Meet Laura & Cassandra at their secret research-station from L&C Enterprises.

Welcome at L&C Enterprises, I am Laura and may I introduce Dr. Cassandra our head of the research-team. I feel honored, that I have the possibility to present our new Re-Sense-Tool and explain it in detail. Behind me, you see an active Re-Sense-Tool where we make some fine-calibration and test it on one girl from our helping community.

The Re-Sense tool fulfills several tasks. On the one hand, it is created for the transport of slaves over a longer period, on the other hand it ensures that the attitude to subservience is somewhat modified.

The re-sense tool is designed to store and transport slaves up to 2 months without damage.

It can also be used as a training unit for future slaves. We have found in countless research units that the willingness to take up new ideas is highest with a degree of arousal at about 80%, and this device works based on this knowledge.

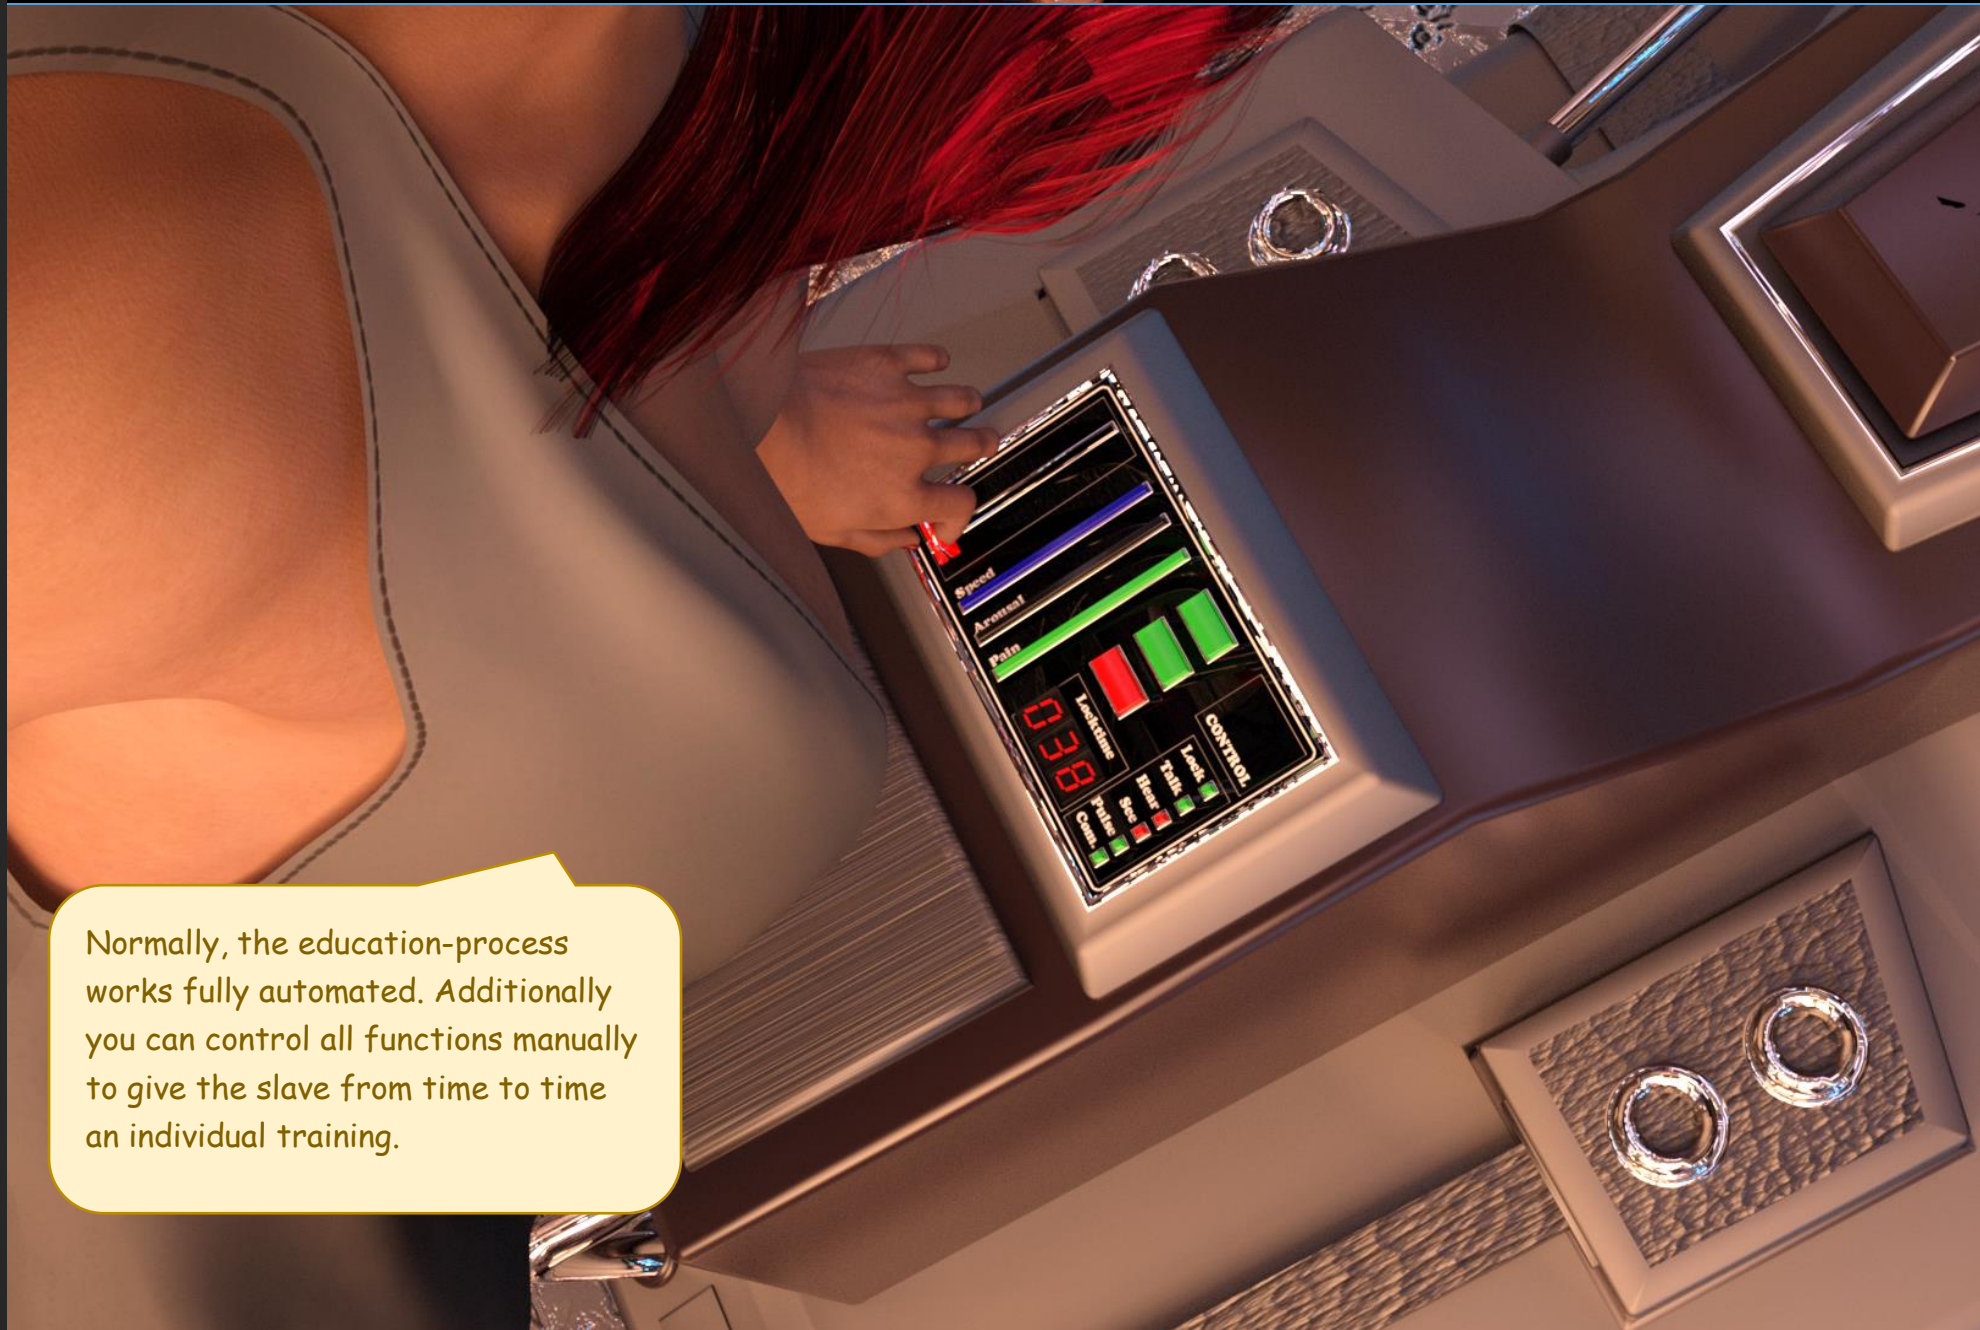

For longer stays, there is a tank below which supplies the stored slave with liquid food as well as with various medicines such as against thrombosis and chemicals which also cause the arousal level to be maintained. Furthermore, the tool also has a reprocessing plant, in which body fluids are also converted into edible food.

So everything is taken into account, which is needed for a long stay. After the transport and after the treatment we do not want any wrecks but trained slaves.

The reclining surface is moveable and this surface begins to vibrate periodically as does the tubes for hands and legs to prevent muscle fatigue.

Normally, the education-process works fully automated. Additionally you can control all functions manually to give the slave from time to time an individual training.

