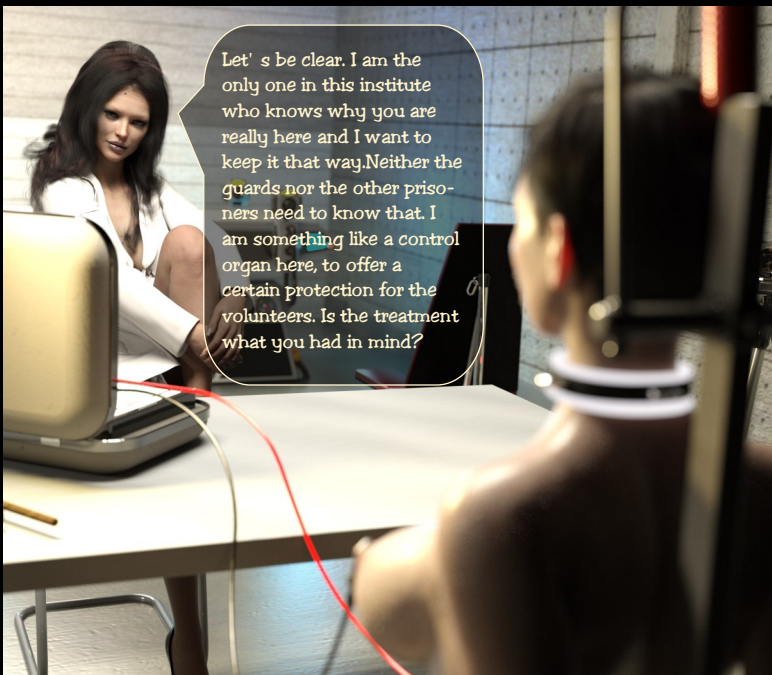

Wow, your tongue is first class. I am now totally out of breath. I need a coffee first. Alarie, let the others know that they can let themselves be spoiled by her. At 2 p.m. I want the prisoner back behind the desk ready for interrogation.

Yes Miss, will do.

Obviously, the employees know the benefits of the face-sitting chair and one after another has accepted this offer and let them be spoiled by Jenny with the tongue. And since her pussy is also very exposed by this position, some men have also taken the opportunity and fucked her through.

Let's be clear. I am the only one in this institute who knows why you are really here and I want to keep it that way. Neither the guards nor the other prisoners need to know that. I am something like a control organ here, to offer a certain protection for the volunteers. Is the treatment what you had in mind?

Yes, miss. Although it's also much more extreme than I could have imagined in my wildest dreams.

I'm glad to hear that. Because special treatment for softies is not possible here anyway. But we can definitely intensify the treatment even more ... Well, then I'll call Alarie back in and he brings you to the medical-checkup.

No sooner said than done and the boss calls the guard, who has also brought a new belt and cuffs and put these utensils on Jenny right away. Her wrists were tied to the side of the belt and so he leads her to the examination lab. The lab is only accessible by an elevator. The equipment is anything but what one might expect in a doctor's office.

Jenny is put by Alaric on the "examination chair" which looks more like a futuristic torture chair and fixed to it. Also the head is clamped and Jenny's movement possibilities are reduced to a minimum.

Since you are the last of the new inmates, we have a lot of time together and I will use the time to do some experiments with you as well.

But first you will receive breast injections with a drug I got from L&C Enterprises. This will increase your sensitivity to sexual sensations but also increase your limit to possible orgasms.

You will be permanently horny but will not be able to relieve yourself.

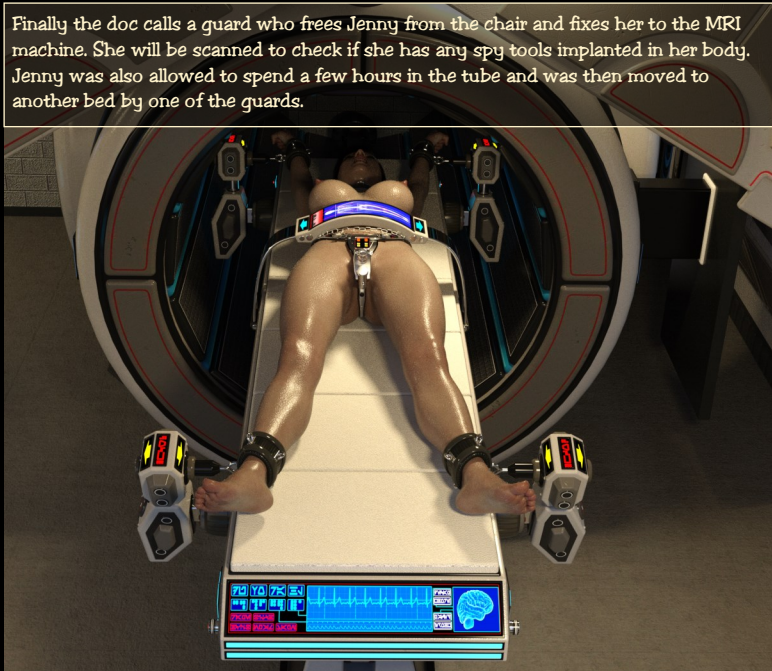

Oh yes, your breasts will also grow a little with the drug. I don't think you'll mind, will you?

After the injections, which were very painful for Jenny, have been administered, she remains fixed on the chair for a few hours to wait until the effect sets in. After that, Jenny receives a breathing mask and she is forced to inhale a gas mixture that enhances the effect of the injection and also ensures that orgasms are prolonged.

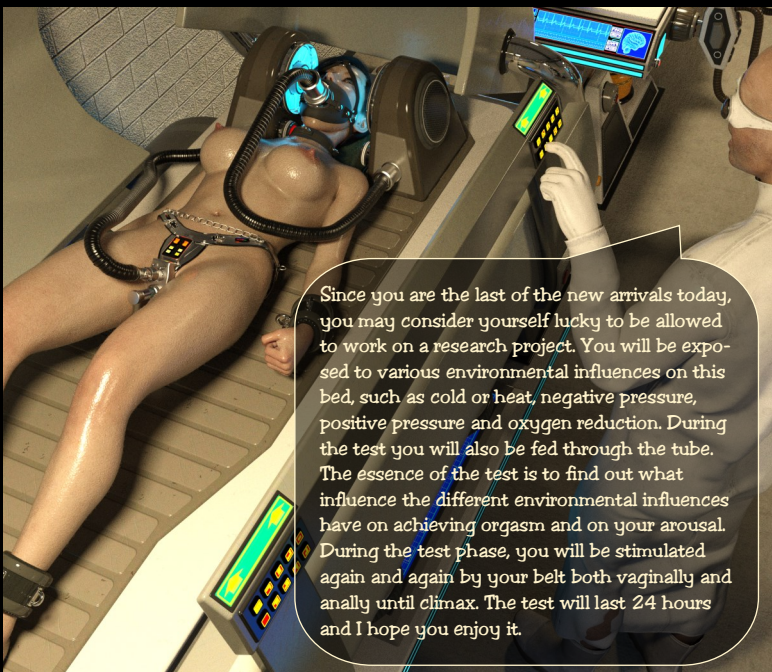

During this time, the dildo in her belt was activated and breast pumps were applied, stretching her nipples to the maximum. Jenny is also subjected to this procedure for a few hours and she reaches a few climaxes during this treatment.

She notices herself that each climax lasts longer and is stronger in intensity than the previous one. During the last orgasm, the intensity was so strong that she briefly lost consciousness. The head support has not only the purpose to fix Jenny's head, but also has sensors that record her brain waves during the treatment.

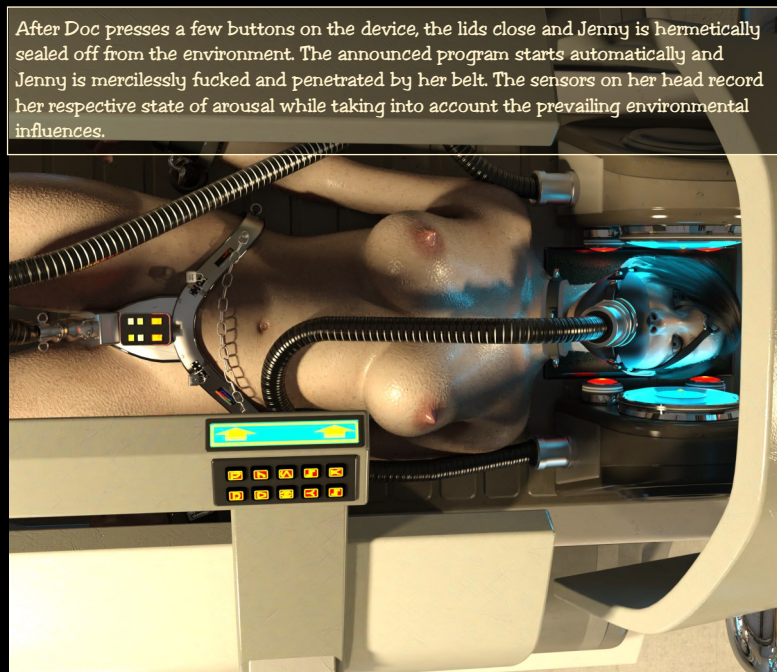

Finally the doc calls a guard who frees Jenny from the chair and fixes her to the MRI machine. She will be scanned to check if she has any spy tools implanted in her body. Jenny was also allowed to spend a few hours in the tube and was then moved to another bed by one of the guards.

Since you are the last of the new arrivals today, you may consider yourself lucky to be allowed to work on a research project. You will be exposed to various environmental influences on this bed, such as cold or heat, negative pressure, positive pressure and oxygen reduction. During the test you will also be fed through the tube. The essence of the test is to find out what influence the different environmental influences have on achieving orgasm and on your arousal. During the test phase, you will be stimulated again and again by your belt both vaginally and anally until climax. The test will last 24 hours and I hope you enjoy it.

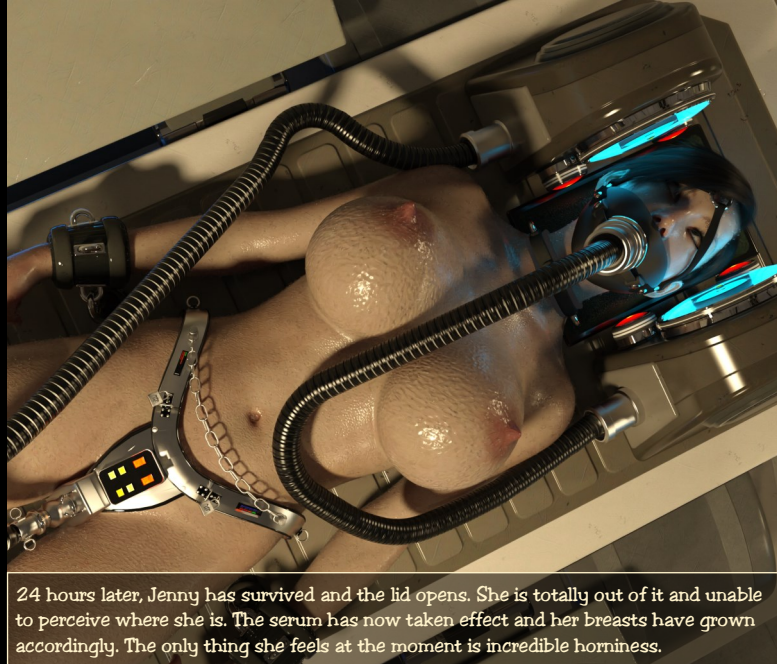

Due to the injections Jenny is in a permanent state of arousal anyway and also the orgasms are much longer than normal. Not only once Jenny loses consciousness because of the intensity of her orgasms. Every time this happens the penetration stops and the devices wait until she wakes up again to continue with the test afterwards.

After Doc presses a few buttons on the device, the lids close and Jenny is hermetically sealed off from the environment. The announced program starts automatically and Jenny is mercilessly fucked and penetrated by her belt. The sensors on her head record her respective state of arousal while taking into account the prevailing environmental influences.

24 hours later, Jenny has survived and the lid opens. She is totally out of it and unable to perceive where she is. The serum has now taken effect and her breasts have grown accordingly. The only thing she feels at the moment is incredible horniness.

24 hours later, Jenny has survived and the lid opens. She is totally out of it and unable to perceive where she is. The serum has now taken effect and her breasts have grown accordingly. The only thing she feels at the moment is incredible horniness.

Alaric frees Jenny from the chamber and, since she is currently neither responsive nor able to walk by herself, he lifts her back onto his shoulder to take her to her cell in the cell wing. But on the way there the boss stops him.

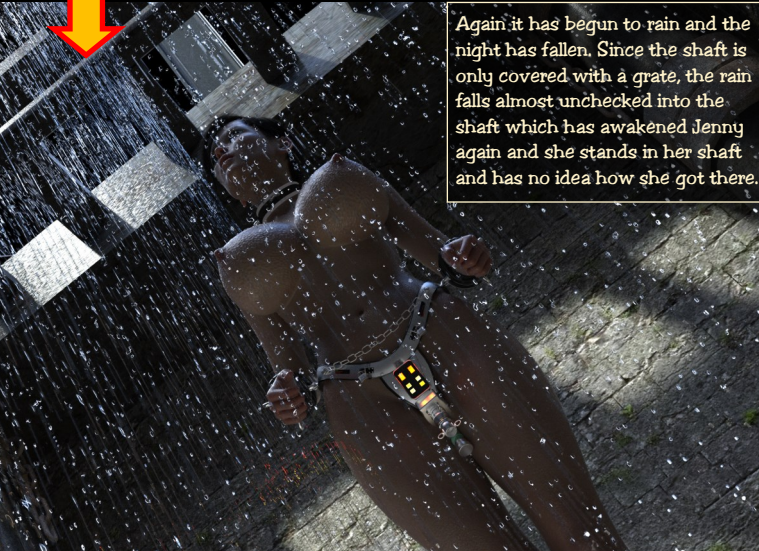

Sorry Alaric, but Raquel's cell is not free yet. She has to spend the night in one of the shafts in the atrium until tomorrow.

