

THE TINY TRAVELER - CHAPTER 1

BY AAABBBZZZ

The year was 2138, an era of exploration like never seen before. Humans had evolved and had started to colonize the stars. On a solo mission was a young traveler of 25 years of age named Scott. Scott had grown up intrigued by unknown areas of space and today he was investigating a strange blue object. As he approached, he was more confused than ever. The scans he performed were giving back some strange information.

That's so strange. There's no data on anything like this. What is this object doing all the way out here, and how did it form? It can't be naturally occurring. Wait, what's going on? I'm reading an increase of gravitational force coming from it. What's going on, it's pulling me into it!

Suddenly it felt as if physics changed their rules. Scott's ship seemed to stretch as it was dragged into the center. There was no way he could get the craft to navigate away. The force was just too strong and overwhelming. Within that instant, he disappeared off every source of radar.

Far off in another place, a similar type object appeared in the air.
This time it wasn't out in space, it looked like to be in a room.

A man in a white space suit stands in a futuristic, metallic structure. He has a confused expression, with his hand to his forehead. A large thought bubble is positioned above him, containing text. The background shows a blue sky with light clouds. The structure has various panels, pipes, and mechanical components.

What the hell was that? My body felt so strange for a moment there. Did I go through some sort of portal or something? This isn't the same area of space I was just in. I'm detecting a ground level though, maybe I should land and get a hold of myself. It feels like something is off here...

What he didn't notice was that he was in a gigantic room. Scott's spaceship set itself up for an automatic landing. As he made his descent, he felt confused. Going through the blue dot was such a sudden and intense experience. He wanted to stop and walk around to catch up with himself.

Where am I?
What is all of this? My communications aren't working so something in this structure is blocking them. Systems show it's a safe environment to walk around in though. Maybe when I get outside more of this will make more sense. This looks like a giant room, but not from my time period. It could be some sort of old movie set.

As he stepped out of his ship, Scott noticed the blue dot floating in the sky. He didn't understand how, but it appeared to act like some sort of portal. This place was intriguing though. He walked across the giant landscape, wondering why all of this was here. As he made it more into the open, he felt a quake in the distance.

What is that, a girl? She's gigantic! Her steps are shaking the ground. I need to get out of the way, she's coming this way! What the fuck is going on here?

Lucky for Scott, the girl didn't seem to notice him. Unfortunately though, he was in her path. At her size she wouldn't even notice it if she stepped on him. The tiny man knew he had to run as fast as he could if he didn't want to risk being crushed.

Without even a second to spare, Scott made a dive through the air as the giant shoe crashed down next to him. For now he had at least dodged the girl. He was frightened by her size and power though. This had completely changed what Scott thought was going on.

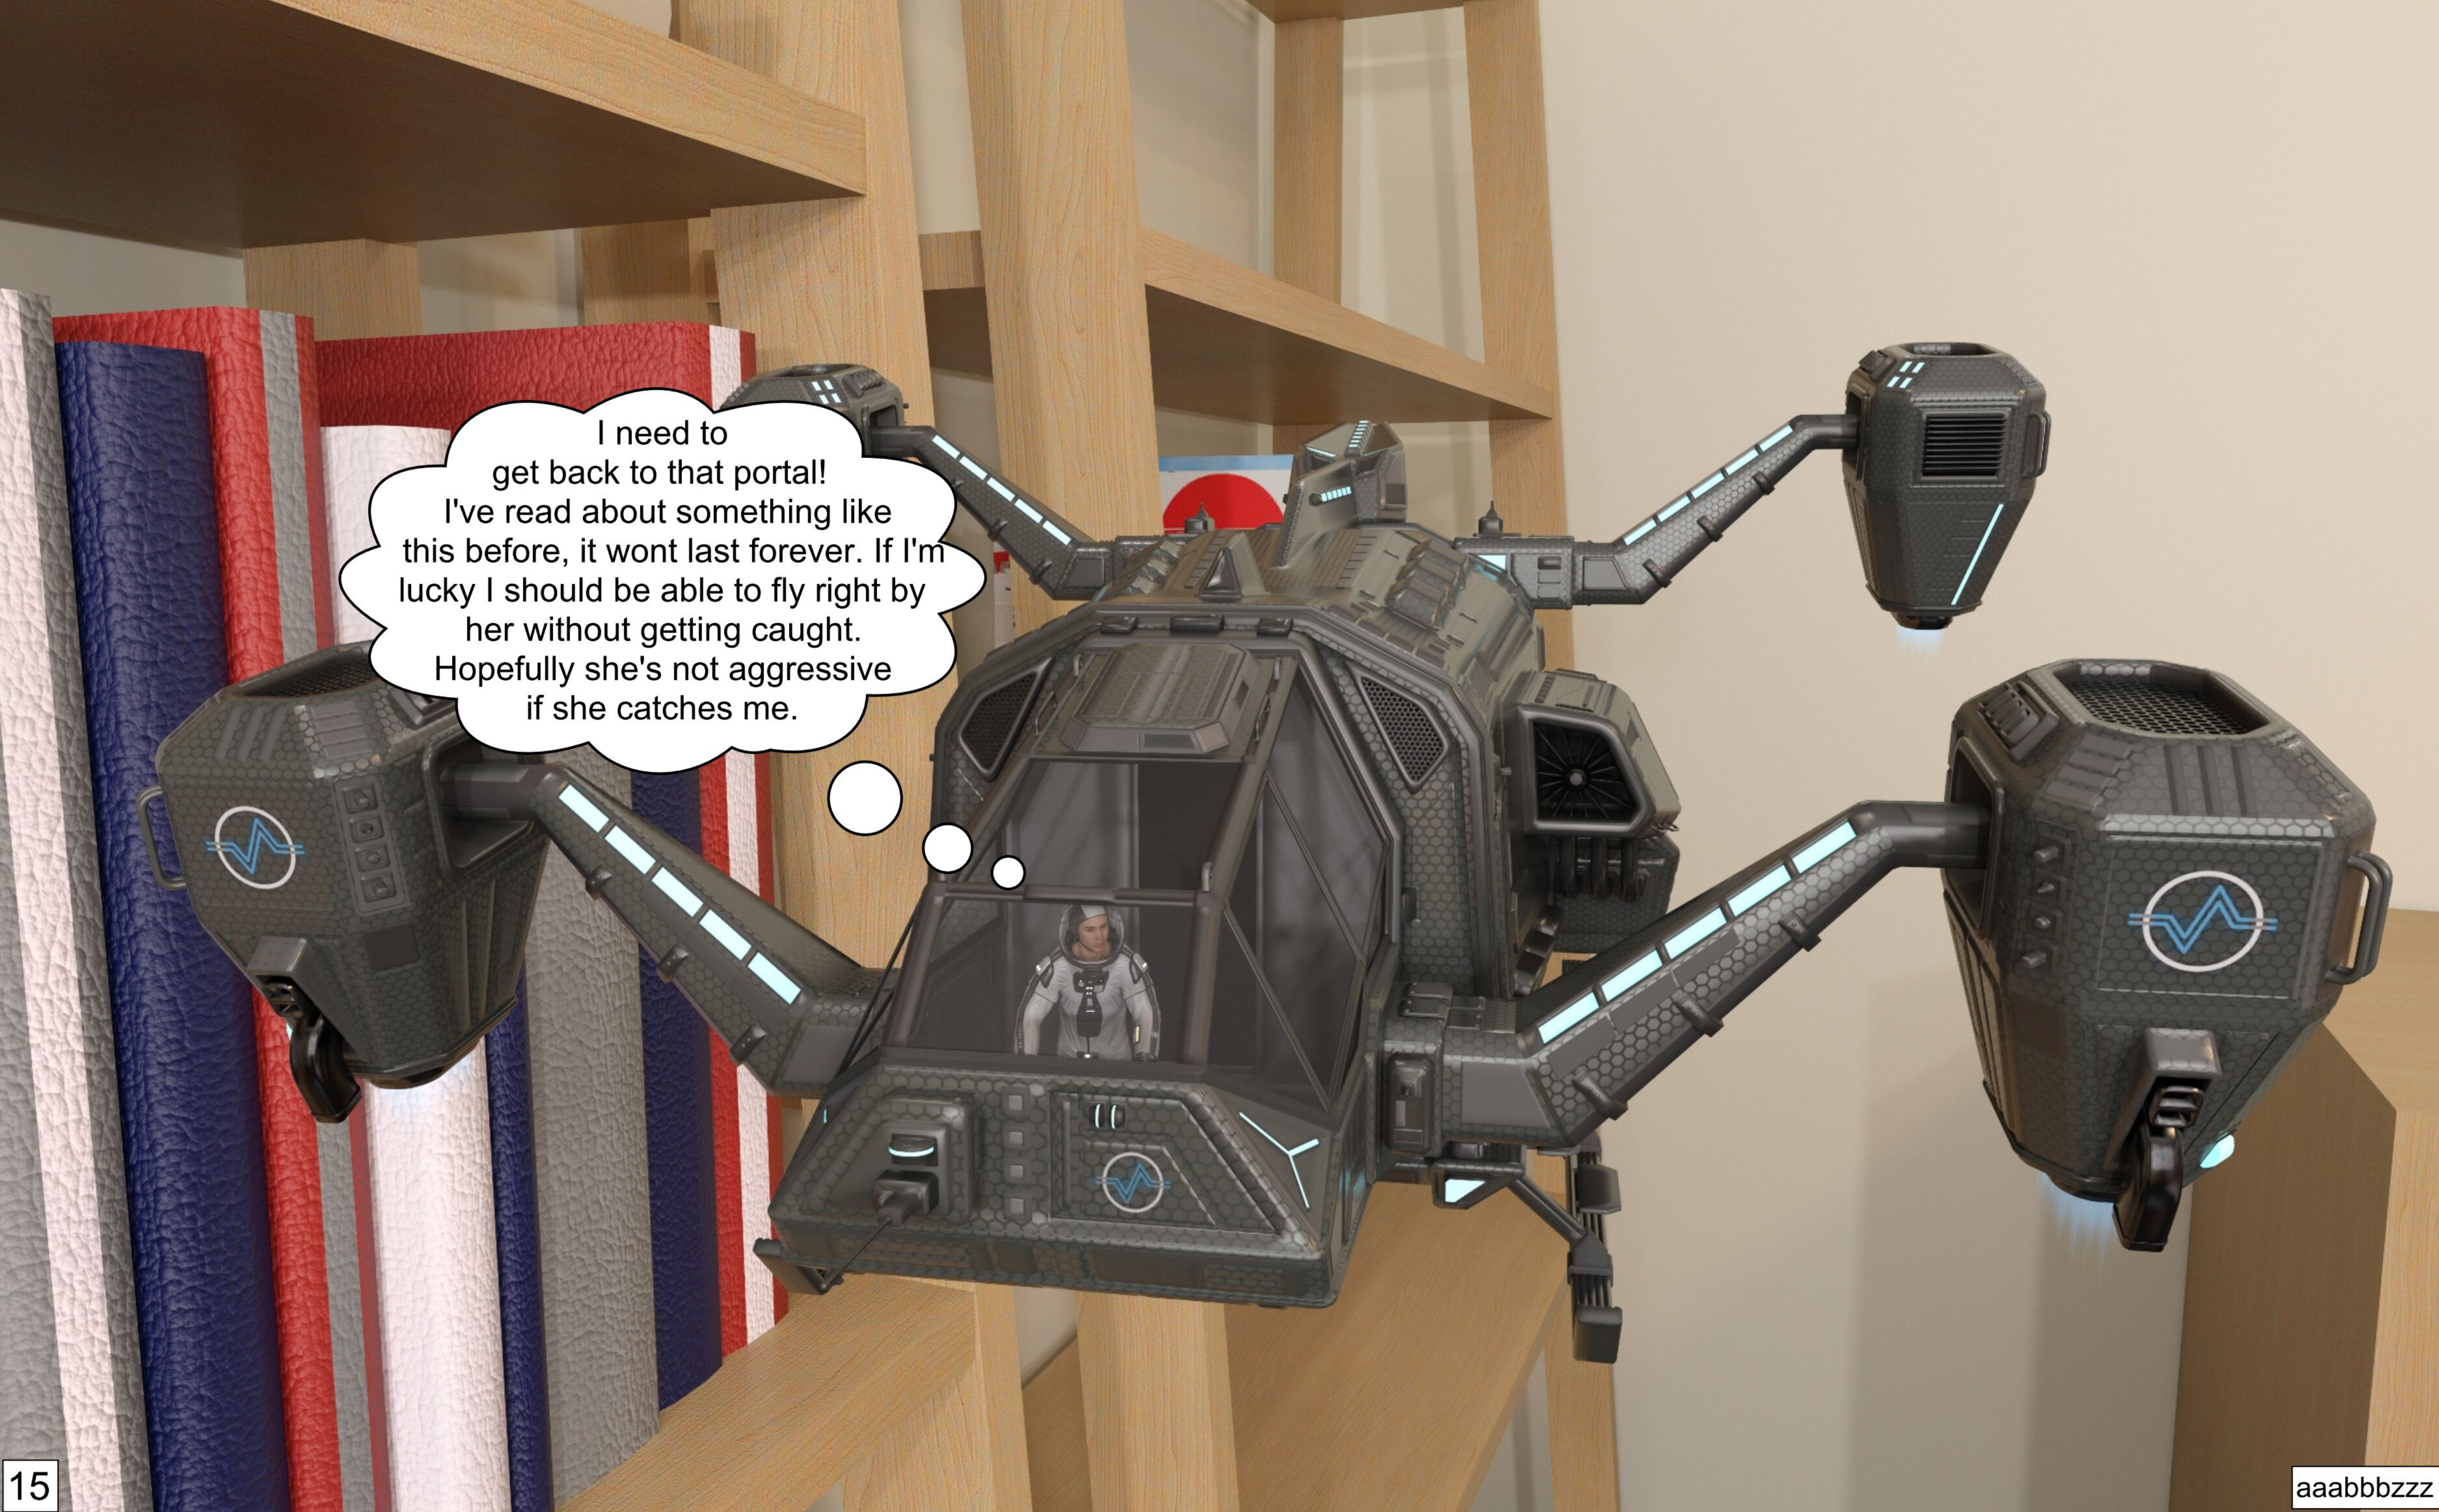

Oh shit, she's going for the blue dot. How is she so big? That portal must of sent me to another dimension or something! Somehow I feel like I have traveled to the past, but did I also shrink going through? There's no way this world is just gigantic. I can't think about this right now, I need to get back to my ship.

Even though Scott was the size of a bug in this world, his ship was a lot bigger. If the girl wasn't distracted by the blue dot, she would definitely notice it. He was getting close though, this was his only chance to get on board and get out of here. He knew he had to get back to his dimension before it was too late.

Megan was an eighteen year old college freshman living in this dorm with one of her best friends. When she came into her room she immediately was captivated by the blue light next to her window. She could feel a warmth radiate from it, making her want to touch the strange object.

I need to
get back to that portal!
I've read about something like
this before, it wont last forever. If I'm
lucky I should be able to fly right by
her without getting caught.
Hopefully she's not aggressive
if she catches me.

