There, that's the last one...

CLUNK

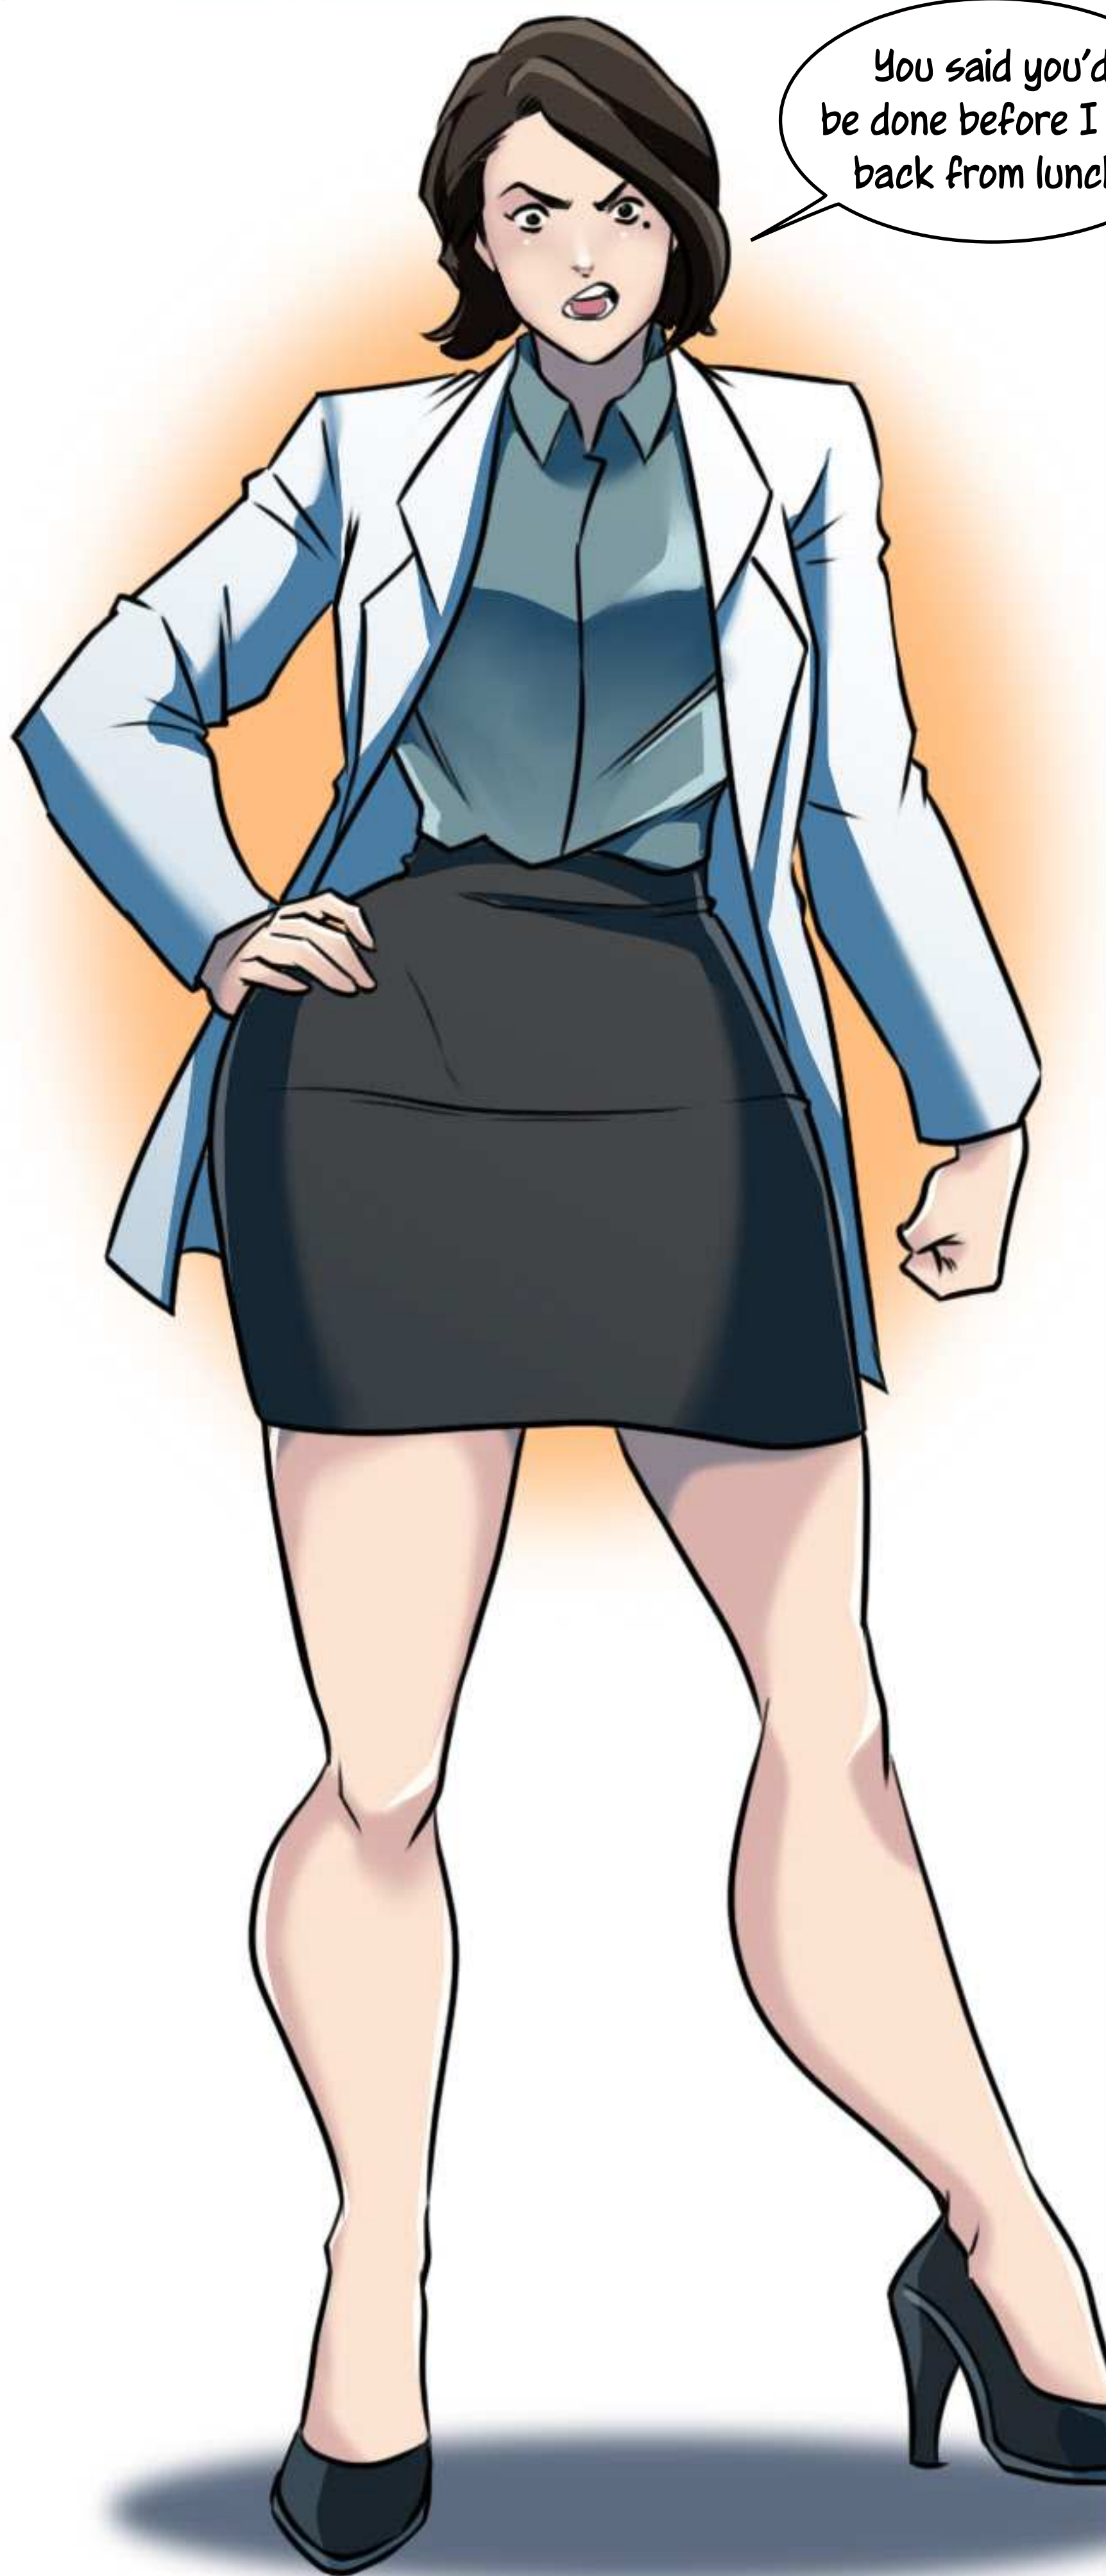

See!
I told you it'd hold a thousand pounds.
Now pay up.

Wow!
Ok, here ya go.

Why are you two idiots STILL here?