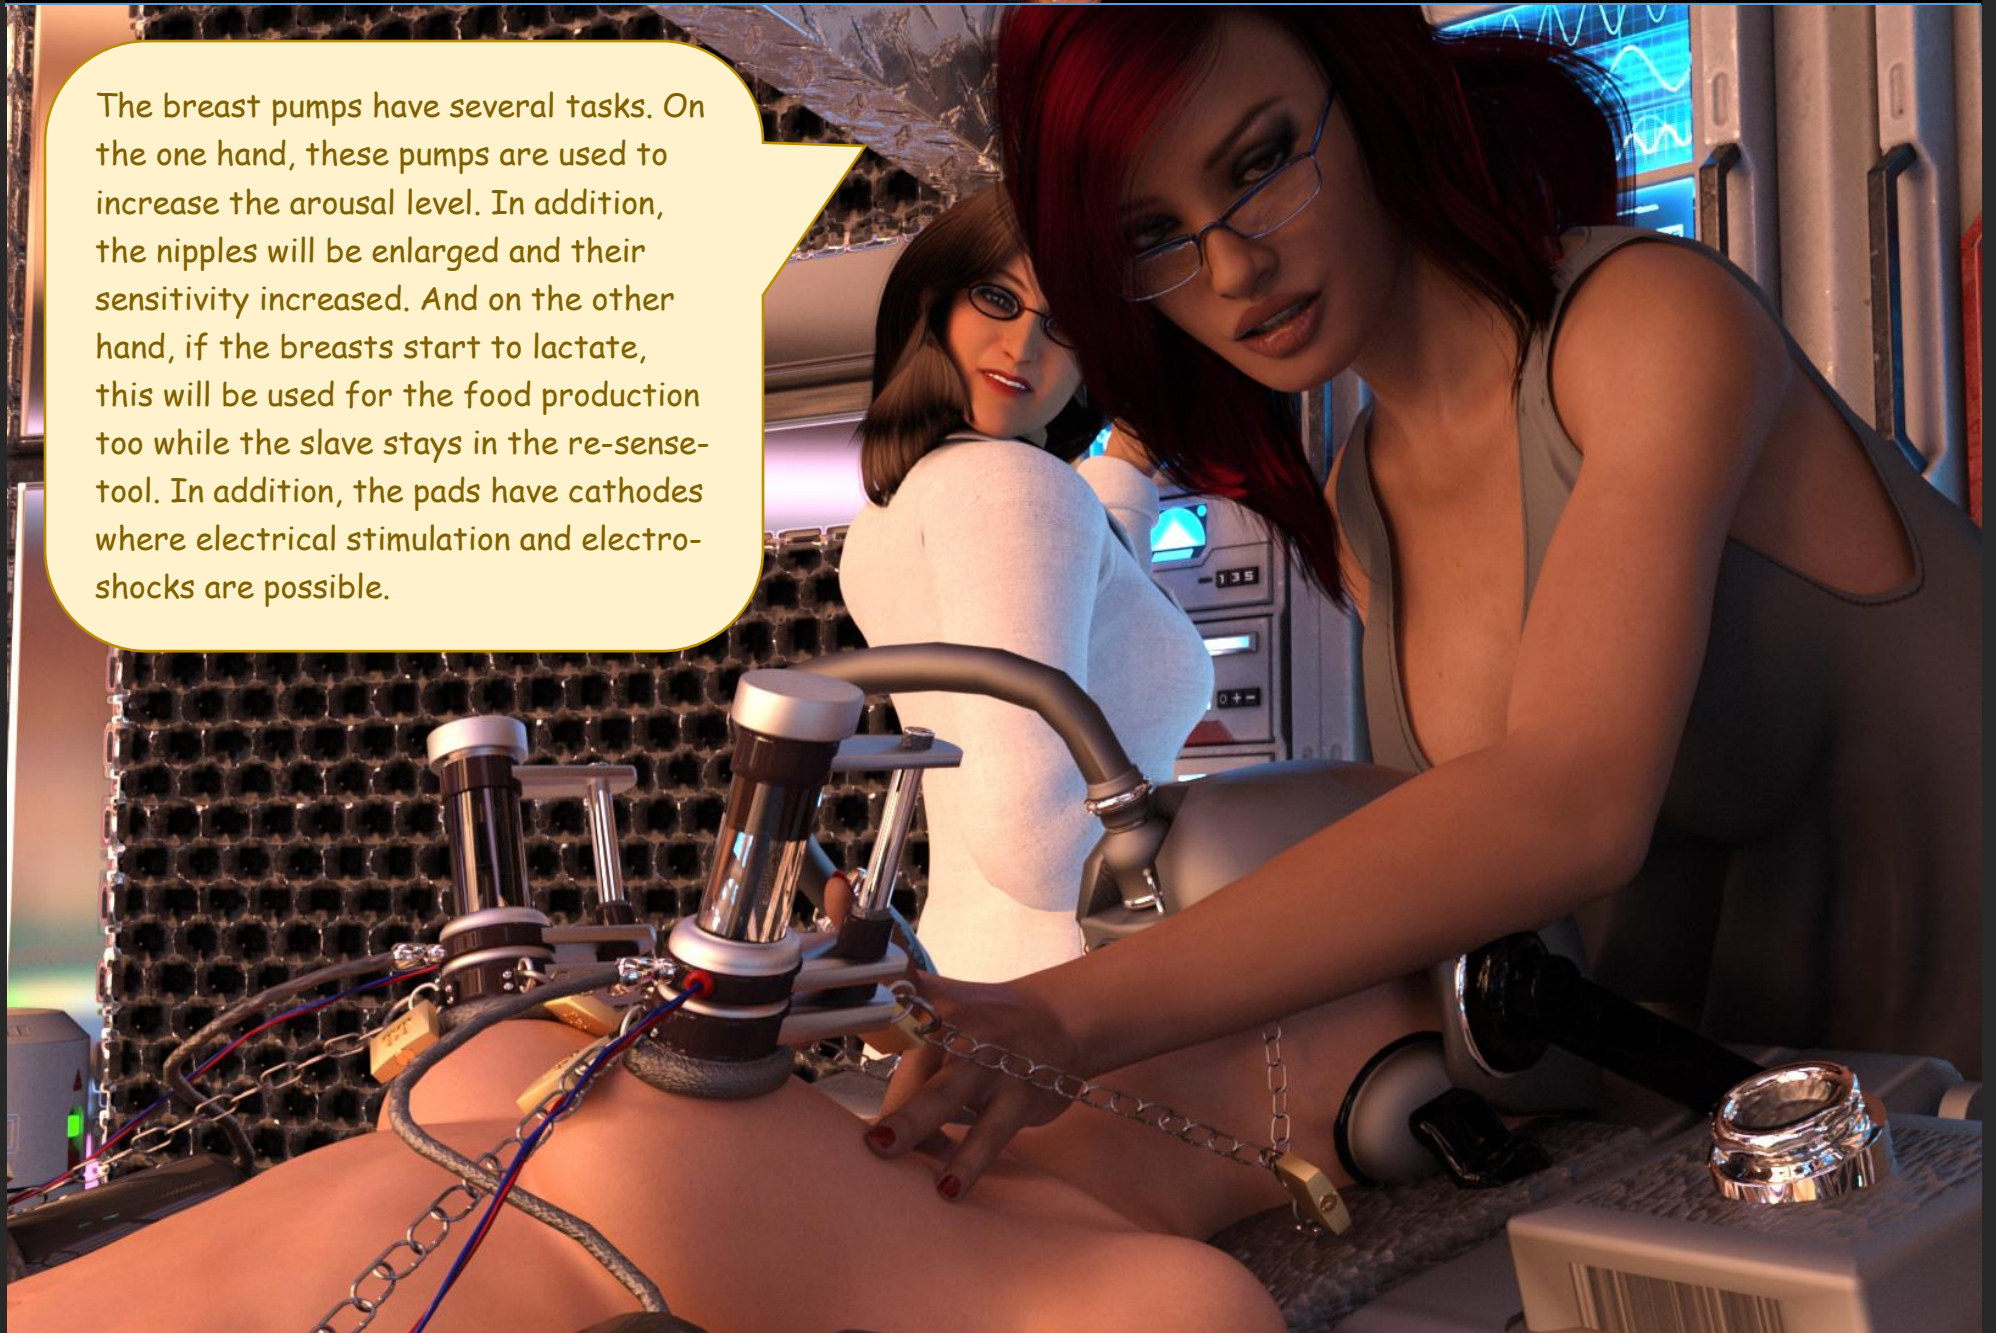

Two HQ stereo monitors are installed in the helmet to perform a hypno-suggestive training for the future slave through these monitors as well as via the headphones. Furthermore, there are sensors in the helmet, which performs an electro-encephalography. The output after some tests is, if the slave had an orgasm or not. The further training program depends on this result increases the ability to delay orgasms.

The feeding unit is secured with chains so that the slave is not able to refuse the offered food. Sucking- and Blowjob-training is included in this device too.

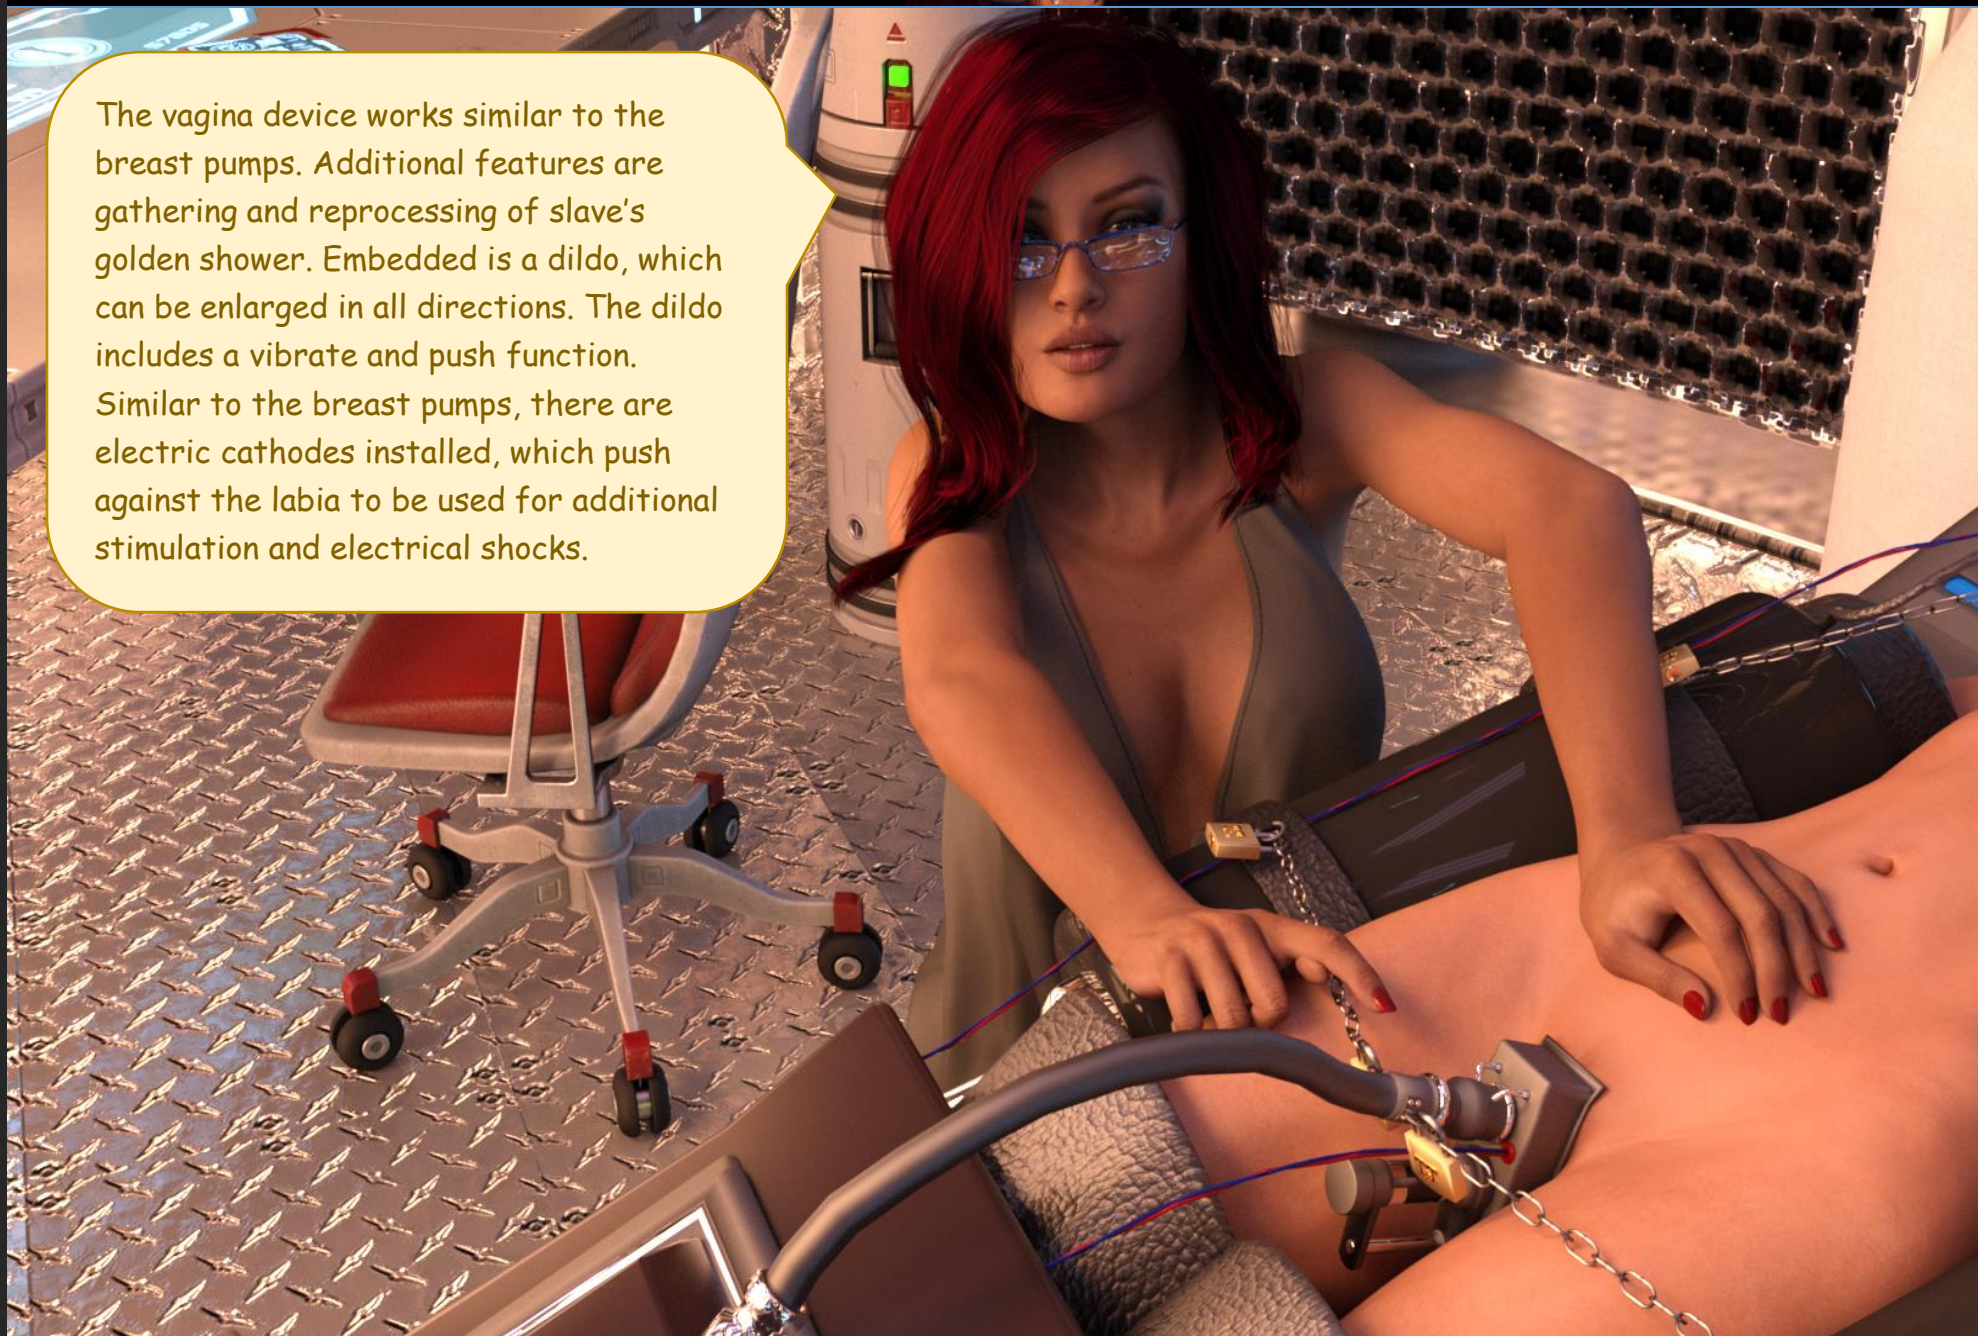

Depending on how much the future slave struggles against the program, the duration of the training is different. But you have to expect at least 3 weeks and in normal cases, the training is completed after 6 weeks at the latest.