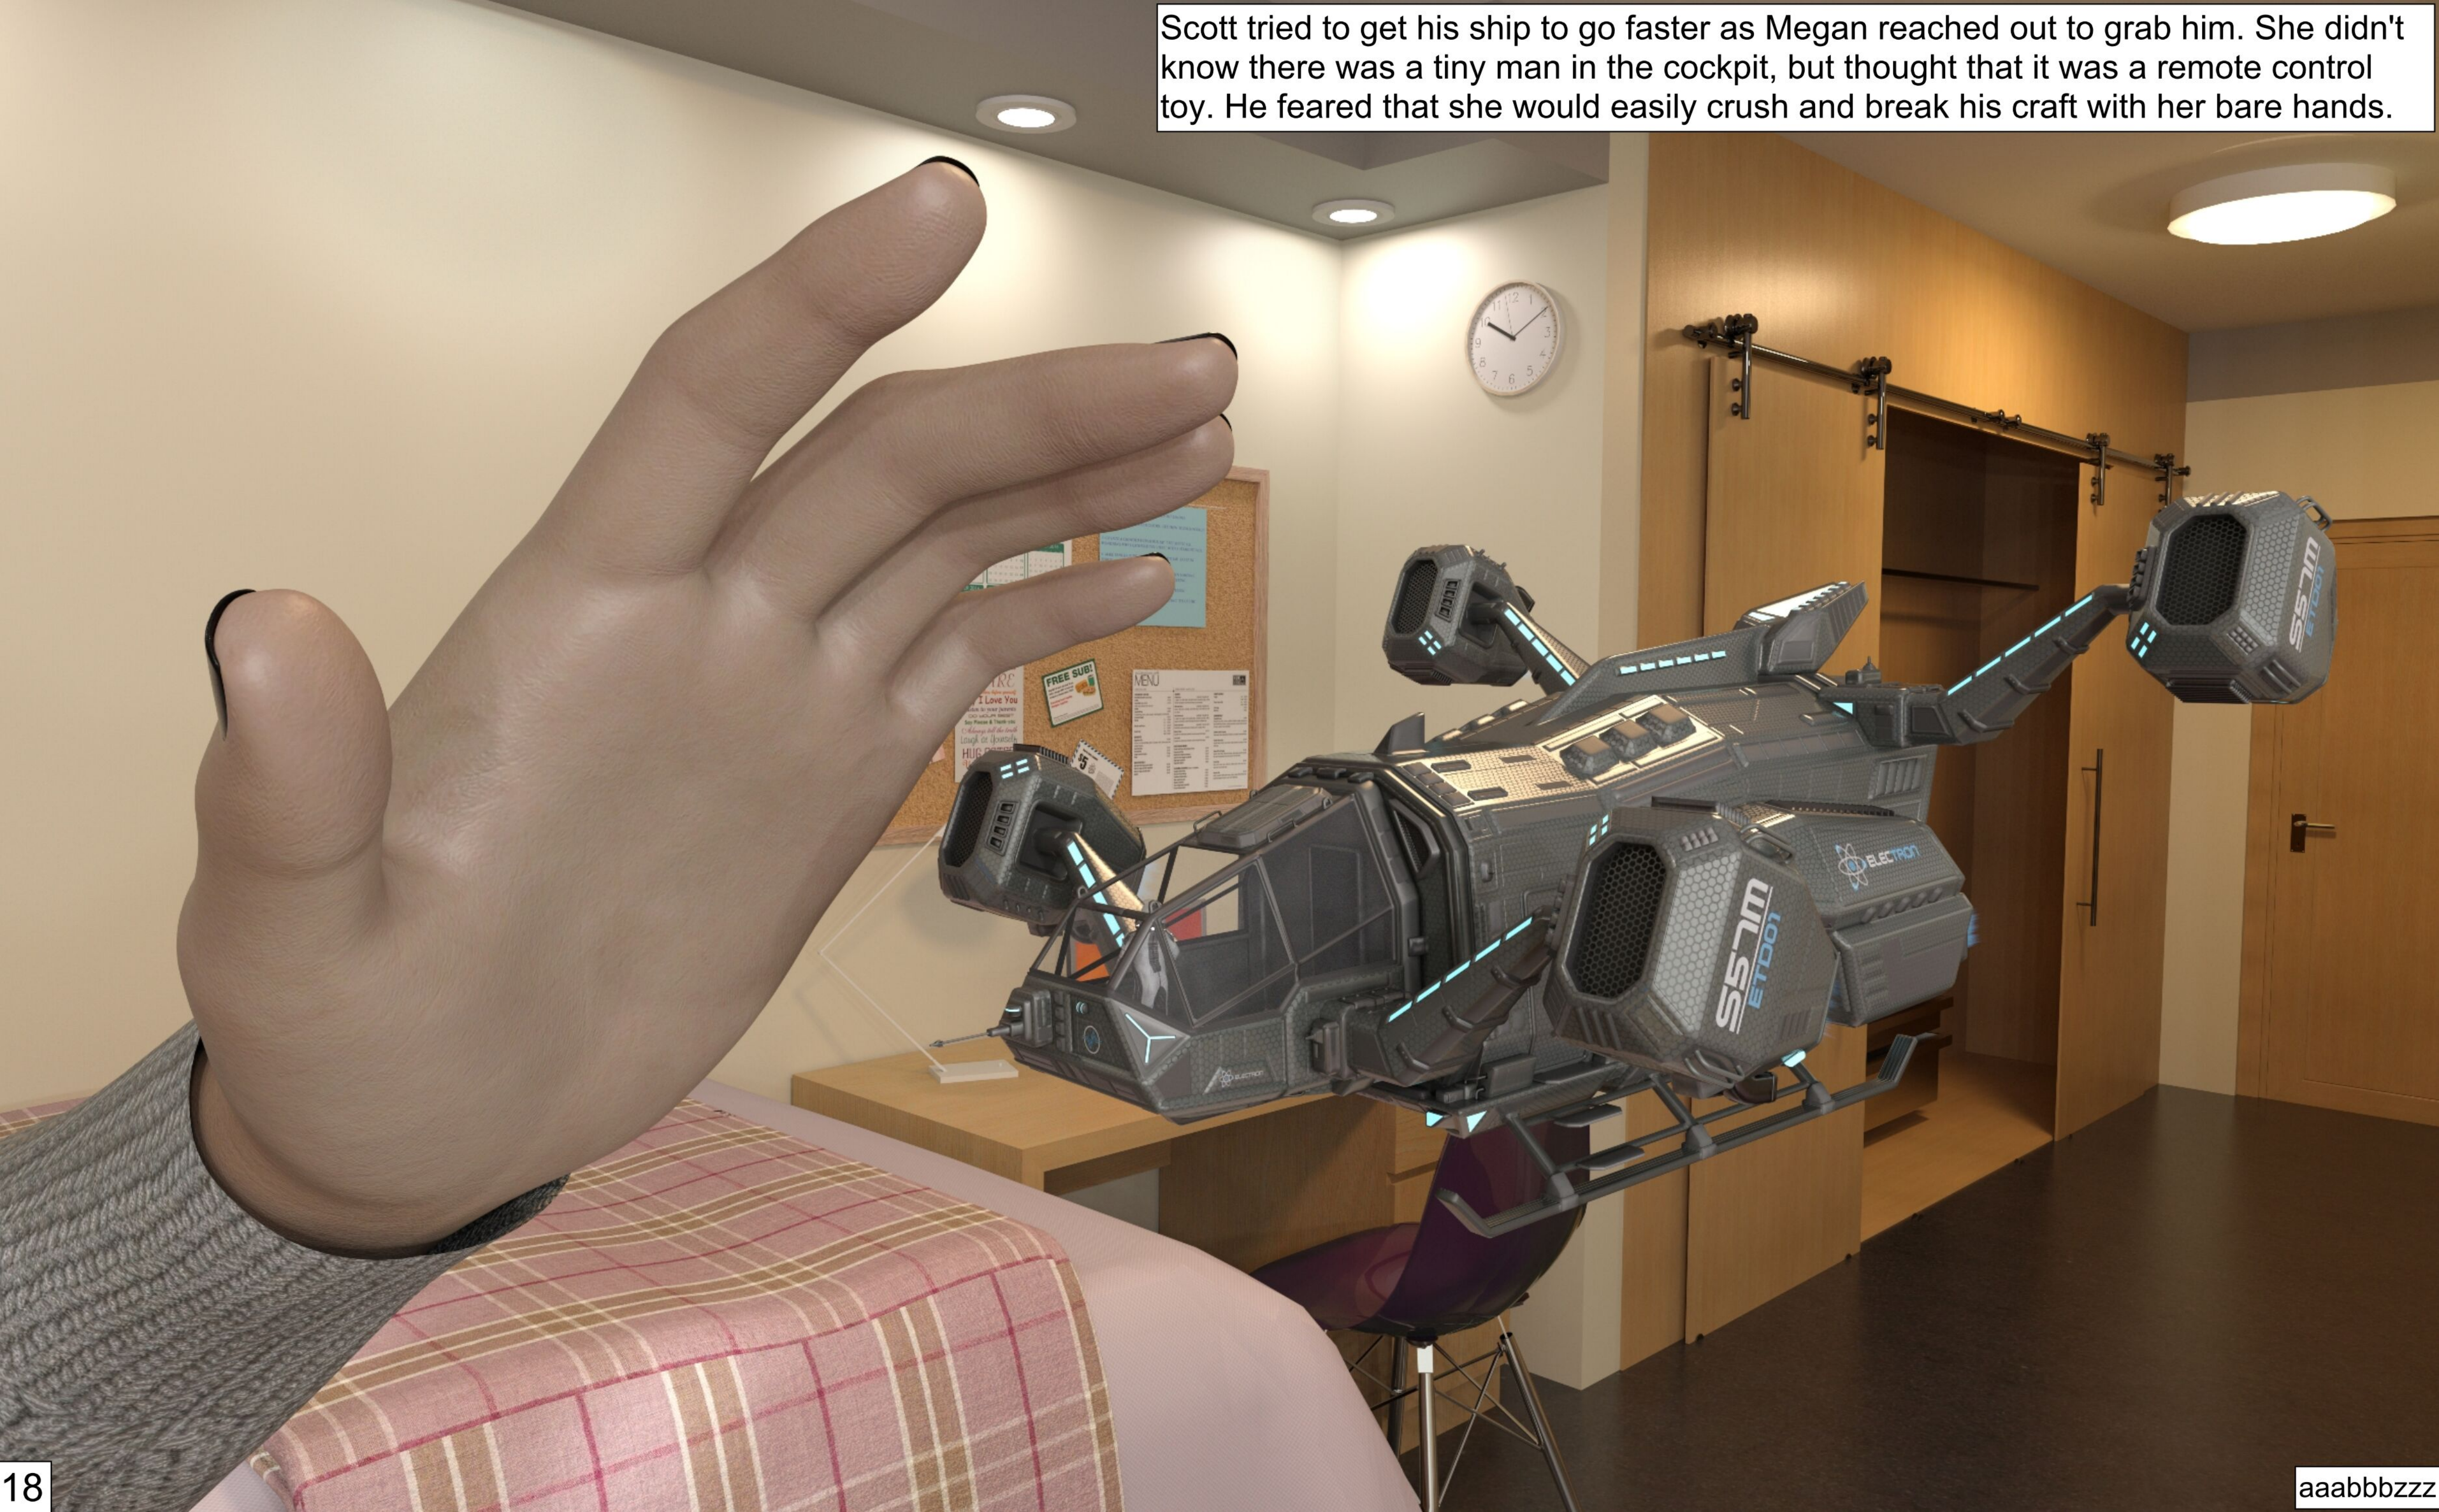

As the engines started to make noise, Megan suddenly noticed the craft rising in the distance. At first she was frightened, but as it started to move towards her slowly she started to realize how tiny and non-threatening it really was.

What's with that face?
Oh no, she's not happy to see me! I need
to get past her right now!

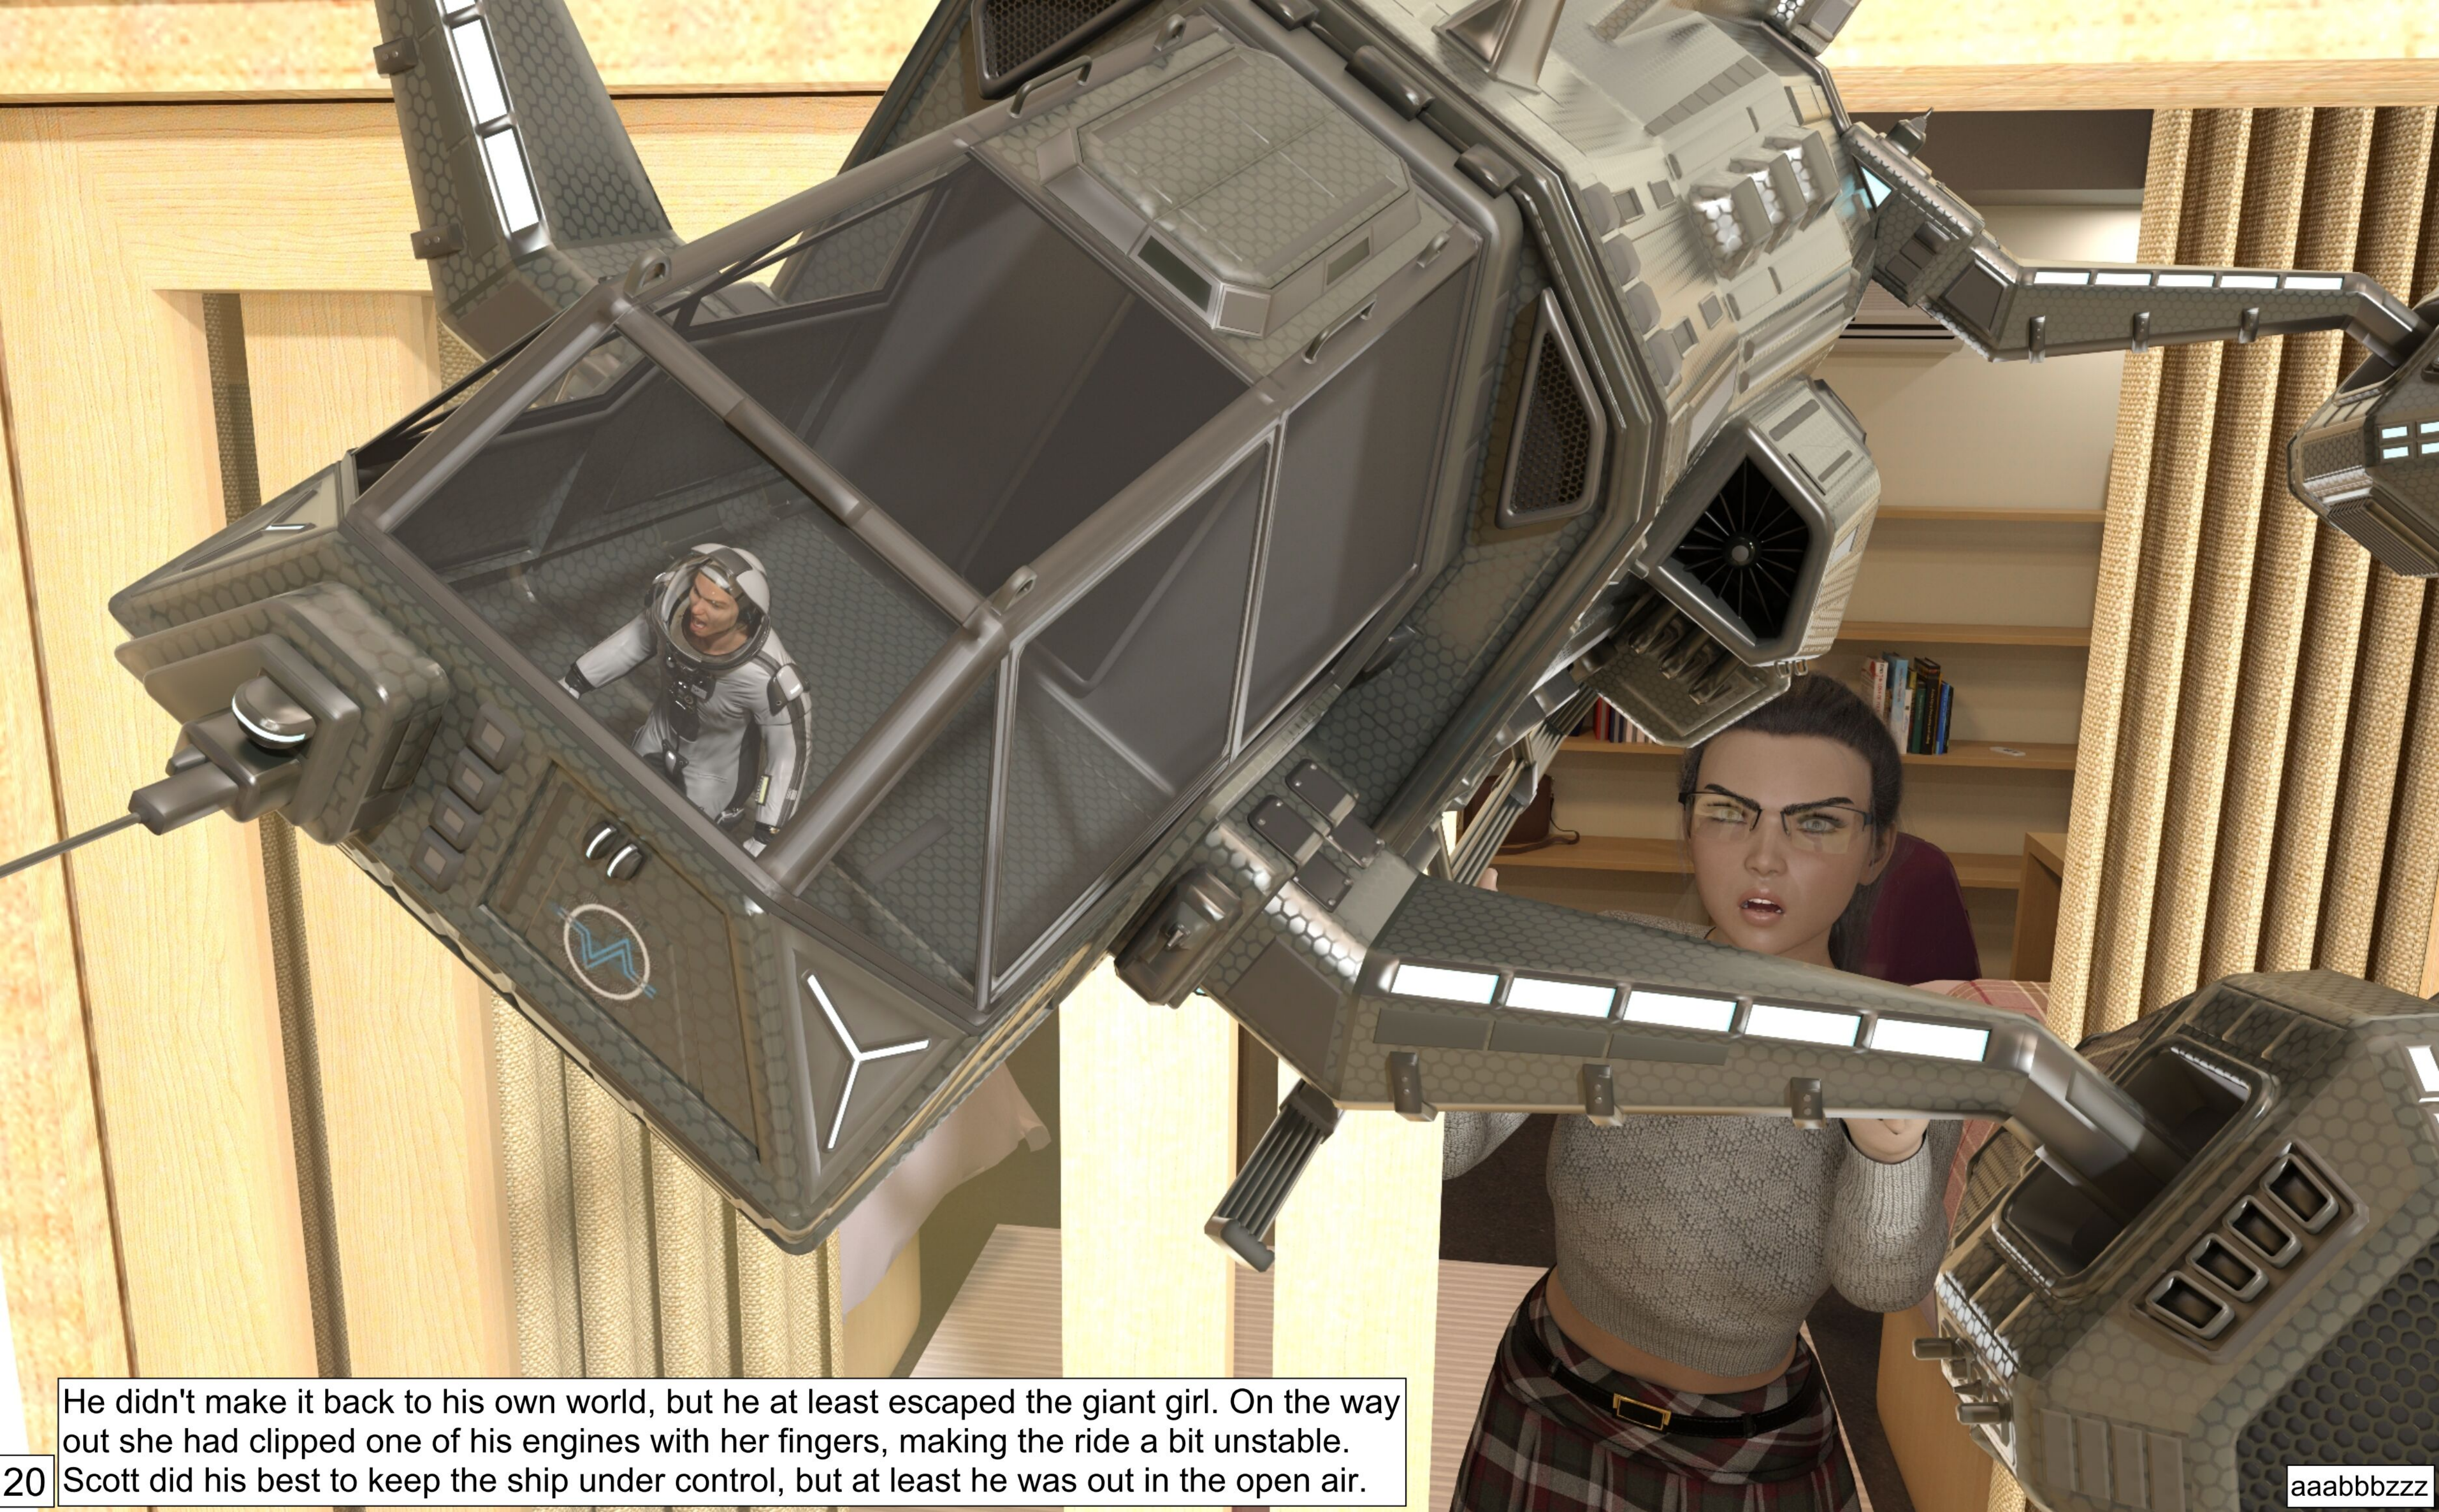

What the fuck
is this, one of those new
drones? You think you can fly
into my room to secretly record me
don't you? Whoever you are, say
goodbye to your toy, I'm going
to take it for myself!

Scott tried to get his ship to go faster as Megan reached out to grab him. She didn't know there was a tiny man in the cockpit, but thought that it was a remote control toy. He feared that she would easily crush and break his craft with her bare hands.

Shit, it just closed! Now is not the time, I need to go. This girl is going to kill me if I don't keep flying. Maybe the leftover light will be enough to send me back!

He didn't make it back to his own world, but he at least escaped the giant girl. On the way out she had clipped one of his engines with her fingers, making the ride a bit unstable. Scott did his best to keep the ship under control, but at least he was out in the open air.

After flying for a few minutes, Scott knew he had to land. It was unreal to be looking out on all of the gigantic structures this world had. He knew that his size would make this entire world hostile to him. If he was going to stop it would have to be a safe place.

Scott eventually noticed an opening as one home had left their sliding door cracked. This seemed like a nice and quiet place to finally land. He aimed for the couch as he noticed an area underneath that would be good to hide in.

The landing wasn't as easy as he thought, but at least Scott was flipped over on a soft surface. His spaceship was undamaged against the soft fibers of the rug. He knew he would have to get out and fix what Megan might of touched.

At least it
doesn't look there is any damage,
I'll have to take a look at a few things
before flying it again. Once I get it running
properly I can start to observe my
surroundings more. I still have no
clue where I am.