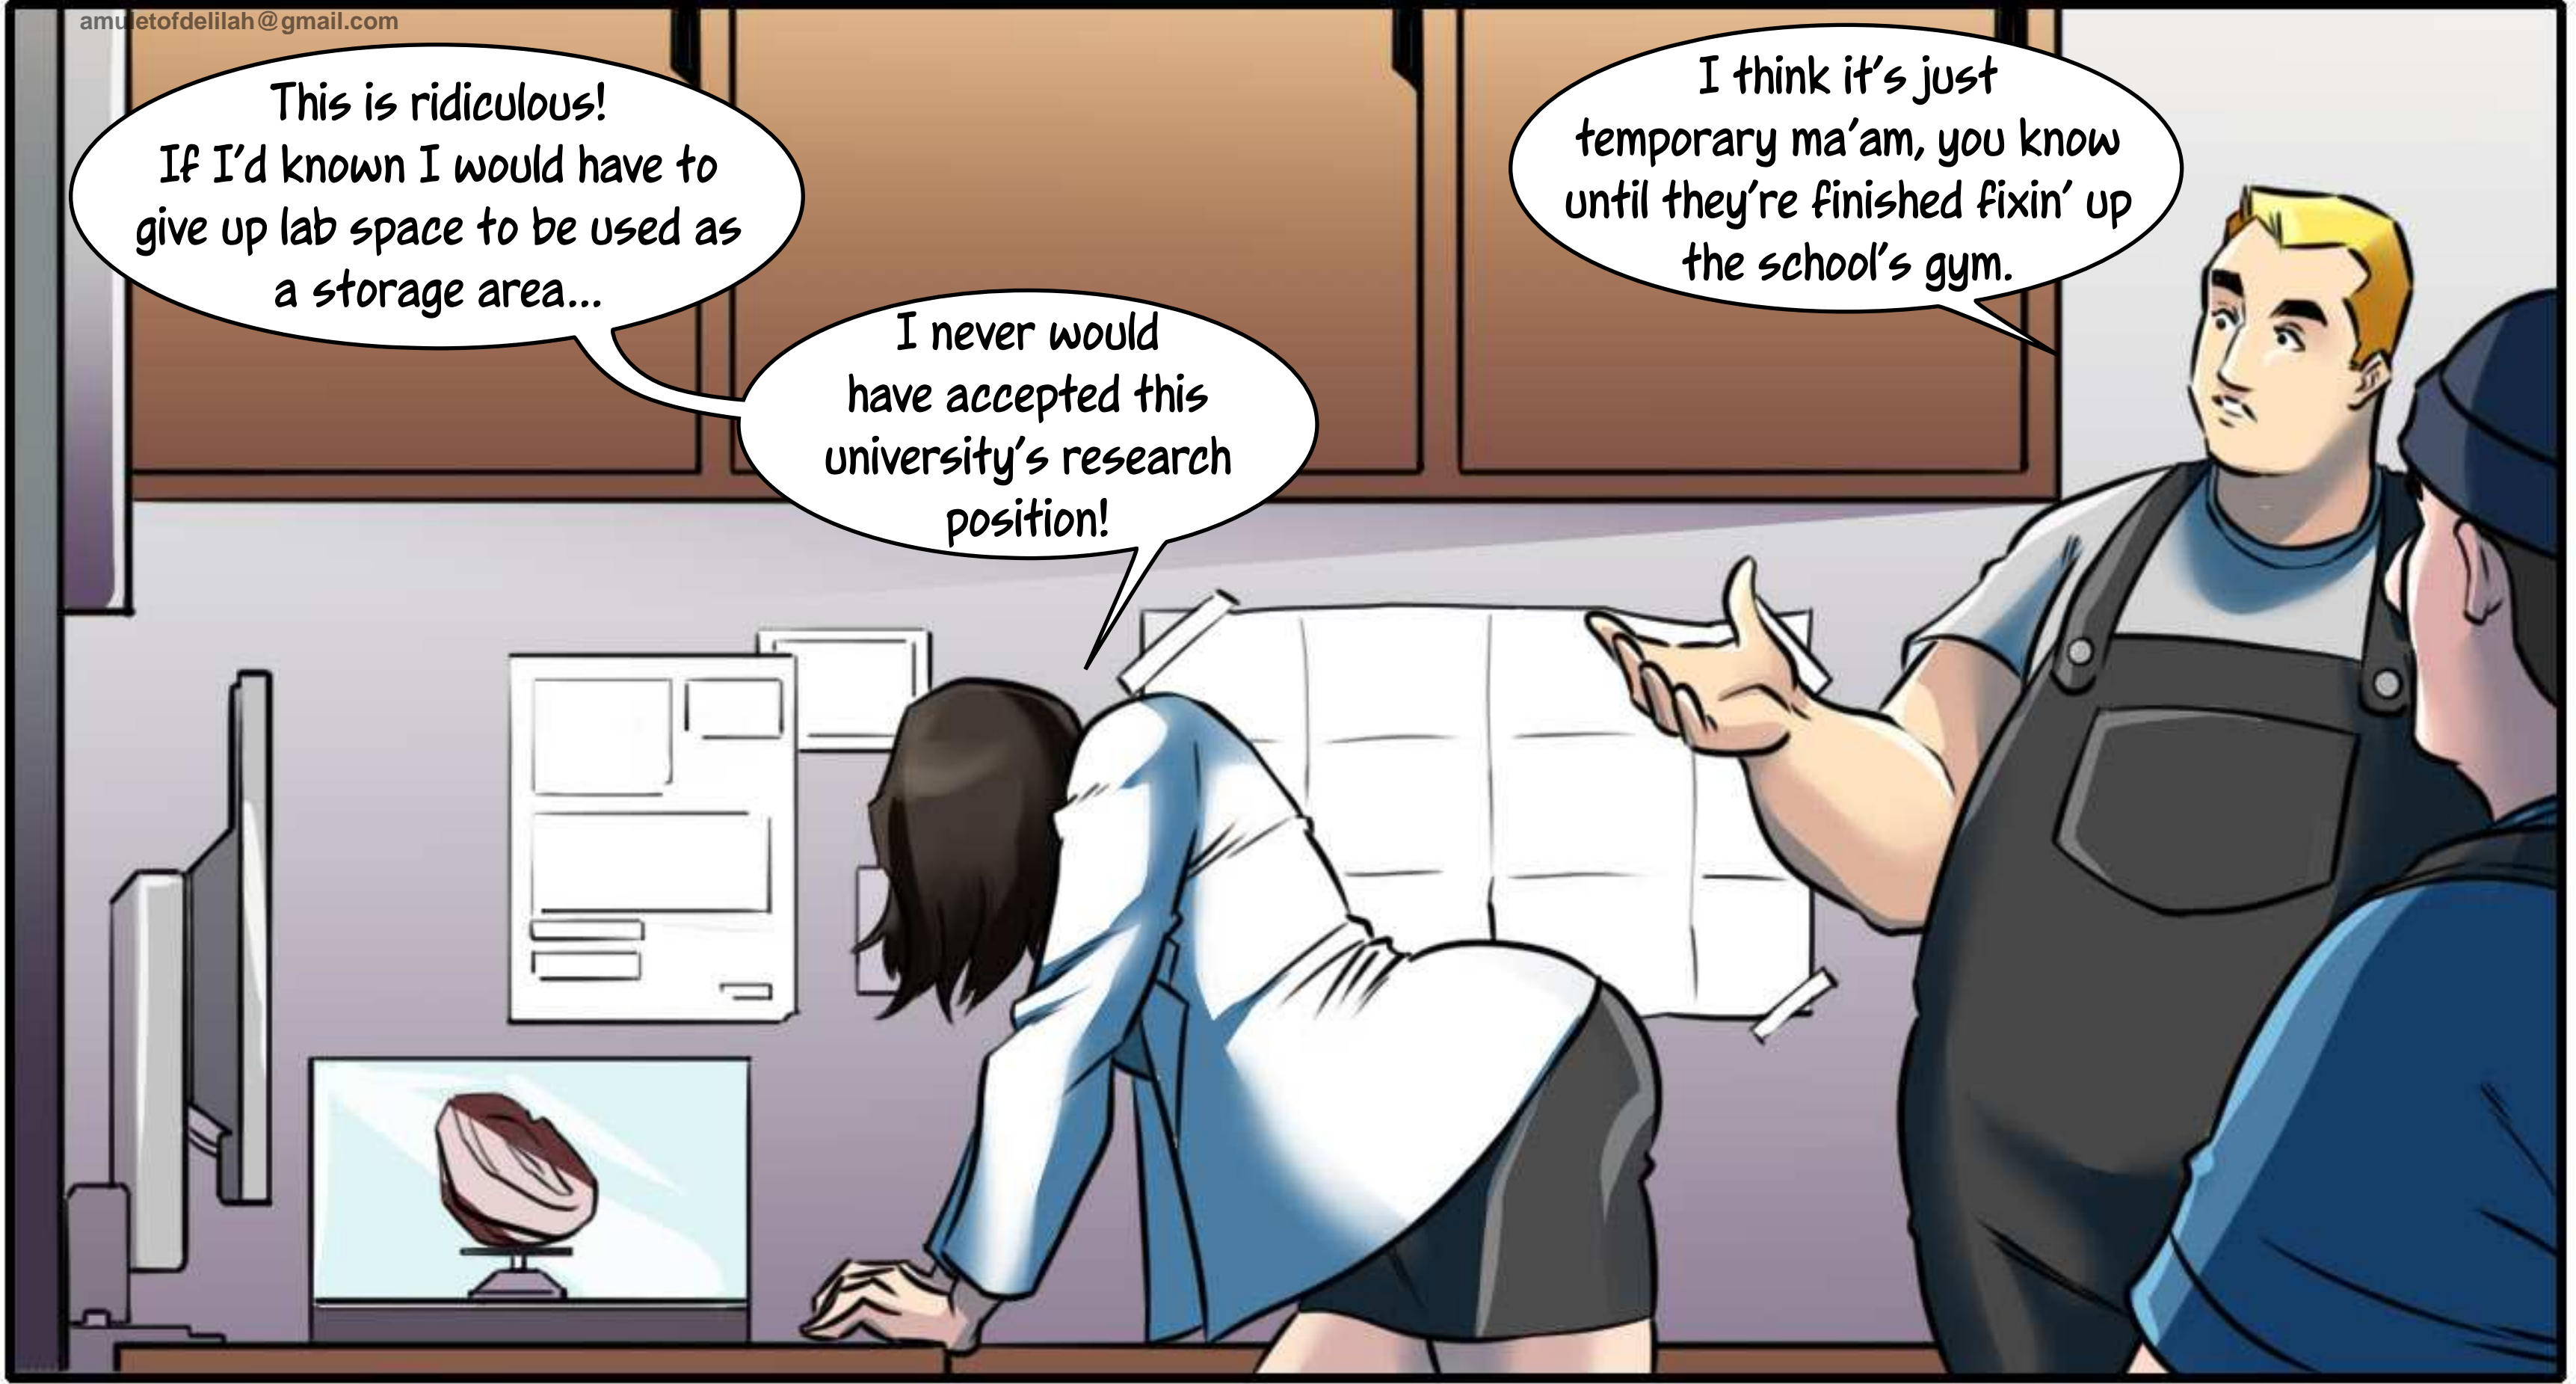

You said you'd be done before I got back from lunch!

Oh! Sorry ma'am, we're done. We were just...