The breast pumps have several tasks. On the one hand, these pumps are used to increase the arousal level. In addition, the nipples will be enlarged and their sensitivity increased. And on the other hand, if the breasts start to lactate, this will be used for the food production too while the slave stays in the re-sense-tool. In addition, the pads have cathodes where electrical stimulation and electro-shocks are possible.

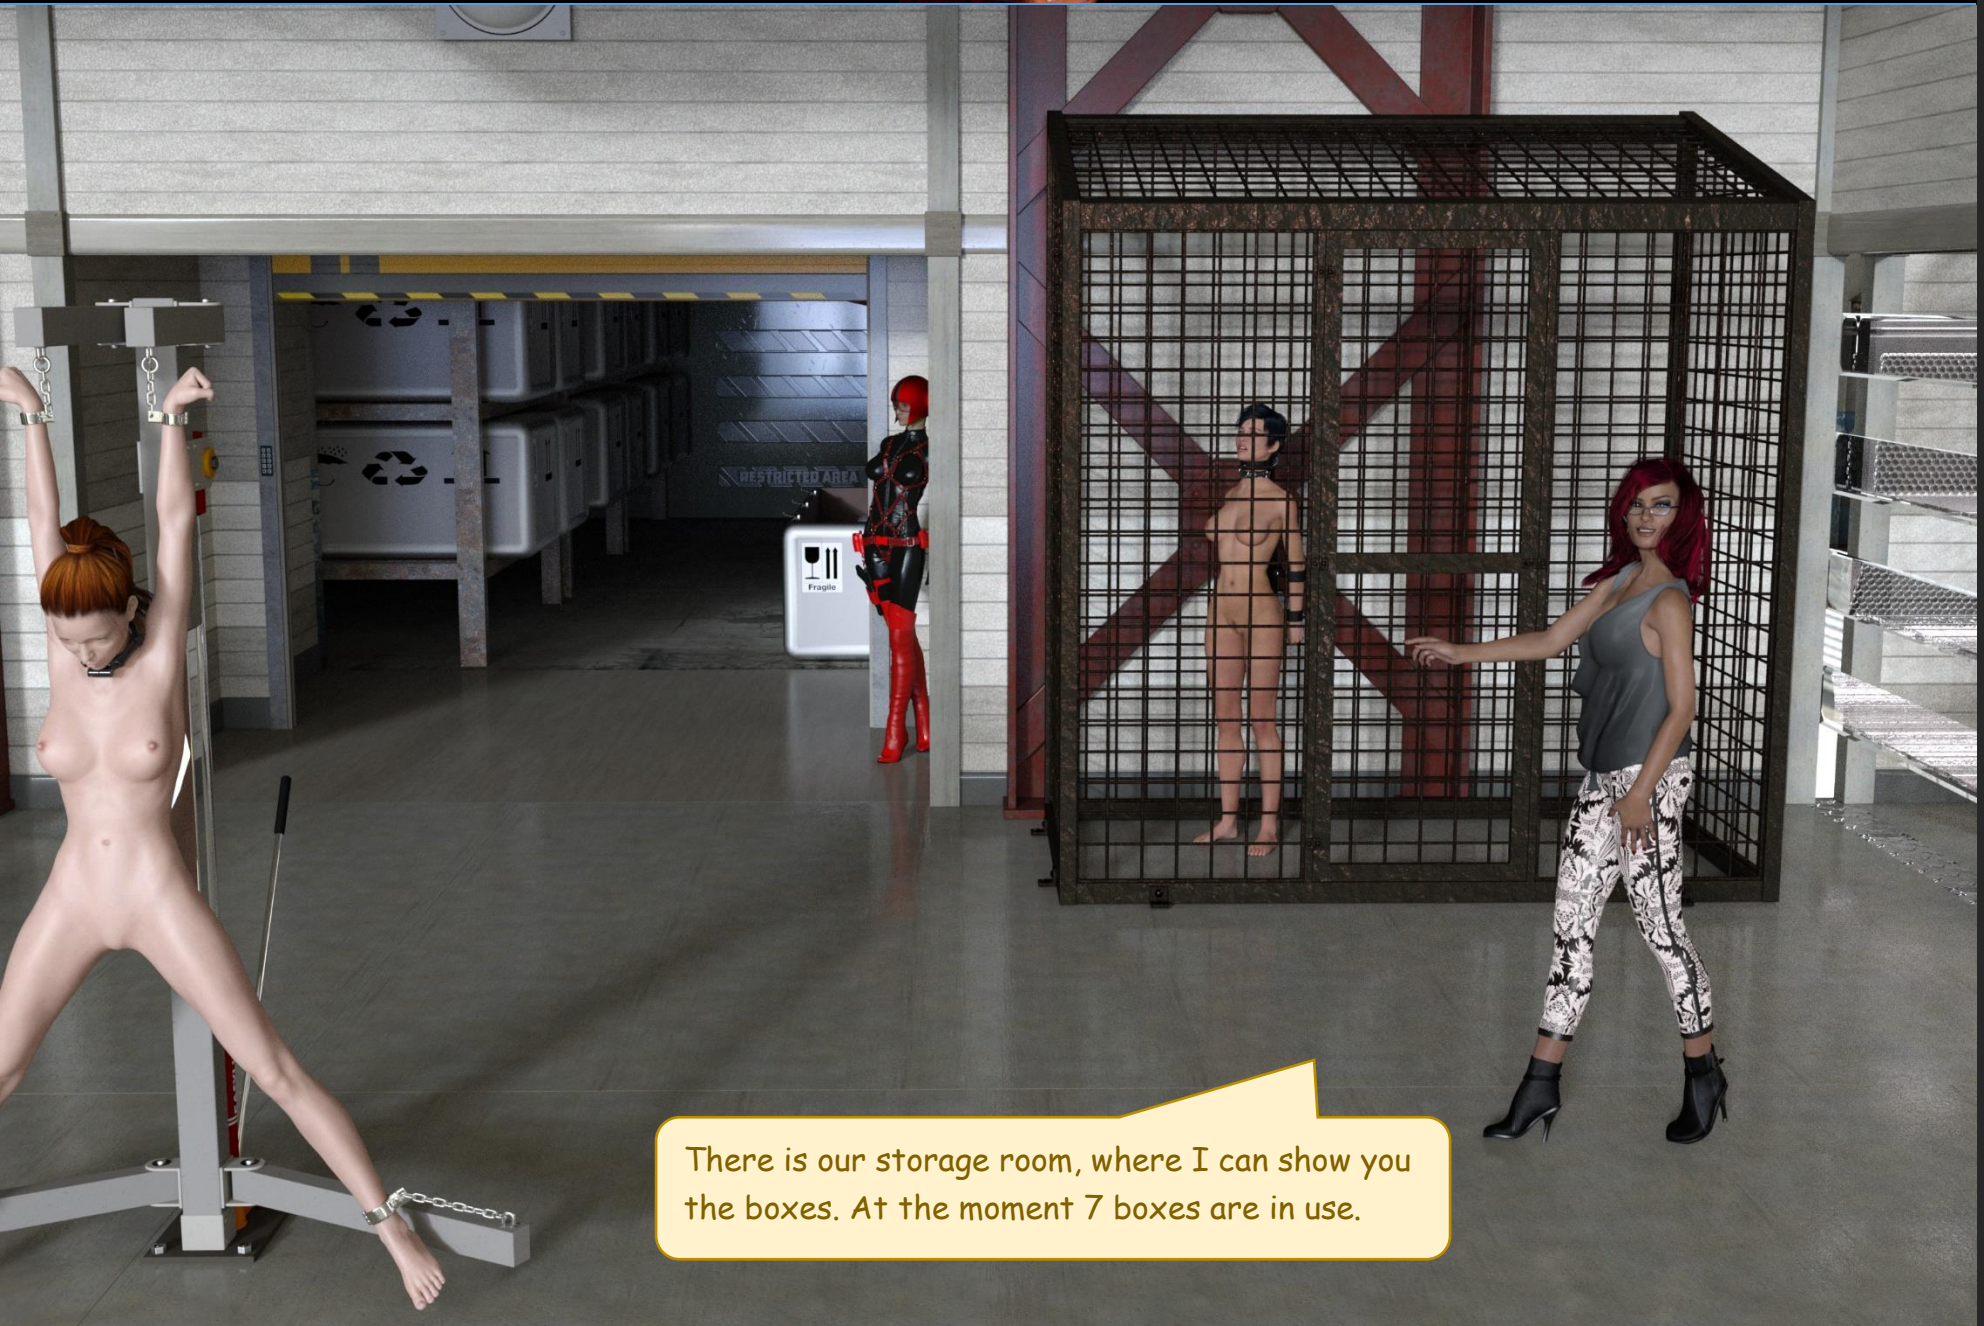

The vagina device works similar to the breast pumps. Additional features are gathering and reprocessing of slave's golden shower. Embedded is a dildo, which can be enlarged in all directions. The dildo includes a vibrate and push function. Similar to the breast pumps, there are electric cathodes installed, which push against the labia to be used for additional stimulation and electrical shocks.

Last not least, I wanted to show you the storage- and transportation-box for the Re-Sense-Tool. Please follow me to one of our storage-rooms.