Coming out of her room, unaware of Scott was a 20 year old girl named Julia. Julia was a student at the nearby university who lived with her mom who was single. Today was her off day and so she was just hanging around her house. As she walked out into her living room each foot step was heard from underneath the couch. Scott could feel as if something powerful were coming through.

A woman with long brown hair, wearing a coral-colored short-sleeved crop top and grey ribbed leggings, is seen from behind, walking towards a large glass door in a modern living room. The room features a grey sofa, a wooden coffee table, and a wooden TV stand. A thought bubble above her head contains the following text:

Huh, did mom
leave the door open again? She's
going to let so many bugs in if she keeps
doing that. What a nice looking day to have off
though. This is the first time in weeks where I
can just sit back and relax. It's going to be
such a great weekend.

It feels like the entire world is moving, how is that possible? Is that another giant girl! Maybe this wasn't the best place to land, I hope she doesn't have to check down here.

Julia sat down on the couch as Scott came to the open to observe. He looked up to see her giant foot hanging off the edge. He was amazed by the sheer size of the girl's body. None of this felt real yet, it was hard to comprehend her scale.

But suddenly Scott looked up to see Julia's mom walk in. Anne was 38 year old woman who took care of herself as well as her daughter. It looked like she had just got back from a run as she was breathing a little heavily. On her way in she closed the door, sealing her tiny visitor inside of the house.

Good morning Julia, how are you doing today? Aren't you happy to finally have some time to not be so busy, you deserve some rest. I'm going to be at your aunt Cindy's for most of the day so it will probably be very quiet around here.

Thanks mom, I'm good! It does feel good, there are so TV shows I wanted to catch up on. Can you say hi to aunt Cindy for me? Tell her I'm excited to see her tomorrow.

As Anne and Julia chatted, Scott watched from below, in shock by how much force he could feel from just a simple conversation between the two.

This is unbelievable.. wait, this could be my chance! They speak English just like I do. With the two of them there maybe I could get one of them to notice me. I'll need a way out of here if I want to get back to my world.

This is great,
she'll have to feel this if I
touch her foot. It's so massive, I'll
have to be careful. If she doesn't
realize I'm here she could hurt
me without even trying.

Scott wasn't so lucky though. The slight tickle only made Julia flick her foot, forcing the tiny spaceman to lose his balance. The tremendous force of her sweep caused him to be pushed through the air.

Ya I can't wait! It will be good to see her and my cousins. It's been awhile since it was all of us girls together. We can get a bit rowdy, but it's a lot of fun.

I'm excited too sweetie. Well I'm going to go take a shower and get ready for the day. Enjoy your TV shows, and don't forget to be good to yourself today.

Meanwhile down on the floor, Scott was trying to recover from the recent shake up. He really underestimated the power of Julia's toes. At his size they were able to throw him around with ease. He thought for a second how easy he could of died with that stupid decision. Getting the attention of a giant would prove to be harder than he thought was possible.

Shit she's leaving already, I thought that was my chance. She looks so powerful as she walks away. It's hard not to be taken by such a sight, it's terrifying.

After her mom had left, Julia brought her legs up on the couch and laid back for a moment. She took a deep breath to meditate on for a second before exhaling very softly. Julia didn't want anything to bother her today, she had her mind set on having a peaceful time.

Damn it that's my luck isn't it! Now I can't get her attention either. Why is everything so fucking big? This isn't right, where did that portal take me to! These people aren't like mine, nobody lives like this that I know of.

Before diving deep into her shows, Julia wanted to catch up on the news. She grabbed the remote and turned it to her favorite weekend news channel. Fortunately for Scott, this would reveal a lot about this world that he had no clue about.

Good morning from the Channel 5 news crew here in sunny California. My name is Alexis, welcoming you to your weekend. Today is March 20th 2021, the first day of spring. Our first story revolves around some mysterious activity detected around our home area. Strange radio waves have been detected coming from what scientists believe could be an alien craft. What puzzles them is that they seem to be man made. More on this story we'll head over to our reporter who has more information.

March 20th 2021... am I hearing that right? Is that why the world looks like this! These people haven't even colonized another planet yet, there's no way I'll be able to get help from any of them. Fuck I need to turn off my distress beacon, that must be what's confusing them.

Without wasting another moment, Scott ran back over to his ship and started to get done what he needed to do. He turned off his emergency signal and fixed up the damages. There was no plan on what to do next yet, but getting in the air seemed to be the first step. From there he could decide what to do if he was capable of flying.

Nice, all systems are looking good. I should try flying it around this house for a little bit first though. Maybe I'll find an opening and won't need to rely on one of those women. If there's a safer place to land that would be a better place to think of some sort of plan as well.

As Julia sat watching the TV, Scott got his engines started. The noise from the show was enough to cancel out the spaceship, giving Scott the chance to fly undetected. As he ascended he wondered if maybe he could get her attention easily with his craft.

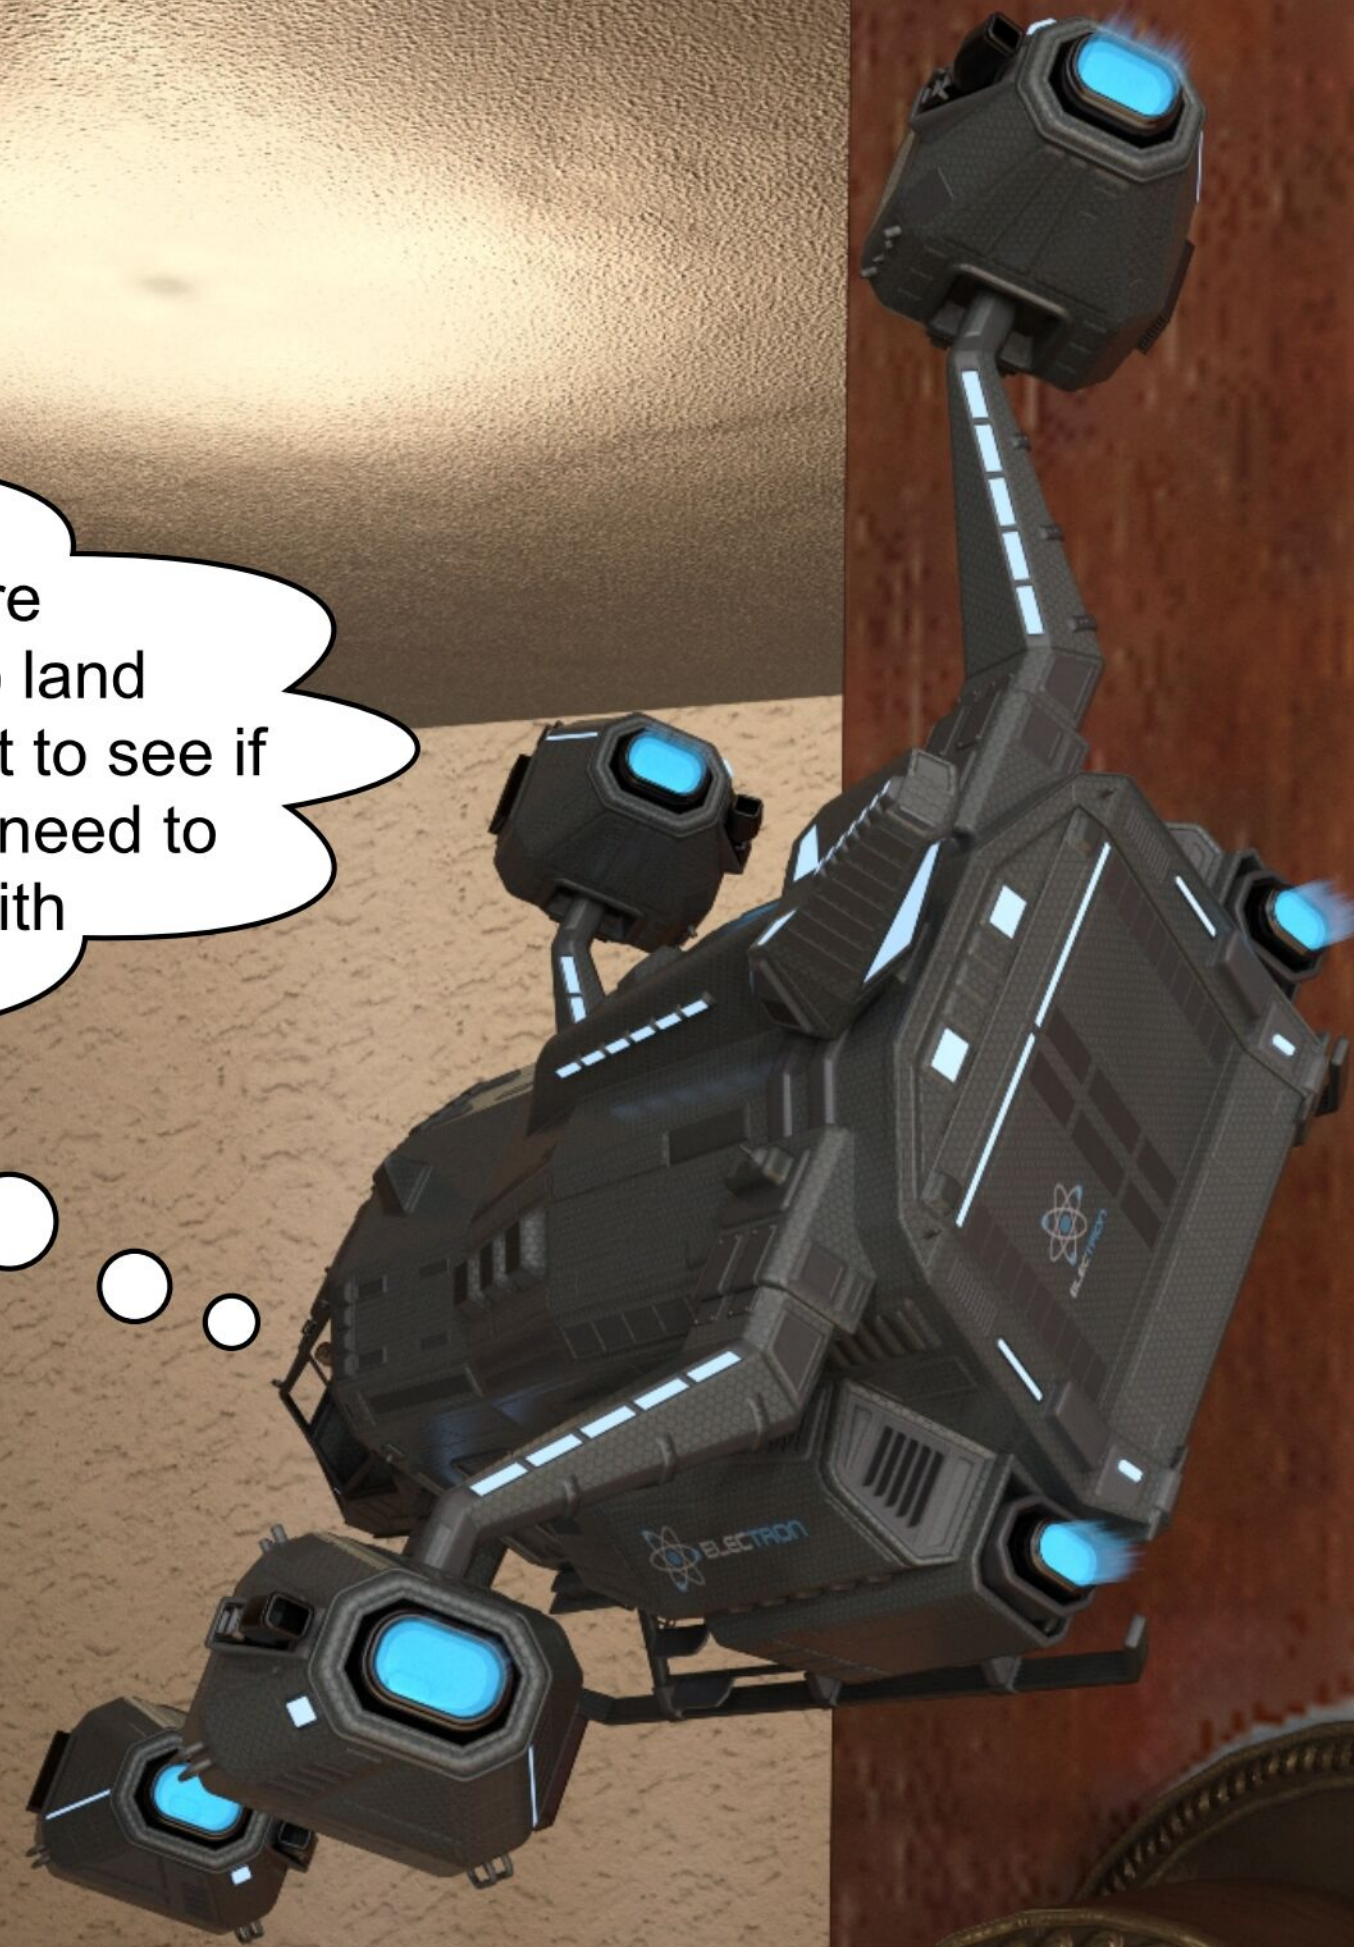

It's unreal
how high I need to fly up just to
get to the top of this couch. I wonder
how tall this girl would stand at this size, she
would be like a skyscraper. Maybe now
wouldn't be the best time to get her to
notice me. I'll look around and see if
any ideas seem better.

Flying a bit close to her head, Scott was lucky not to get the attention of the giantess. She was fortunately glued into her shows and didn't seem to be aware at all. From there Scott flew through the hallway, approaching Julia's room.

Is this her room? If she's going to be out there watching TV it could be a good idea to land somewhere in here. I haven't had a moment to see if my map has updated or anything yet. I'll need to eventually get back to that house with the blue dot.

It almost seemed too good to be true, but Julia had left one of her upper cabinets open. Scott took a peek inside to find a dark and empty space, perfect to safely land his ship and get all of his thoughts together.

A character is seen from behind, standing in a dark, industrial environment. The character is wearing a dark, tactical-looking outfit. The environment is filled with dark, metallic structures and machinery. A large, white thought bubble is positioned above the character's head, containing text. The background is dark and atmospheric, with some faint lights and textures visible on the machinery.

Okay I think this is finally a spot I feel safe in. Nothing could come up here and get me easily. I need to figure out what to do. I'm not sure what I would do if something happened to my ship. It's the only thing that keeps me feeling like I have a chance of making it through this. Maybe I can just rest for now and not rush into the wrong decision.