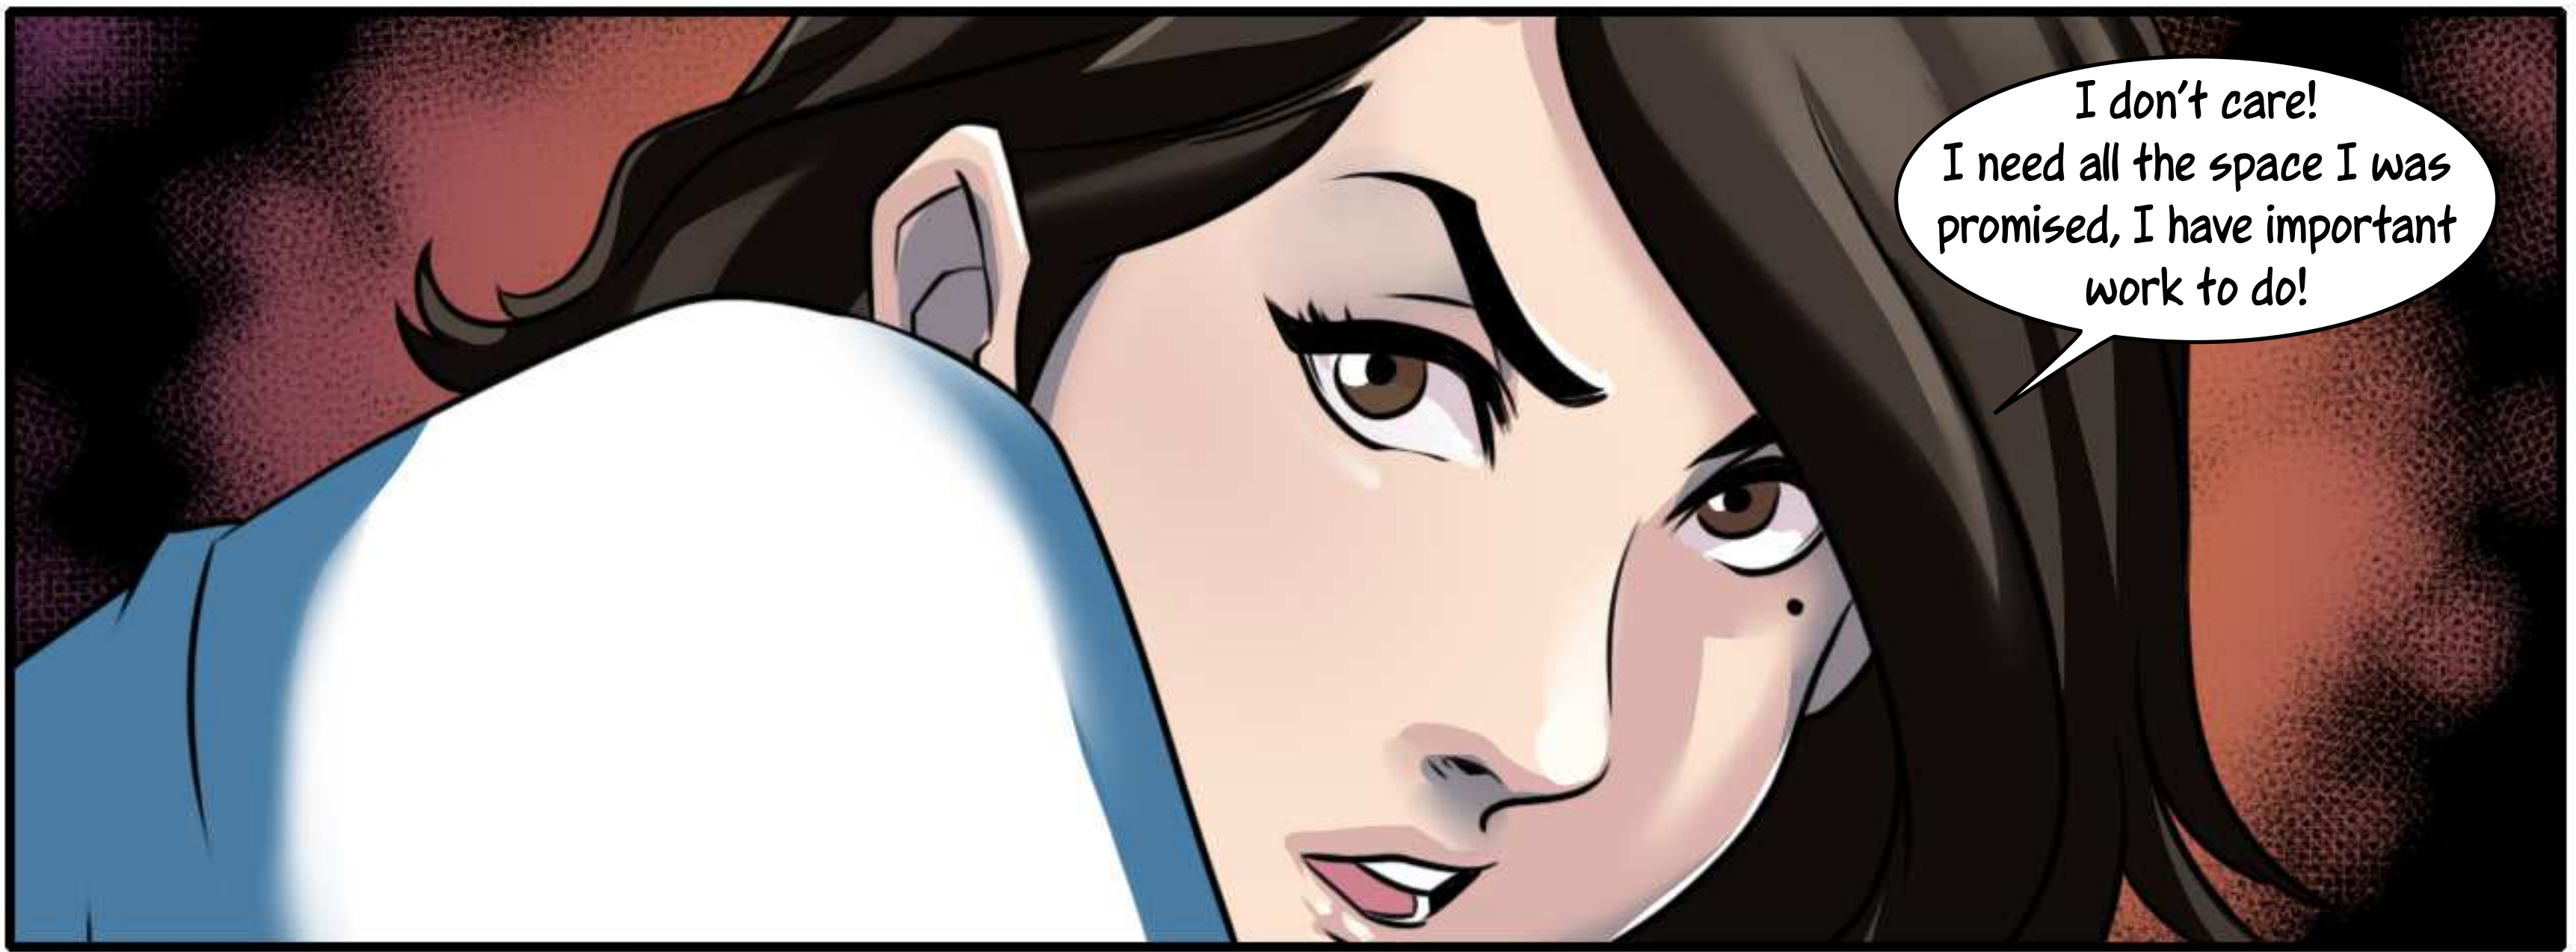

TOK TOK

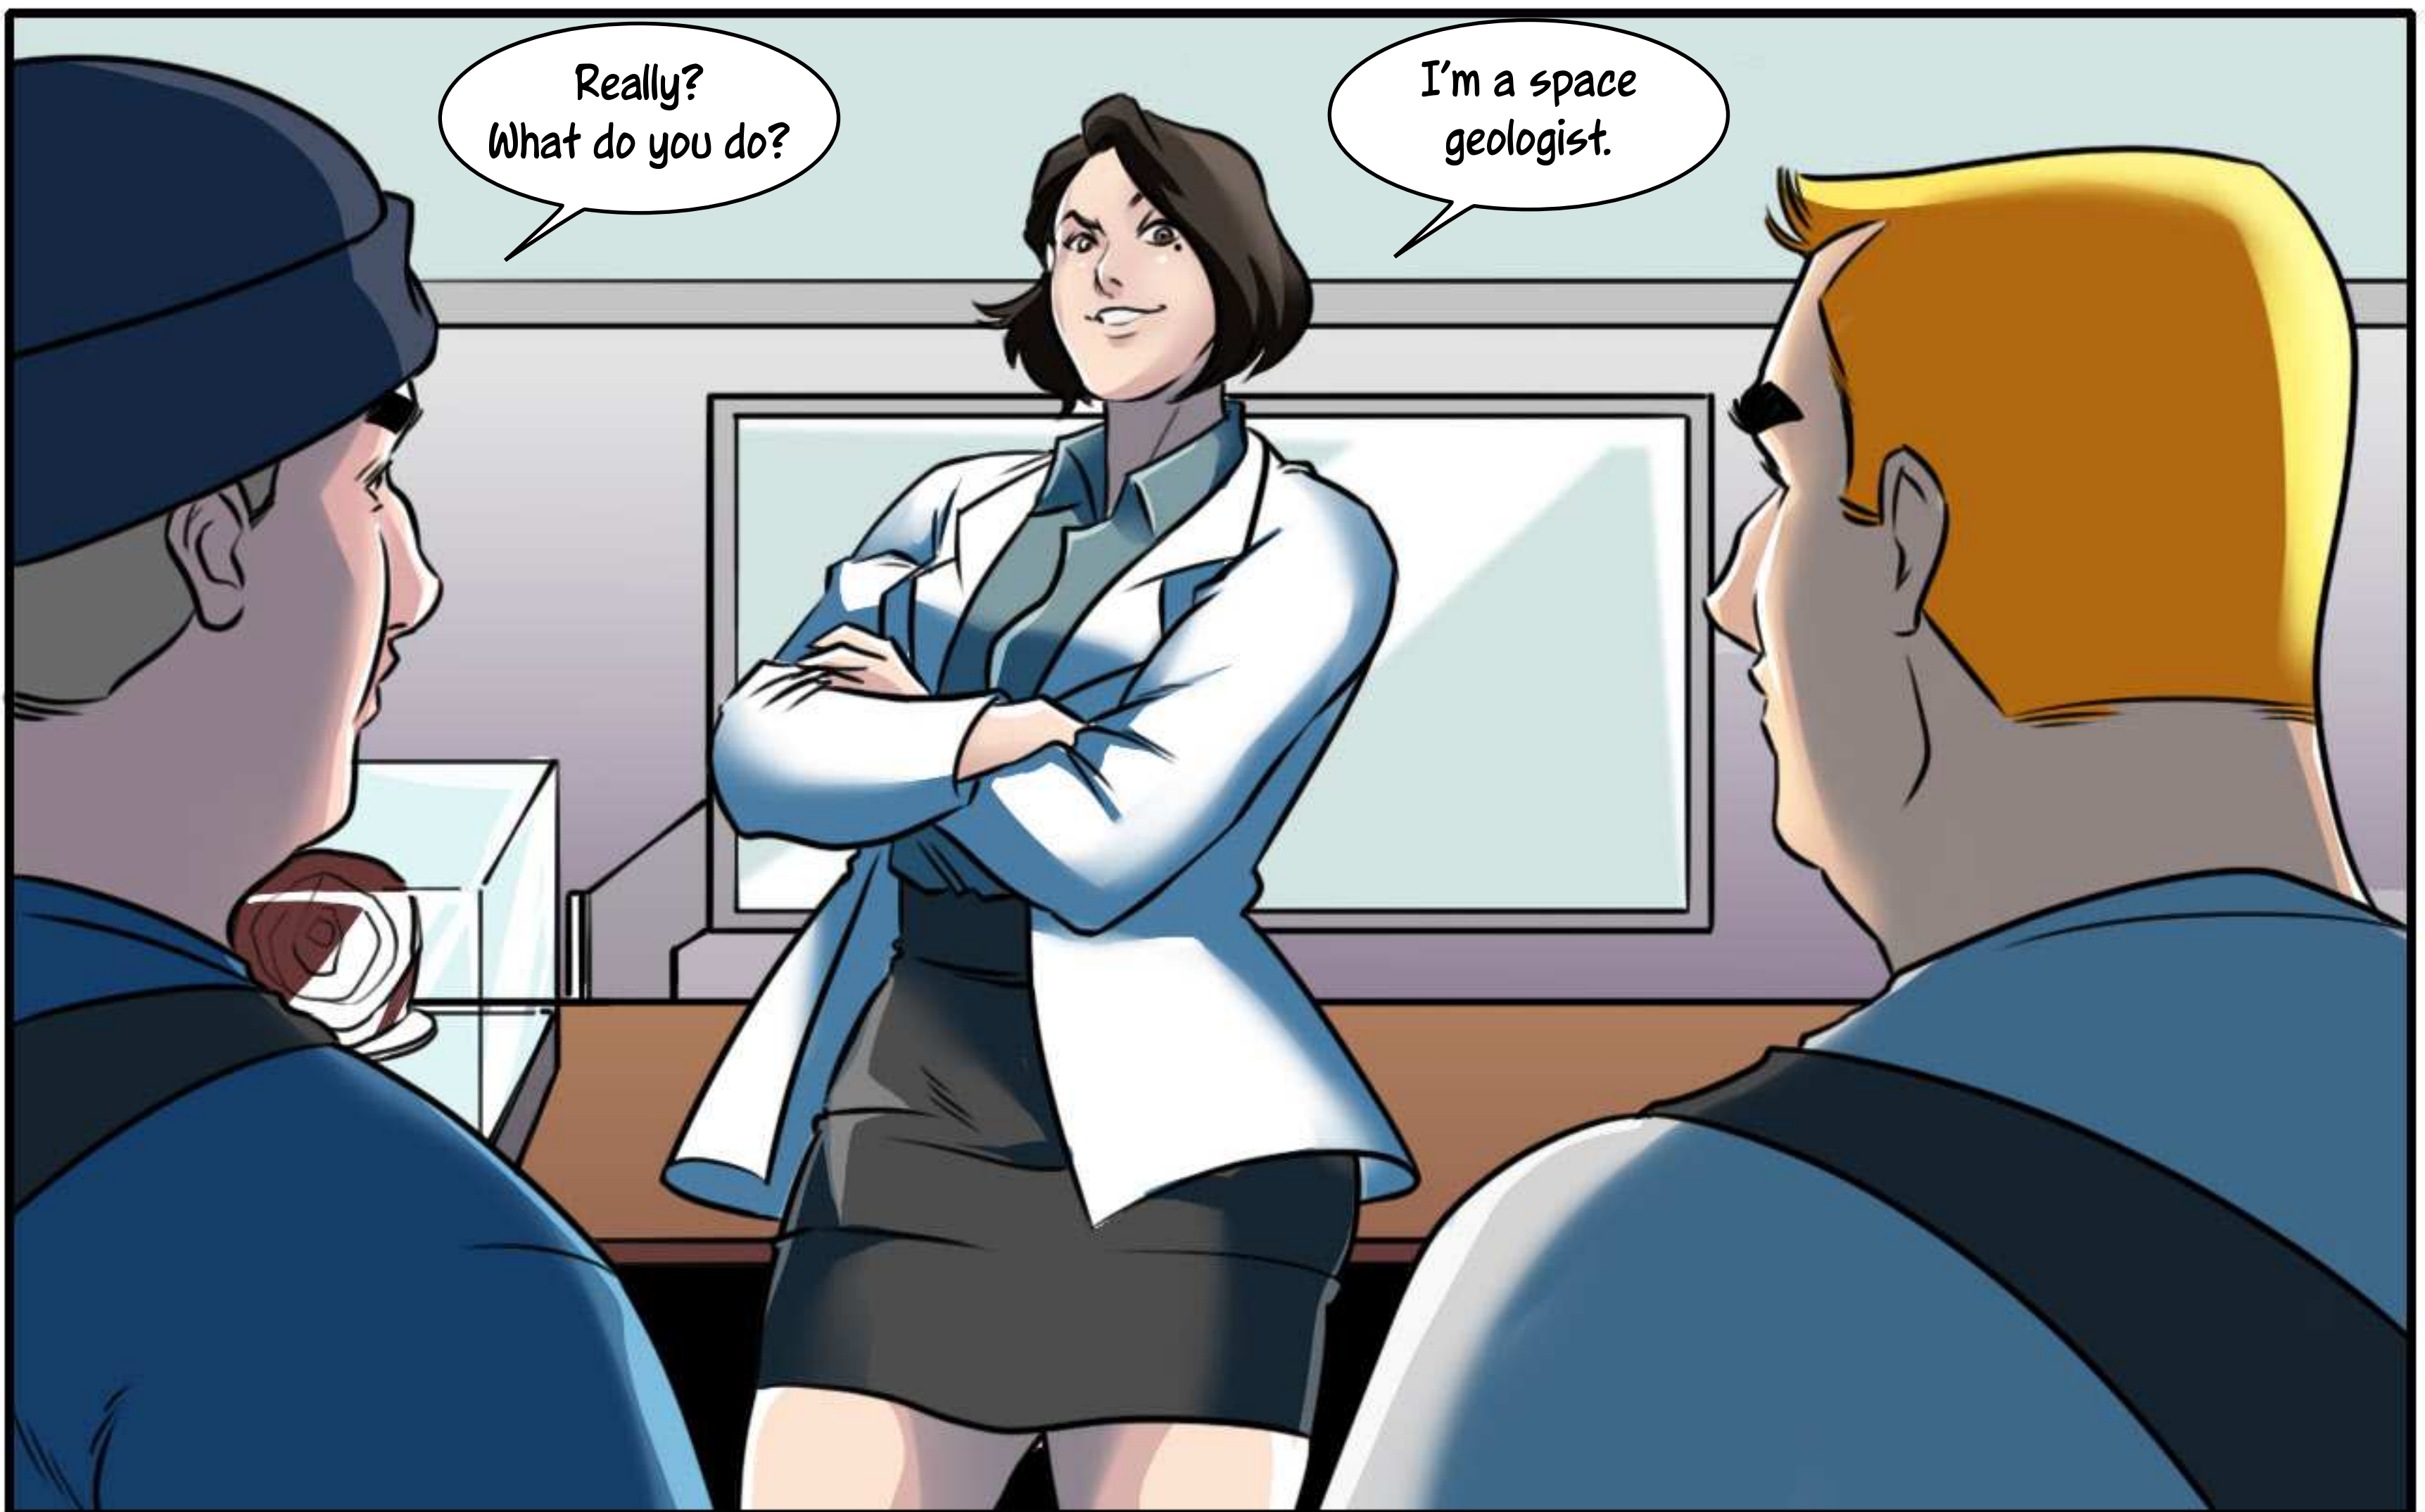

This is ridiculous!
If I'd known I would have to
give up lab space to be used as
a storage area...

I never would
have accepted this
university's research
position!

I think it's just
temporary ma'am, you know
until they're finished fixin' up
the school's gym.

I don't care!
I need all the space I was