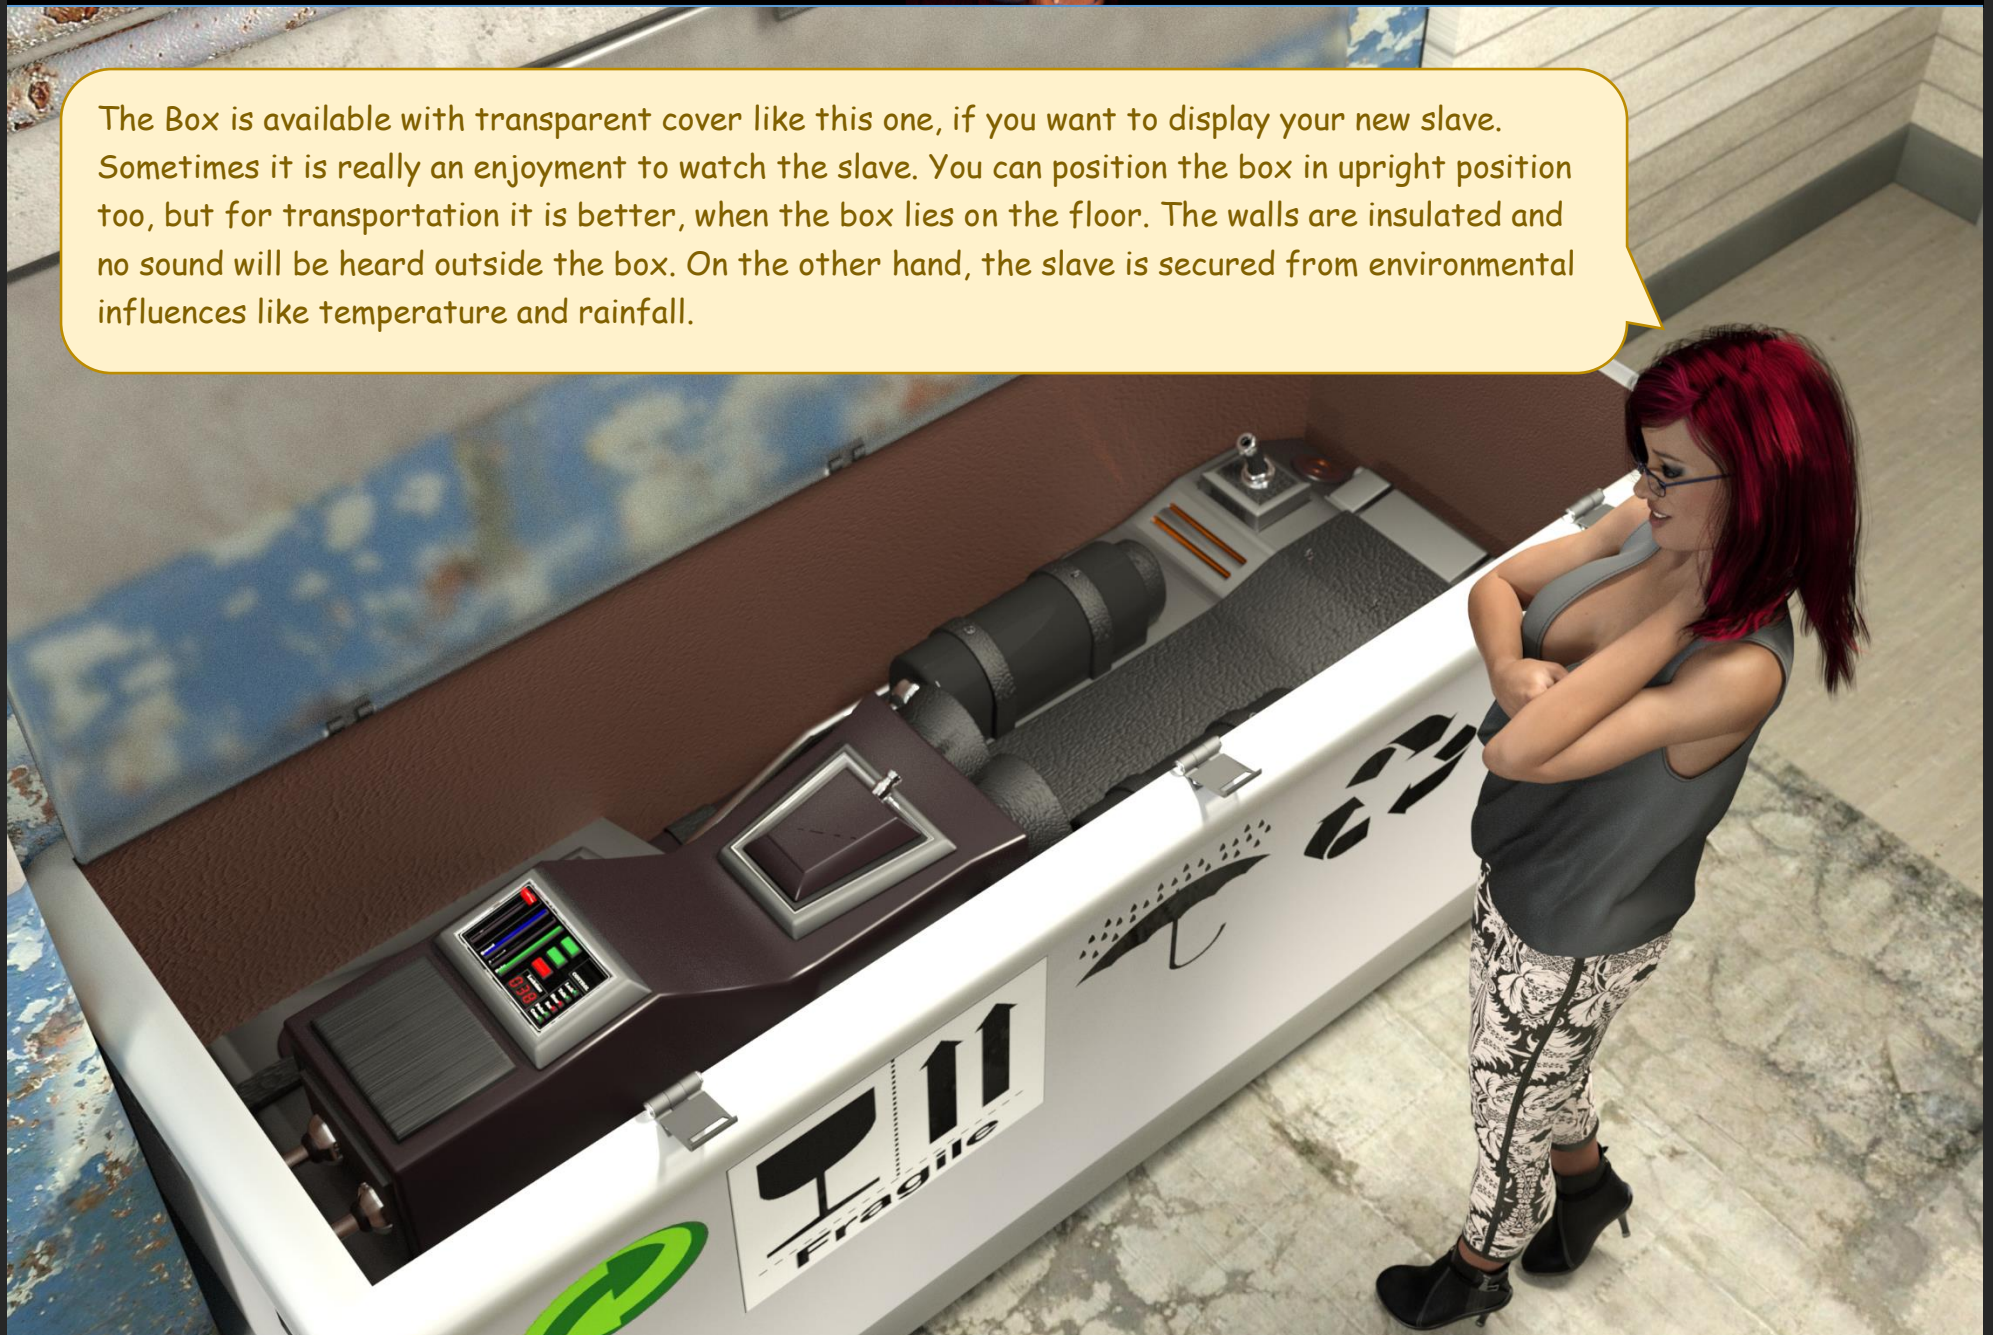

There is our storage room, where I can show you the boxes. At the moment 7 boxes are in use.

There are more purposes for the Re-Sense-Tool-Box. You can use it for transportation. Slaves in training can be stored in the box too. On my left side, you see several boxes and some boxes are filled with new slaves in training at the moment.

The Box is available with transparent cover like this one, if you want to display your new slave. Sometimes it is really an enjoyment to watch the slave. You can position the box in upright position too, but for transportation it is better, when the box lies on the floor. The walls are insulated and no sound will be heard outside the box. On the other hand, the slave is secured from environmental influences like temperature and rainfall.

But I have something different that might be of interest for you. Look here. This collar gives total control to you for your slaves. When they wear the collar, the slaves will always be faithful and obedient.

There are several possibilities in the collar to control your slave. You can restrict the area and single places, where the slave is allowed to move. The collar will send electric shocks, if the slave leaves the allowed area and similar when the slave enters a restricted area. The collar can be controlled remotely and has a bad-word- and a loudness-detector. If the slave uses the bad-words or speaks to loud than it will be fined with additional shocks. In case of trying to open the collar without permission or the slave will be moved to far away from the allowed area, there is a blasting charge on the back-side of the collar which will blow up.

You are interested in these slaves? I'm sorry but we've recently picked them up on my land. First, we need to interrogate them and perform a background check.

Only after these checks we will know what we can do with these slaves. Moreover, they are not well trained.

Usually, we observe our new members up to one year before we add them to our community.

Warden Bring this one to interrogation room number 5.

After Jutta has been prepared for interrogation, Laura takes her gag off.

It is up to you whether we have to go the easy or the hard way. Who are you and what do you do on my island?

You perverted fucking bitch ... what have you done with Sara and Conny ... you are the devil in person ... let us free ...

Ouch ... these are too many bad-words and ...

After all these bad-words, the collar becomes active and sends a violent electric shock to Jutta.

What a shame. I think we had to start over again.

AAAARRRRRRRRRRRRRRRRGGGGHHHH.....

The electric shock was too much for Jutta. She becomes unconscious.

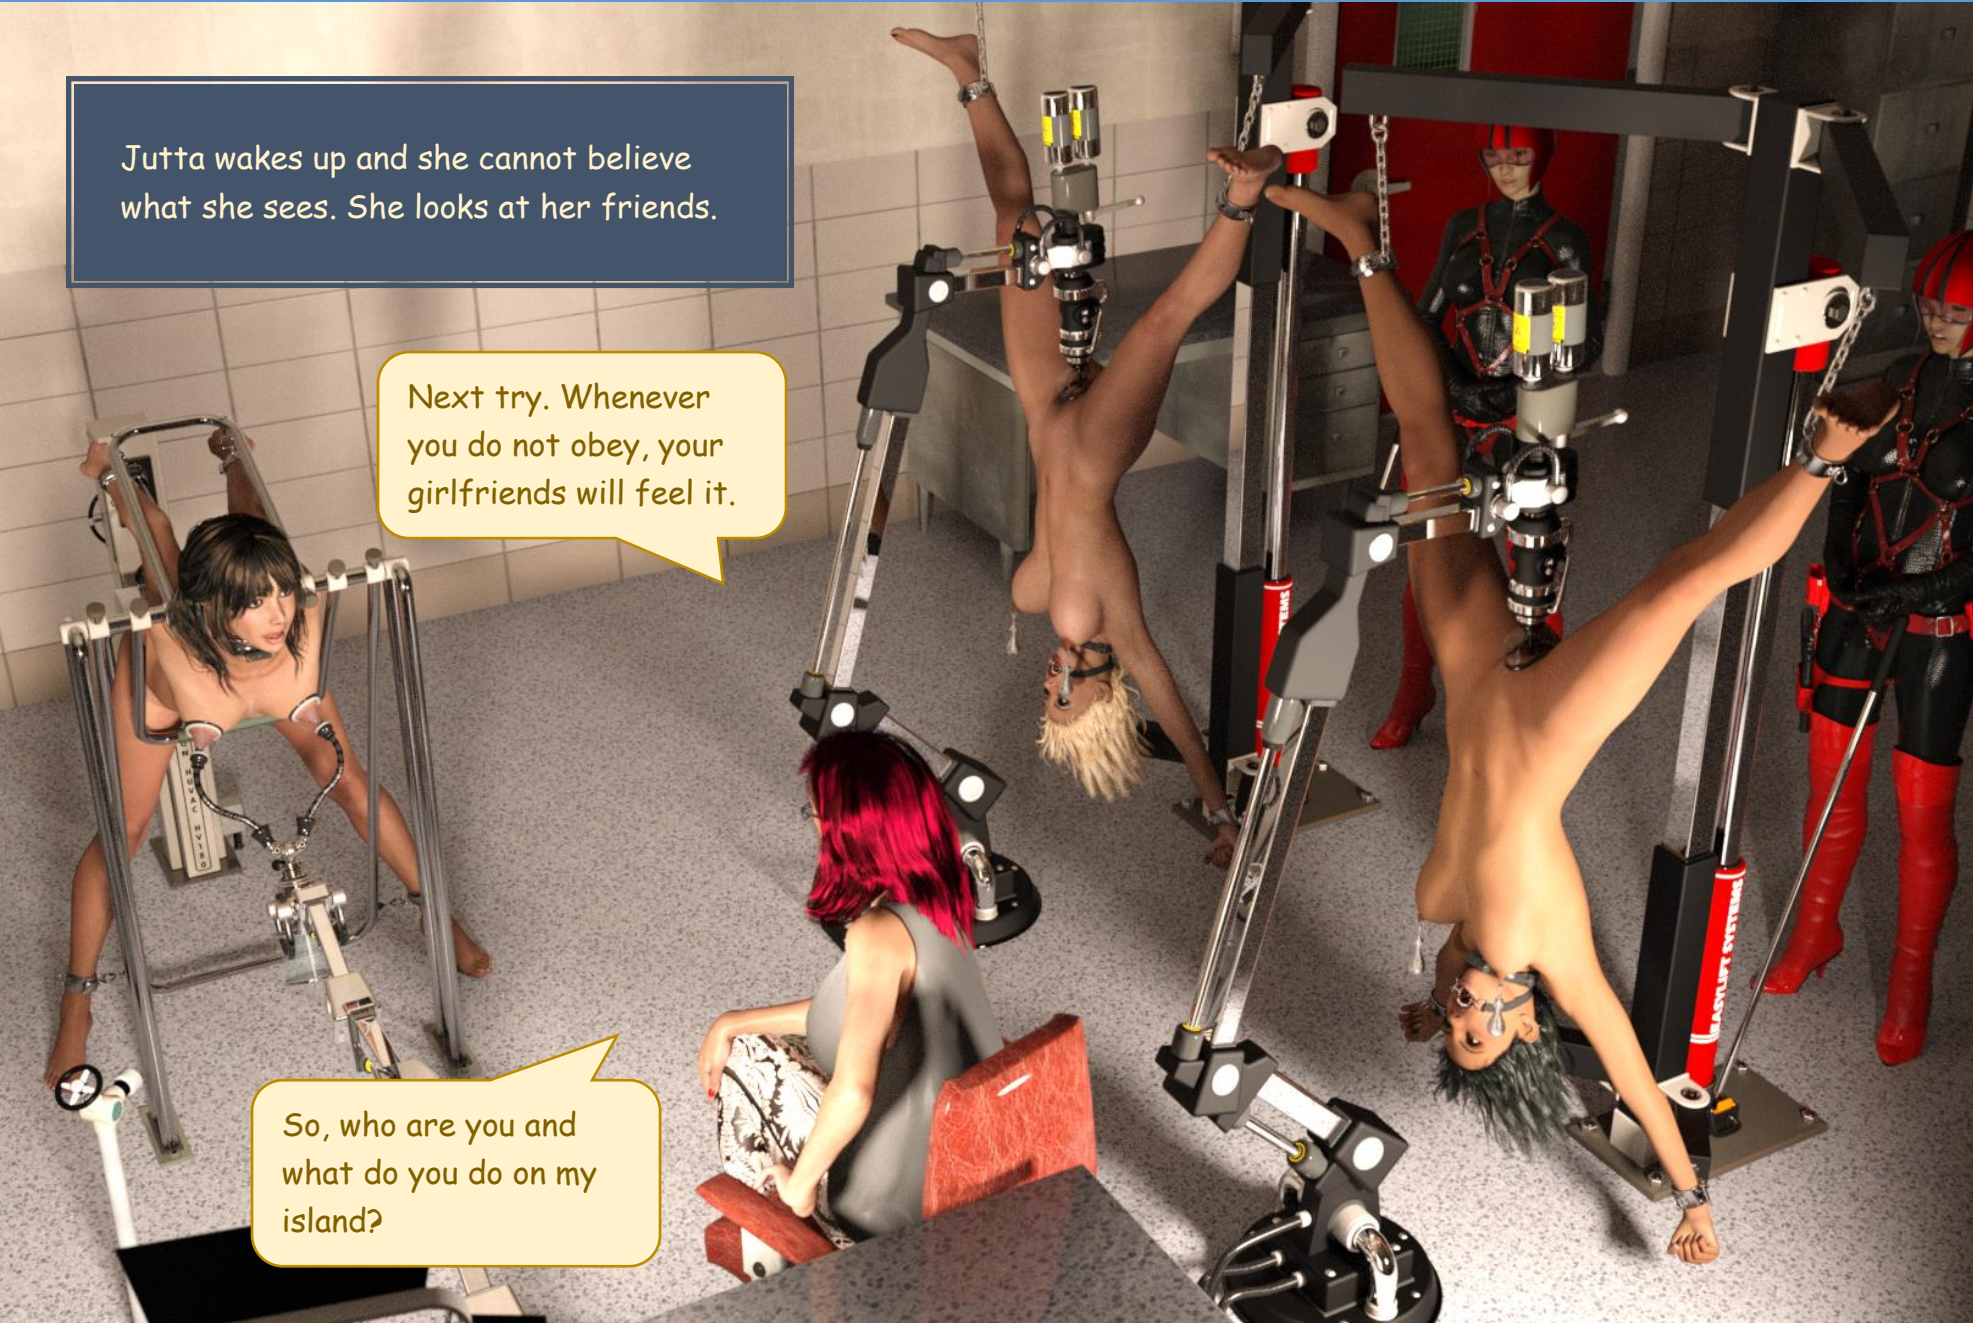

Ok, it looks like we have to use a different method. Guard, bring the 2 other slaves and make them ready for further questioning.