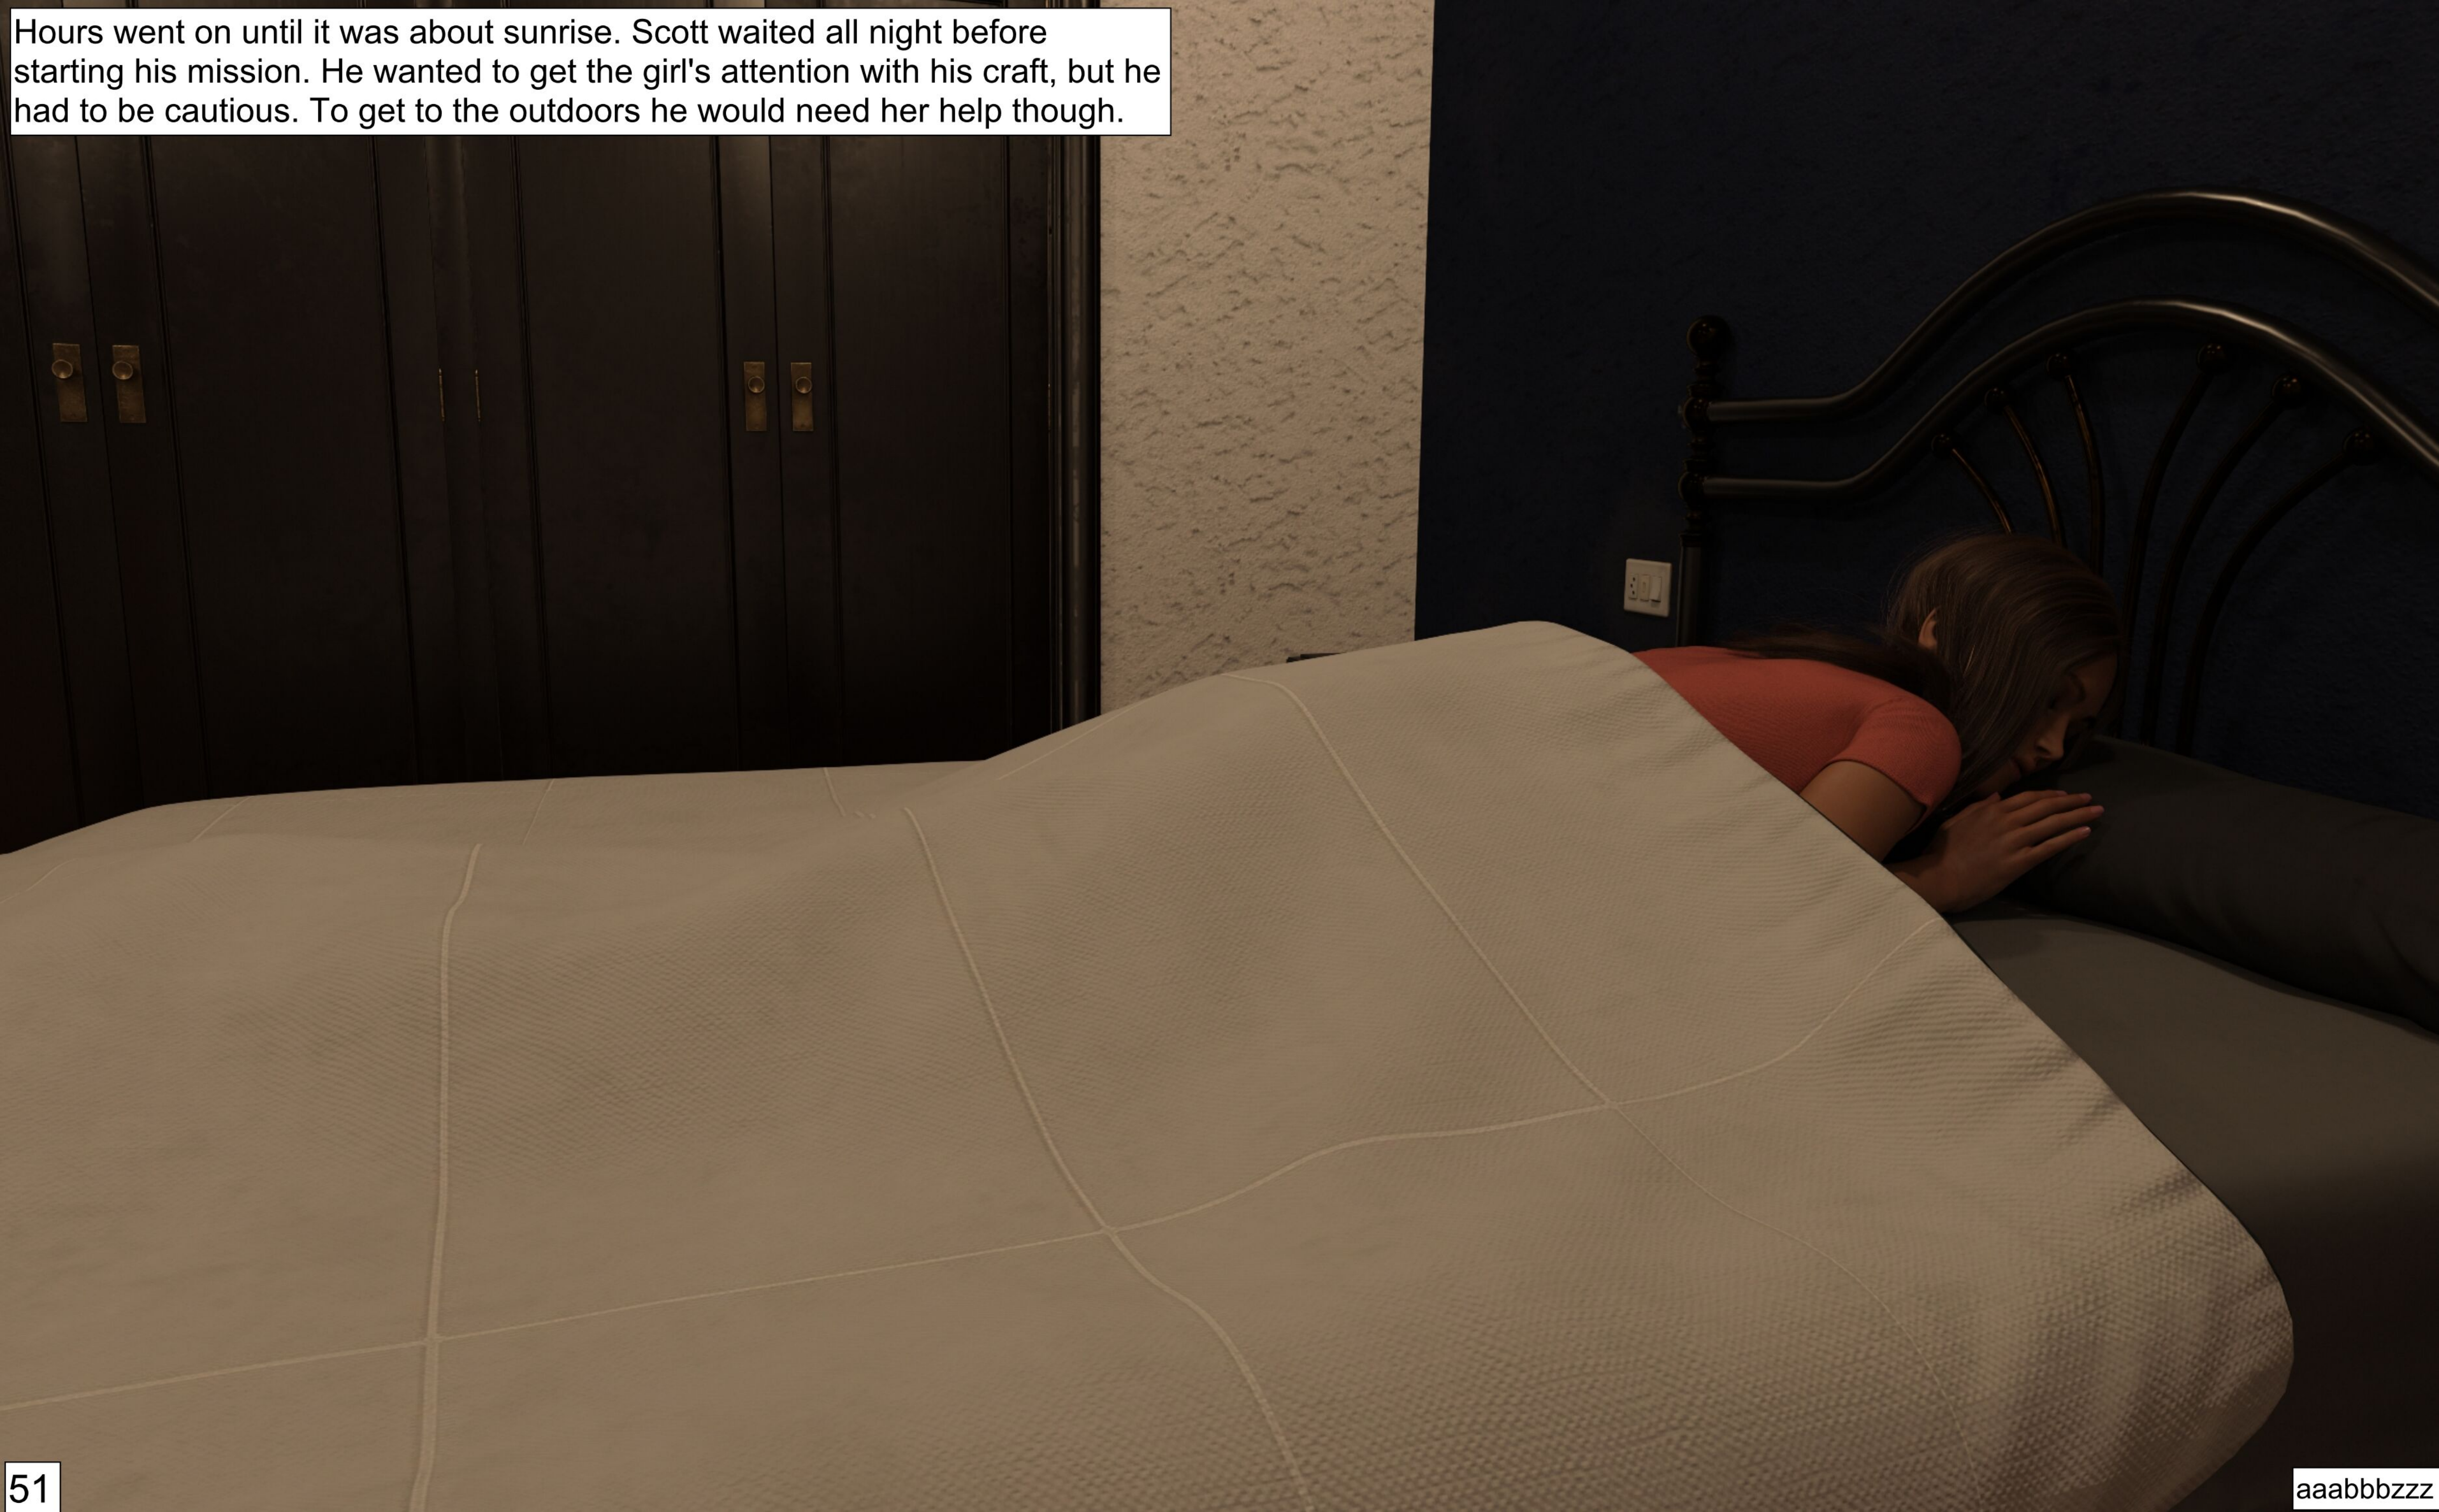

Scott rested for hours as the day went by. Traveling through the portal and this entire experience had him exhausted. The day went on for Julia until she decided to call it a night. Walking into her bedroom she was unaware of the tiny man hiding above.

I think she's going to bed. I'm ready to go now but the best move is to wait until early morning. If something happens I don't want to be outside at night. I guess I'll wait until then.

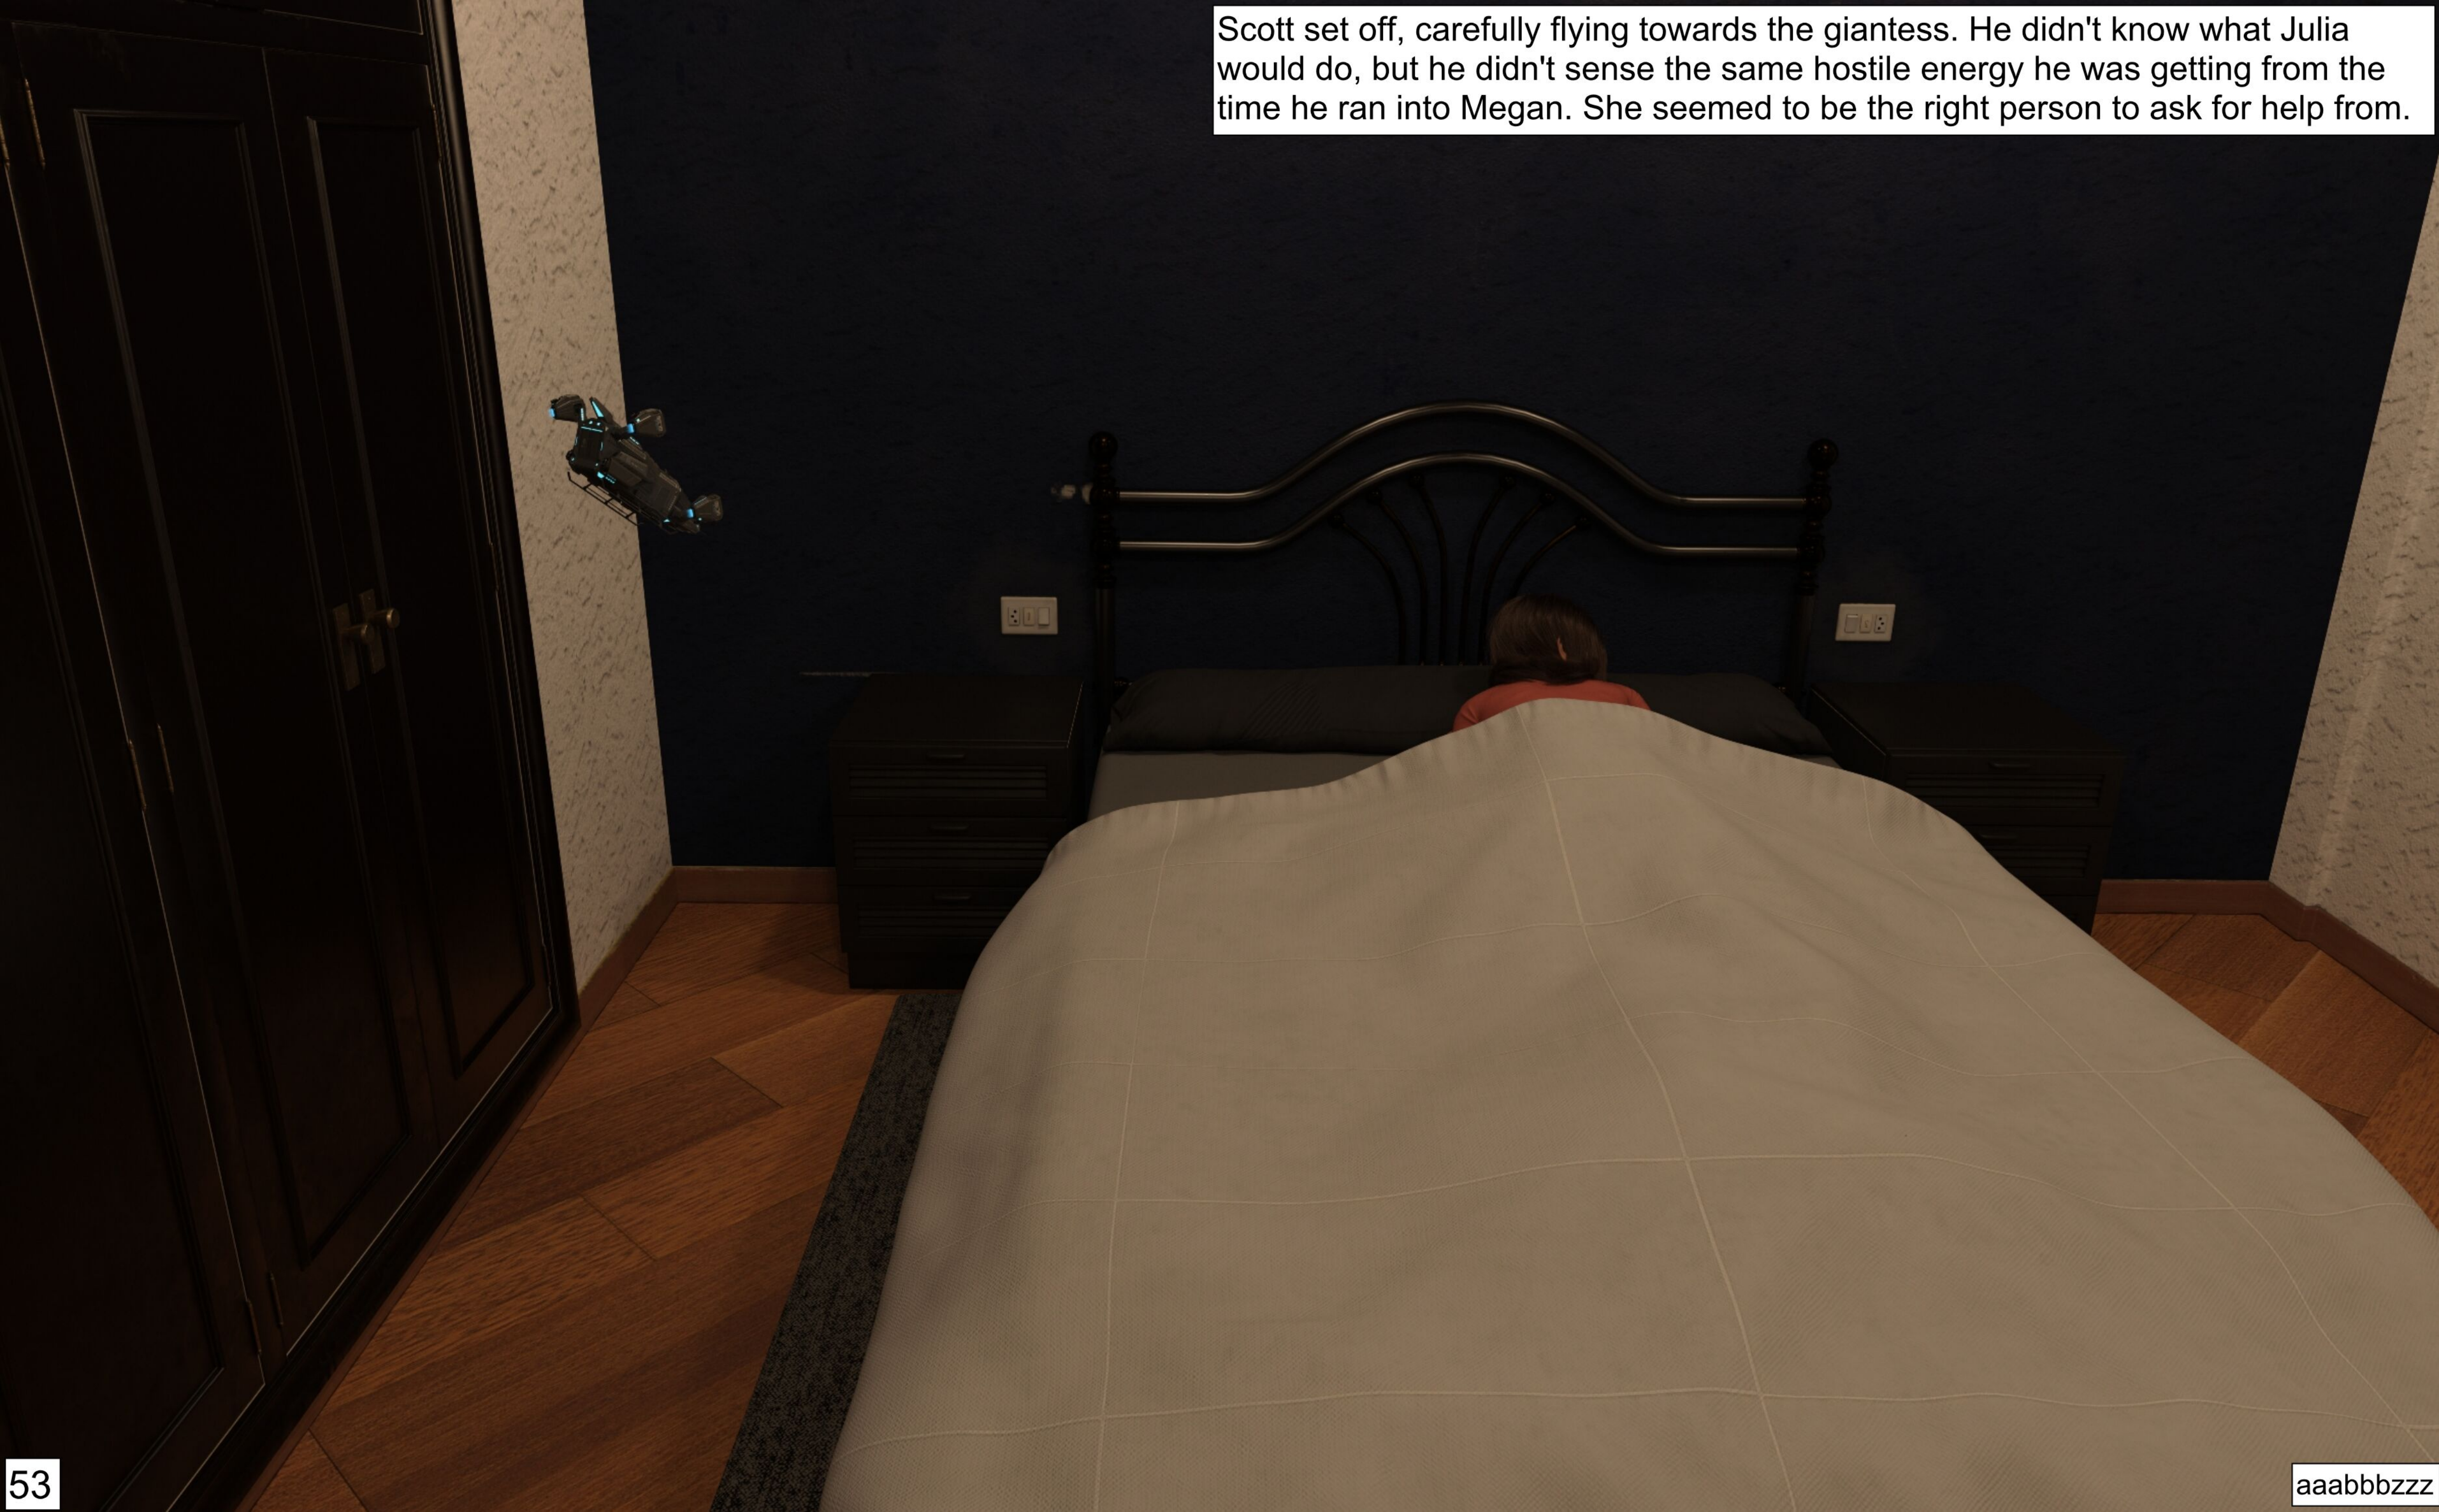

Hours went on until it was about sunrise. Scott waited all night before starting his mission. He wanted to get the girl's attention with his craft, but he had to be cautious. To get to the outdoors he would need her help though.

Okay I think now
would be a good time to wake her.
She sleep clear through the night so this
could be my only chance to sneak up
peacefully. Hopefully she can hear me
with my ship's megaphone.

Scott set off, carefully flying towards the giantess. He didn't know what Julia would do, but he didn't sense the same hostile energy he was getting from the time he ran into Megan. She seemed to be the right person to ask for help from.

Excuse me, Julia.

Can you wake up, I need your help please. Try not to be shocked, I'm not trying to hurt you. I need your assistance!

This wasn't the reaction Scott was wanting. Julia was severely alarmed to be woken up by the tiny spaceship. She didn't understand for a moment what she was looking at. But she started to eventually wake up, reacting in the only way she thought she could.

It didn't take much effort for the giantess just to grab onto the ship. Scott couldn't react in time as the giant arm seemed to appear out of nowhere. Now, he was in Julia's grasp, afraid that his plan was going completely wrong.

Hey who the hell is flying this thing? What are you doing in my room! It's a good thing I wasn't doing anything, why are you in here?

Julia's heart was racing, she was scared that she was being spied on. But when she took a moment to look at what she had in her hand she started to realize what exactly it was. She made eye contact with the tiny man inside. Seeing his scared little face made her know he was not hostile.