promised, I have important
work to do!

Really?
What do you do?

I'm a space
geologist.

...surrounded by morons... everyone on this stupid planet...

Excuse me, can you help me? I'm looking for a Dr. Dominique Mundy.

Oh... I'm sorry! I didn't know you were busy, I can come back...

I'm Dr. Mundy and I'm also very busy!

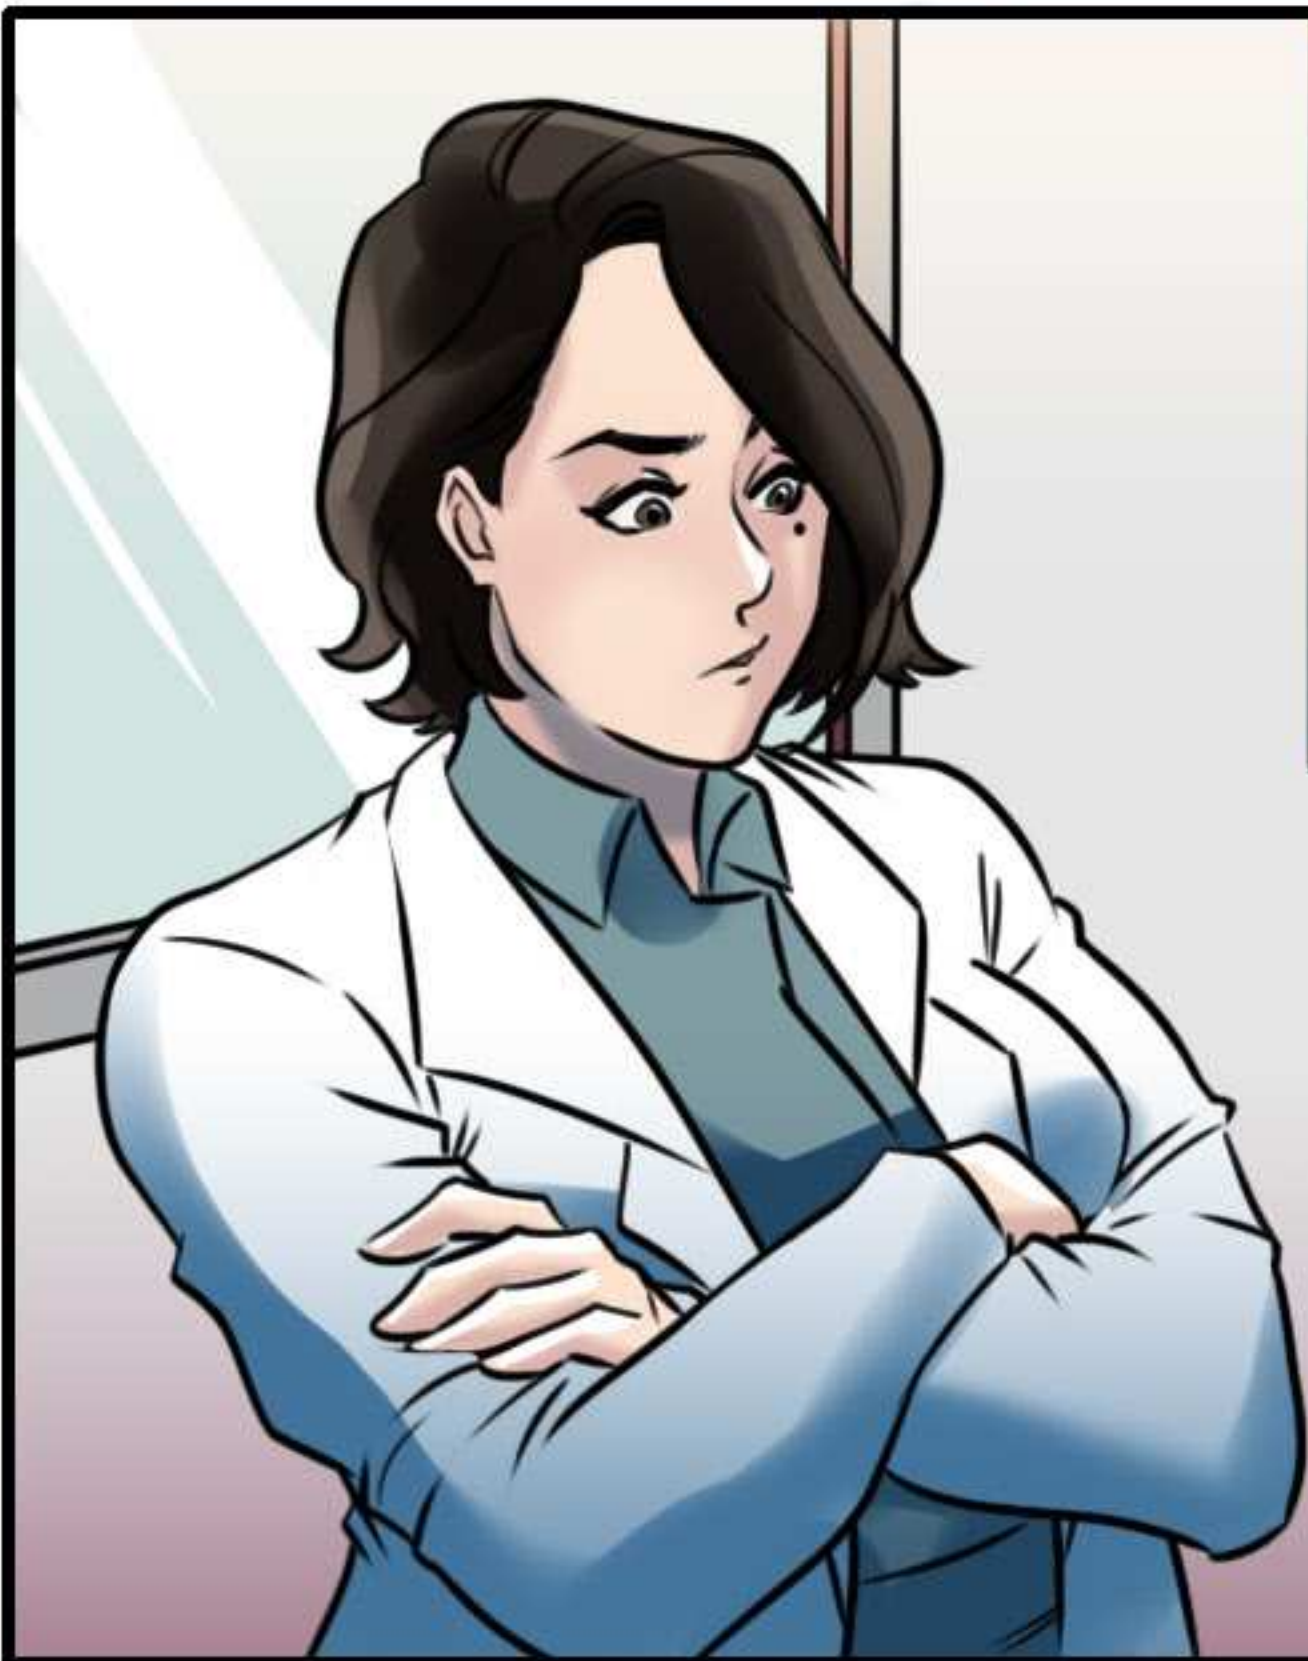

Just tell me who you are and why you're bothering me!