Ok, boss, will do.

Thus Alaric brings Jenny into the forecourt and hangs her upside down on the hook of the cargo crane with her ankles tied together and her wrists tied to her belt to lower her into the shaft.

In the somewhat more spacious shaft, which even contains a cot for sleeping, Jenny is carefully laid down on the floor, the hook is unhooked and pulled back up. Before that, the doc checked to make sure that the extreme treatment had not left any physical damage, and only extreme tiredness was found. Jenny herself, of course, has no idea that she is lying in this shaft and the surprise will be all the greater when she awakens.

Again it has begun to rain and the night has fallen. Since the shaft is only covered with a grate, the rain falls almost unchecked into the shaft which has awakened Jenny again and she stands in her shaft and has no idea how she got there.

The belt itself is currently inactive and the serum that was injected into her breasts is still active. Jenny is horrified to see that her breasts have grown extremely. Since she is extremely aroused by the serum, but has no possibility to relieve herself due to the bondage, she has only one thought to be fucked as soon as possible

Jenny lies down on the cot, which is a little protected by a ledge in the ceiling and tries to sleep, which she always succeeds only for a short time, because the belt remains inactive during the whole night and denies Jenny the so necessary release from her urge imposed by the injection

" Please fuck me " ... is all Jenny can think about. Even the sweltering heat that spreads in the shaft during the day does not matter to her. Time passes agonizingly slowly and she has no idea how long she has to stay here.

Jenny is lifted out of the shaft with the crane and her cage is locked with padlocks as soon as she comes to the surface, which unfortunately minimizes the chance of relief for her

Please fuck me, please ...

Jenny had to wait until late afternoon until she was freed from the shaft. For this purpose a cage was let into the shaft and Jenny was asked to jump in. Is the long-awaited redemption coming now?

After many days of being permanently tied up and sweating endlessly, Jenny is taken by the guard to the shower room for a thorough cleaning.

In the shower room the guard takes Jenny out of the cage and leads her to one of the shower places where Jenny is secured with a chain to a metal bar. After that the attendant removes her own clothes and starts to clean Jenny with a sponge and a scrubbing brush.

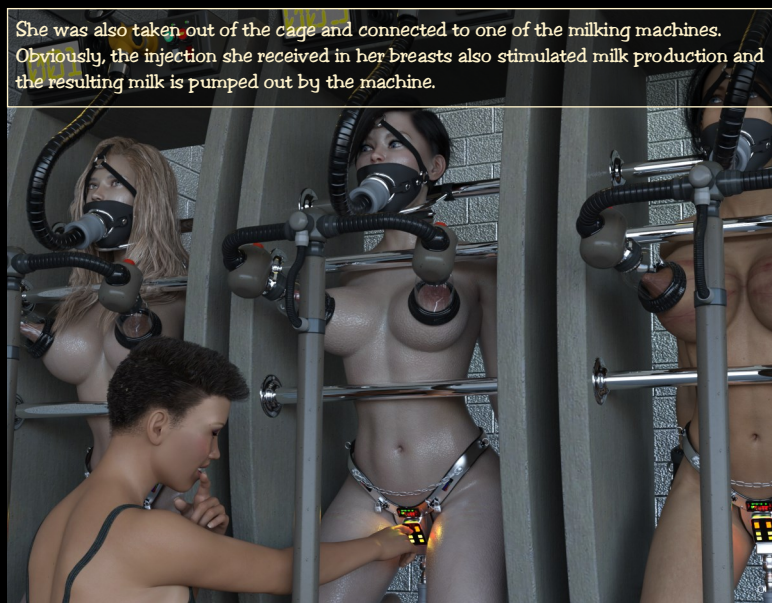

and then the foam is removed ...

After the washing process, the guard does not miss the opportunity to let Jenny show her gratitude for the service ...

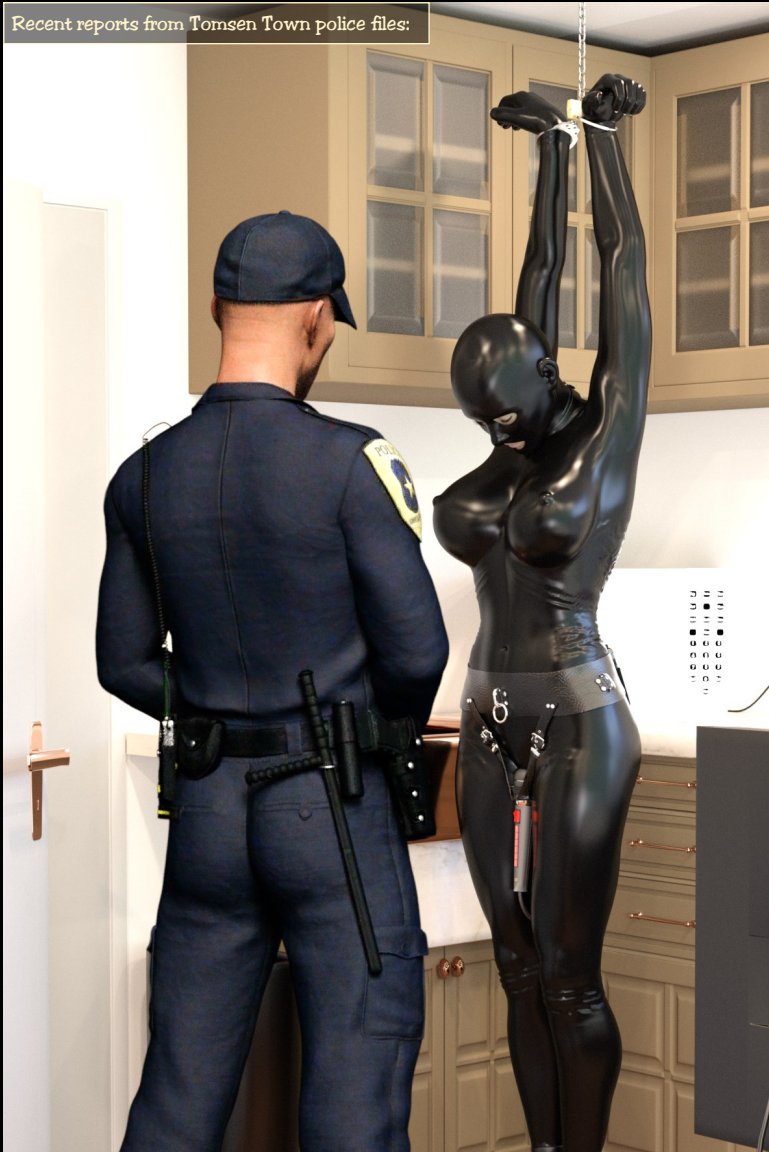

Then she was put back into the cage and taken to another floor ... The sight of the many helpless girls at the mercy of these machines terrified Jenny.

When she has been connected to the machine almost immobile, the guard activates her belt and the inserted plugs come back to life at the same time as the breast pumps.

Recent reports from Tomsen Town police files:

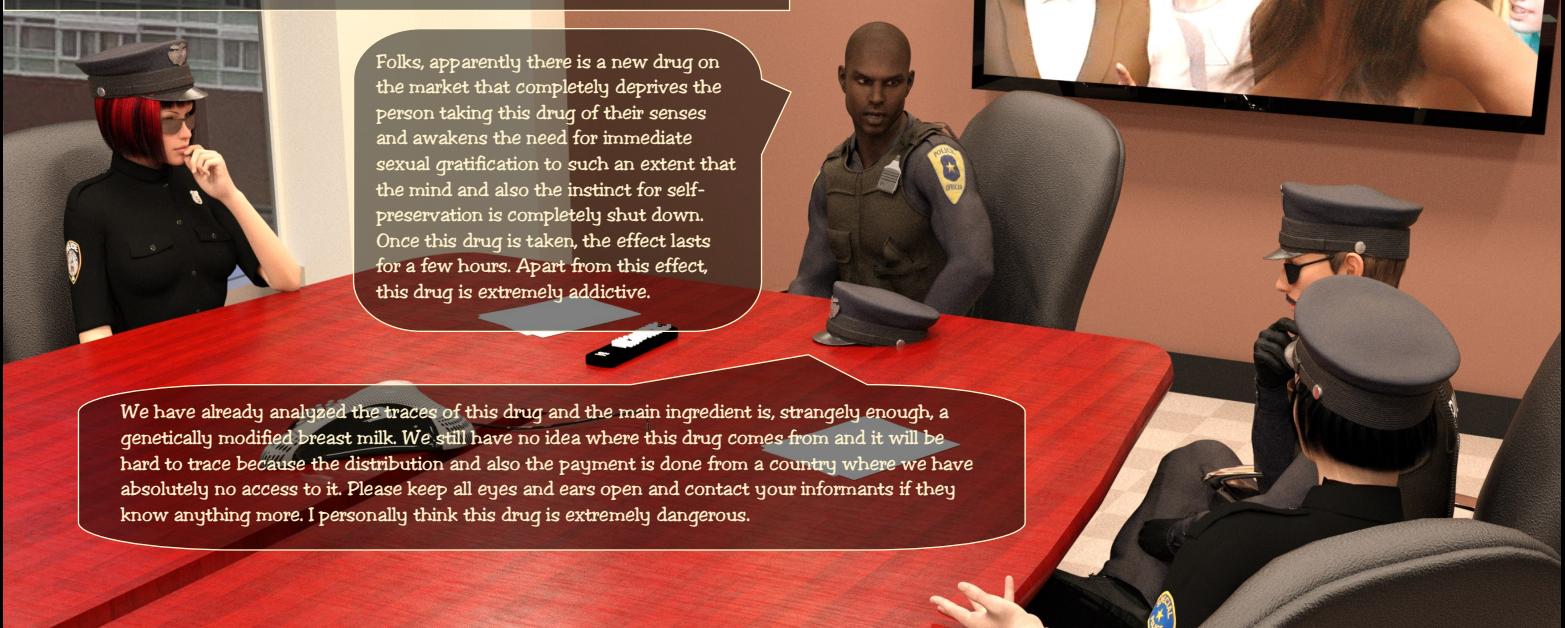

After receiving a call from a lady that loud screams of pain could be heard coming from a neighbor's apartment, a police patrol went to the apartment and found an unconscious woman tied up and hanging from the ceiling with a vibrator running. The keys to the restraints could not be found and according to the woman's later statement, she had thrown the keys away in the course of a self-bondage session. As it turned out, the woman acted under the influence of a new drug that intensifies sexual needs and makes all inhibitions and self-preservation instincts disappear.

Another case caused a sensation, where a woman in the open street removed her clothes and satisfied herself. She completely ignored the policeman's request to stop. It also turned out that this woman was under the influence of drugs and this new drug was mixed into her drink in a pub after she had left her seat for a short time. It was the same drug as in the first case.

Other cases of sexual inhibition were also reported to the police and always this new drug was involved. In one case, a traffic accident was caused that made the highway impassable for longer hours. By luck, no people were harmed here.

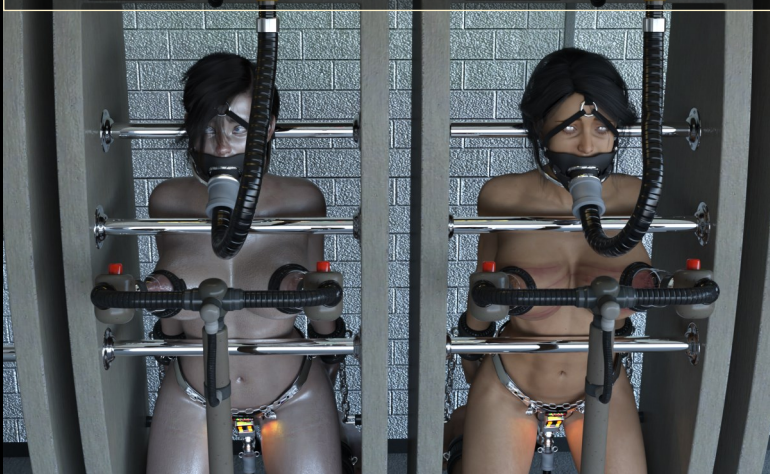

Police Chief Cooper gathers his command staff to brief and advise on the new situation.

Folks, apparently there is a new drug on the market that completely deprives the person taking this drug of their senses and awakens the need for immediate sexual gratification to such an extent that the mind and also the instinct for self-preservation is completely shut down. Once this drug is taken, the effect lasts for a few hours. Apart from this effect, this drug is extremely addictive.

We have already analyzed the traces of this drug and the main ingredient is, strangely enough, a genetically modified breast milk. We still have no idea where this drug comes from and it will be hard to trace because the distribution and also the payment is done from a country where we have absolutely no access to it. Please keep all eyes and ears open and contact your informants if they know anything more. I personally think this drug is extremely dangerous.