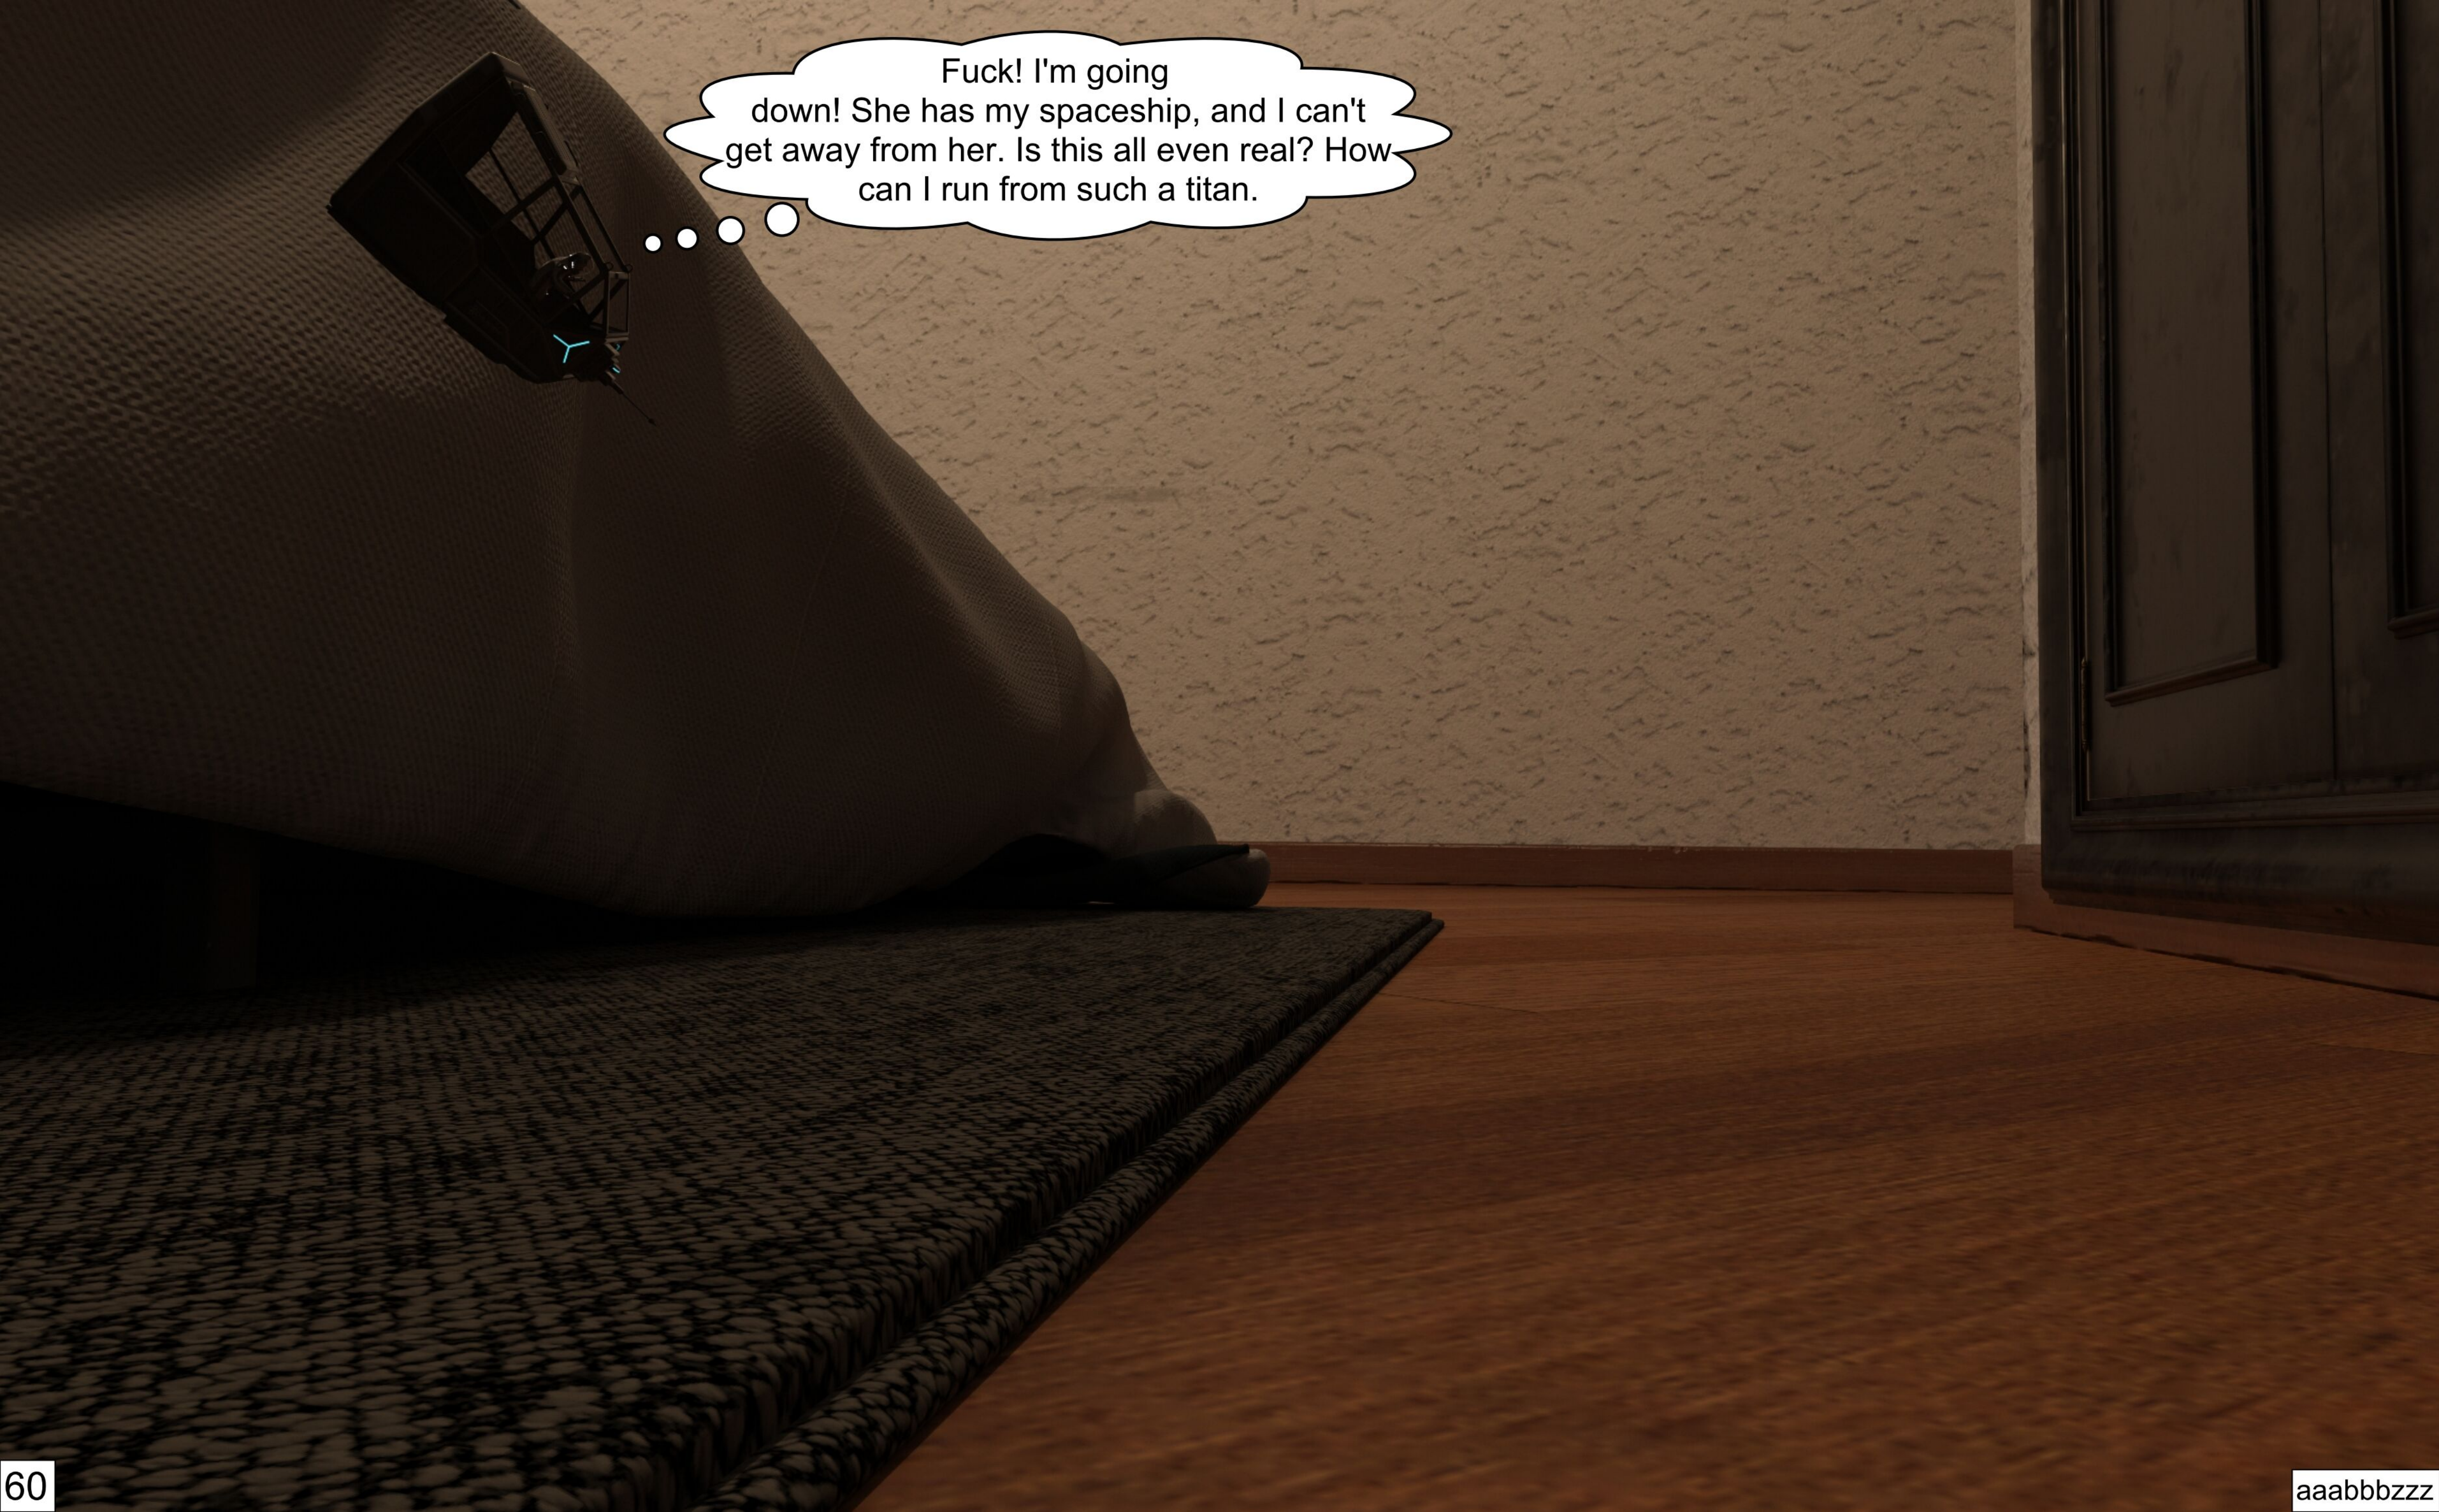

Please
Julia! I know this might seem
very weird but I'm a person just like
you. I need your help getting
back to my world!

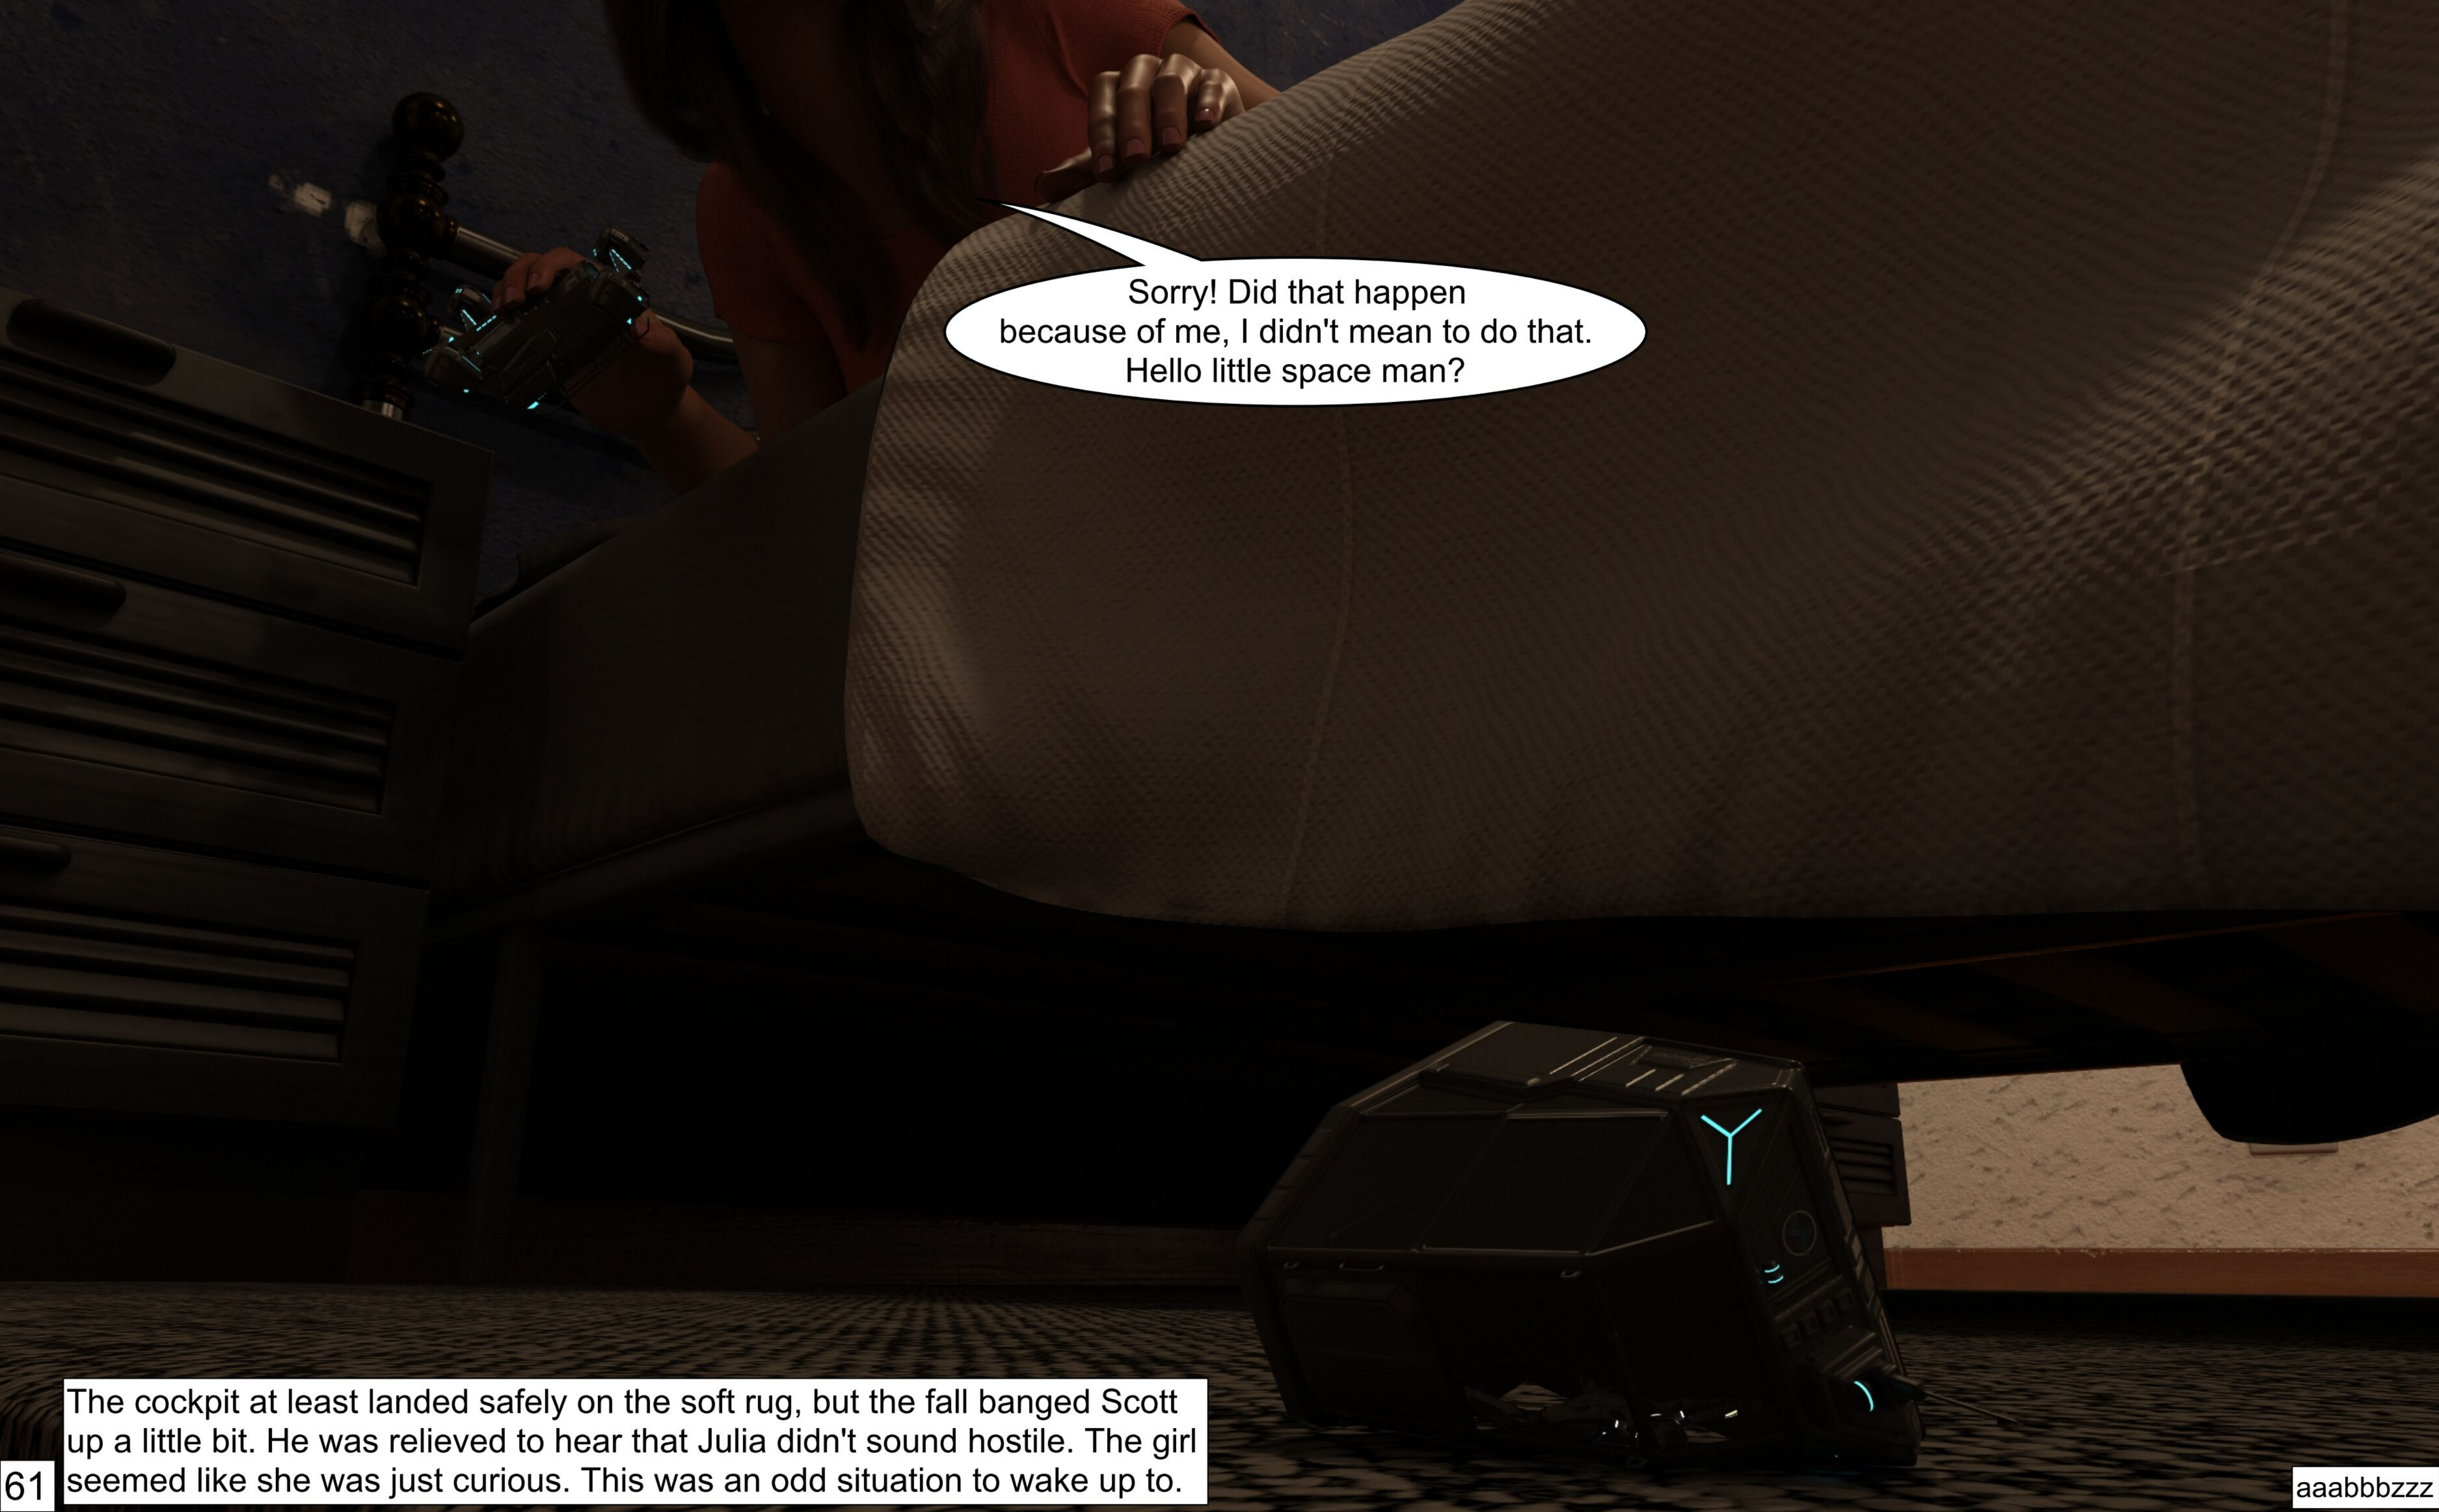

No way, you're like a tiny spaceman! Are you an alien from another planet? You look so much like one of those astronauts, but a lot smaller. Tell me what's going on if you want me to let go of you. You're in my room after all, how did you get in here!