Oh sorry again! My Name is Heather Wallace and well...

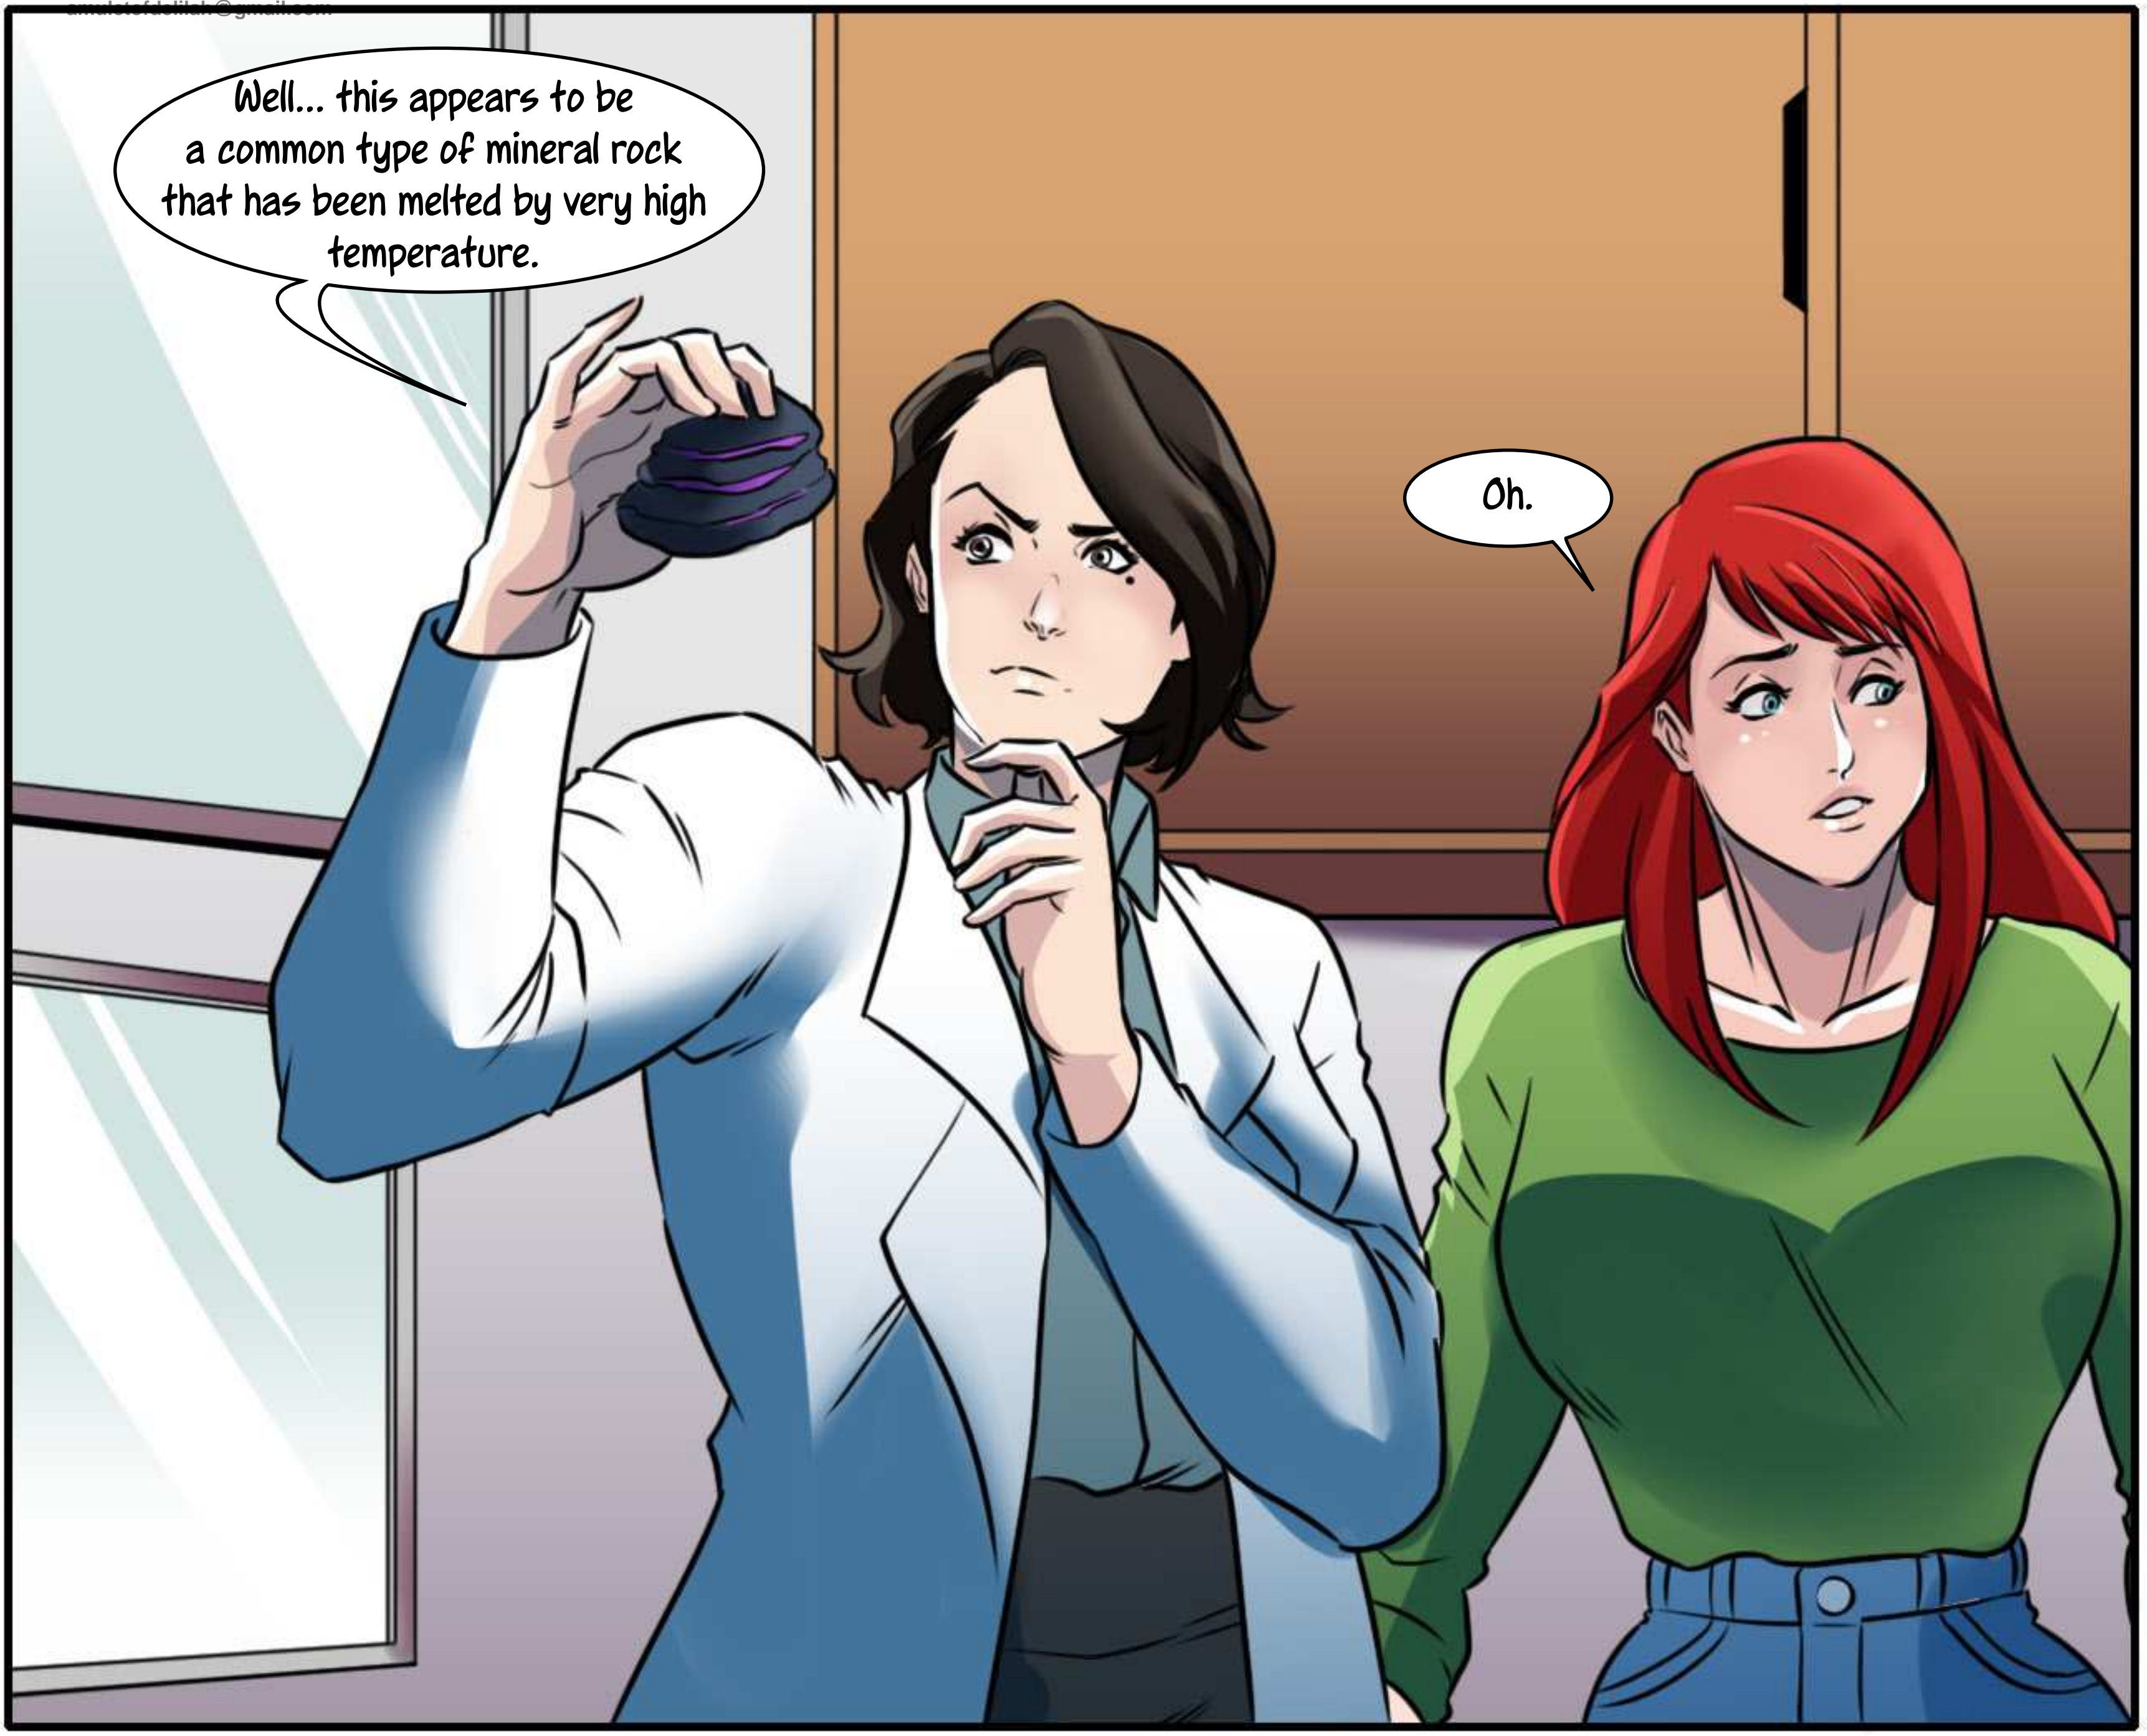

I asked around and I was told you were the person to see about meteorites and...