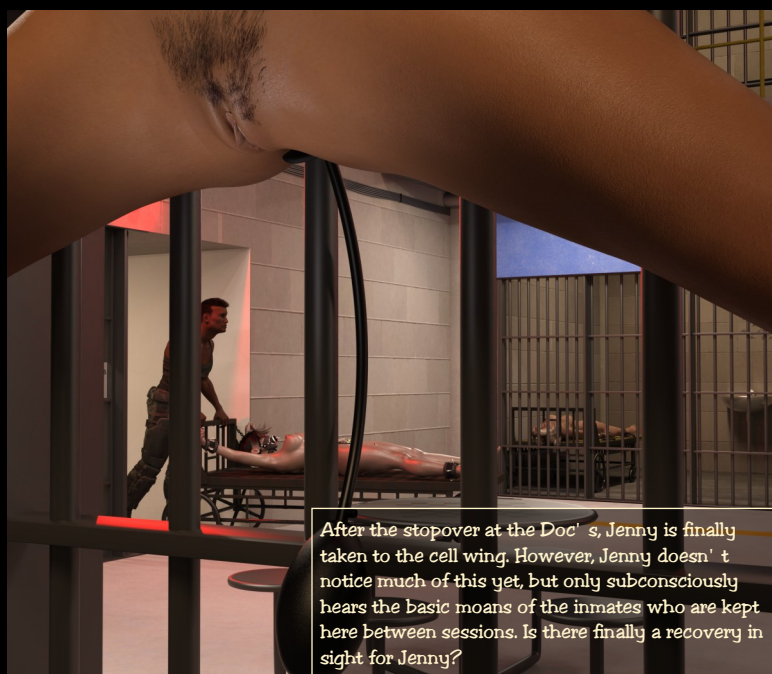

Endlessly Jenny is held in the milking machine. The pumps suck incessantly on he breasts. The fucking machine in Jenny' s Belt is set so that she is always kept in maximum arousal and receives one orgasm after another. Accordingly, this machine also makes short breaks again and again. Her anus is also permanently stimulated by the integrated vibrating plug. Her mind has long since left her body and she just floats in immeasurable horniness ...

Jenny' s signal light also turns green, meaning that her bottle is full and she is to be released from the pumping station. A guard frees Jenny and takes the full bottle and transports both of them by means of a transport bed ...

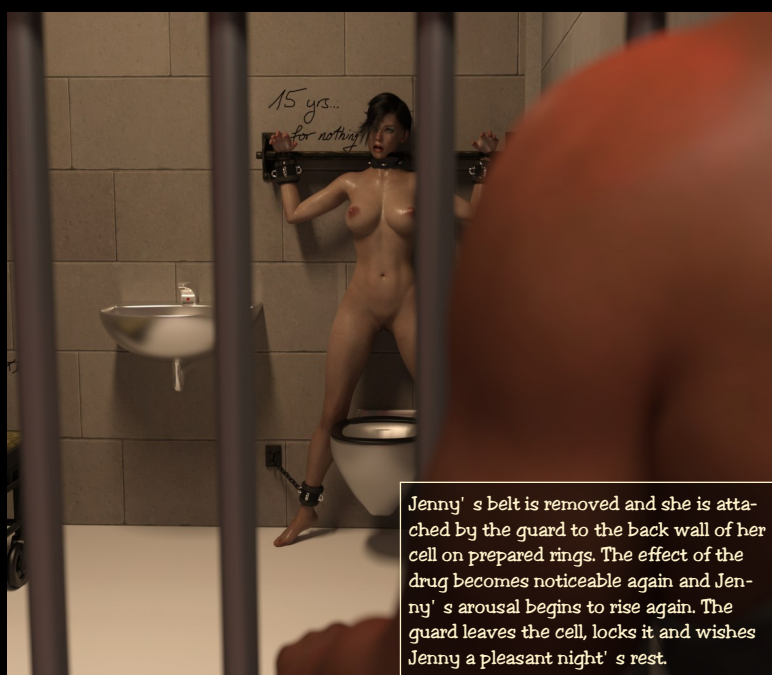

The guard makes a stop at the doctor' s office while taking Jenny away to deliver the milk bottle for analysis.

After the stopover at the Doc' s, Jenny is finally taken to the cell wing. However, Jenny doesn' t notice much of this yet, but only subconsciously hears the basic moans of the inmates who are kept here between sessions. Is there finally a recovery in sight for Jenny?

Target, Jenny' s Cell, reached ...

Jenny' s belt is removed and she is attached by the guard to the back wall of her cell on prepared rings. The effect of the drug becomes noticeable again and Jenny' s arousal begins to rise again. The guard leaves the cell, locks it and wishes Jenny a pleasant night' s rest.

The boss has invited the company's closest confidants to a meeting. They are Robert, the recruiter, Cassandra the developer of the serum, Mc Toy the scientific director, Philip the leader of the Guards and Paul who is responsible for distribution.

Can you fill us in on the latest progress

Of course, first still the result of the analysis of the basic material of this Raquel (= Jenny). Her breast milk has a quality that is above average and can produce four times the drugs that the other producers would be capable of. In order to be able to release the right hormones for production, she must be kept permanently in a state of alternating deprivation followed up with continuous orgasms. For this it is also necessary that she must also be kept in states of fear and agony. That means, Philipp, your people can have a full go at her. But I give to consider that also with Her, as with the others, it is not possible to hold Her longer than 4 weeks and to be able to recruit again at the earliest in one year. The quality of the base material decreases extremely after 4 weeks and the ladies would not tolerate a longer treatment either. That means, Robert, you must not slack off in providing supplies.

I also have some progress both in the development of the catalyst that the girls get with the injections and in terms of the final product. With the catalyst, I have been able to increase the length of an orgasm by a factor of 10, which helps the quality of the final product by increasing the release of the modified hormones. This means that the final portion of the final product requires only half the amount of breast milk and we can increase the production to double. But as mentioned by Dr. McToy, there must be a break of at least 10 hours of deprivation accompanied by fear and torment between orgasms, and during pumping the girls must have one orgasm after another.

Doesn't that shorten the usability of the suppliers?

No, it doesn't although the girls will be a little more drained after 4 weeks.

There is another important point we need to discuss. We have agreed that nothing of the drug will be sold in Tomsen Town or in our country. How can it be that cases are now coming to light that the local drug squad has brought to our attention. That is what we need the very least. I think we clearly cleared that up at the time.

Paul, find out who that was and we'll put a stop to it.

Jenny did not need to think about sleep that night. It is impossible to sleep in this position.

These were not only male visits who wanted to fuck Jenny, but also female guards came to play with her.

Apart from this fact she received many visits during the night. And as you can easily guess, these visits did not come to chat.

During the night, also because of the serum, the breasts swelled up again and after the rush of visitors suddenly stopped a few hours before daybreak, the urge for sexual relief also grew until dawn.

The guard opens the shackles and Jenny sinks onto the toilet seat, completely exhausted.

Please fuck me

Don't worry, they are already waiting for you in the streaming studio and there you will be fucked so hard that you won't be able to see or hear

Unable to take even one step by herself, Jenny is brought to the studio by handcart.

Jenny doesn't realize at all what they are planning to do with her.

Jenny is pushed forward to the stage.

Ah, here comes our main attraction. Well, lift her up onto the stage and I'll secure her accordingly.

Jenny is lifted onto the platform and chained there accordingly. Then the platform starts rotating slowly, that all sides of Jenny are visible.

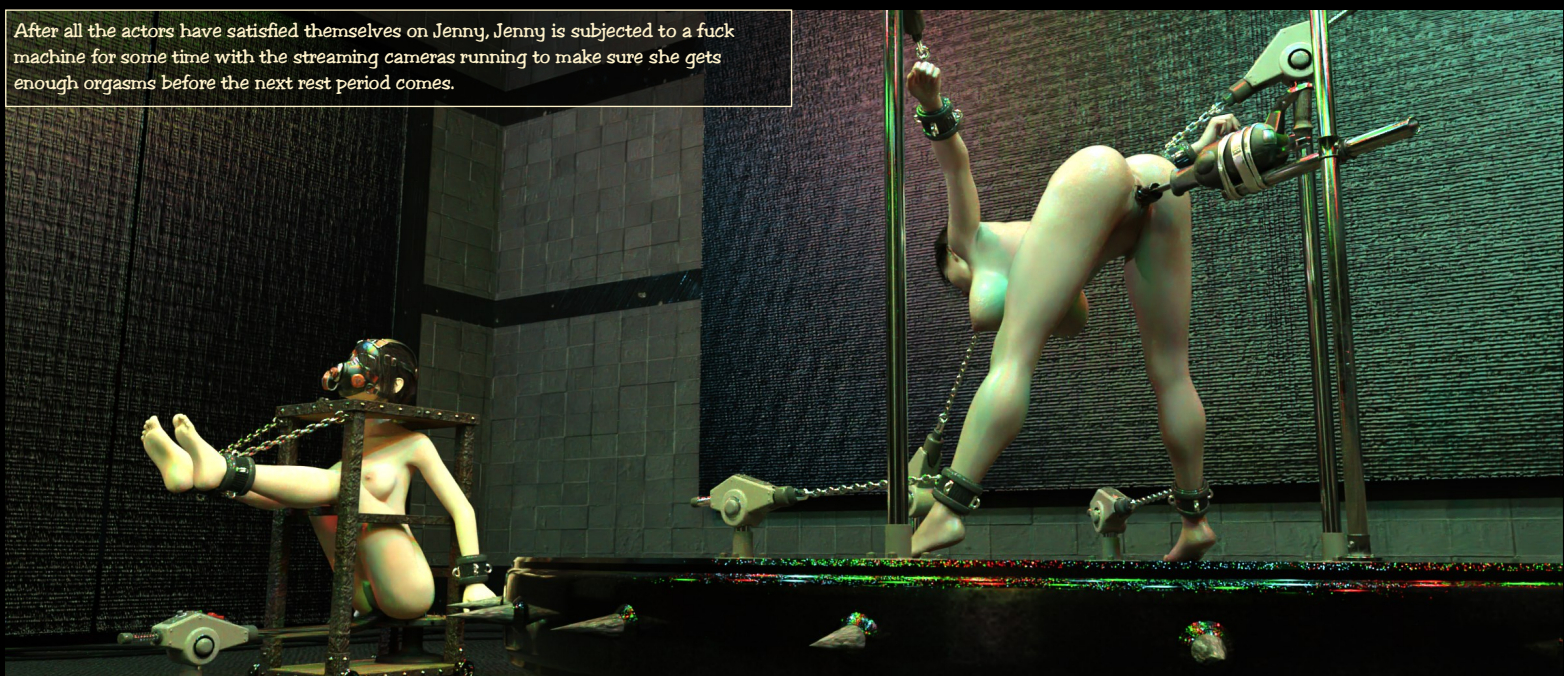

And finally Jenny's wish comes true and she gets fucked by the guard ...

Some guards have found each other to fuck Jenny one by one. Also women with strap on dildos have joined the queue

After all the actors have satisfied themselves on Jenny, Jenny is subjected to a fuck machine for some time with the streaming cameras running to make sure she gets enough orgasms before the next rest period comes.

After almost endless time where Jenny is fucked mercilessly, the fuck machine is finally removed but no one thinks of releasing Jenny. She may still spend a few hours in this pose together with the two extras on the left and right. The platform on which Jenny slowly turns remains active, as do the cameras. But all the other people leave the studio and leave the 3 poor girls alone. Even after this intense fuck orgy, the serum is still active and the desire to be relieved again gradually builds up and even drowns out the pain that this uncomfortable pose entails.

The investigation against the drug gang is in full swing in Tomsen Town. Many clues lead in the wrong direction and also the dealer, who has been doing his mischief in Tomsen Town, could be arrested after relevant hints. Unfortunately, he could not give any clues, because the delivery of the drug as well as the payment, which was made in Pitcoins, could not be traced.

Thanks Babs for that tip and since we're treading water on the stand, we should follow up on every possible lead. What do you suggest we should do?

But officer Jenkins followed another lead and especially the fact that was the basic ingredient of the drug as well as the temporal causality led her to another lead. Officer Jenkins is mainly active in the BDSM genre and also follows all the news in the popular Tomsen Town newspapers and this offer of SM jail vacation has not escaped her. She also has a gut feeling that rings an alarm bell.

She discusses the whole thing with police chief Cooper, who immediately has an open ear.

I should apply for such a prison stint undercover. Being of a masochistic bent myself ... or I probably wouldn't be working here ... I have no problem letting that wash over me.

You want to take that chance? You know that's very dangerous. I think if you really want to do this, we should put an implant in you because I assume they're going to do an intensive cavity search and an implant can't be found without certain technical means. Then we'll always know where to find you and you should be able to raise an alert-trigger.

Yeah, that sounds like a good plan. That's how we do it and maybe that will get us somewhere. And if not, at least I had 4 weeks of fun at government expense.

After Jenny had to endure hours in the film studio in this extremely uncomfortable position, her urge for relief has increased again. Once again she was taken away, showered, fed and led to the milking room where she was tied into the last free milking machine.

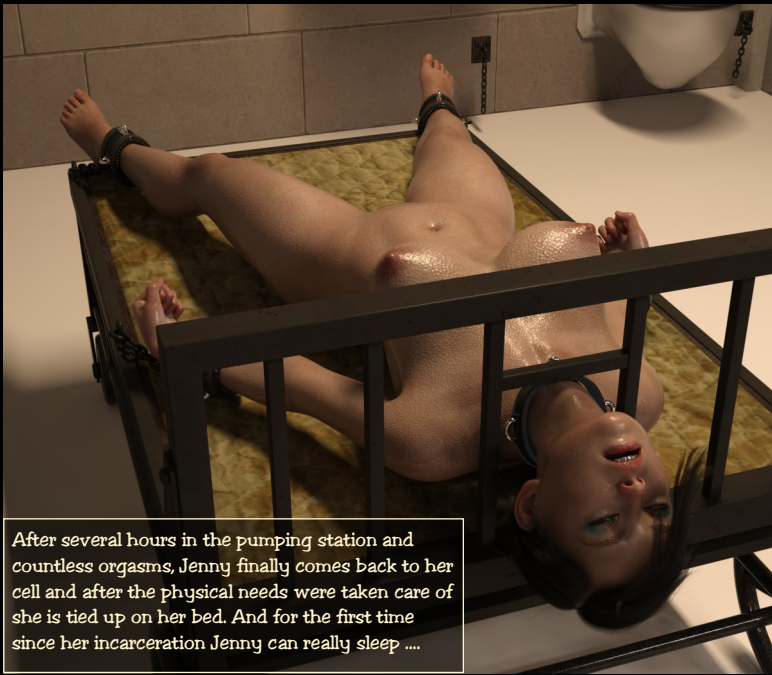

During the milking process Jenny was fucked by the integrated machines and got the relief she longed for. Also, the position in the milking machine is much more comfortable than in the film studio and so she begins to enjoy her stay in the milking room.