As the giantess raised her voice, she started to apply a bit more pressure to the ship. All of this caused Scott's cockpit to deploy the emergency sequence. He detached from his main craft and flew through the air. Julia's head followed him the entire way down.

Fuck! I'm going
down! She has my spaceship, and I can't
get away from her. Is this all even real? How
can I run from such a titan.

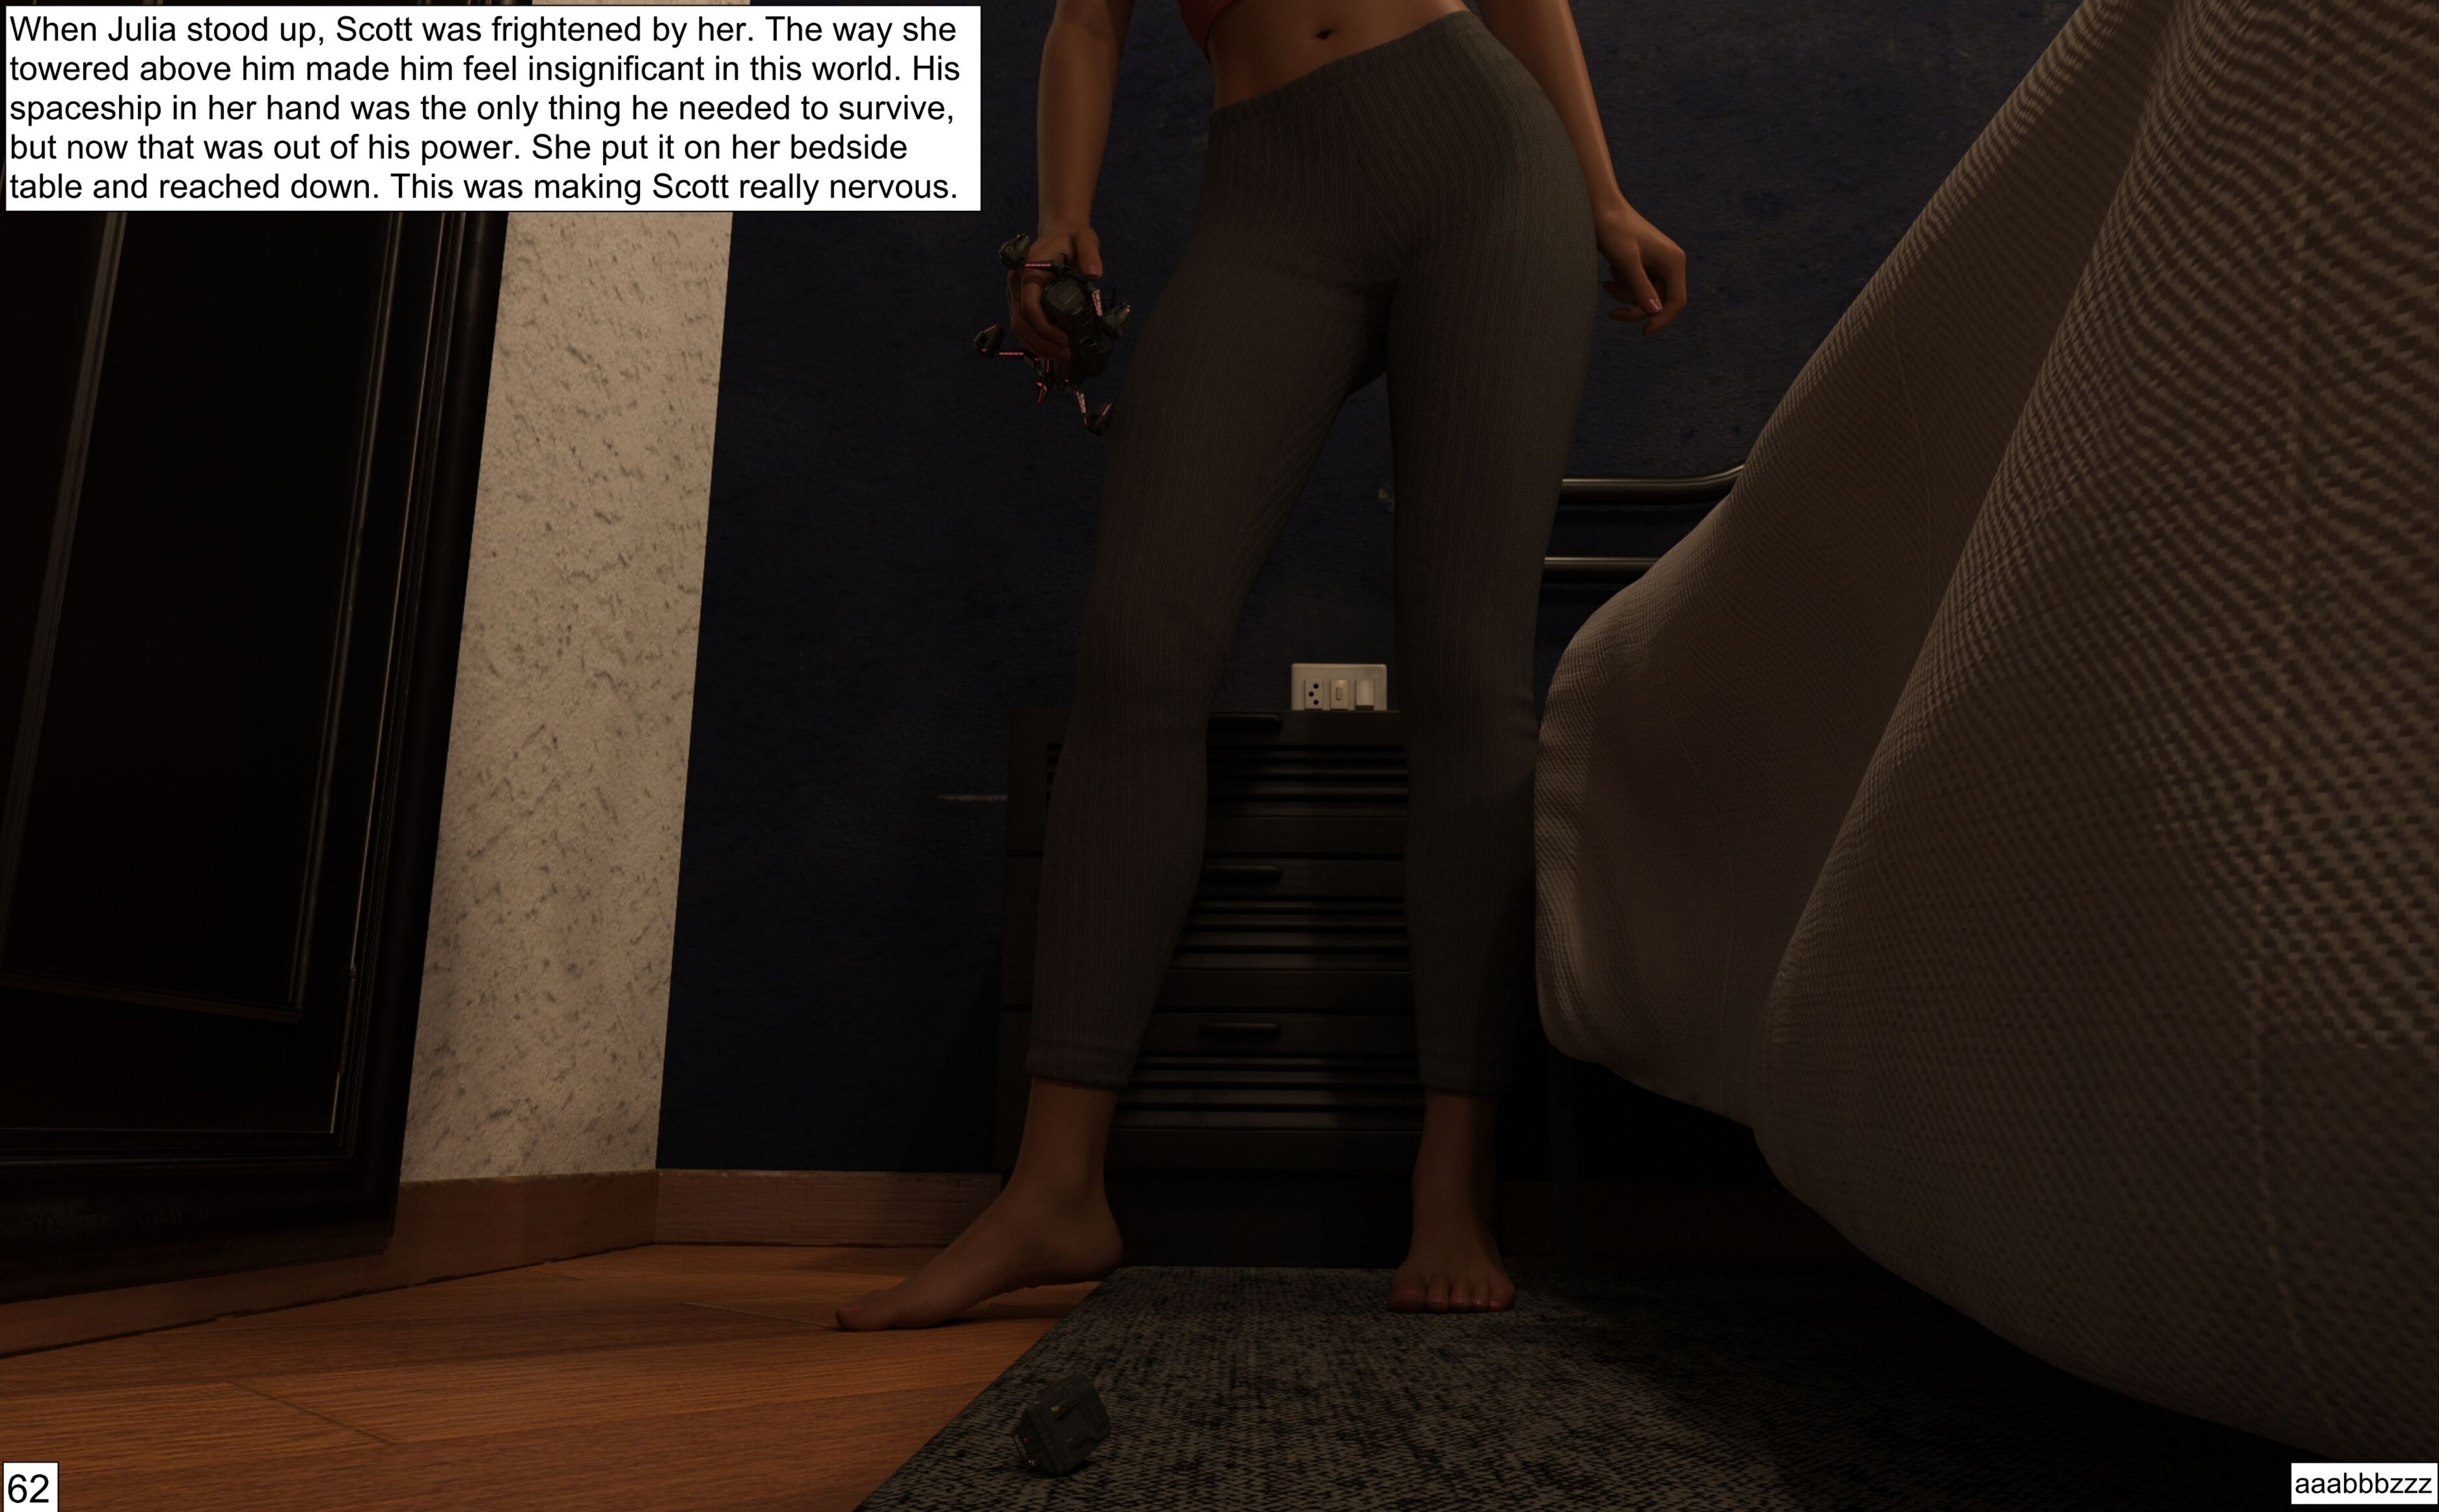

Sorry! Did that happen
because of me, I didn't mean to do that.
Hello little space man?

61 The cockpit at least landed safely on the soft rug, but the fall banged Scott up a little bit. He was relieved to hear that Julia didn't sound hostile. The girl seemed like she was just curious. This was an odd situation to wake up to.

aaabbbzzz

When Julia stood up, Scott was frightened by her. The way she towered above him made him feel insignificant in this world. His spaceship in her hand was the only thing he needed to survive, but now that was out of his power. She put it on her bedside table and reached down. This was making Scott really nervous.

Don't worry
try not to be scared. I'm not
going to break your little ship. You can
tell me what's going on. I'm sorry that this
happened, you must be
frightened.

Why am I
suddenly starting to get a
strange vibe from this girl. I think
she intends to help me, but for
some reason I'm getting a
weird feeling.