Really?!? Hmm... let me see it.

I think I found one.

Well... this appears to be a common type of mineral rock that has been melted by very high temperature.

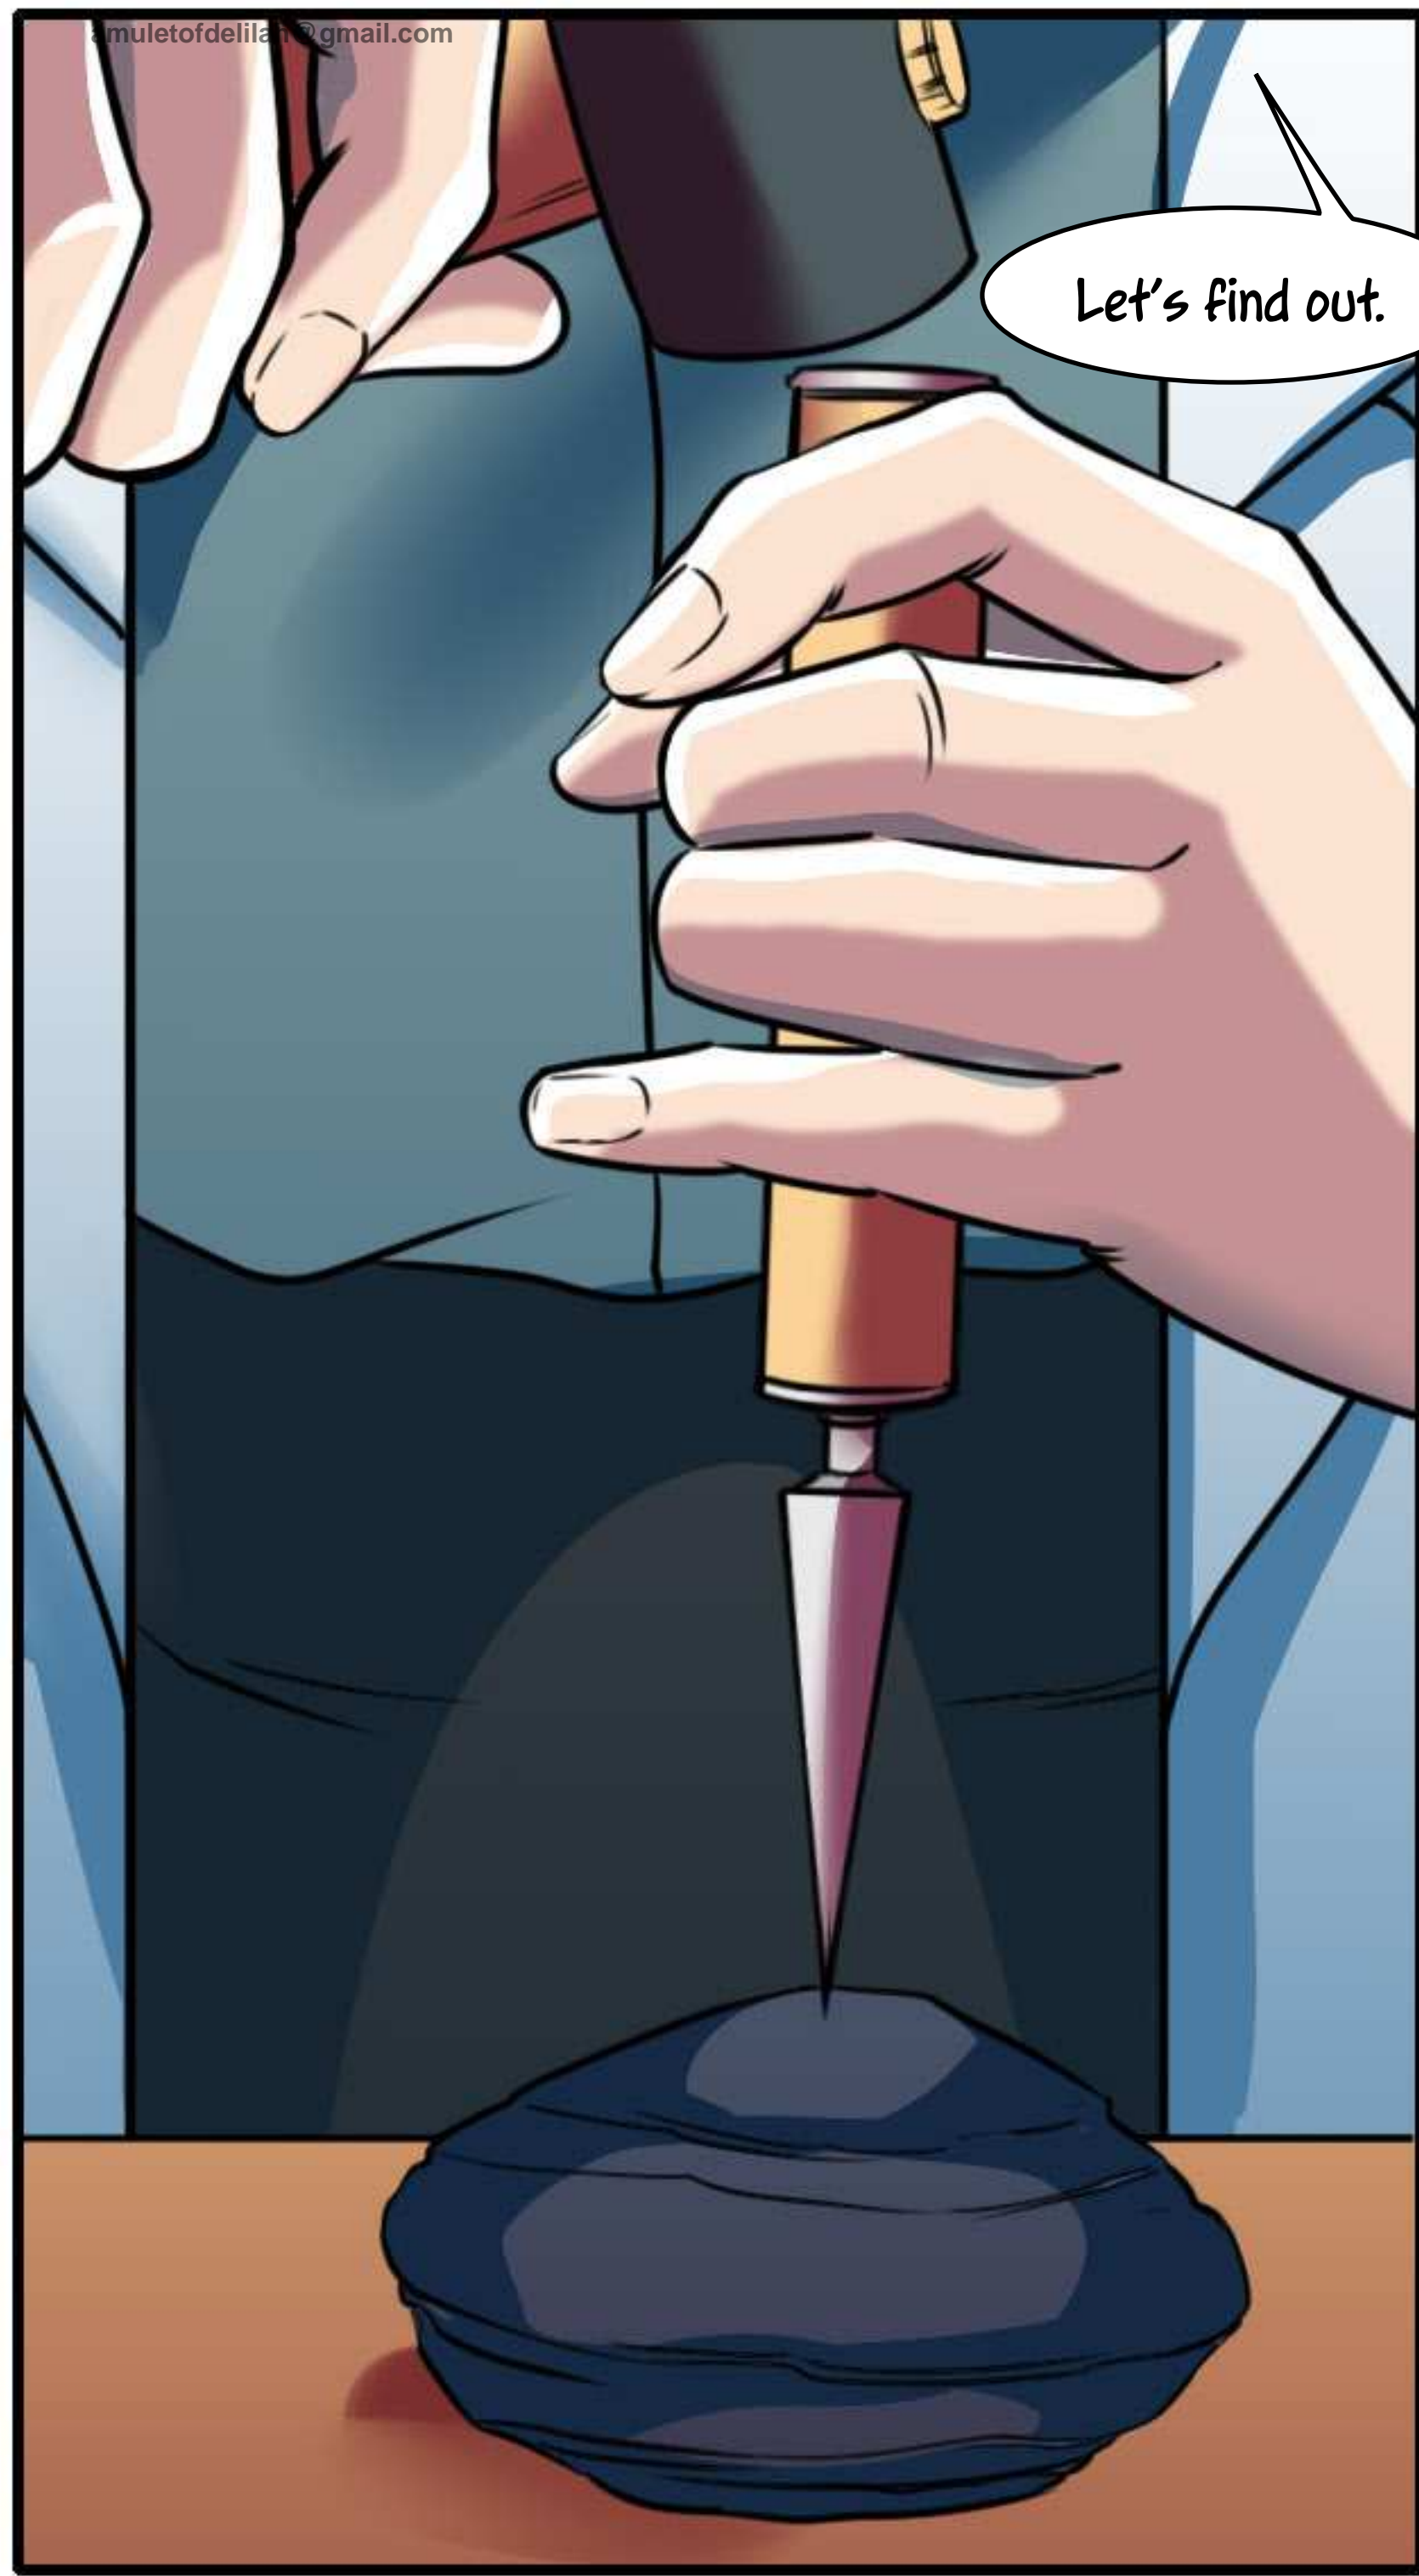

Oh.