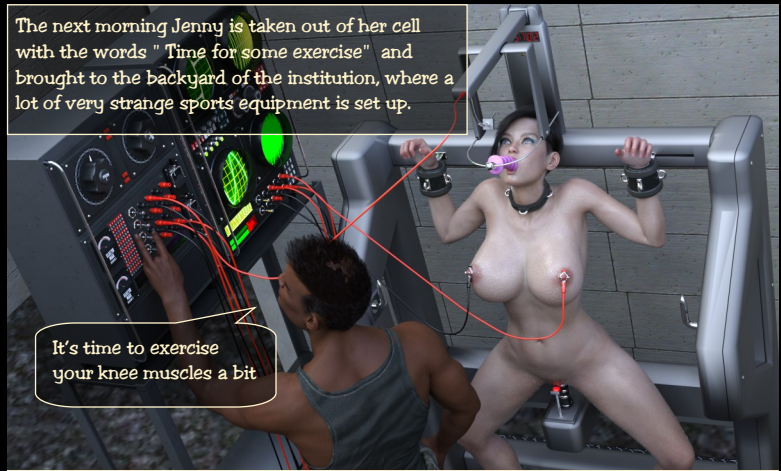

That evening, Officer Barbara Jenkins picks up the newspaper article and calls the phone number listed in the ad. Of course, in her capacity as a police officer, she had the call tracing activated. But as it turns out, it's an Internet number where the actual caller is behind an untraceable TOR network. Also, the operators of the prison have become more cautious and no address was given, but a meeting place where Barbara will be picked up. Already the day after tomorrow, on Saturday, the meeting is to take place.

The thought of being committed to a torture prison has already made Barbara so horny in advance that she has a few toys ready ...

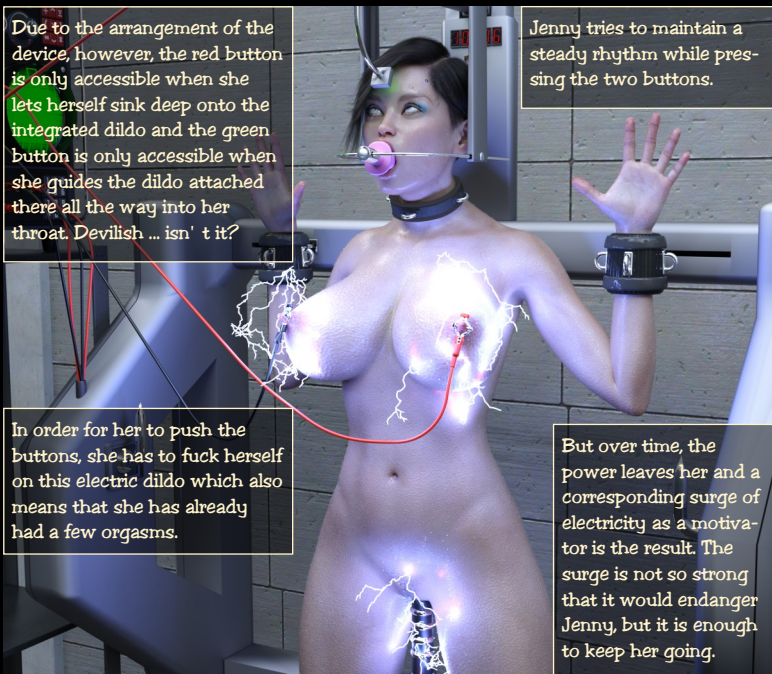

After several hours in the pumping station and countless orgasms, Jenny finally comes back to her cell and after the physical needs were taken care of she is tied up on her bed. And for the first time since her incarceration Jenny can really sleep ...

The next morning Jenny is taken out of her cell with the words "Time for some exercise" and brought to the backyard of the institution, where a lot of very strange sports equipment is set up.

It's time to exercise your knee muscles a bit

As already mentioned, the program for the actual goal of this institution includes that the prisoners are subjected to certain tortures in the morning on the one hand and on the other hand they have to reach some climaxes. This is also the case with this unit. At forehead level there is a green button and at mons there is a red button. Both buttons have to be pressed alternately. If she does not do this in time, then Jenny gets appropriate encouragement via the cables in the form of power surges to work faster.

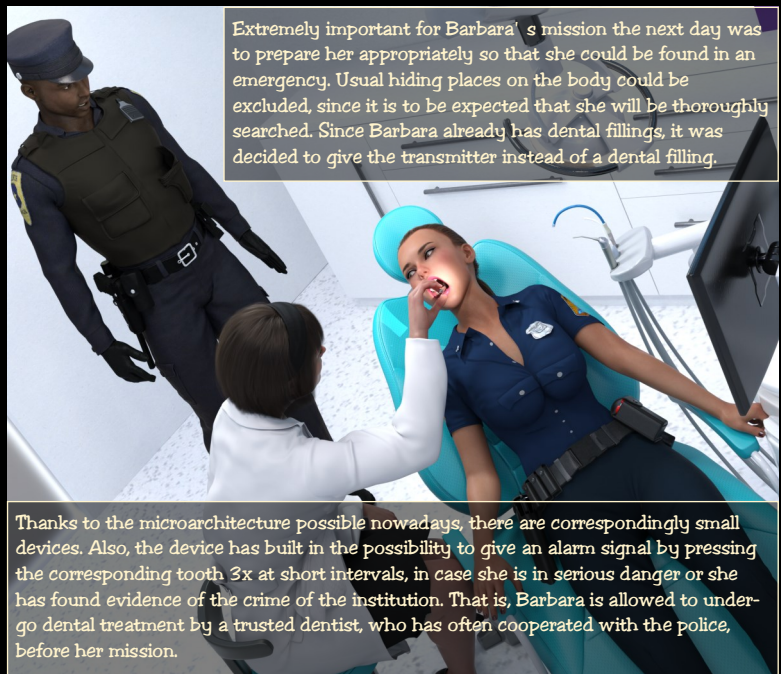

Due to the arrangement of the device, however, the red button is only accessible when she lets herself sink deep onto the integrated dildo and the green button is only accessible when she guides the dildo attached there all the way into her throat. Devilish ... isn't it?

Jenny tries to maintain a steady rhythm while pressing the two buttons.

In order for her to push the buttons, she has to fuck herself on this electric dildo which also means that she has already had a few orgasms.

But over time, the power leaves her and a corresponding surge of electricity as a motivator is the result. The surge is not so strong that it would endanger Jenny, but it is enough to keep her going.

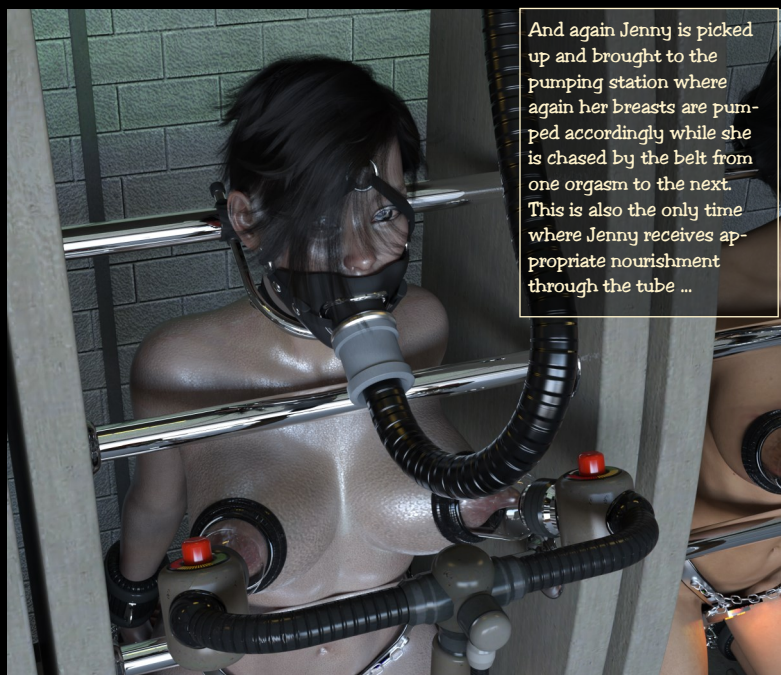

Extremely important for Barbara's mission the next day was to prepare her appropriately so that she could be found in an emergency. Usual hiding places on the body could be excluded, since it is to be expected that she will be thoroughly searched. Since Barbara already has dental fillings, it was decided to give the transmitter instead of a dental filling.

Thanks to the microarchitecture possible nowadays, there are correspondingly small devices. Also, the device has built in the possibility to give an alarm signal by pressing the corresponding tooth 3x at short intervals, in case she is in serious danger or she has found evidence of the crime of the institution. That is, Barbara is allowed to undergo dental treatment by a trusted dentist, who has often cooperated with the police, before her mission.

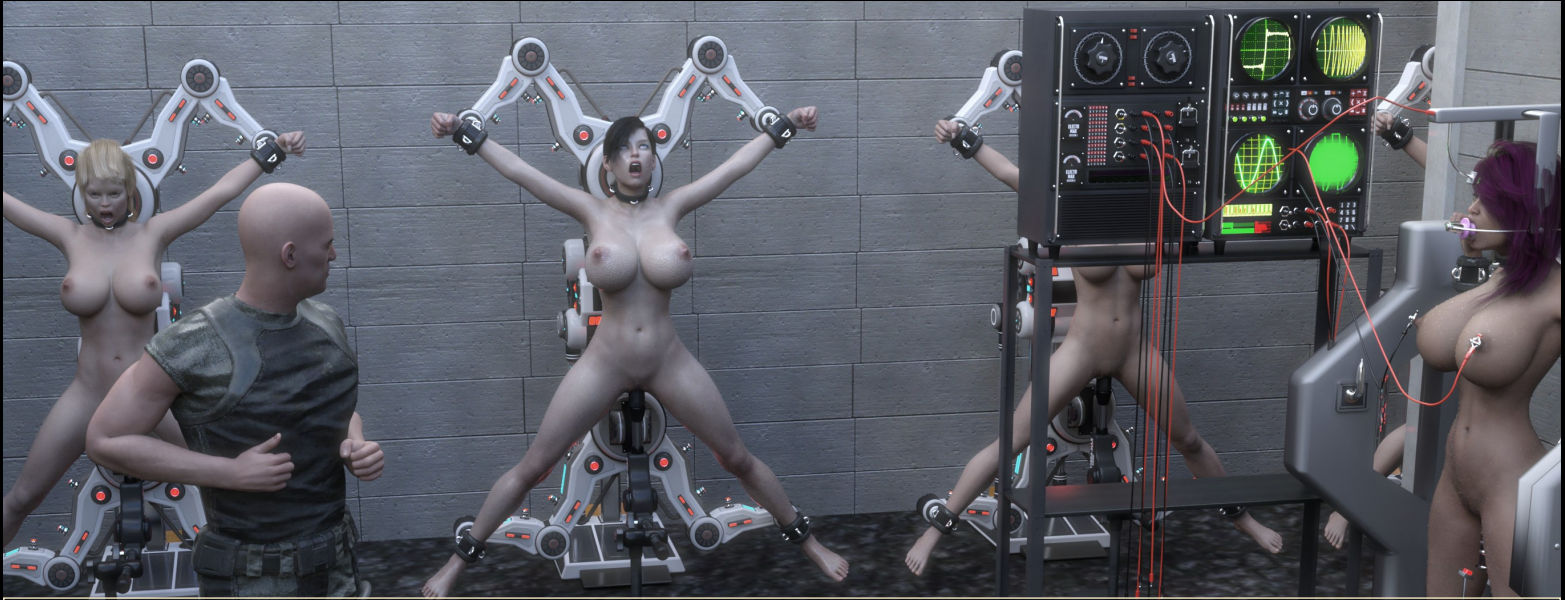

After Jenny was allowed to fuck herself for hours in this strange device, the device was turned off and all devices were removed with which she could get an orgasm. In addition, she received her gag again and remains tied to this device for more hours until she is picked up again for the daily milking process.

And again Jenny is picked up and brought to the pumping station where again her breasts are pumped accordingly while she is chased by the belt from one orgasm to the next. This is also the only time where Jenny receives appropriate nourishment through the tube ...

A strange chair was set up in Jenny's cell for the following night, certainly a lot less comfortable than it was on the bed the previous night. Jenny was strapped to this chair and was also visited and fucked through several times during the night by different guards.

After a very uncomfortable and fucking night Jenny is brought back to the yard and together with other inmates again put on a fuck machine where she is left to this machine for a longer time. Afterwards the fuck part is removed and she waits again to be picked up for the pumping machine.

The time has come. Barbara waits at the agreed meeting point, where she is picked up by a black SUV with black tinted windows. She was told to wear nothing but a hanging dress and shoes. Underwear was forbidden ... Still she is kindly asked to take a seat in the back seat and she gets in. The event now takes its course ...

The SUV drove Barbara into a parking garage where a van was waiting for her and Barbara was ordered to get out and get into the van. But before she could enter the van there was a " Stop, remove your clothing before you get into the van.

These measures seem a bit excessive to Barbara for this prison vacation stay and her suspicions that this organization is engaged in dishonest machinations are becoming more and more substantiated. Nevertheless, she wanted to go through with it before sounding the alarm. She had also asked the other occupants of the SUV' s why the security measures were so extreme and the answer was, " It' s part of the show"

Barbara considers whether to object to the order to strip naked, but has decided against it because she does not want to be rejected at the last moment. She gets into the van and the door is closed behind her.