Jutta wakes up and she cannot believe what she sees. She looks at her friends.

Next try. Whenever you do not obey, your girlfriends will feel it.

So, who are you and what do you do on my island?

Noooooooooooo
Stoooooooooooo

What a pity, "no" and "stop" are bad-words too. Jutta receives her next electro-shock but remains conscious.

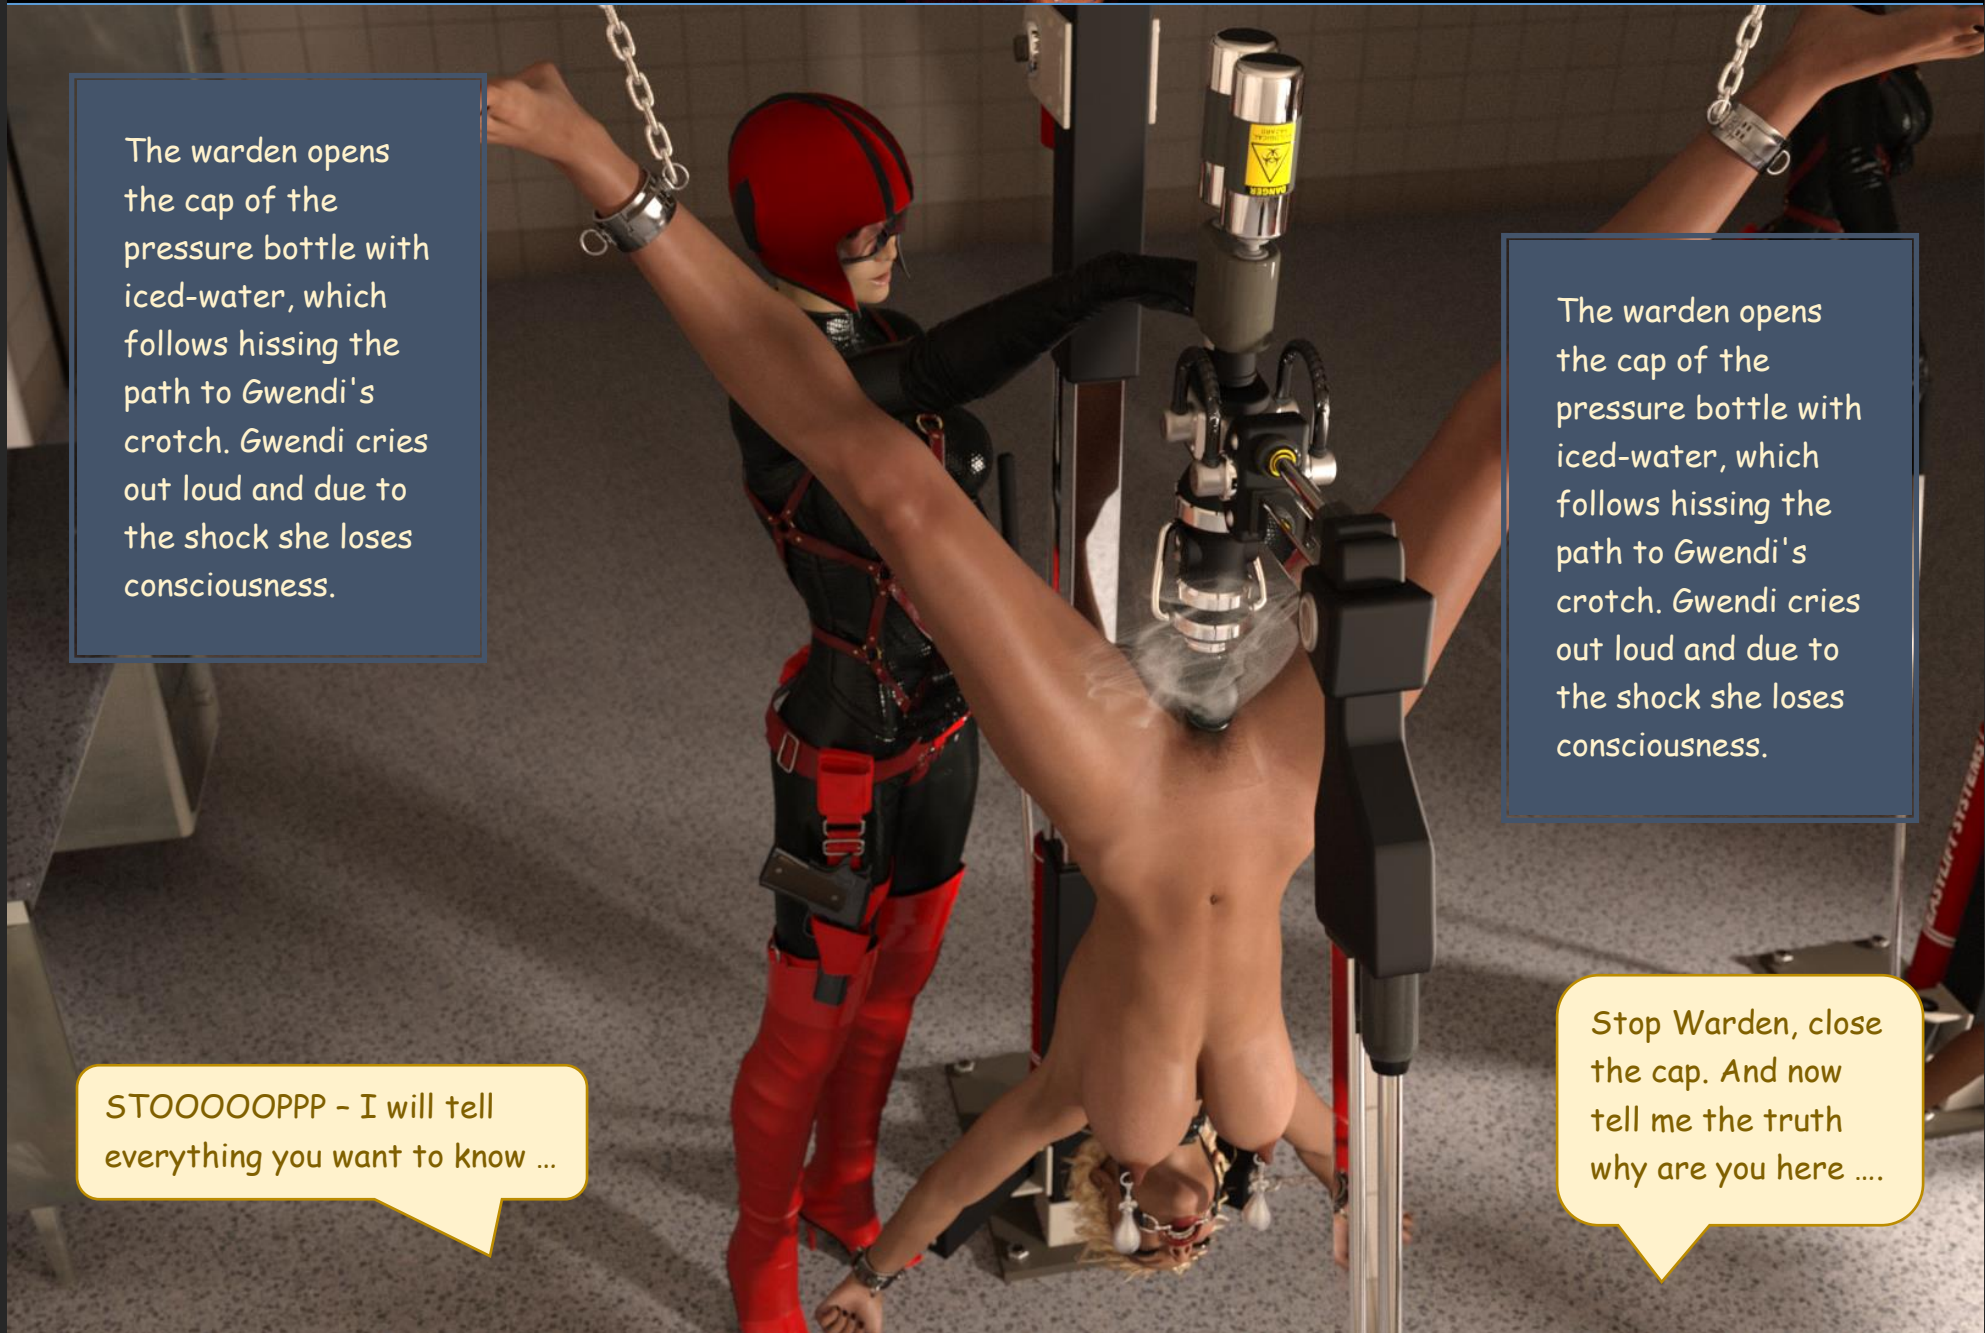

OK, no answer is also an answer and especially a wrong answer. Guardian ... open the ice-water bottle for the blond slave.

The warden opens the cap of the pressure bottle with iced-water, which follows hissing the path to Gwendi's crotch. Gwendi cries out loud and due to the shock she loses consciousness.

The warden opens the cap of the pressure bottle with iced-water, which follows hissing the path to Gwendi's crotch. Gwendi cries out loud and due to the shock she loses consciousness.

STOOOOOPPP - I will tell everything you want to know ...

Stop Warden, close the cap. And now tell me the truth why are you here ...

Jutta begins to tell ...

A few days ago I met with my friends ...

Jutta's story ...

Gwendi, Cathy and I met because we are worried about Sara and Conny's vanishing. We have not seen them for many days and since their last performance at Paul's Club both have disappeared without a trace.

I'm pretty sure that Paul has something to do with it. Above all, he talked always with a red-haired lady while Sara and Conny were on the stage and since both are vanished this red-haired was no longer seen in the club.

We should ask Paul what he knows about Sara and Conny's vanishing.

This is not so easy. If Paul is involved in kidnapping, he will not give us any information about it.

So we must force Paul to answer our questions.

Yes, we grab and stun him.

Then we drag him in our SM Studio and there we have enough tools to squeeze everything out of him. And how do we stun him?

I could invite him for a drink at home and give him a sleeping pill.

Good idea, let's do it as discussed.

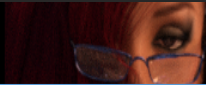

Hello Paul, I had a proposal for you and your Show

As planned, we waited for Paul in the same night. Gwendi involved Paul in a conversation and invited him to her home. Cathi and I waited around the corner, if something unexpected happen.

In Gwendi's apartment, both get comfortable and Gwendi hands over Paul the drink enriched with enough sleeping powder.

That's what I call a nice ending of a working day. What did you want to suggest?

First of all, I would suggest let's have a toast.

After Paul has emptied his glass, Gwendi tells him the plain truth.

Everything I want to know is, what happened with Sara and Conny and where are they?