Which means it could be a meteorite, at least underneath all the charred material.

Oh!

CREEK

Let's find out.

TOK

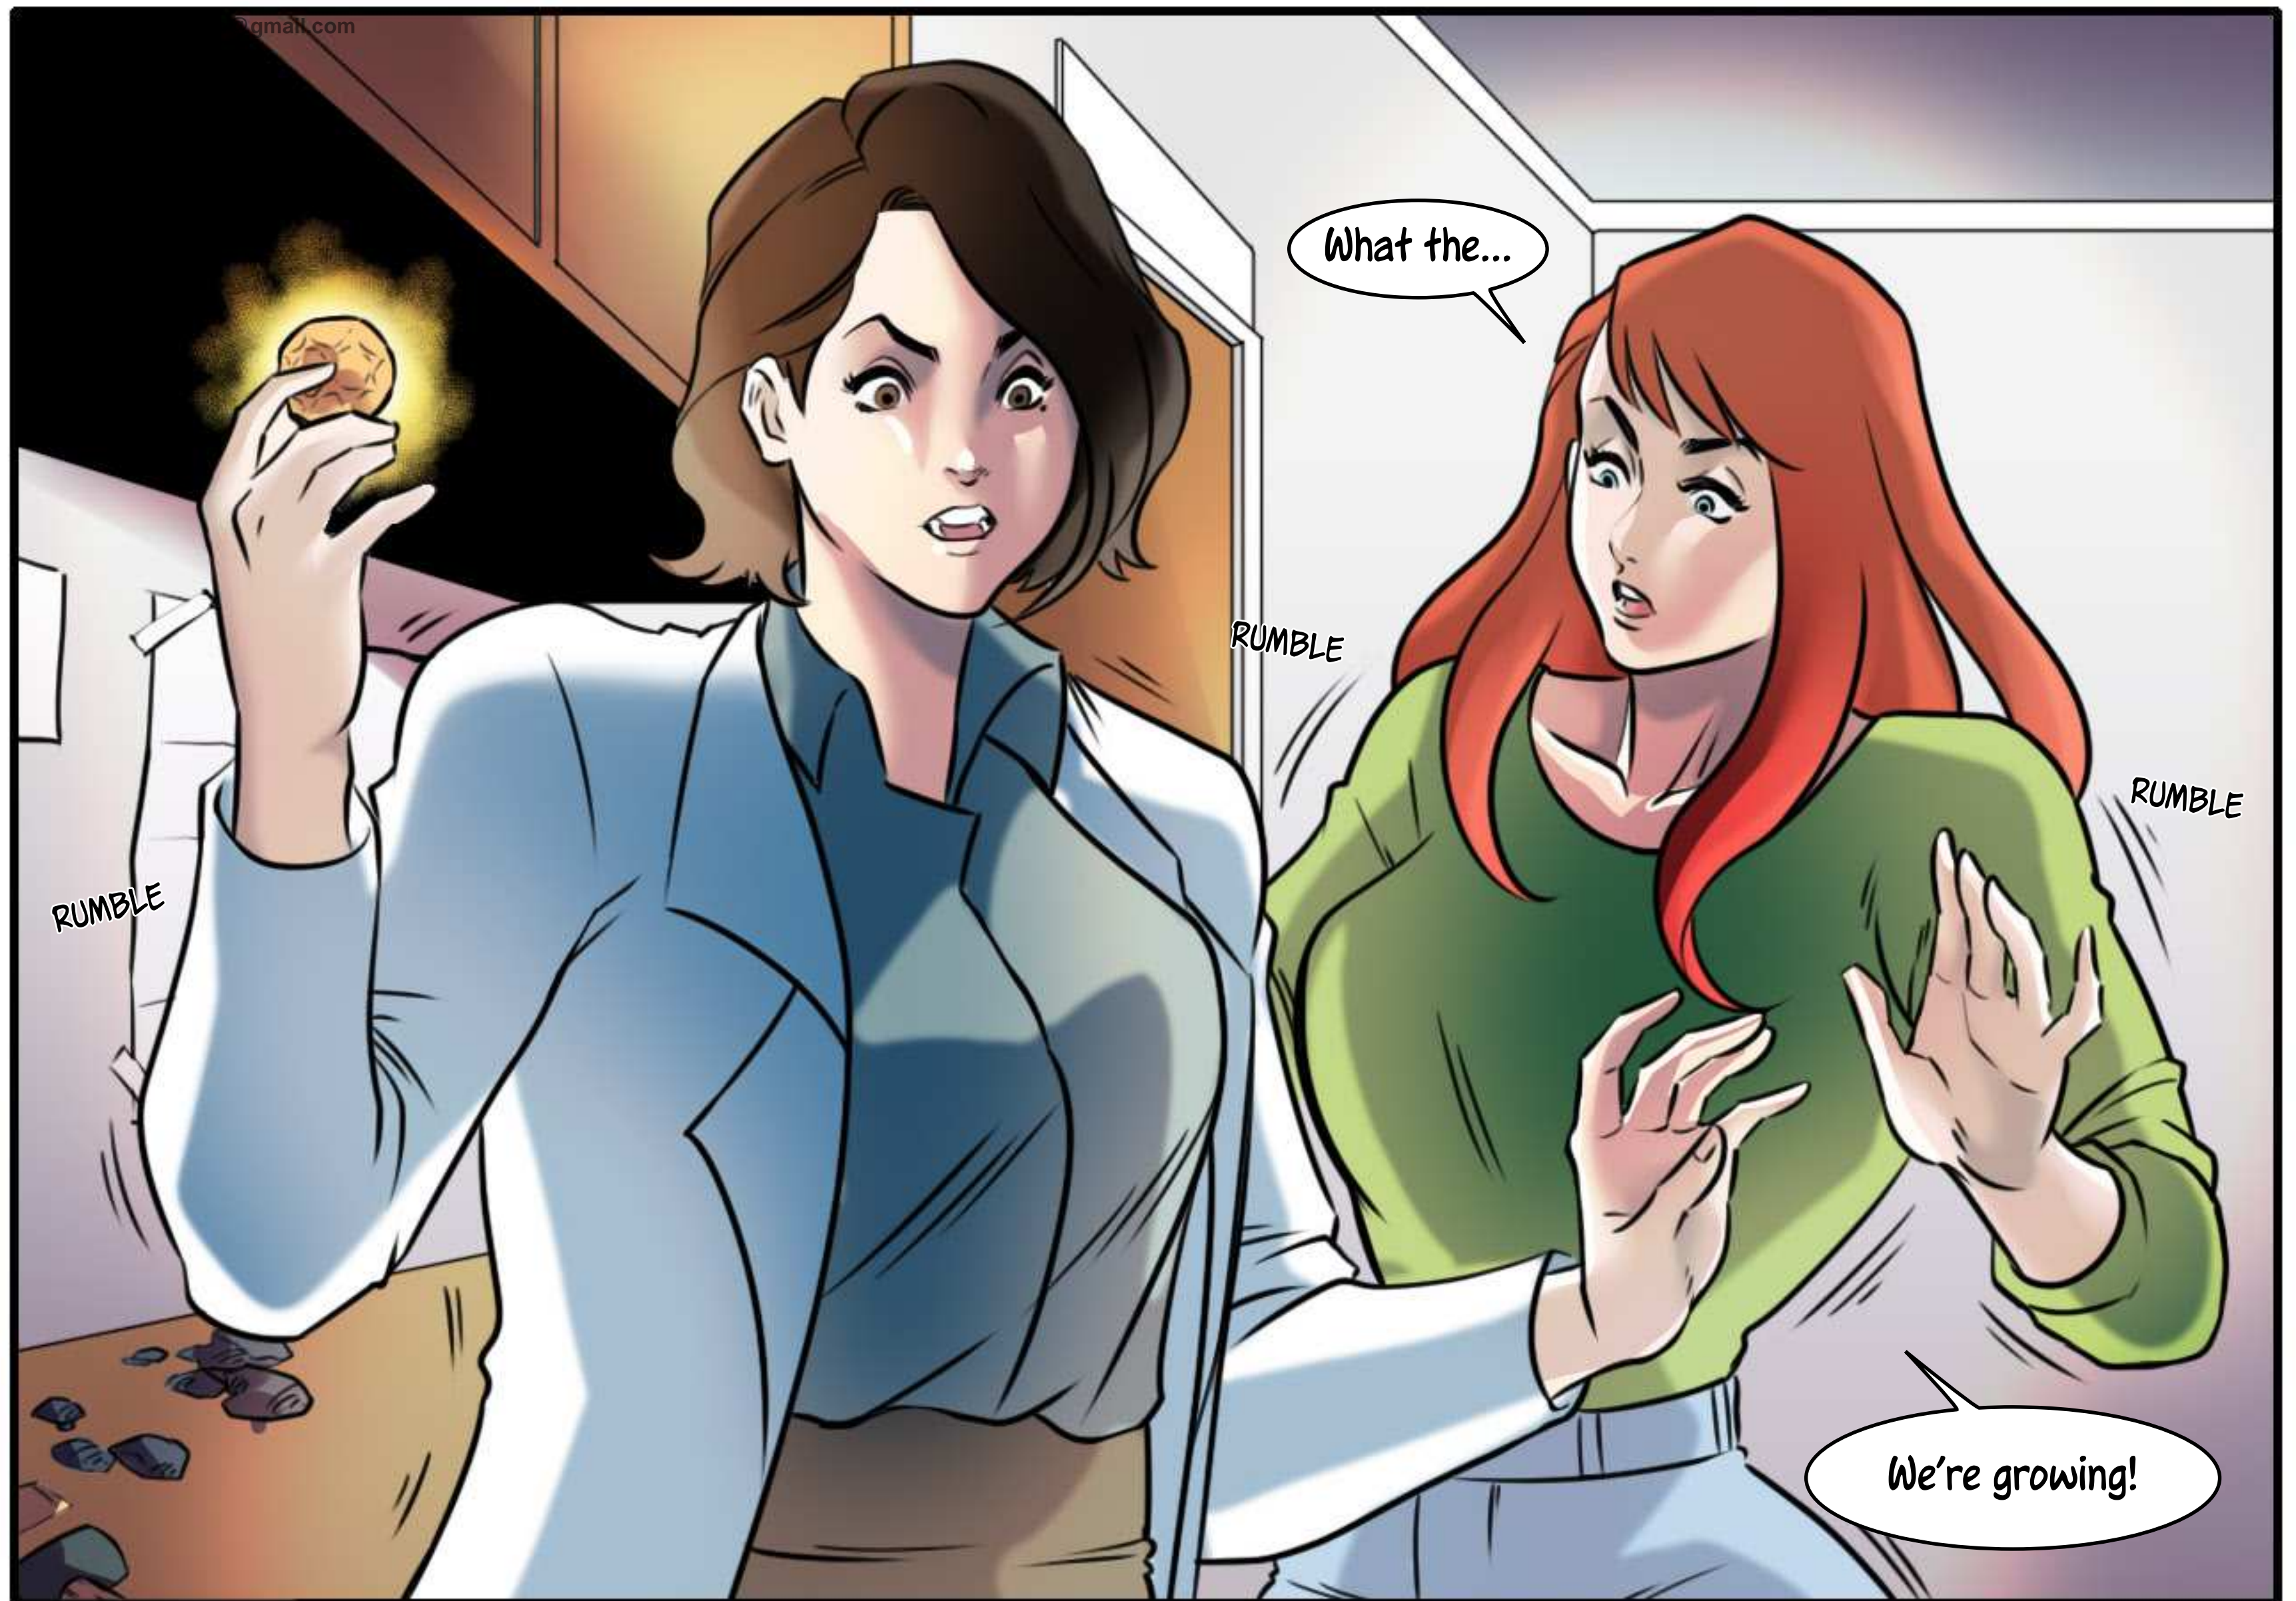

KTHACK!