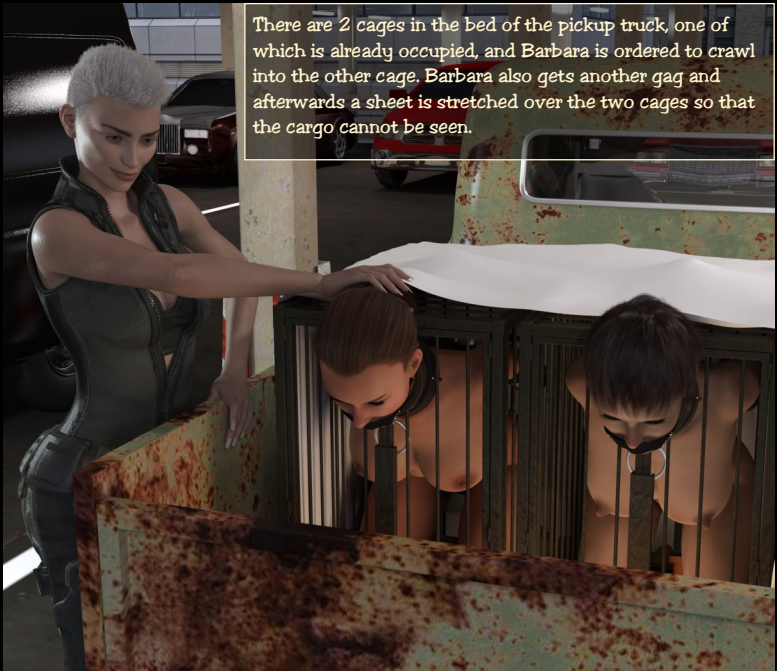

The person sitting behind the desk gives her a cursory body search and especially when searching the oral cavity she had a little uneasy feeling, but the new seal in the prepared tooth did not attract any attention. What followed was the usual questioning and explanation of her role in the prison. After that, she had to sign forms stating that she had voluntarily submitted to the procedure and that the institution had acquired all rights to her including torture and punishment without any right of objection on her part, and so on.

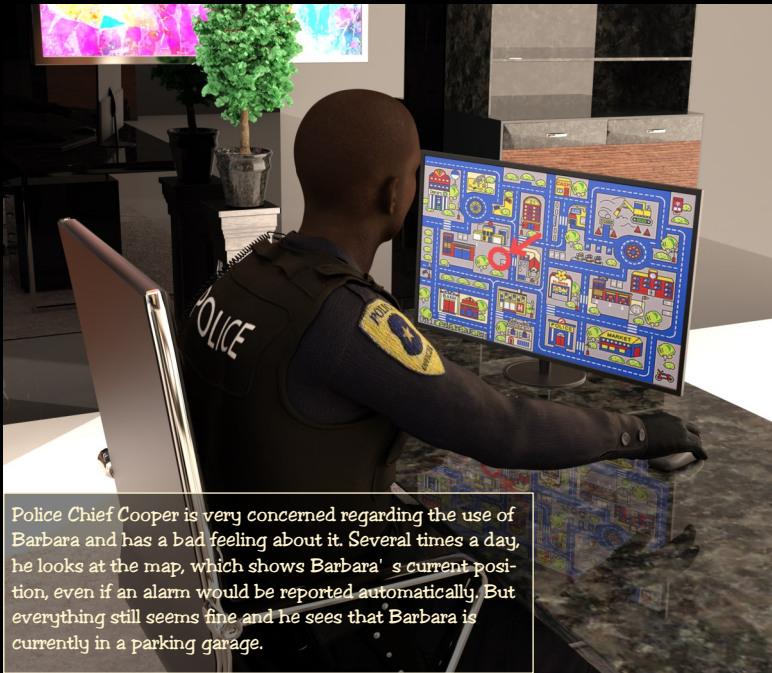

After Barbara signed, Robert said: " Welcome to the Prison, I hope you enjoy your stay. Get out now, you will be picked up."

Barbara exited the van and the SUV was replaced by a pickup truck with cages. Barbara' s hands are tied behind her back in an armbrinder by 2 guards and locked in one of the cages in the back of the pickup.

There are 2 cages in the bed of the pickup truck, one of which is already occupied, and Barbara is ordered to crawl into the other cage. Barbara also gets another gag and afterwards a sheet is stretched over the two cages so that the cargo cannot be seen.

Police Chief Cooper is very concerned regarding the use of Barbara and has a bad feeling about it. Several times a day, he looks at the map, which shows Barbara' s current position, even if an alarm would be reported automatically. But everything still seems fine and he sees that Barbara is currently in a parking garage.

And the journey into the unknown begins for Barbara and the other girl. In addition, the journey is accompanied by heavy rain showers that fill the loading area of the pickup truck more and more with water.

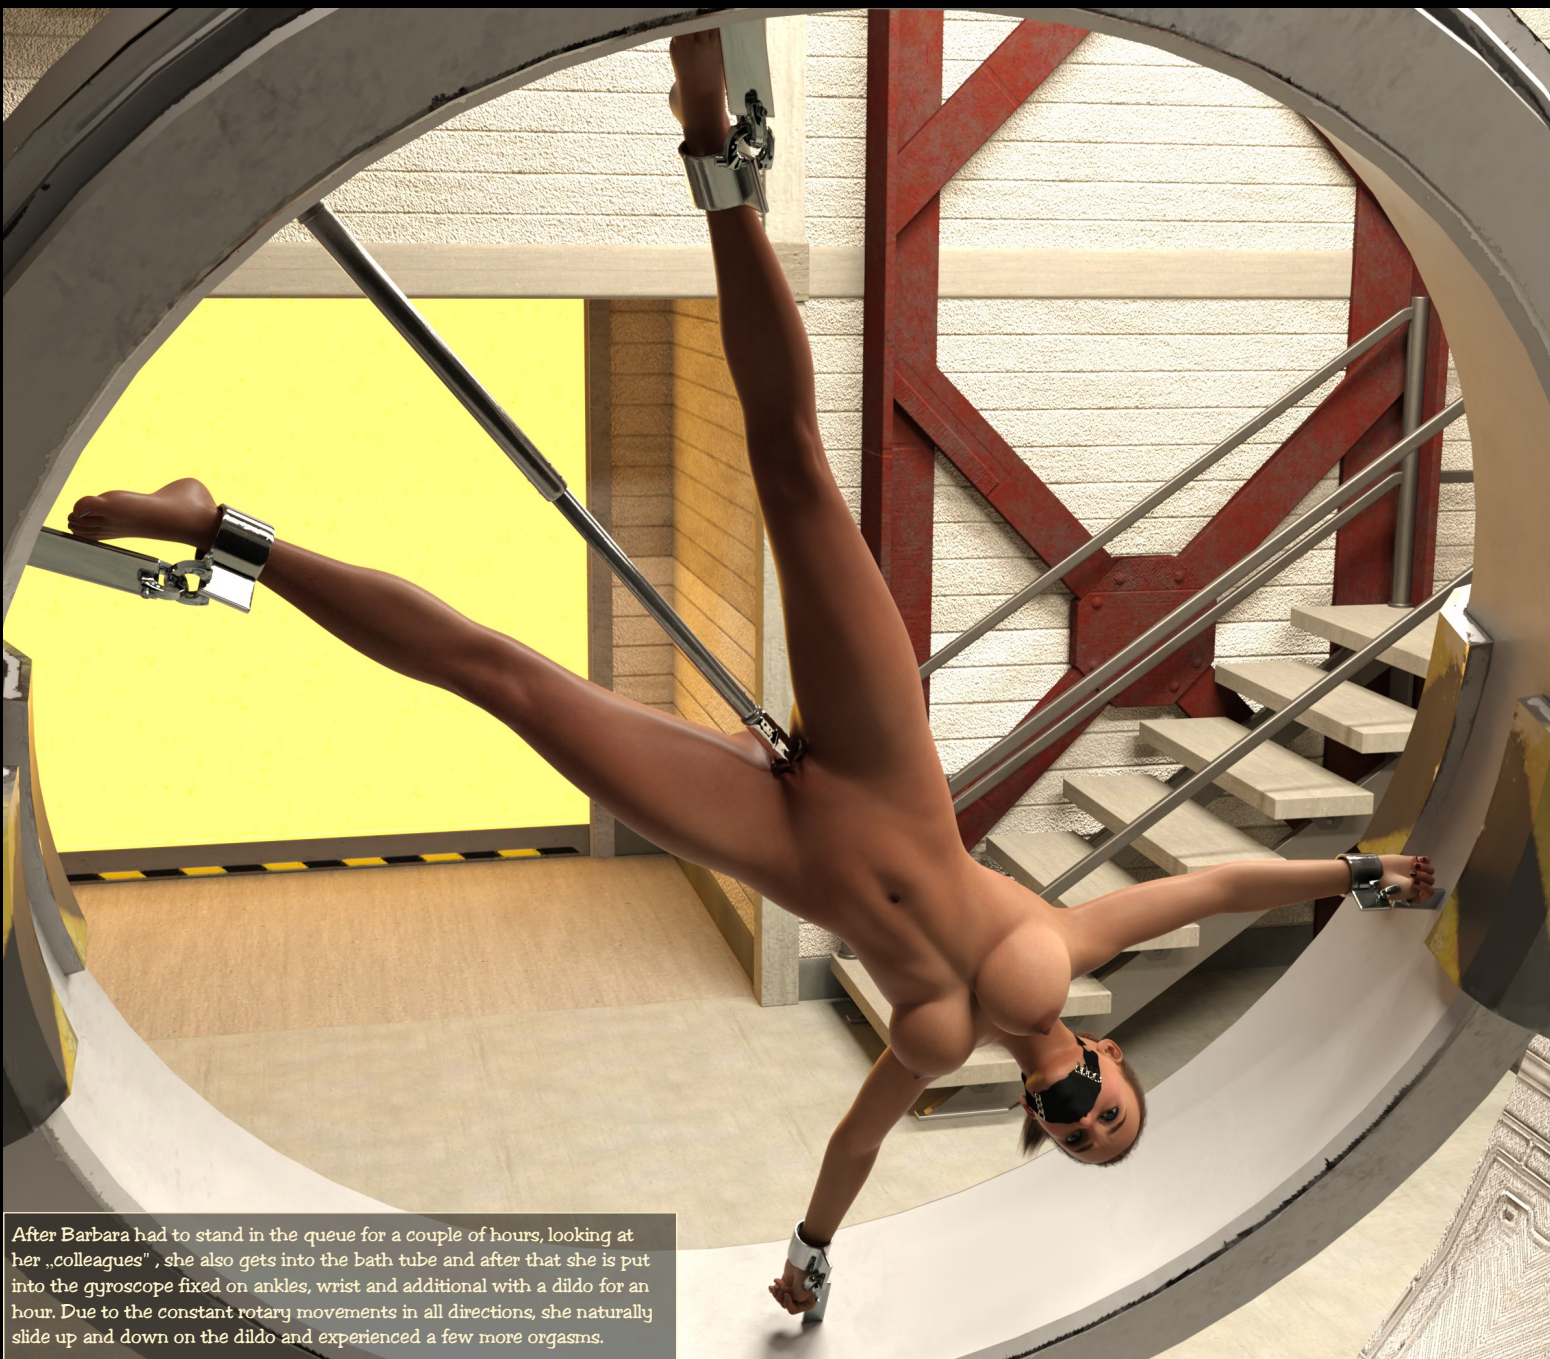

After Jenny has received several orgasms through the fucking machine, the fucking machine was removed and she was allowed to wait again a few hours completely helpless in her predicament. After that her belt was put on again and brought to the milking machine by the guard. There is nothing like a regular daily routine.

Barbara is now allowed to go through the usual onboarding process for this institution. First of all, she is put in the dildo-equipped cages, where she is tied up, blindfolded and gagged with the other volunteers, waiting for her turn to be examined.

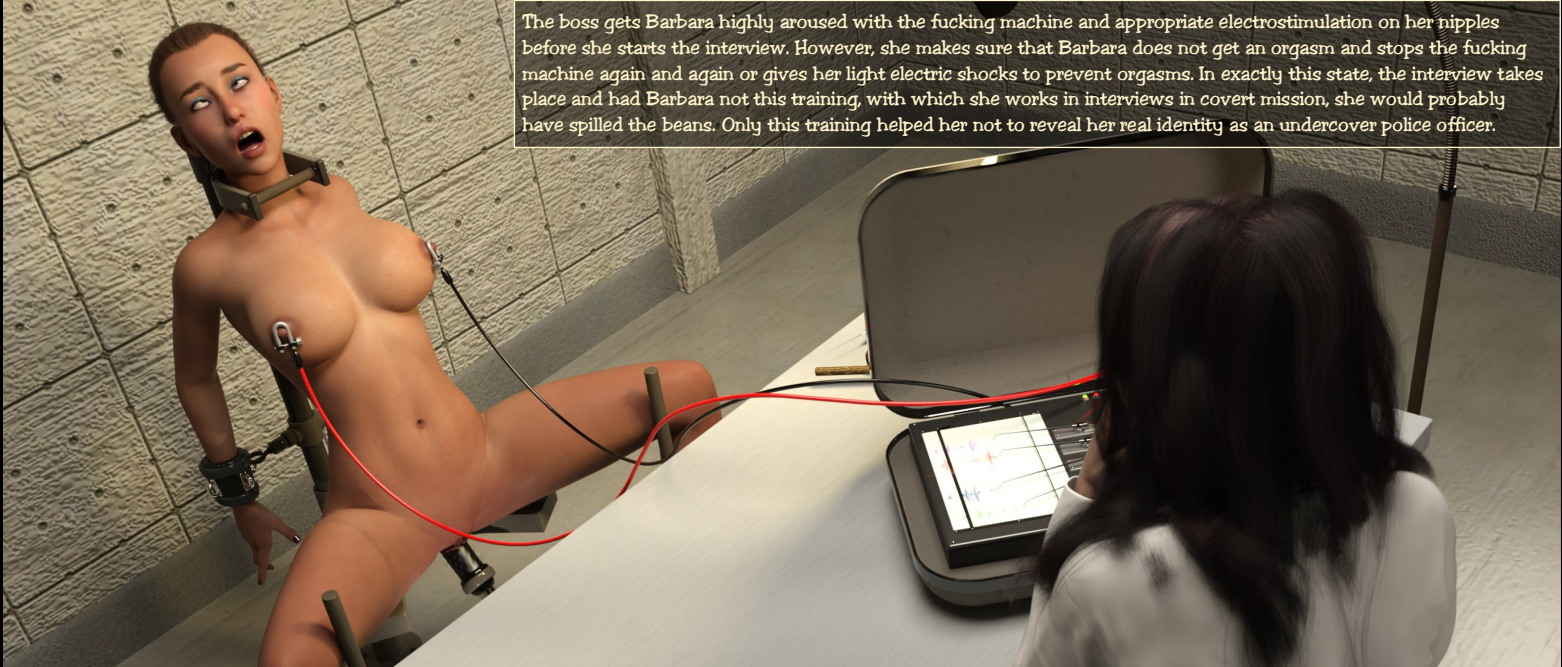

Barbara also gets in line for the washing bay. However, her waiting time is shortened somewhat by special treatment from a guard.