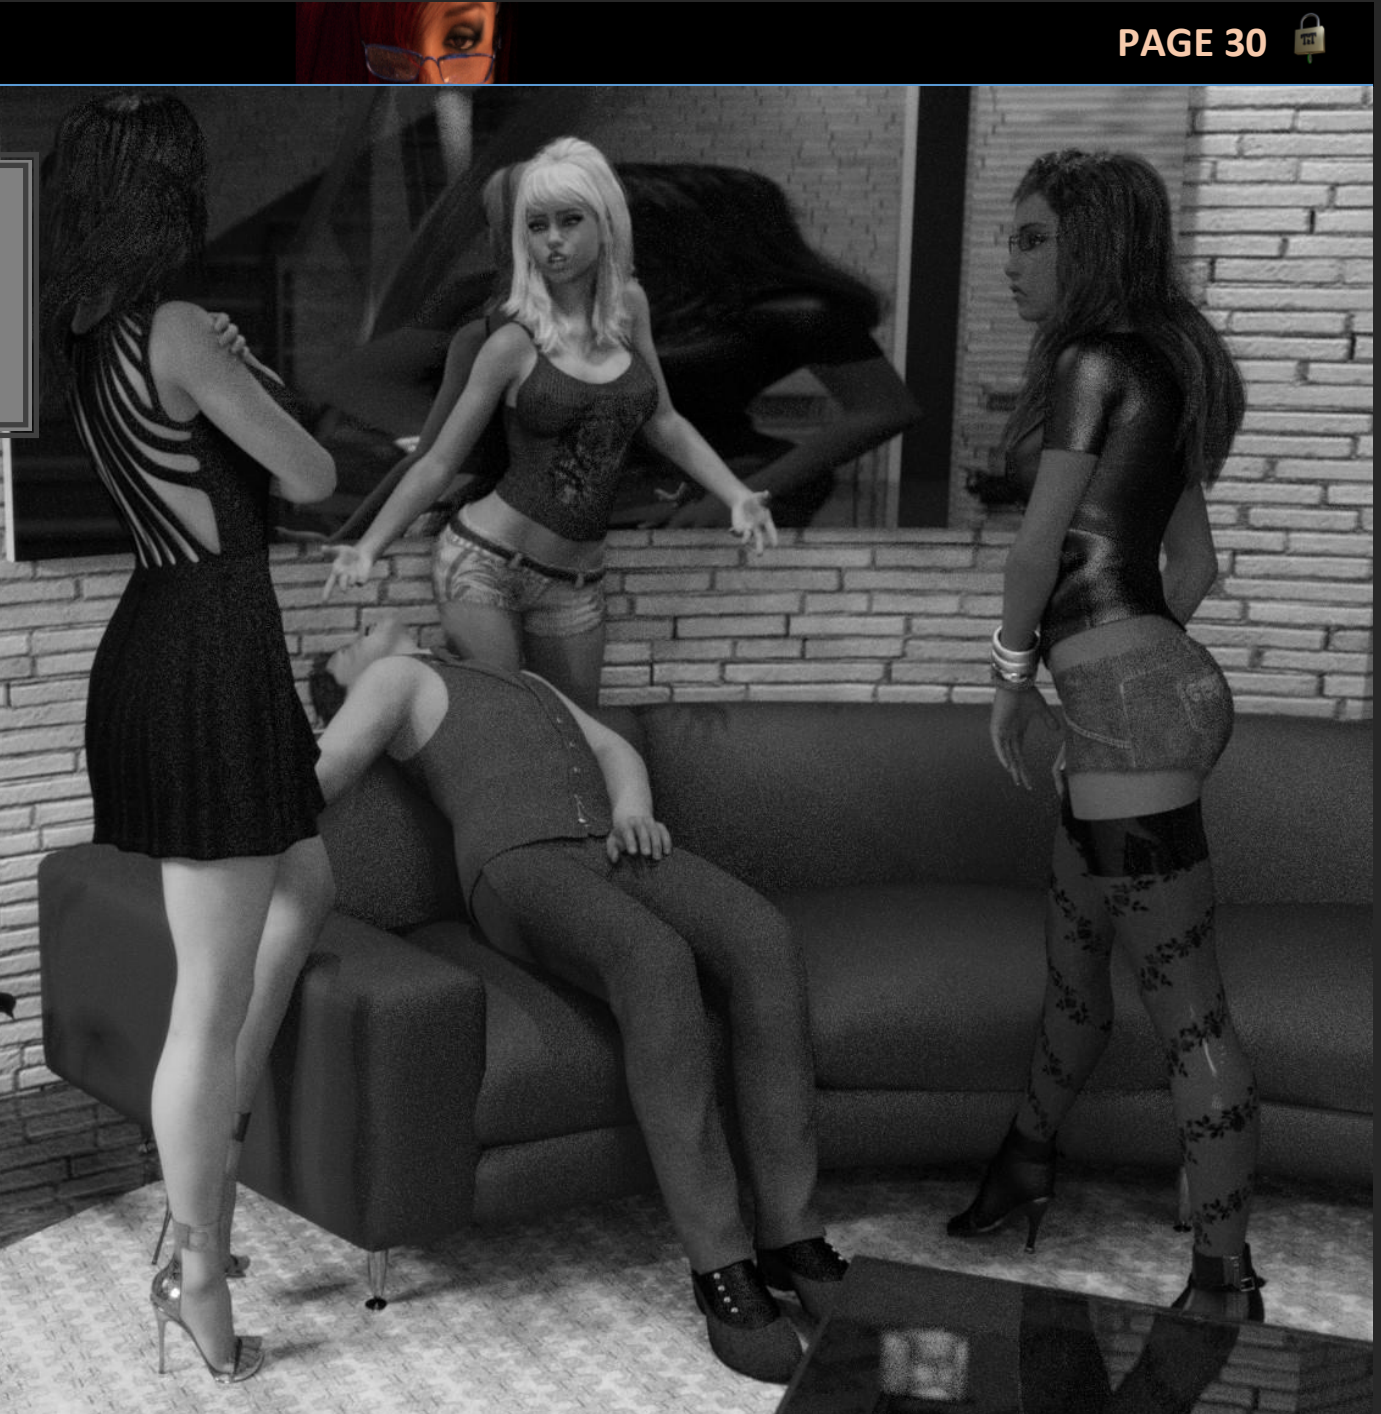

I told everything I know to the police. And what was in this drink?

Only a few sleeping pills ... and you can trust me, we will get the truth.

And Paul slept away ...

After Paul has fallen asleep, Kathi and I appears to transport him to the prepared SM-Studio.

Paul, for sure, could not resist our loveable treatment methods in the SM-Studio, and he informed us about everything willingly.

So we got your name and also the details about your business with him. As a punishment for this betrayal, we have dealt with Him a little more until unconsciousness.

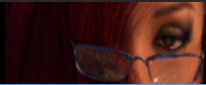

After we had finished with Paul, we took him naked to the nearby forest. Due to the fact that he had so much skeletons in his closet, we did not worry that he spills the bean out what happened the last hours.

Due to the fact that we know your name, it was easy to figure out where your island is. Afterwards, we rented a suitable boat and started the journey.

Sometime later we reached your island.

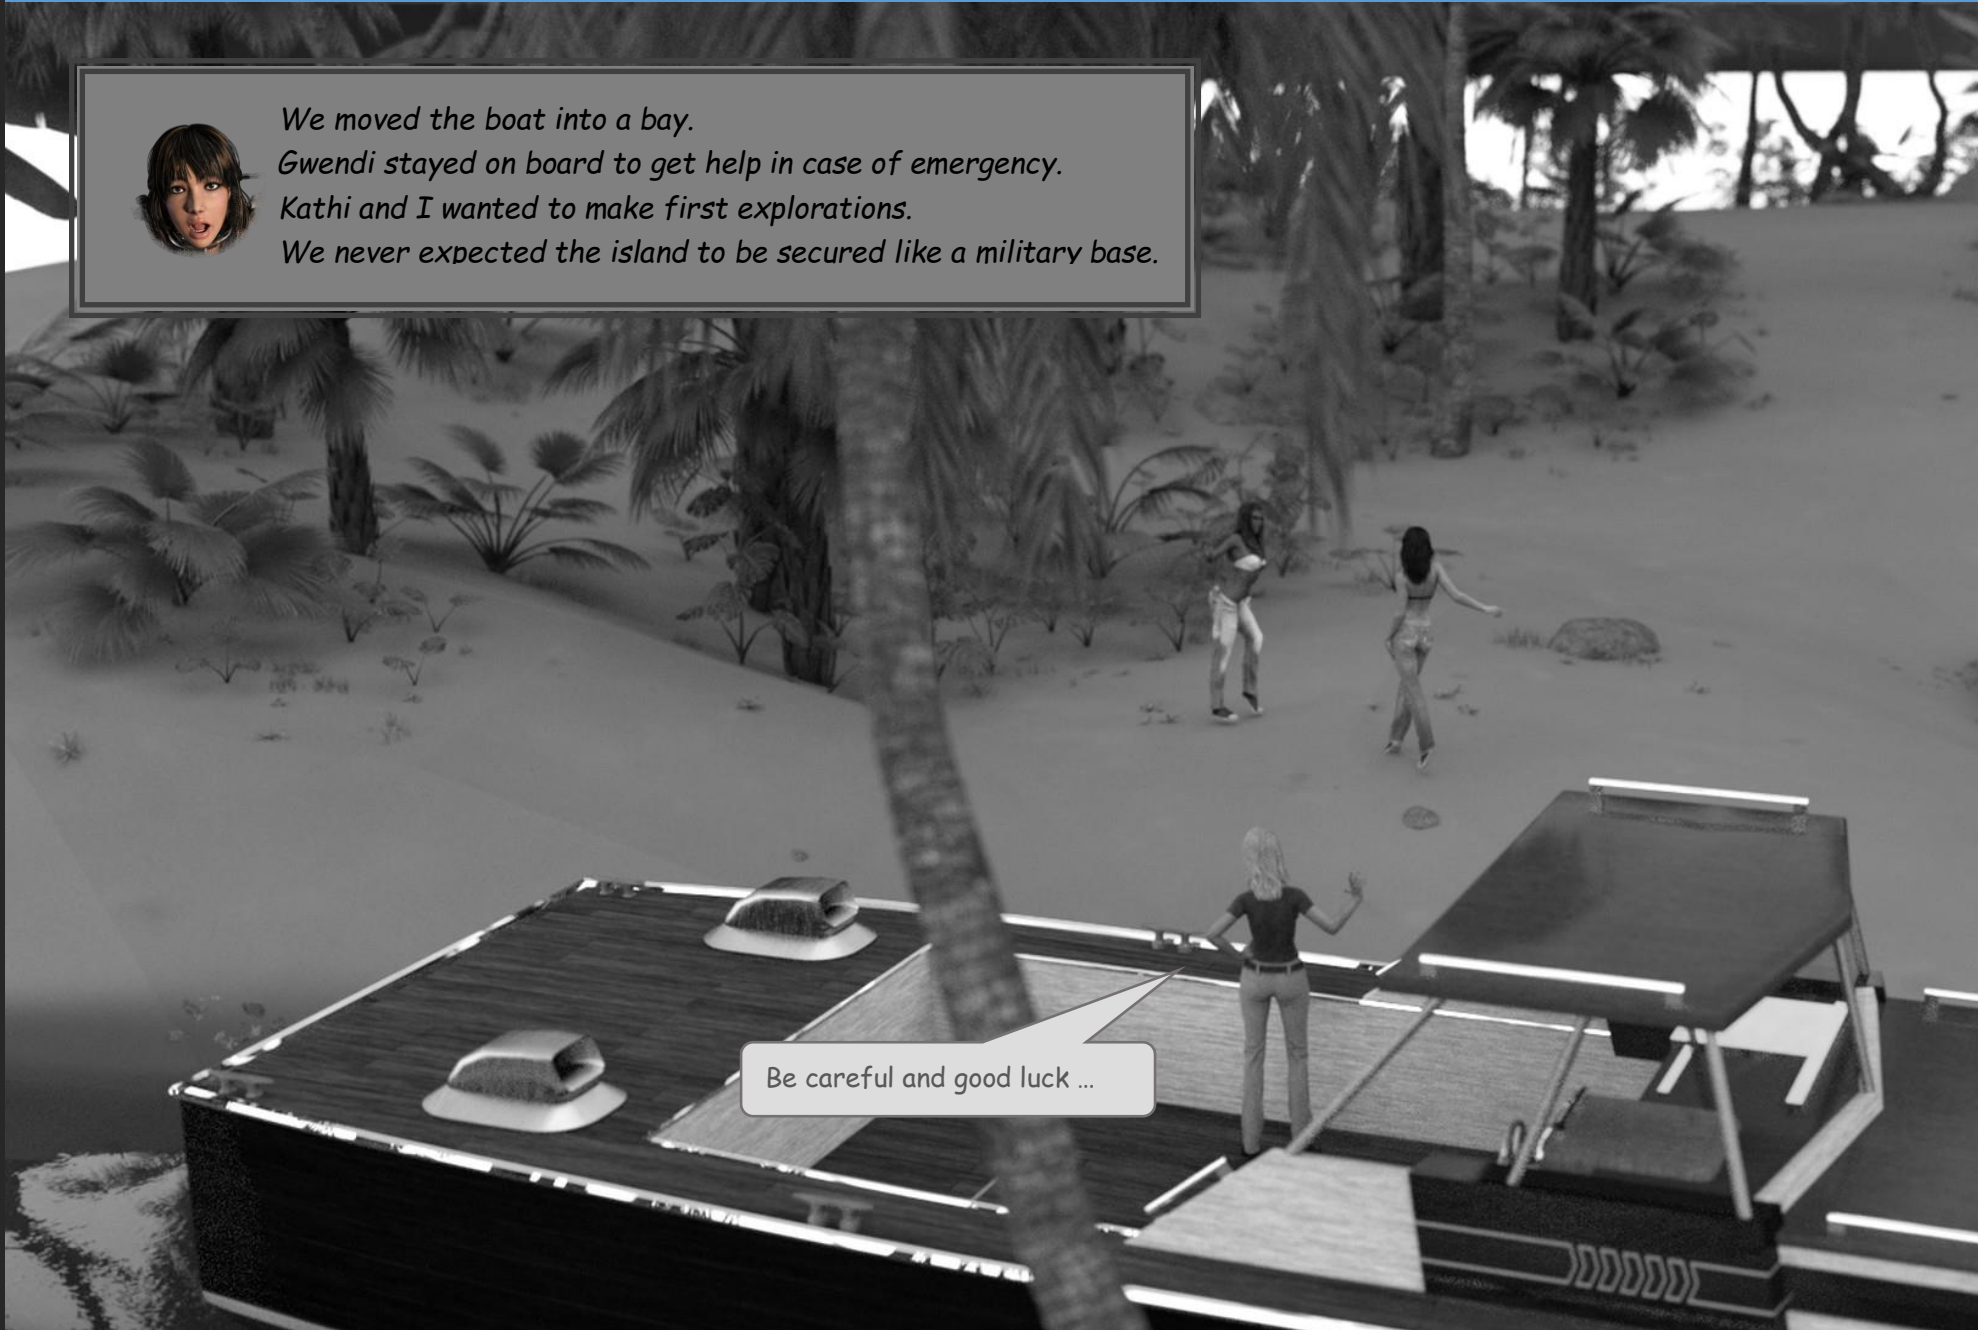

But this can be deceiving.
We should be very careful.