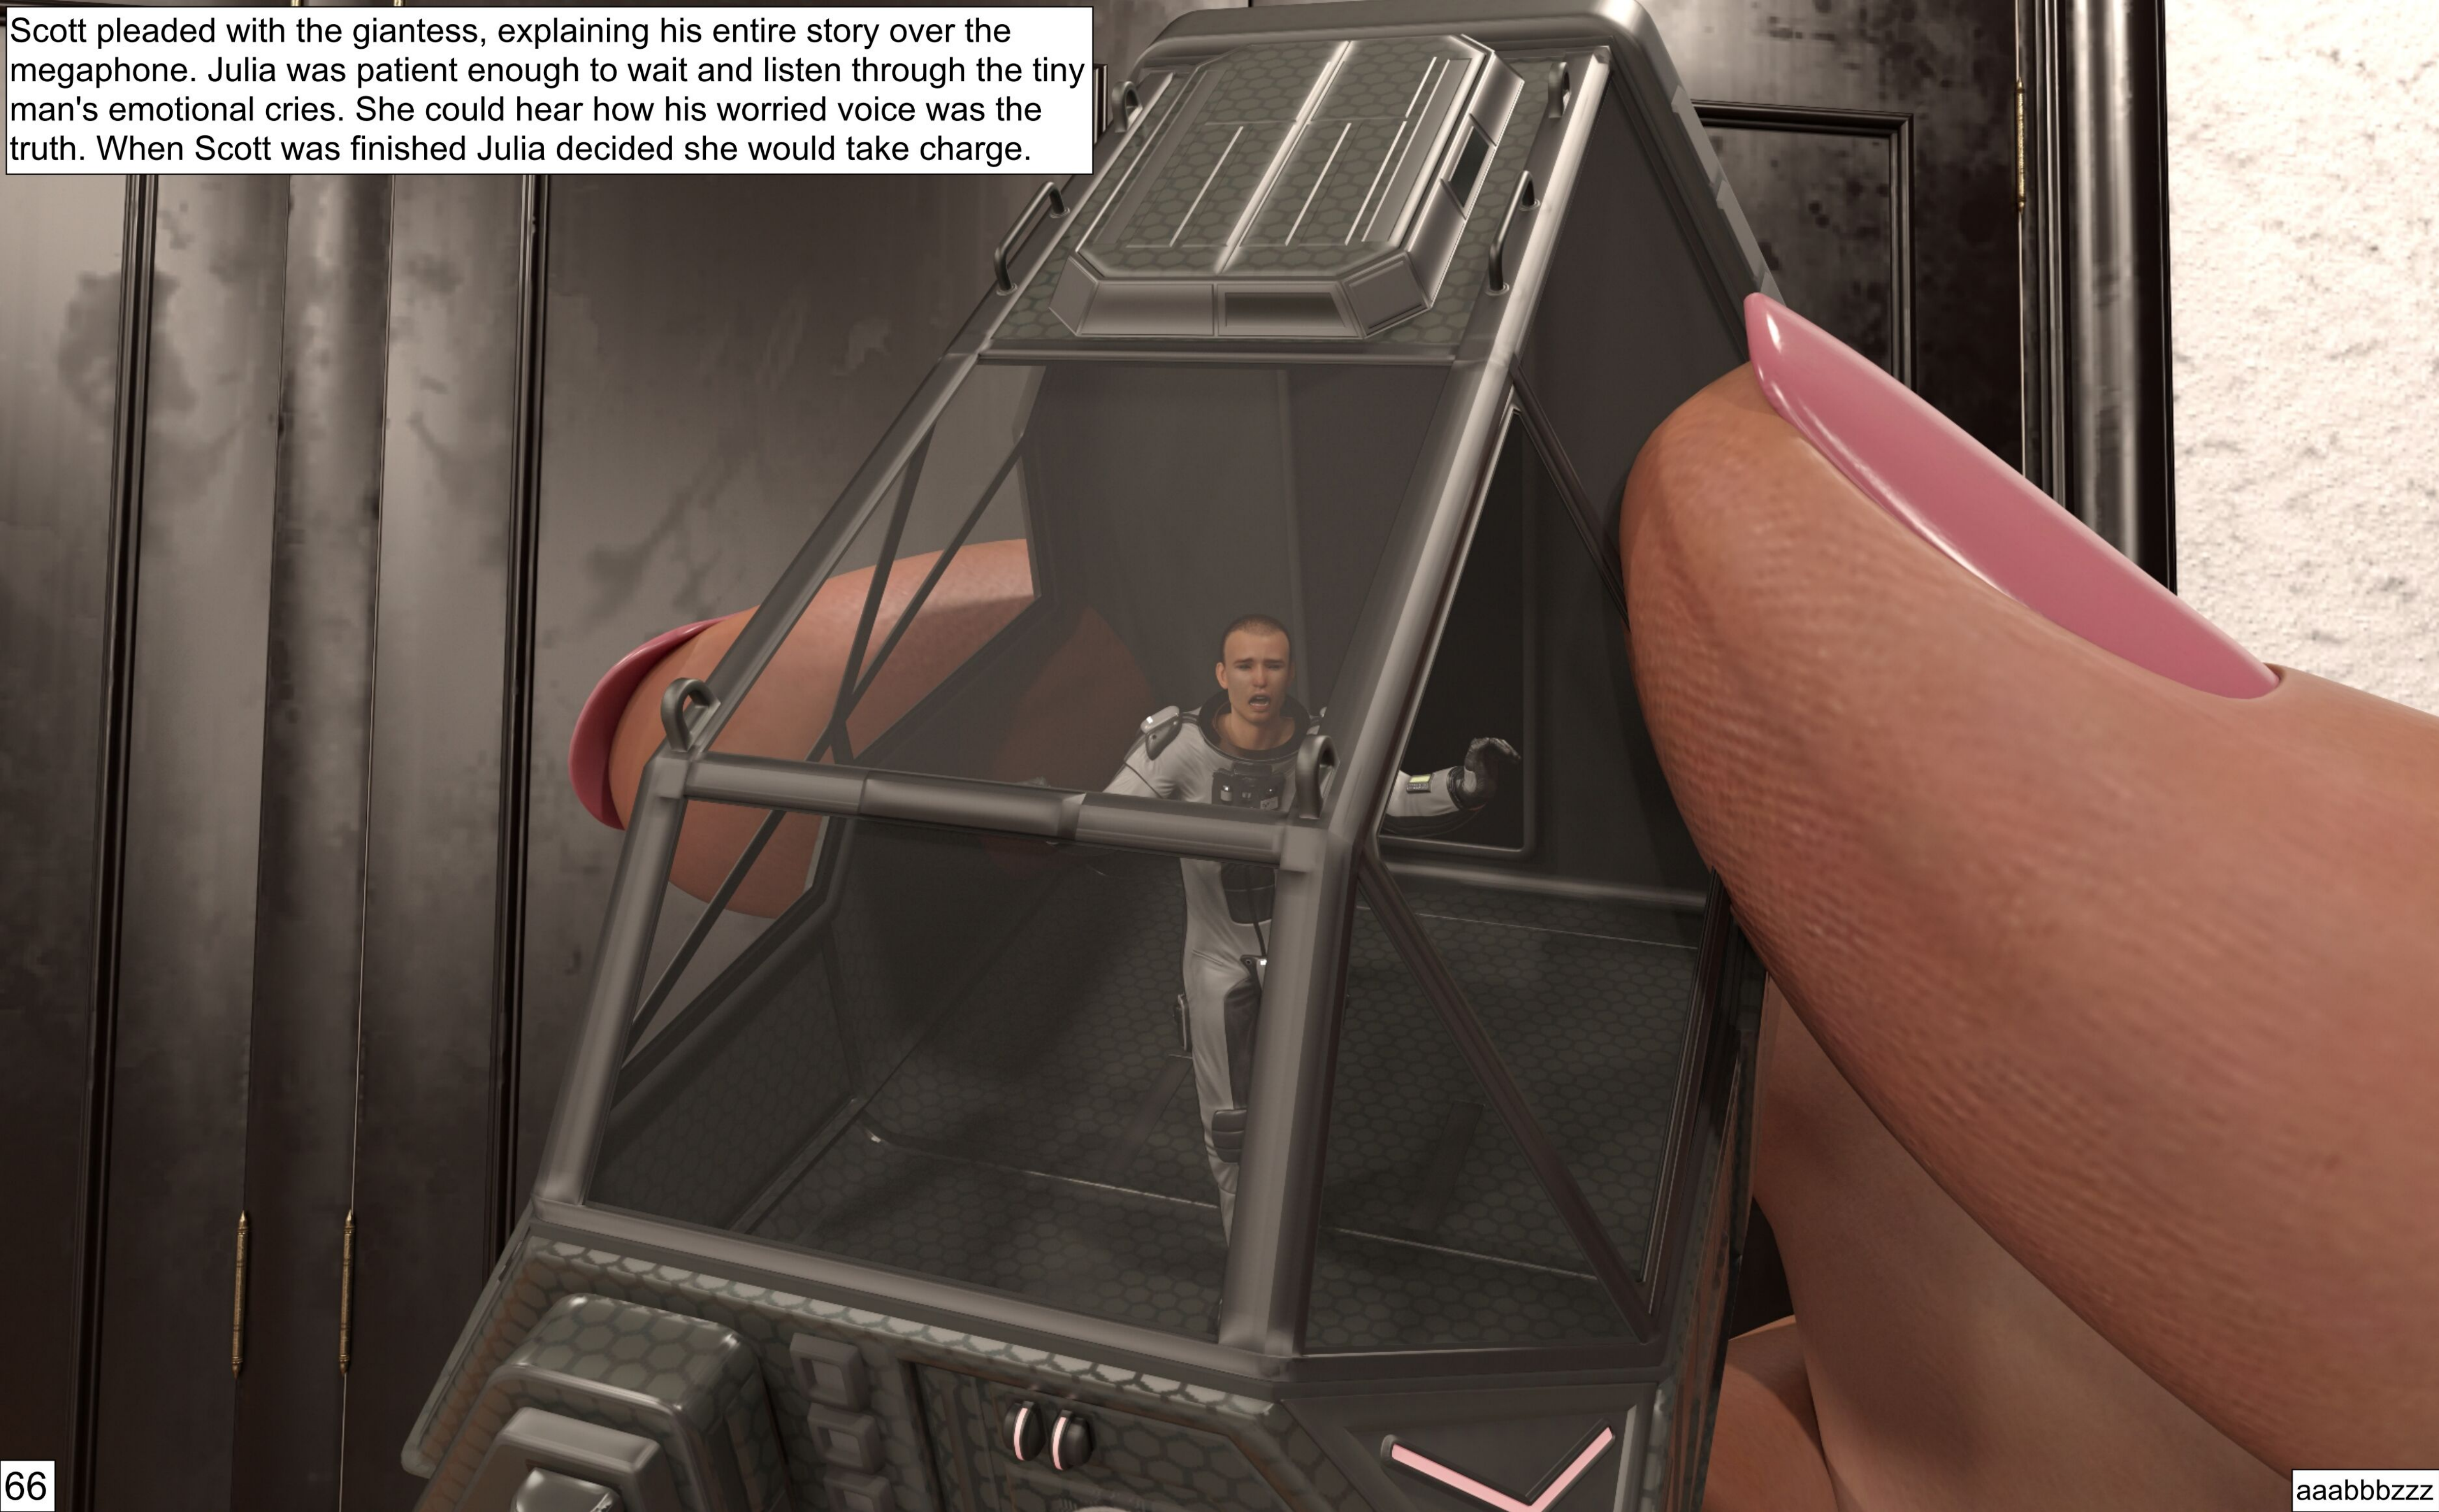

64 Julia picked up the cockpit and held it in the palm of her hand. Scott looked up to watch the giantess loom down on him. His heart rate started to increase as fear intensified. Julia went over and turned on her light to better see what she was dealing with.

No way this can't be real. You are a bug sized space man! I want to hear about how you got here. It's still really weird to have you be in my room while I was sleeping. Explain to me everything!

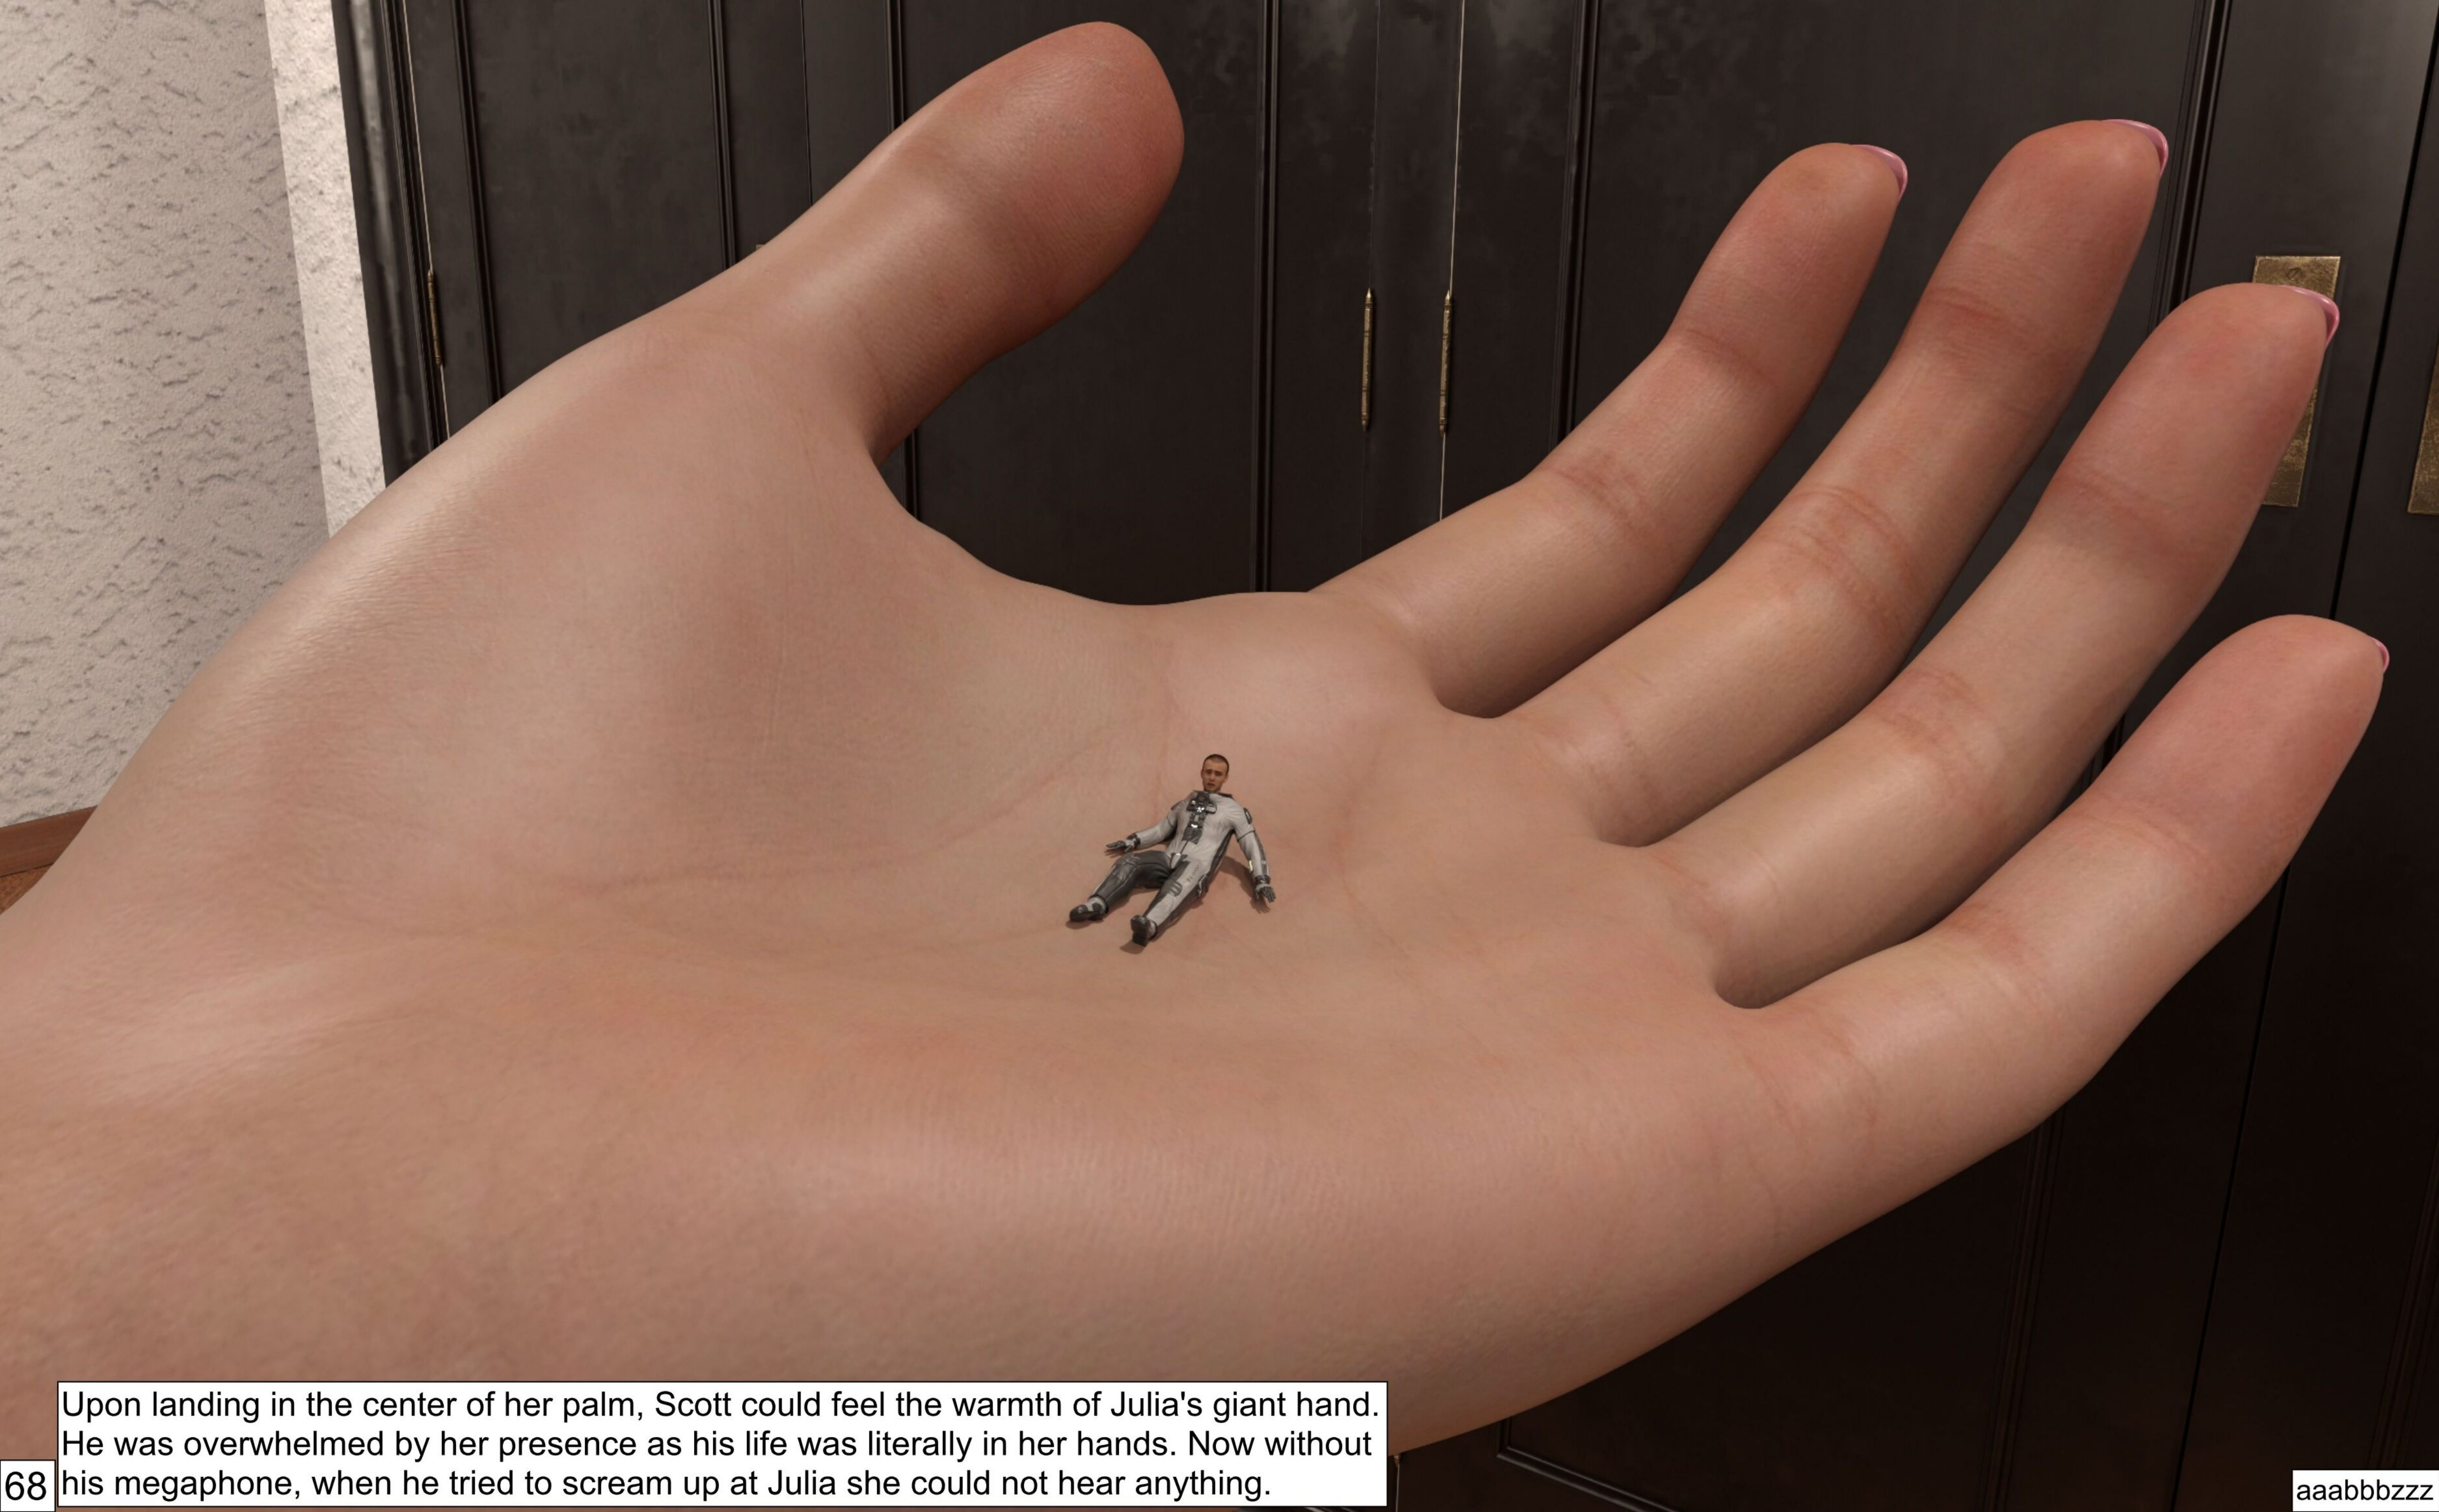

Scott pleaded with the giantess, explaining his entire story over the megaphone. Julia was patient enough to wait and listen through the tiny man's emotional cries. She could hear how his worried voice was the truth. When Scott was finished Julia decided she would take charge.

Well Scott, I think I could help you, but I would like to actually meet you outside of your pod here. Can you get out of there? Come on, I promise to be gentle.

Julia was still giving off a weird vibe, but she at least wasn't hostile at the moment. When she demanded Scott to come out he felt a bit uncomfortable. But he thought he wasn't in a position to upset the giantess, so he opened his door.

68 Upon landing in the center of her palm, Scott could feel the warmth of Julia's giant hand. He was overwhelmed by her presence as his life was literally in her hands. Now without his megaphone, when he tried to scream up at Julia she could not hear anything.

Awe poor thing, I can't even hear you anymore not that you're out of that craft. You're just so small! I can't imagine what your point of view must be like right now. I just hope you aren't afraid of heights!