After Barbara had to stand in the queue for a couple of hours, looking at her „colleagues“ , she also gets into the bath tube and after that she is put into the gyroscope fixed on ankles, wrist and additional with a dildo for an hour. Due to the constant rotary movements in all directions, she naturally slide up and down on the dildo and experienced a few more orgasms.

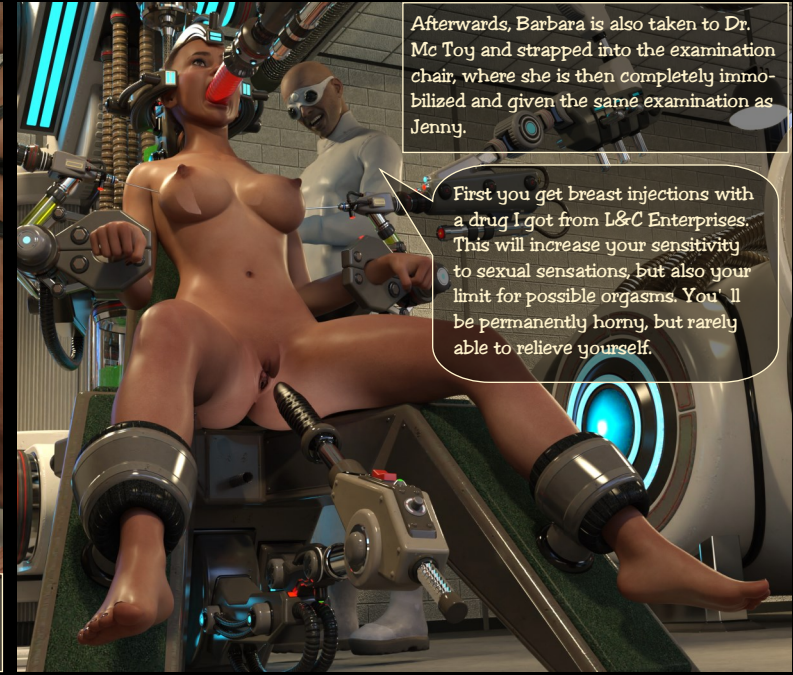

Over an hour Barbara was turned in all directions with the inserted dildo in the gyroscope and then, still completely dizzy in the head brought to the interrogation. As we have also experienced with Jenny, the interrogation is a farce. How should Barbara give reasonable answers here, if she is fucked by a machine during the interrogation.

The boss gets Barbara highly aroused with the fucking machine and appropriate electrostimulation on her nipples before she starts the interview. However, she makes sure that Barbara does not get an orgasm and stops the fucking machine again and again or gives her light electric shocks to prevent orgasms. In exactly this state, the interview takes place and had Barbara not this training, with which she works in interviews in covert mission, she would probably have spilled the beans. Only this training helped her not to reveal her real identity as an undercover police officer.

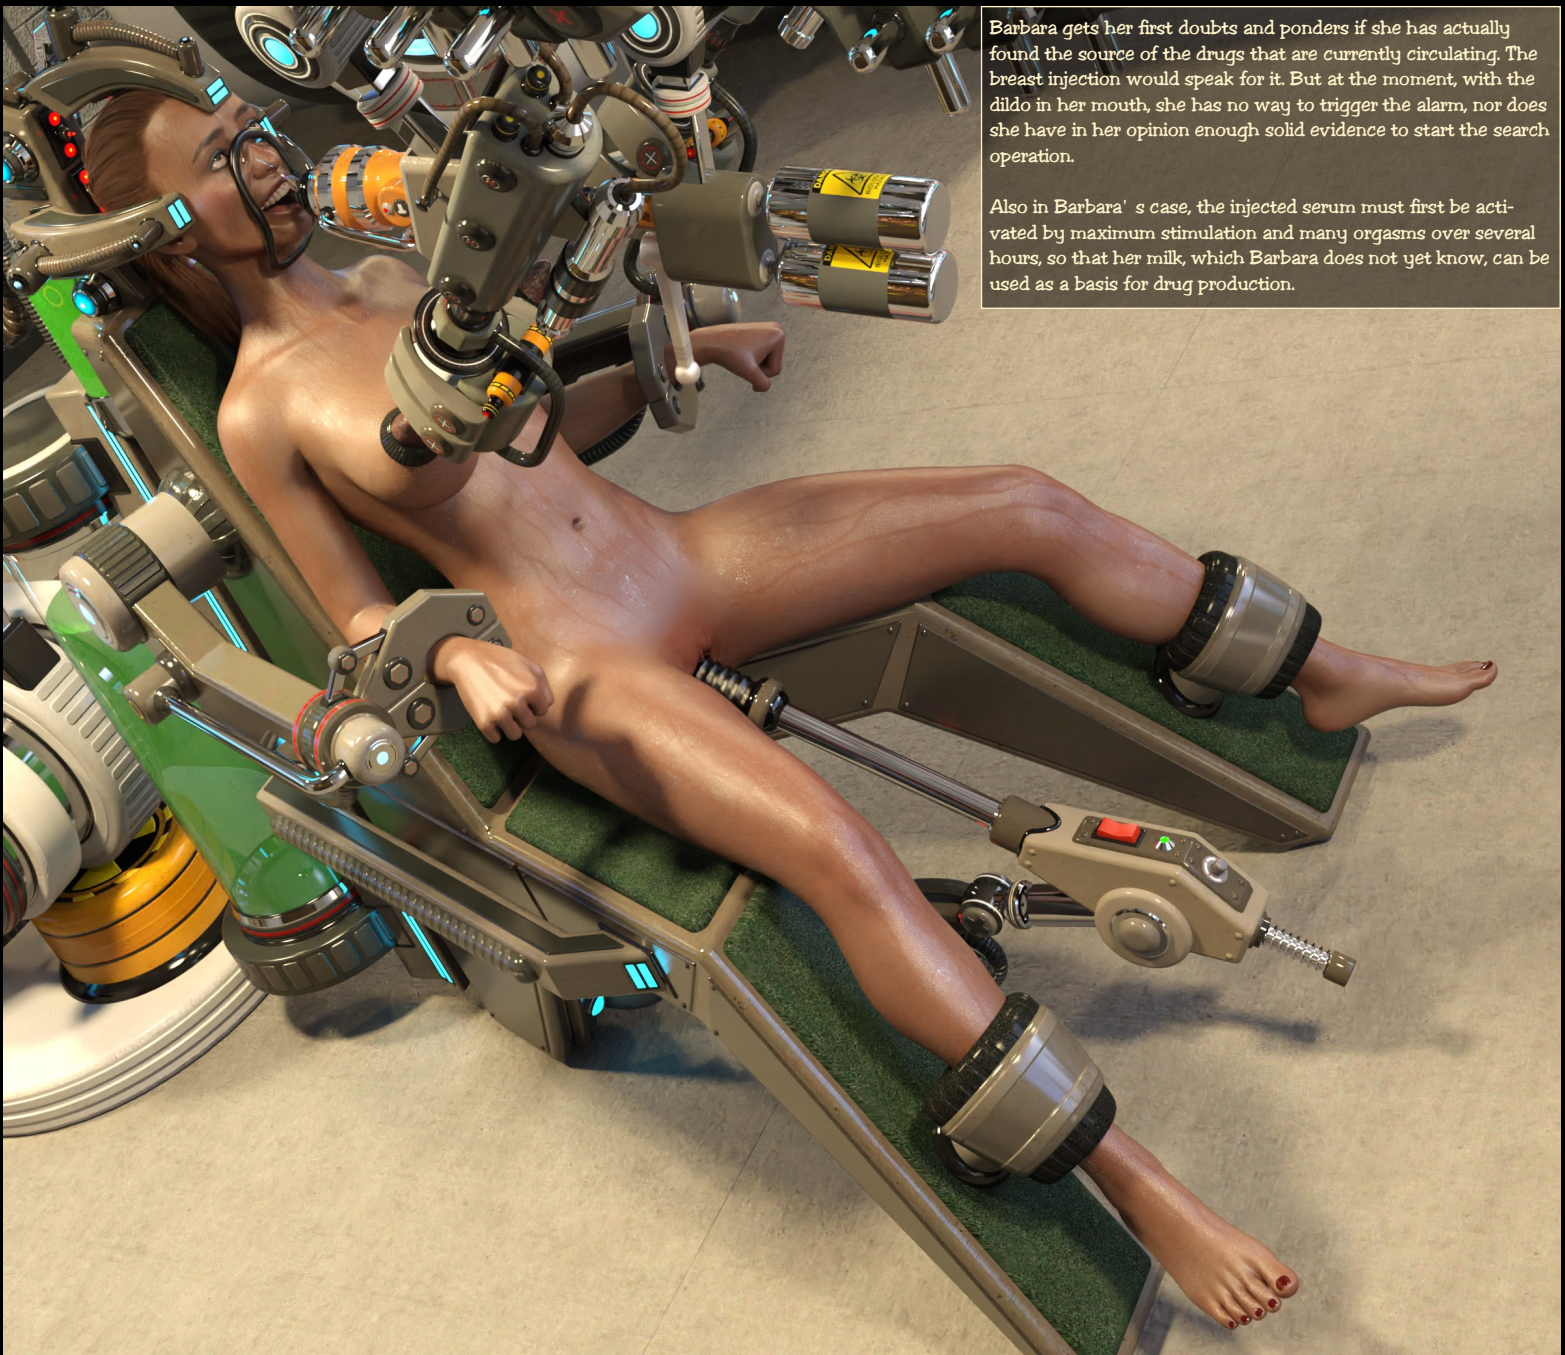

After the interrogation, Barbara was also put on a device that was less comfortable than Jenny's. But Barbara also had to prove her head work while being fucked by the male guards.

Afterwards, Barbara is also taken to Dr. Mc Toy and strapped into the examination chair, where she is then completely immobilized and given the same examination as Jenny.

First you get breast injections with a drug I got from L&C Enterprises. This will increase your sensitivity to sexual sensations, but also your limit for possible orgasms. You'll be permanently horny, but rarely able to relieve yourself.

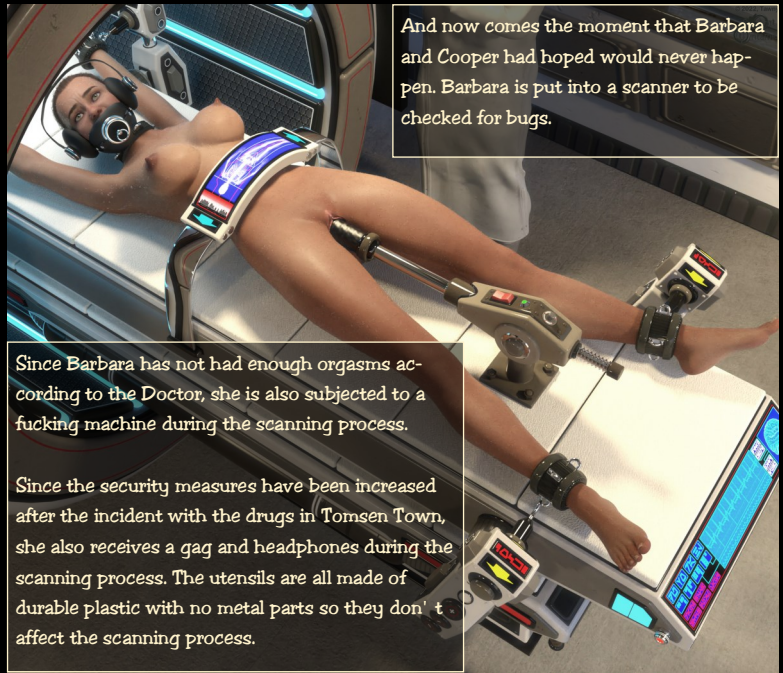

Barbara gets her first doubts and ponders if she has actually found the source of the drugs that are currently circulating. The breast injection would speak for it. But at the moment, with the dildo in her mouth, she has no way to trigger the alarm, nor does she have in her opinion enough solid evidence to start the search operation.

Also in Barbara's case, the injected serum must first be activated by maximum stimulation and many orgasms over several hours, so that her milk, which Barbara does not yet know, can be used as a basis for drug production.