This island looks so peaceful.

*We moved the boat into a bay.
Gwendi stayed on board to get help in case of emergency.
Kathi and I wanted to make first explorations.
We never expected the island to be secured like a military base.*

Be careful and good luck ...

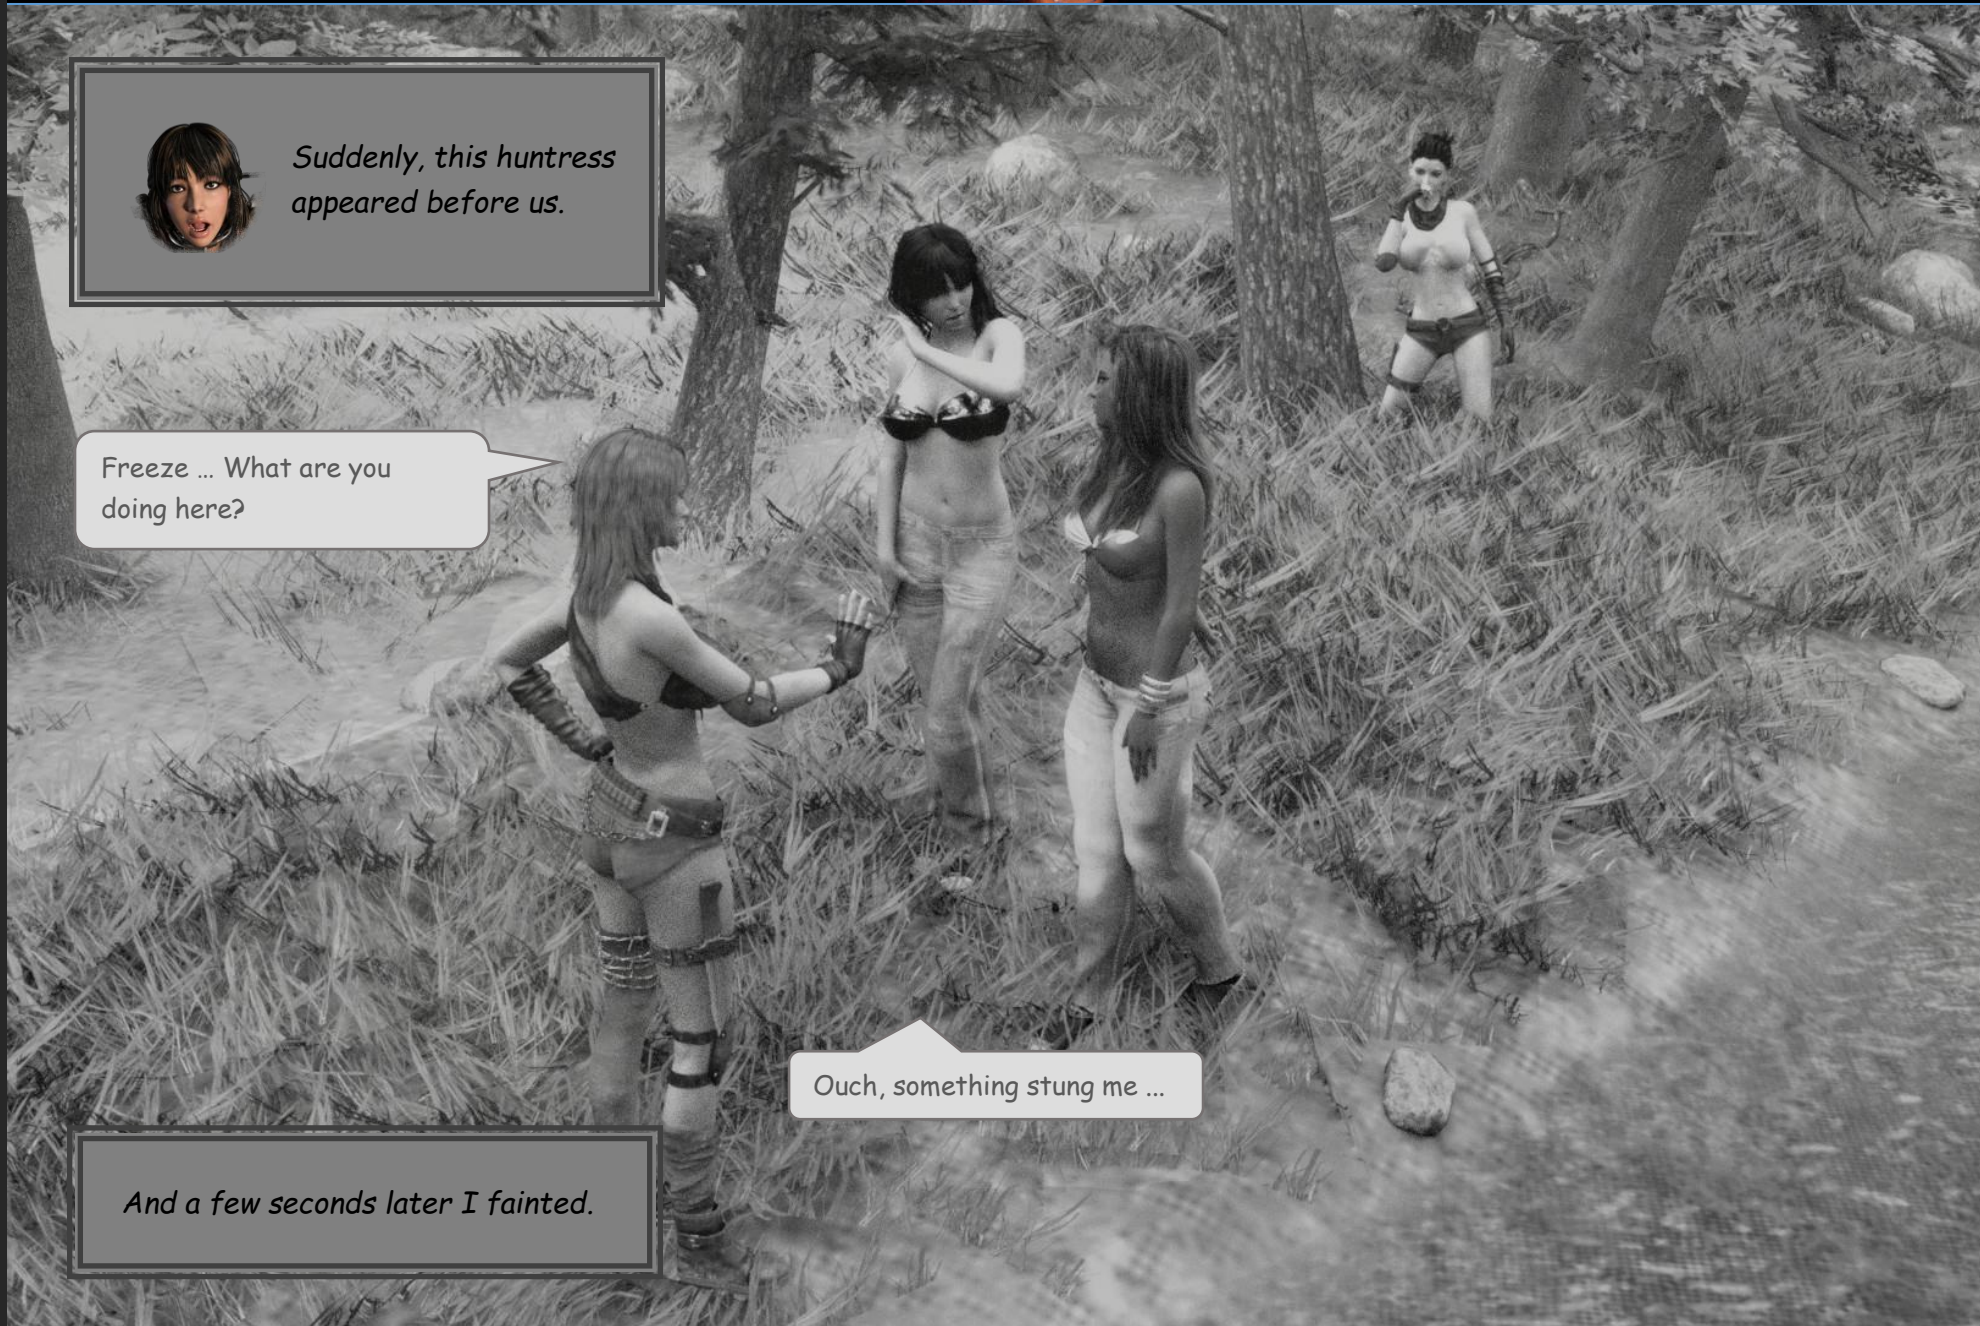

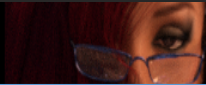

Suddenly, this huntress appeared before us.

Freeze ... What are you doing here?

Ouch, something stung me ...

And a few seconds later I fainted.