There was no warning before Scott found himself between Julia's thumb and finger. She easily was able to pluck the tiny man from her palm. Then, she brought him even closer, still wanting a better look at him. Scott's pulse was now out of control. He was utterly helpless in this young girl's fingers.

This is really scary! Please Julia, can you put me back in my cockpit so I can talk to you?

I still can't hear you at all!
Probably only if you're right up against my ear. Listen here Scott, I'm really sorry you're in this situation. But I don't think I should let you go that easy. How many nights have you been spying on me in here? I've wondered the past week if someone was watching, I just had a feeling.

Scott was now scared to death. He didn't feel like Julia completely trusted him yet. She had made accusations that he didn't have time to defend himself against. All of a sudden while this was happening though, her room door opened. Julia froze in shock as her mom came into her bedroom unannounced.

Trying to think quickly, the first thing Julia thought to do was to drop Scott down next to her. Anne kind of abruptly came into the room, so there was little time to react. Scott knew he couldn't be left alone with Julia, he had to get Anne's attention now or never.

You're up early,
how are you Julia? I thought I
heard you talking or something. It looks
like you just saw a ghost or something.
Did you have another one of those
nightmares?

No mom, I'm okay.
You just caught me off guard
coming in so unexpected. I was
just in my head meditating. Can
you knock next time
please?

That's my fault honey I'm sorry. I just thought you were excited for your cousin's birthday. When I saw your light on I thought you were getting up.

75 This was his only chance to make a break for it. Julia couldn't look down as she was talking to her mom and Scott knew his spacesuit would help him when jumping down onto the carpet material. He made a leap of faith with nothing else to lose.

Fuck, I've never had to use that function of my spacesuit before. I'm not sure if I've had enough practice. I need to get my head in the game, there's not a lot of time!

77 Running as fast as he could, Scott passed through right underneath Julia's feet. He stared up, knowing that any moment one of her powerful feet could come down and stop him. When he made it out into the open he knew he was safe from her. His new question was, would he be safe with Anne?

A giantess woman with long, slender legs and a black, low-cut dress stands in a room. She is looking down at a tiny man on the floor. The room has a white wall on the left and a dark, ornate door on the right. The floor is wooden, and there is a patterned rug in the bottom left corner. A speech bubble is positioned above her head, and a text box is in the bottom right corner.

Aunt Cindy will be over first, then we'll have the birthday stuff setup for when her daughters show up. It's going to be so much fun! All five of us girls together like old times.

It was difficult to stretch his neck back as Scott approached the giantess. She was so tremendous standing before him. Anne was talking about a birthday party that was happening here at this house later today, but it was hard to focus on the details when Scott had only one mission.

If Julia
couldn't feel me on her
bare skin how will she ever
notice me? Maybe I should just try
to climb up. If I hang on maybe I
can at least get away from
her daughter.

It was a crazy idea, but it seemed like Scott's only option as he grabbed onto the threads of Anne's socks. An uncomfortable smell radiated from them, but it wasn't enough to stop the little man. He crawled slowly into position as Julia looked down with a worried face.

Are you sure you're okay
Julia? You seem to have a frightened face. Is
there something going on you're not telling me
about? Don't worry I'll listen.

I promise there's
nothing mom. I guess I'm just a little
shaken up by this dream I had. I'll be fine in a
few moments. I'll see you out there
when I get dressed.

Oh shit,
here we go, she's moving!
This is insane. If it weren't for these
gloves I would have no chance at doing
this. I need to convince her mom to help
me. She has my spaceship now so I
need to find a way to get it
back!

Scott's suit allowed him to hold on tight as Anne left her daughter's room. Julia was now concerned her mom might squish the tiny space man. She felt how fragile his body might be and how effortless it would be to hurt him. He was going to escape, the real question now was how would she retrieve him? With this birthday party happening today Julia knew it would be hard to find time to dedicate to this.

84 Anne walked into her bedroom with Scott still hanging onto the threads of her socks. Her movements made him feel like he was holding on during the craziest storm of his life. For her it was just a couple simple steps into her room. Knowing that Julia might take a bit to get ready, Anne thought she had some time she could spend with herself.

I think I'm almost there. She's getting on her bed and I can try to touch her skin from there. If I fail now Julia will come after me. Just a bit longer, my grip is getting weak, I hope I can keep holding on!

When Scott got to this position he was starting to worry that his plan wasn't thought out all the way. Yes he was away from Julia, but what would her mother think if she found him. Scott thought that someone older might be more mature about the situation, so he had hoped Anne could really help. As she playfully kicked her legs around, the little man finally lost his grip.

I wonder if it
would be safe to jump down onto the bed? If
the surface is soft enough it could cushion my landing.
No no no no no no no! I can't hold on anymore.
Ahhhhhhhhhhh!!!

Unaware of the tiny bug crawling on her foot, Anne started to get wet thinking about what she wanted to do. It was going to be a long day without much time for herself. This morning she woke up incredibly horny and could not stop herself. For a moment she contemplated on if she would have time for another go.

Scott felt lucky to be untouched by the recent fall, but when he looked up he quickly realized he was in the wrong place. Ahead him was Anne's exposed pussy. He heard her moan softly as she reached into her bedside table.

Uh oh, this might not be a good time to get her attention. If she finds me watching her when she's like this I don't think it will go well. I need to get out of sight!

Oh what the hell, one more time wouldn't hurt. I don't have to take forever. I just think it would feel really good if I did right now. This could be my only few minutes alone all day. I'm sure my sister will want to hang out all night, Cindy is always up so late.

Frantically, Scott put his legs to the test. He sprinted to the edge of the bed, looking behind at the unreal view he had of the giantess. Luckily for him she didn't look back as she repositioned herself on her knees. She was removing her night gown, something Scott didn't expect to see.

At the very last second, Scott jumped off the ledge, confident his spacesuit would help him land. This happened the very moment Anne pulled her night gown over her head. Now the mother was naked on her bed and ready to play with herself. She had no idea of her tiny guest who might be watching.

Are you serious! I have to be in here while she's doing this now? How am I supposed to make this look not weird. Even if I was able to get noticed she would think I was perverting on her too. Maybe I should at least climb up and be ready if there is a good time to come out.

The sounds of Anne's dildo going in and out of her vagina and her soft moans were the only things Scott could hear. Even though she was trying to be quiet, her reactions were still a lot. The waves of noises passed through Scott, telling him just how heated things were. Anne started to pick up her pace, losing herself to the intensity.

A woman with dark hair and red nail polish is lying on her back on a bed with white sheets and a grey blanket. She is holding a red vibrator in her right hand, which is inserted into her vagina. Her left hand is resting on her right thigh. Her eyes are closed, and she has a satisfied expression. A thought bubble is positioned above her head, containing text.

Mhm.. that
feels so good. All I want is more!
Fuck yes fuck yes. I want to scream out so
fucking badly. It's making me sequel to myself.
Oh yes, I want to cum. I need to make myself
cum just one more time before this party. Oh
my god, fucking right there. That's
the spot.

It was hard for Scott to look away, not because he was enjoying the show, but because he was so intrigued. He had never watched somebody masturbate like this ever in his life. If Anne knew he was around she would be so pissed. He heard and watched every second of her personal playtime. It was hard not to get too pulled in, but at least he knew Anne was lost in her own world herself.

It didn't take long for Anne to bring herself to a climax. Her body rewarded herself as she gave off faint cries of enjoyment, exhaling deeply with each breath. She thought she was completely alone, but Scott was watching. Now he was running, hoping not to be seen by her for now.

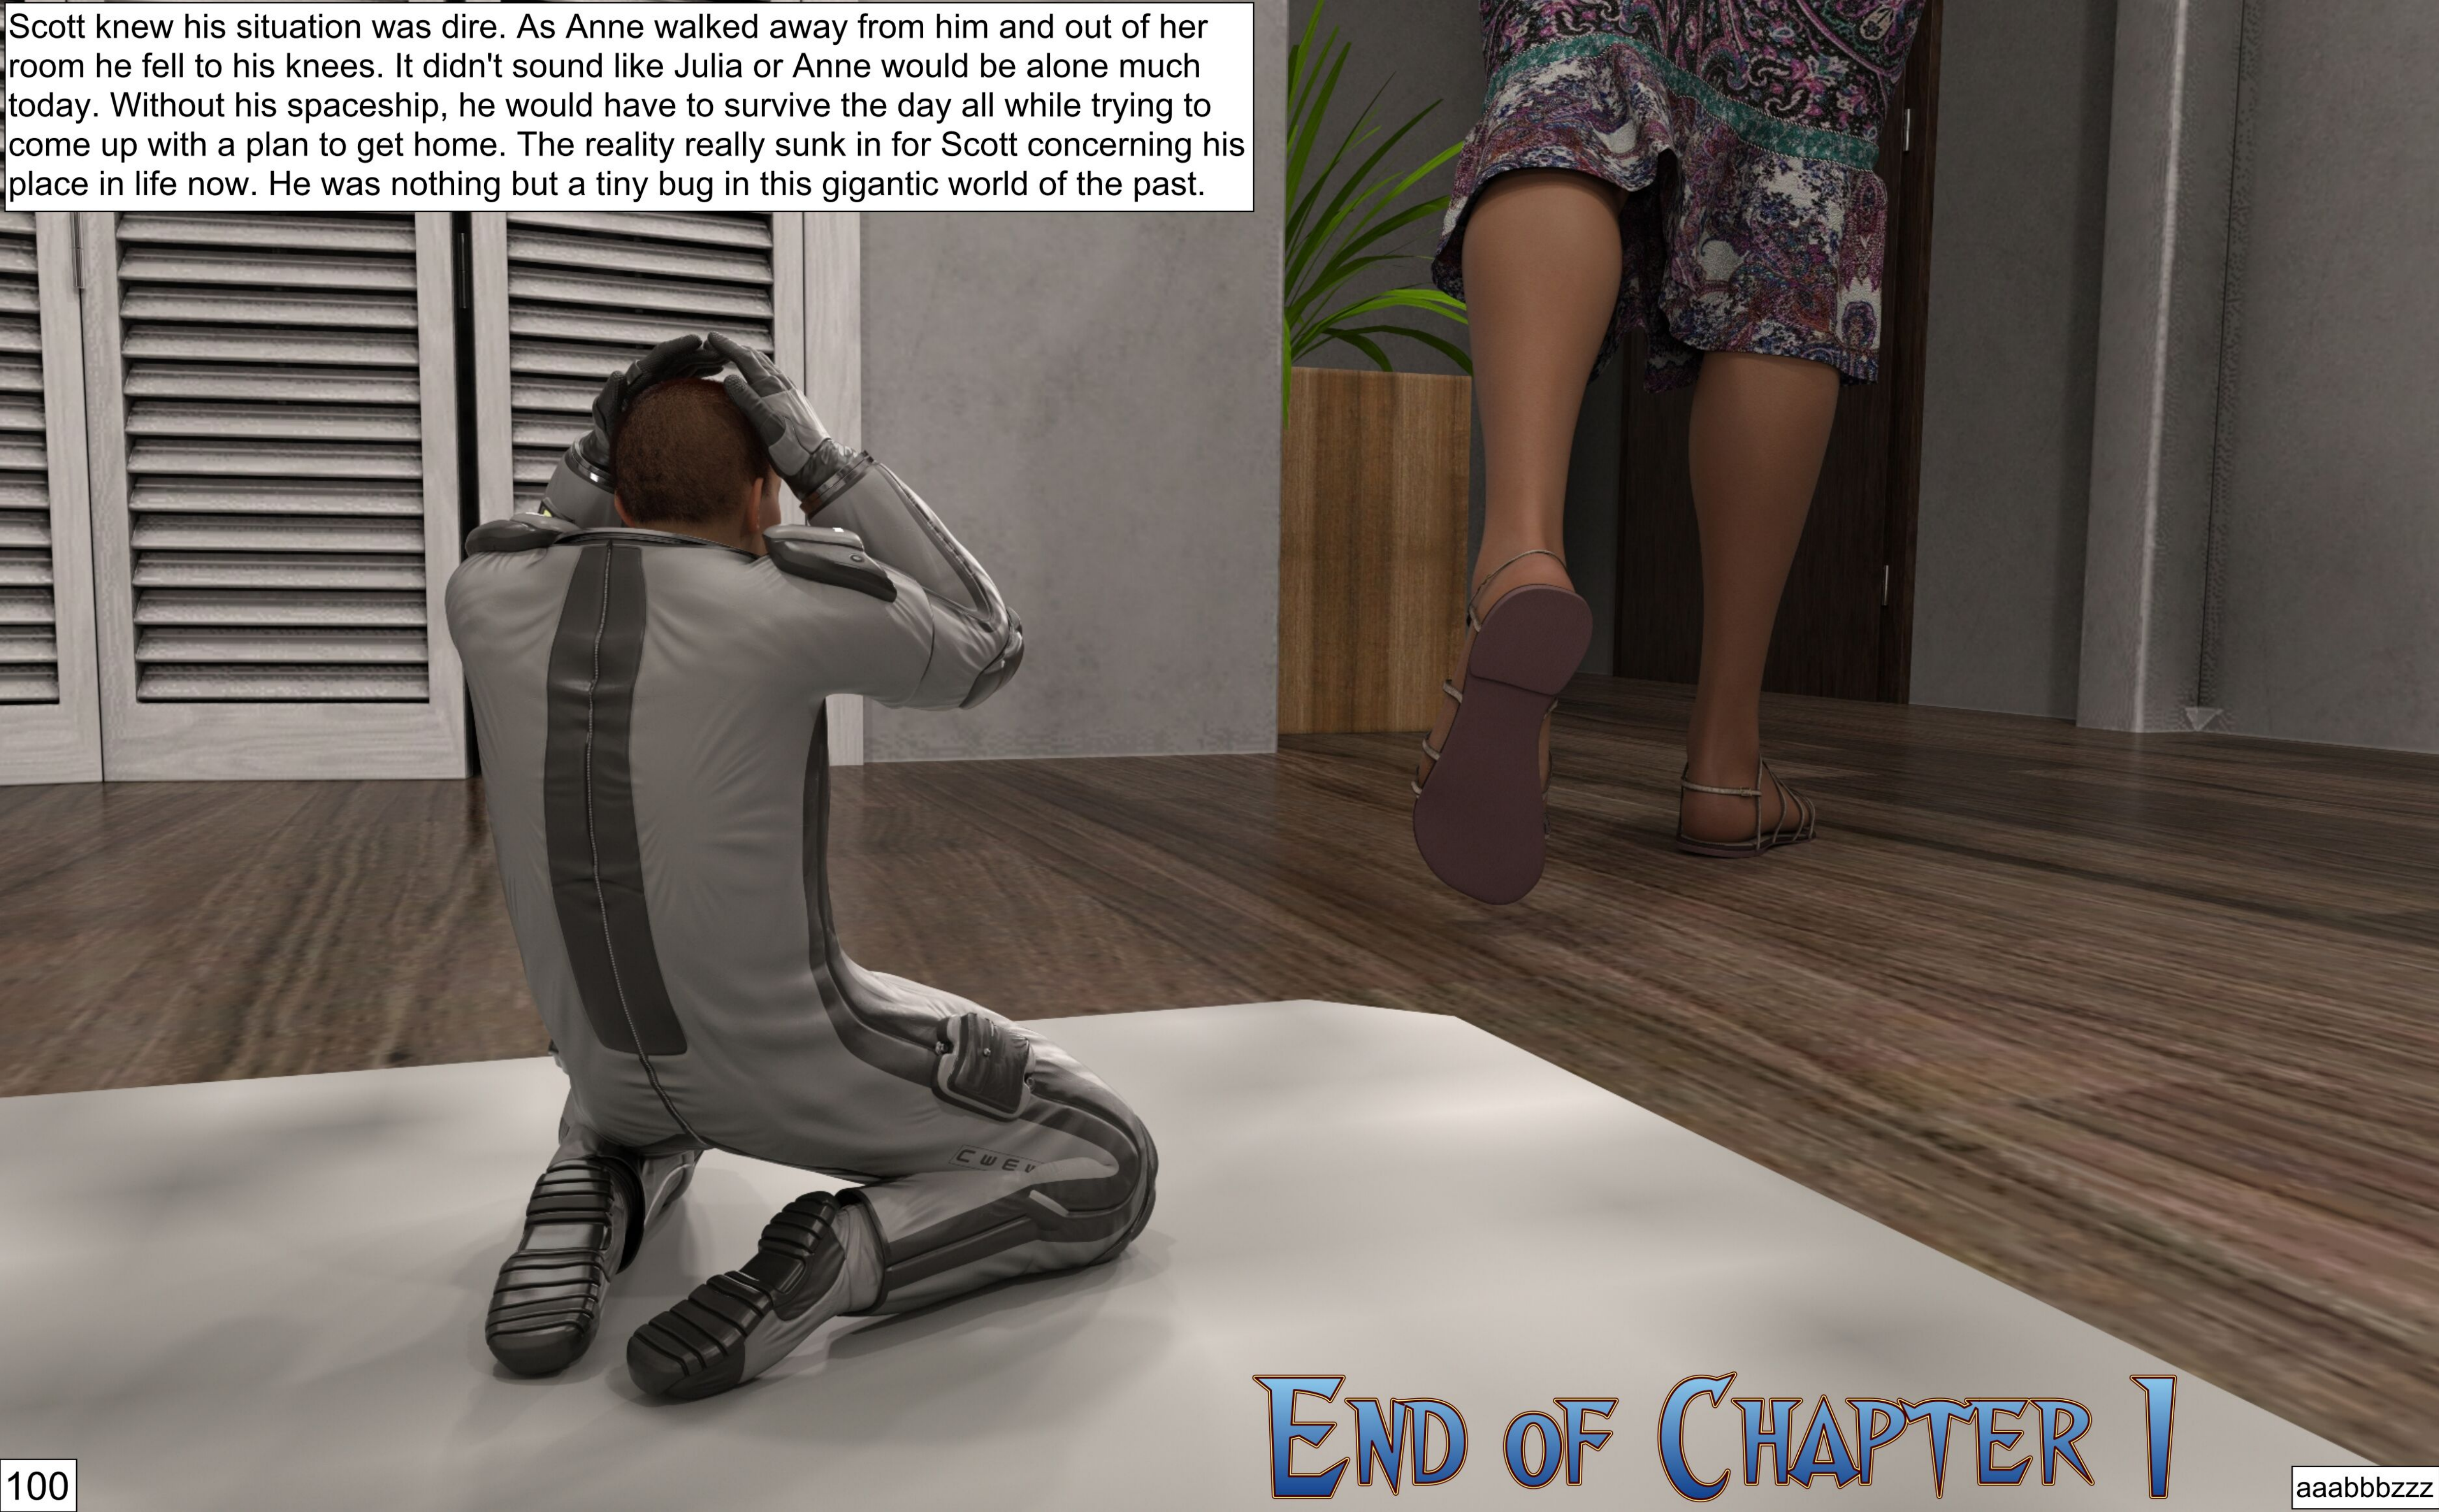

Anne didn't look over by the end of her bed, but she threw her dildo carelessly over in that direction. Scott didn't look back and ran, hoping that the recently used sex toy wouldn't run into him. It was luckily far off and he wasn't noticed. He thought that riding Anne's sock might lead to getting her attention, but not this. As she got up from the bed, Scott jumped back down to the lower level, trying to figure out a way he could approach the giantess.

There's no way I'll make it down over there. She got dressed so fast! It's almost impossible to keep up with these gigantic women without a ship. I'll need to sneak up on one of them when they are more still. Fuck that's going to be impossible today too with their party!

Scott knew his situation was dire. As Anne walked away from him and out of her room he fell to his knees. It didn't sound like Julia or Anne would be alone much today. Without his spaceship, he would have to survive the day all while trying to come up with a plan to get home. The reality really sunk in for Scott concerning his place in life now. He was nothing but a tiny bug in this gigantic world of the past.

END OF CHAPTER 1