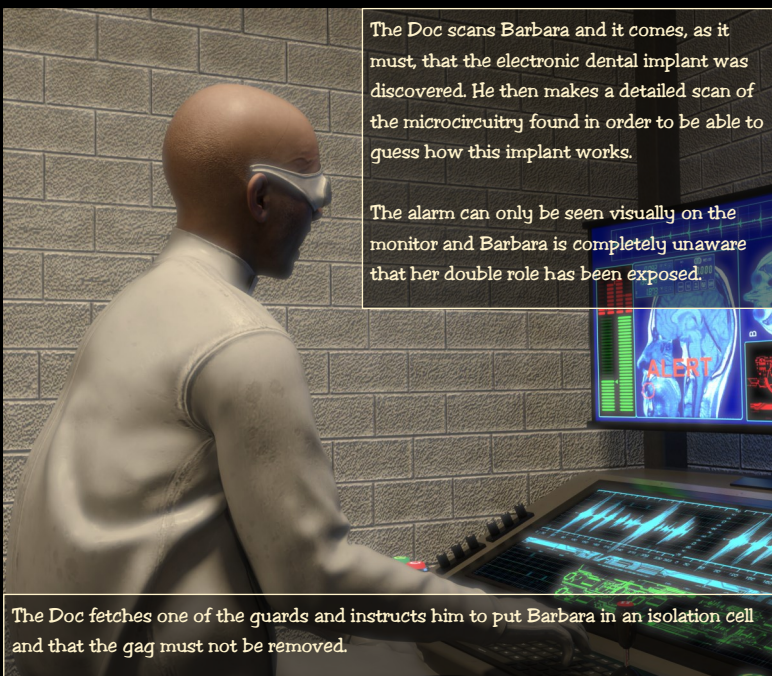

While Barbara may experience one orgasm after the other, Jenny was also put back into the pump and feeding machine and also experiences one climax after the other while the milk is pumped from her breasts.

And now comes the moment that Barbara and Cooper had hoped would never happen. Barbara is put into a scanner to be checked for bugs.

Since Barbara has not had enough orgasms according to the Doctor, she is also subjected to a fucking machine during the scanning process.

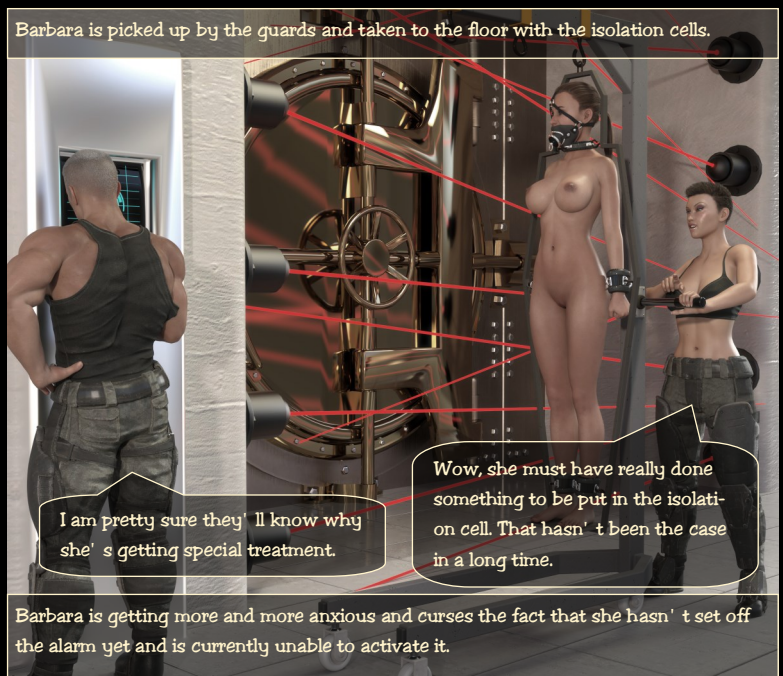

Since the security measures have been increased after the incident with the drugs in Tomsen Town, she also receives a gag and headphones during the scanning process. The utensils are all made of durable plastic with no metal parts so they don't affect the scanning process.

The Doc scans Barbara and it comes, as it must, that the electronic dental implant was discovered. He then makes a detailed scan of the microcircuitry found in order to be able to guess how this implant works.

The alarm can only be seen visually on the monitor and Barbara is completely unaware that her double role has been exposed.

The Doc fetches one of the guards and instructs him to put Barbara in an isolation cell and that the gag must not be removed.

Barbara is picked up by the guards and taken to the floor with the isolation cells.

I am pretty sure they'll know why she's getting special treatment.

Wow, she must have really done something to be put in the isolation cell. That hasn't been the case in a long time.

Barbara is getting more and more anxious and curses the fact that she hasn't set off the alarm yet and is currently unable to activate it.

After the safe is opened, Barbara is harnessed by the two guards to the rack mounted on the back wall of the safe. An automatically controlled anal and vaginal dildo is to provide for her entertainment in this isolation cell. Afterwards the safe will be locked again. With the tube plug in her mouth, Barbara has no way to set off an alarm. However, the walls are not sealed in a way that the locating signal is blocked. But Barbara doesn't know that and her panic is accordingly.

Doc immediately called an alert meeting, where the closest circle of the drug cartel participates.

Damn, that means we have to clear the base. How do we get everything out in time?

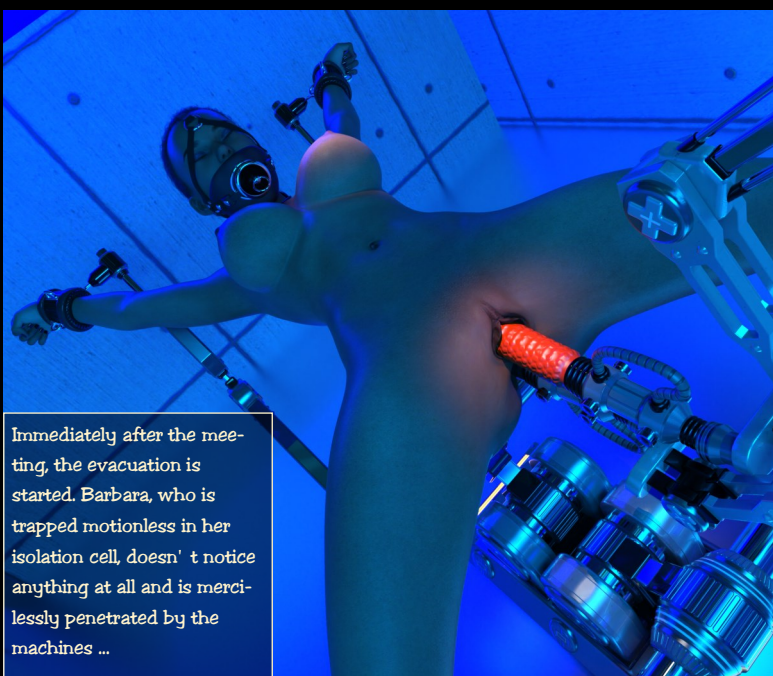

Guys, we have a problem. One of the new inmates is bugged and has a position tracker with an alarm system built into a tooth. That means our position is now probably known to the local police.

The inmate hasn't realized she's been discovered yet, and we have made sure she can't set off any alarms. We've put her in an isolation cell, but it lets the tracking signal through so the receivers of the tracking signal won't suspect anything and we can buy time to clear the base. I suggest we move to Laura's former base immediately.

Yes, that's a good idea. The base is well equipped and has not been discovered yet.

OK, let's get started on that right away. First the most important equipment and when the girls are tied up in the equipment, we'll take them along with the equipment right away as well.

We don't have time to remove them from the devices. All the other girls get their turn at the end, as well as the staff who are not initiated. We will not leave the base in a convoy but each truck, once loaded, will leave immediately so that as little as possible is left when the police arrive. If we're lucky, we'll get everything out in time. They're supposed to do the loading as well.

Immediately after the meeting, the evacuation is started. Barbara, who is trapped motionless in her isolation cell, doesn't notice anything at all and is mercilessly penetrated by the machines ...

Attention, this is an alarm exercise. The entire station must be cleared immediately.

Within a very short time, the transport trucks arrive at the base to pick up the equipment.

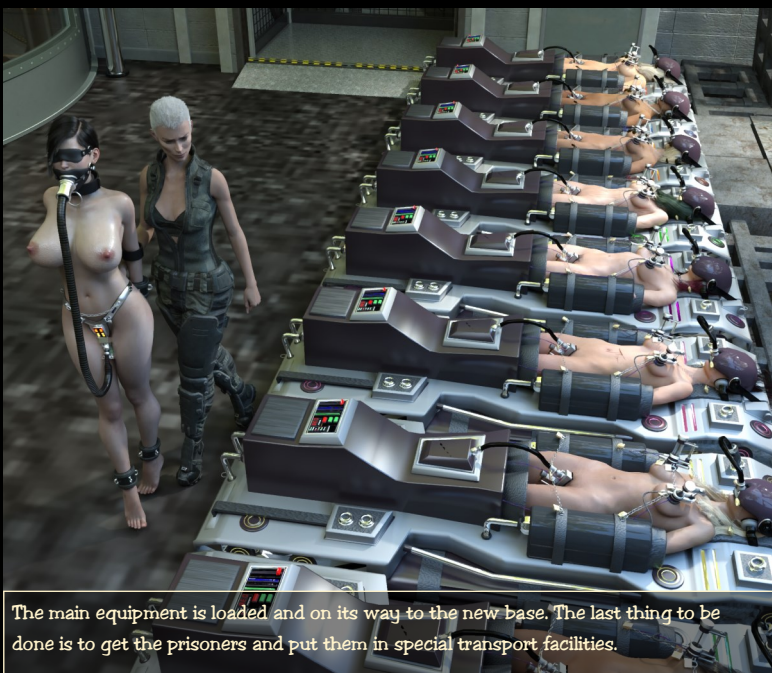

Each truck is loaded with the station's equipment along with the girls currently tied up in that equipment until it is full and begins its journey. The drivers have no idea of the destination but are instructed by radio.

What about the freight that is already on the way, have all the trucks come through?

OK, everything goes according to plan and we can also make our way to the new accommodation. Good thing the police haven't shown up yet.

Yes, no disruptions have been reported so far. Give the truck drivers the coordinates for the next destination.

The main equipment is loaded and on its way to the new base. The last thing to be done is to get the prisoners and put them in special transport facilities.

These facilities are programmed for the same daily routine as is normally the case. That is, to be fucked, tortured and pumped. In addition, the prisoners are also fed and can survive a long stay in these devices.

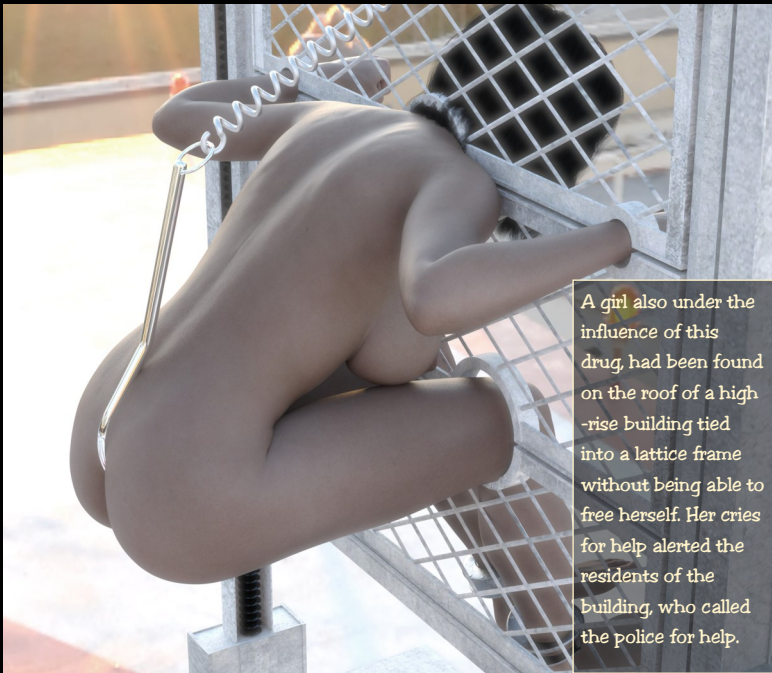

Police fail to bring this new sex drug under control and more and more bizarre are the findings of people harmed by the drug.

In the forest of Tomsen Town a girl was found who tied and chained herself. In her pussy she was wearing a buzzing vibrator. The keys for the chains were not found. The presence of the drug was also detected. After the release she knew nothing about it, let alone how she got into the forest.

Apparently, the drug not only intensifies the urge for sex and diminishes objective judgment by the mind, but also arouses the craving for torture and bondage.

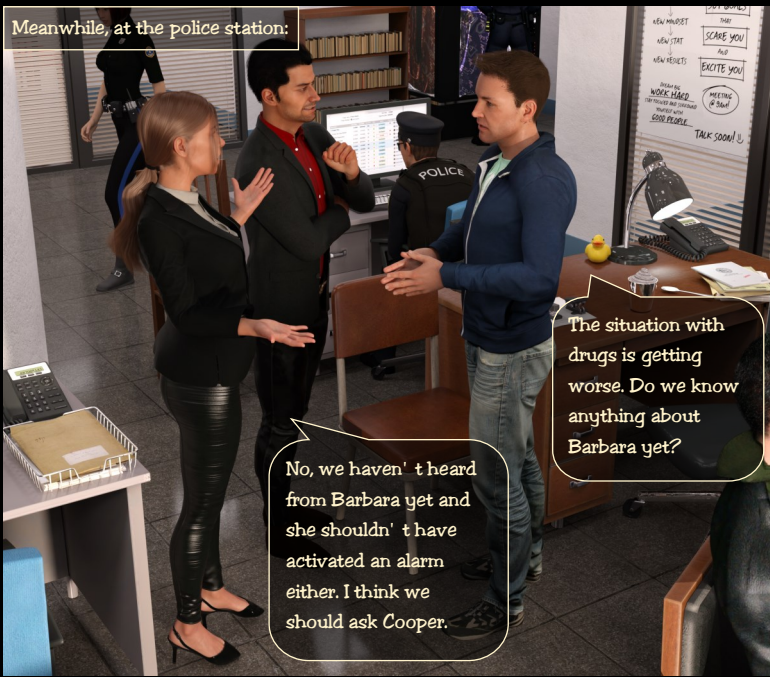

A girl also under the influence of this drug, had been found on the roof of a high-rise building tied into a lattice frame without being able to free herself. Her cries for help alerted the residents of the building, who called the police for help.