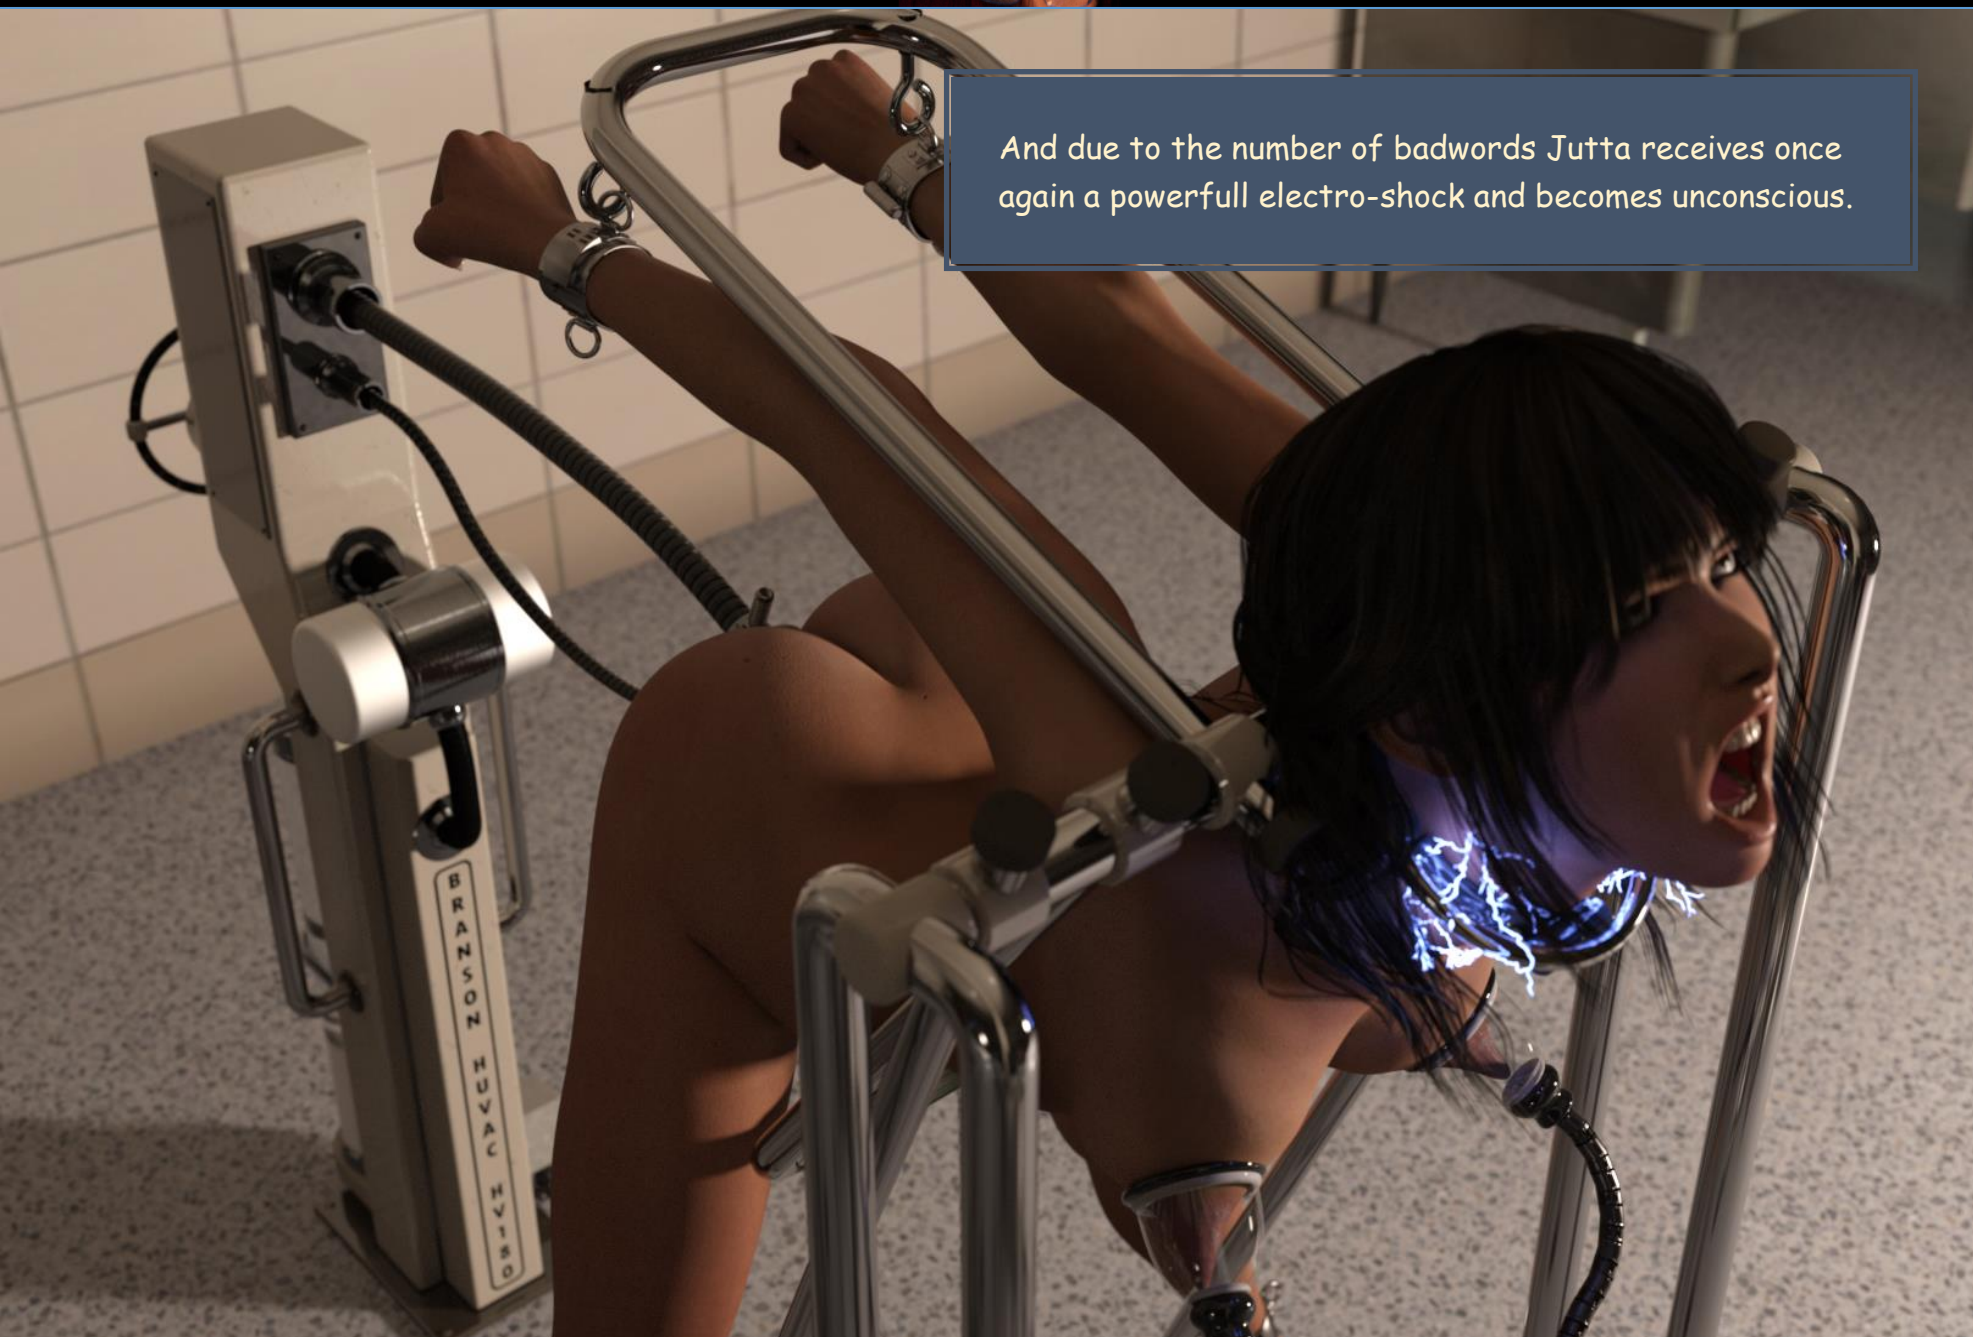

We awoke on these torture devices where these shitty fucking assholes without brain tortured us. Fuck off bitches

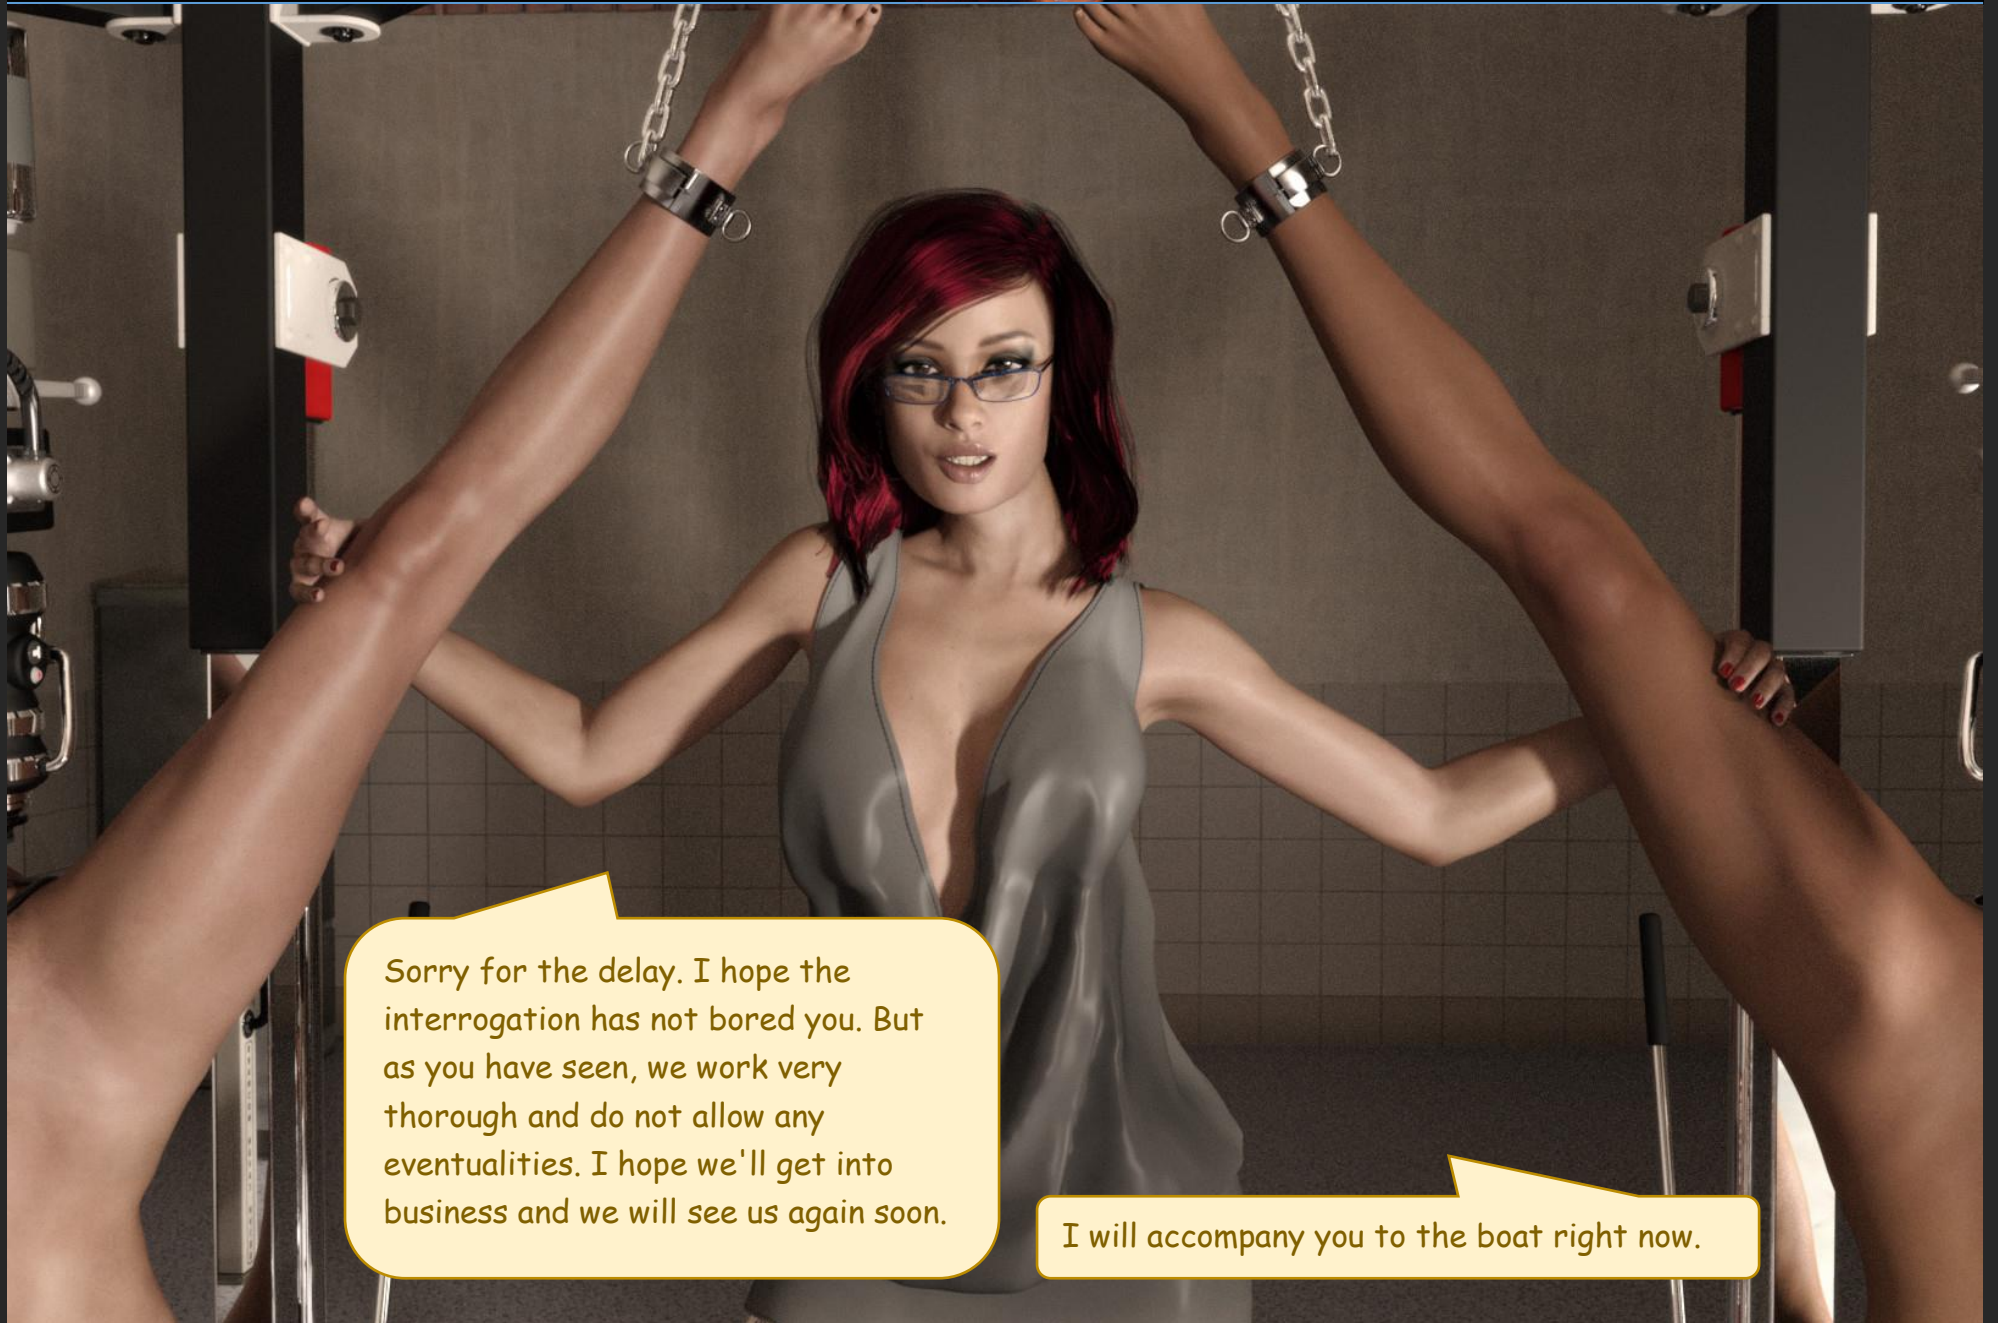

And due to the number of badwords Jutta receives once again a powerfull electro-shock and becomes unconscious.

Well, I know enough. Guardian ... put the feeder in her mouth and when I am away with my guest, give the three intruders into a box. Also, make a background check about these three. Oh yes ... Find this Paul and get him immediately.

Sorry for the delay. I hope the interrogation has not bored you. But as you have seen, we work very thorough and do not allow any eventualities. I hope we'll get into business and we will see us again soon.

I will accompany you to the boat right now.

While the boat cast off, you wave back once again.

What will happen to our 3 girls?

Is Paul found and brought to Laura?

And then what happens to Him?

Will there be answers to these questions?

Perhaps there is a reunion in the "captured" story.

So stay tuned on this channel and hope for answers ;-)

END ?