Thus, a girl was found on one of the country roads leading to Tomsen Town, tied naked to a fence.

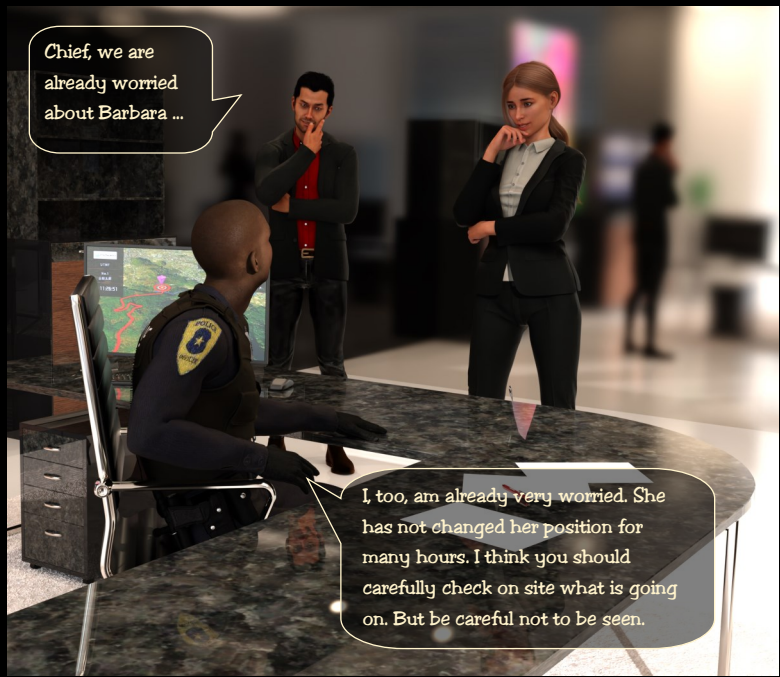

Meanwhile, at the police station:

No, we haven't heard from Barbara yet and she shouldn't have activated an alarm either. I think we should ask Cooper.

The situation with drugs is getting worse. Do we know anything about Barbara yet?

Chief, we are already worried about Barbara ...

I, too, am already very worried. She has not changed her position for many hours. I think you should carefully check on site what is going on. But be careful not to be seen.

OK Detective, do you have the coordinates?

Joey and Luc arrive at the prison and just see the last truck leaving the location.

Damn, what's going on? That looks like a move. Also, it looks like there's no one left on the base.

Do you have the number of the truck?

Yeah, I got it...

Barbara faints again and again due to the permanent penetration. At the beginning it was for her still a horny experience but meanwhile it hurts only and no relief is in sight.

The poor girls, who had the misfortune to be tied up in one of the devices of the criminals, were placed in the container of the trucks without the devices or penetration tools being removed, and in some cases the devices are even self-sufficient from electricity and continue their work during the journey. The journey is an extreme torture for the girls

After Luc informs the T.T.P.D. and requests a squad to investigate the abandoned location, Joey and Luc head back to the car as fast as they can and set off in pursuit of the truck. They take care not to be noticed by the truck driver.

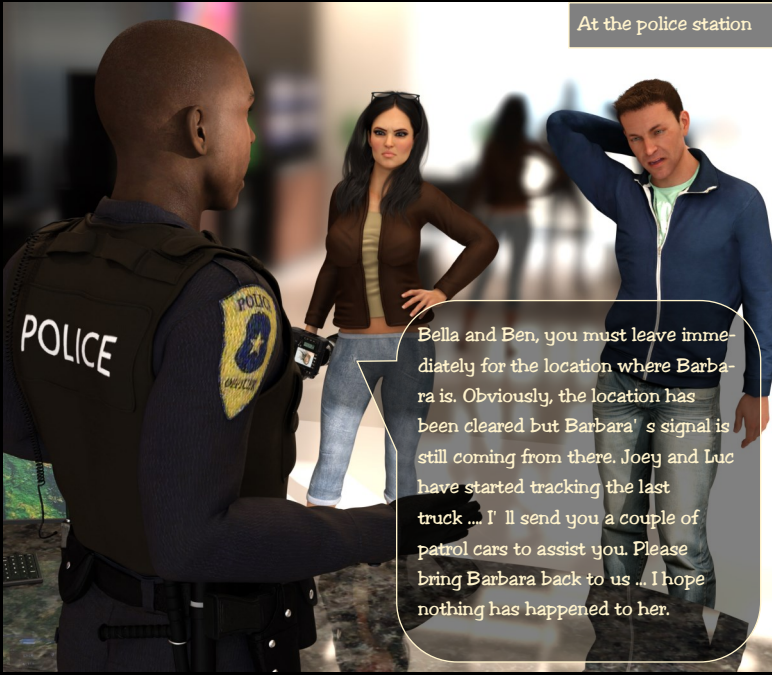

At the next traffic light where the truck has to stop, Joey jumps out of the car and mounts a GPS tracking device on the truck's container so it can't be seen.

Damn, what is that lady doing, she must have mounted an explosive device. I have to warn the truck driver

And so this driver also follows the truck in order to overtake and stop it at the appropriate place.

At the police station

Bella and Ben, you must leave immediately for the location where Barbara is. Obviously, the location has been cleared but Barbara's signal is still coming from there. Joey and Luc have started tracking the last truck ... I'll send you a couple of patrol cars to assist you. Please bring Barbara back to us .. I hope nothing has happened to her.

During the chase

Damn, what does this ass wants from me? Wave... honks ... and now he also brakes ... not with me ...

Although the driver brakes in front of the truck, the truck accelerates and rams the car

Of necessity, Joey and Luc have to break off the chase and help the crashed driver.

Damn, what was that. Thank God the driver is alive. He is only unconscious. Will you call an ambulance?

At the former base of the criminals:

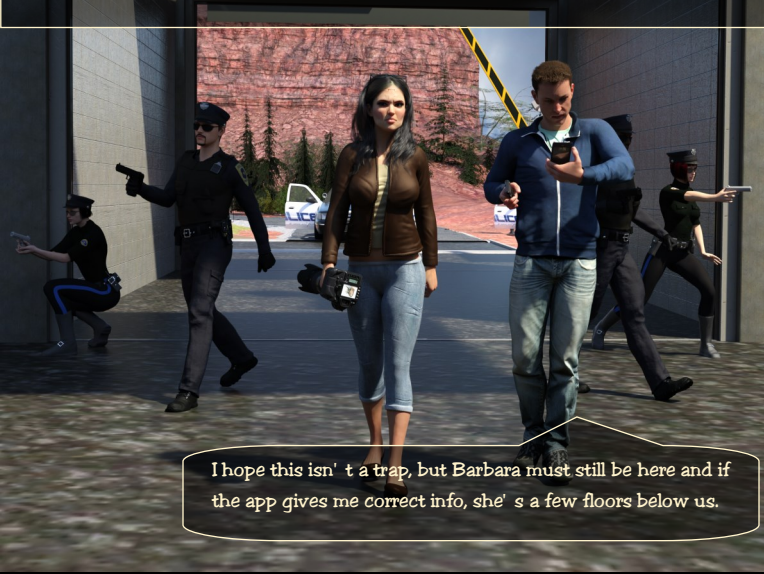

Lt. Cooper dispatched a full strike team to the site to support Bella and Ben, who immediately went on standby around the building.

Police ... The building is surrounded. Come out with your hands up.

but nobody comes ...

Since no one complied with the police's request and came out, since there is no one left here except Barbara, Bella and Ben, accompanied by 4 officers, cautiously enter the building. Ben has located Barbara in the tracking app.

I hope this isn't a trap, but Barbara must still be here and if the app gives me correct info, she's a few floors below us.

Since no other way could be found to get down, they take the freight elevator. But they are a little tense, because this could also be a trap.

OK, this is where we have to get off. Barbara should be on this floor.

Here everything is completely cleared out. I don't understand how they did it so quickly

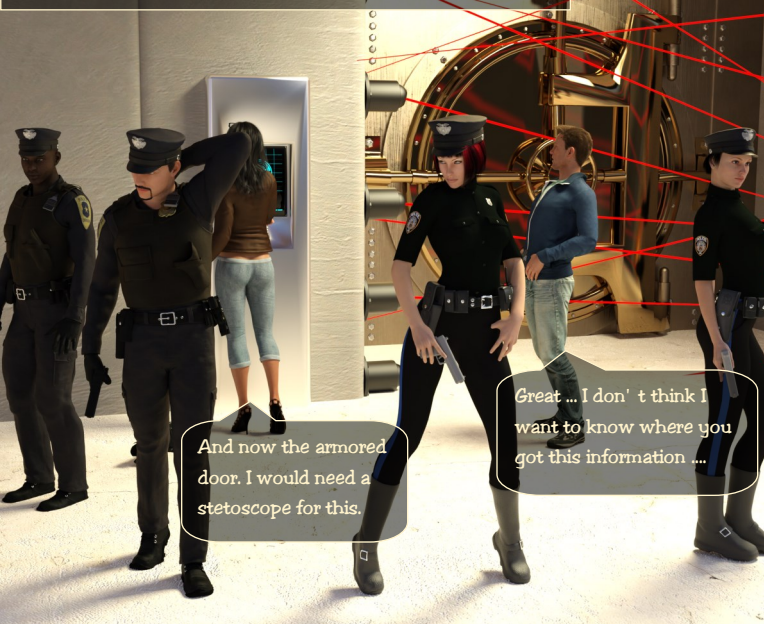

Oh, shit ... with laser beams and then these massive armored doors. How are we supposed to get in there quickly?

Take it easy Ben, all that glimmers is not gold. I know this series. This is a TT1668/5/1 from Knocksafe Inc, they are easy to crack. Can you lend me your cell phone so I can get the code?

They get out of the elevator and can't help but be amazed. Not even a bank has a safe system like this. How could these scoundrels build something like that?

Bella gets to work and lo and behold, the laser beams disappear.

And now the armored door. I would need a stethoscope for this.

Great ... I don't think I want to know where you got this information

... and the door is actually open.

Voila ... Please enter ...

You always amaze me with your skills.

Bella opens the door and Barbara emerges. She hangs unconscious and sweaty in her bonds and is mercilessly fucked by the fucking machine in her pussy and anus.

The 6 people stand open-mouthed in front of this sight and no one shows any impulse to free Barbara.

Guys, pull yourself together. Don't you want to free Barbara at last?

Oh man, can I take a picture ...

I envy her ...

This is the horniest thing I have ever seen ...

And she would even do this voluntarily?

Barbara is carefully taken off the machine and transported to the nearest hospital. The remaining police officers still search the rest of the premises. But they find no evidence of drug production or other people.

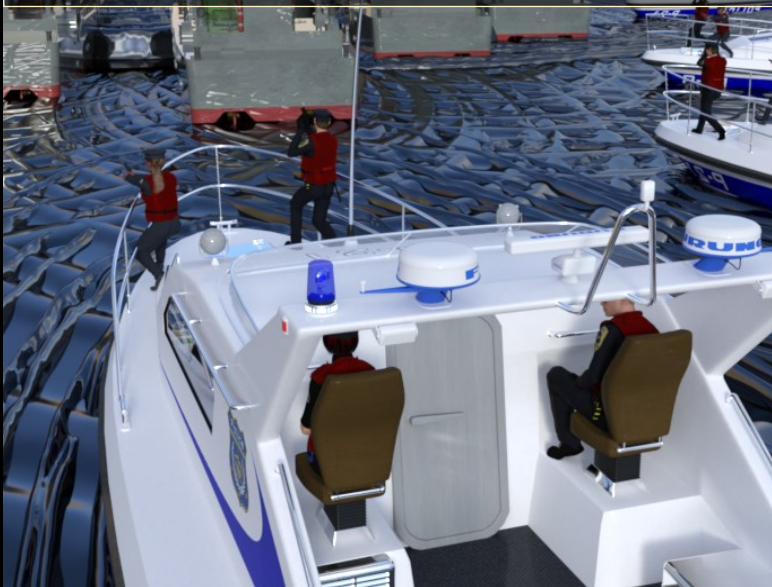

In the meantime, the trucks have reached the beach where special transport boats are waiting to pick up the containers and take them to Laura's secret island. Laura was a slave trader who had a training center for slaves on her island.

Joey and Luc had to give up the chase because of the car accident and told Cooper accordingly.

Thanks to the tracking device, Cooper was able to follow the route of the container and it was also loaded onto one of the boats. Cooper immediately activated the water police and they left with their boats to intercept the container boats.

The water police were quickly on the scene circling the container carriers and forcing them to shut down the engines.

Immediately the boss was informed about the agreed call number.

Oh shit ... what do you say? You are surrounded by the police? You have to surrender? ... OK...

Since the yacht did not set a direct course for Laura's Island either, the probability of detection is not very high. After this phone call, the boss threw the cell phone into the sea.

OK, set the course to Laura's Island.

Damn ... Good thing the freighters didn't know the target coordinates yet.

In the meantime, the containers were opened and the police officers could not believe what they found. But quickly they were organized and freed the girls from the devices, which then transferred to the police boats. Jenny was also freed and her adventure was thus a thing of the past.

Unfortunately, the head of this crime organization could not be caught. They have retreated to the secret island and research station of Laura. Unfortunately, they have also taken 2 captive girls with them. It is to be feared that we will come across these criminals again sometime in the future, especially since Cassandra and the Doc have taken the research results with them.

THE END