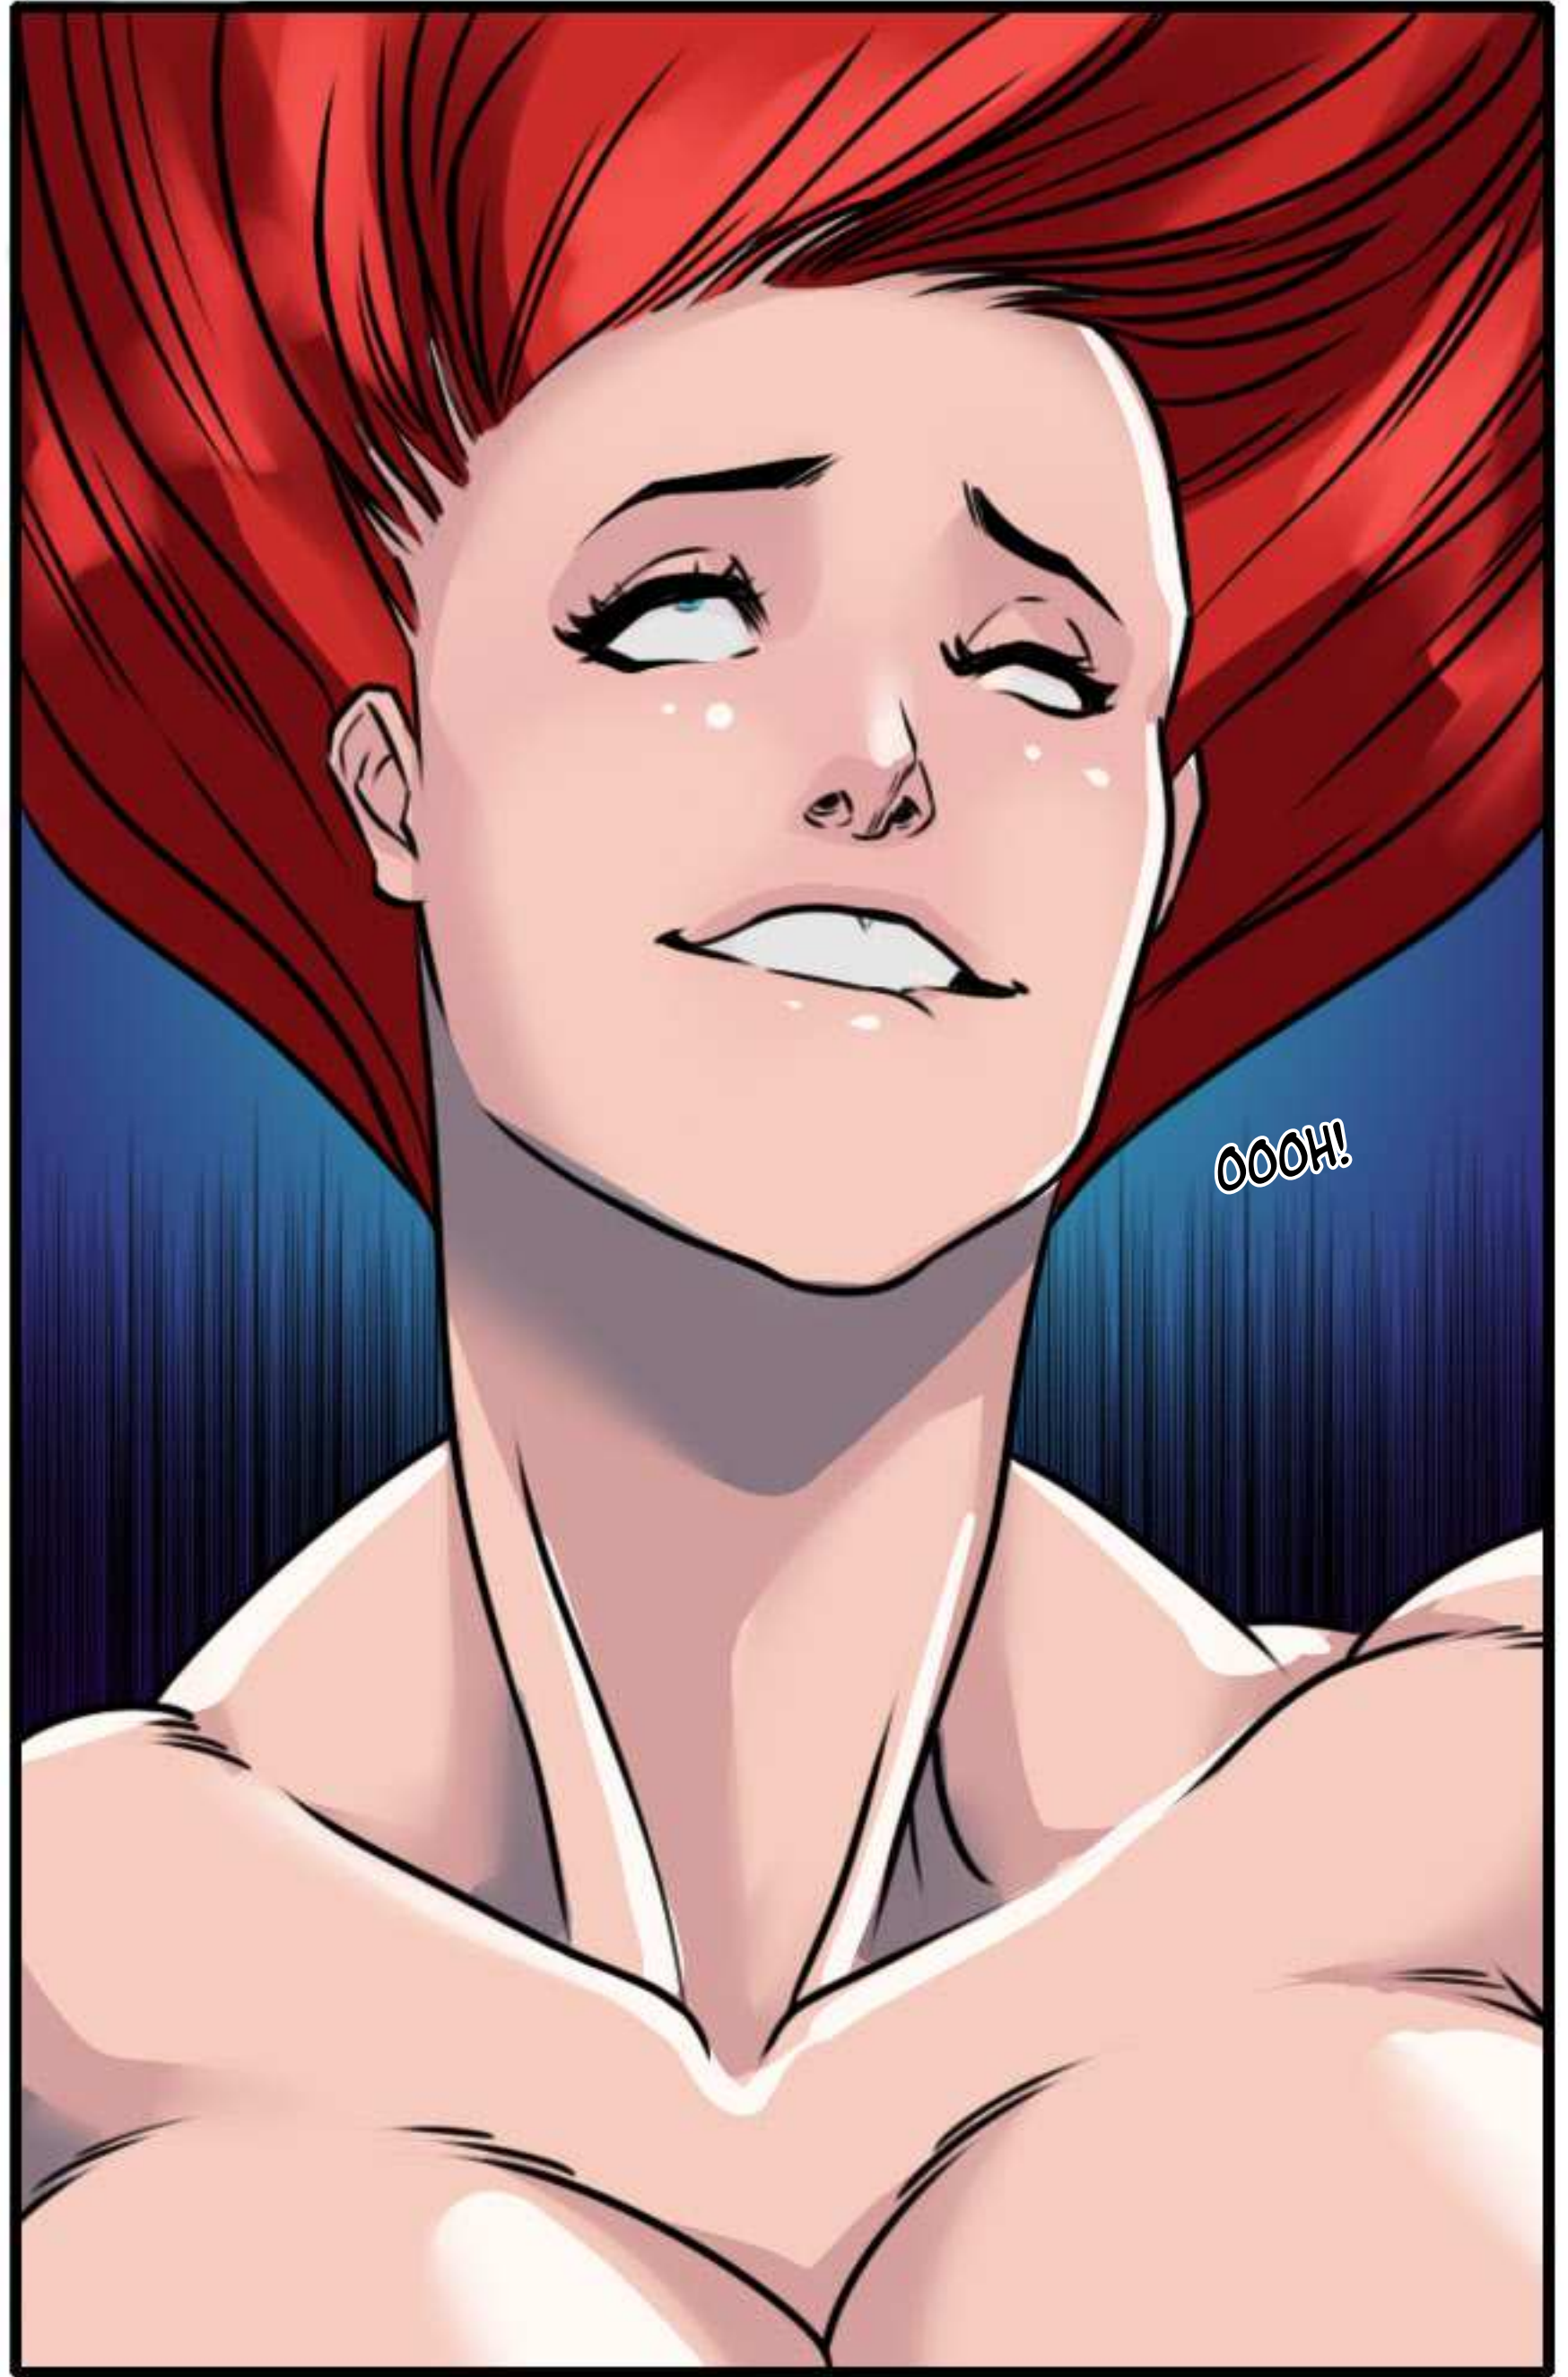

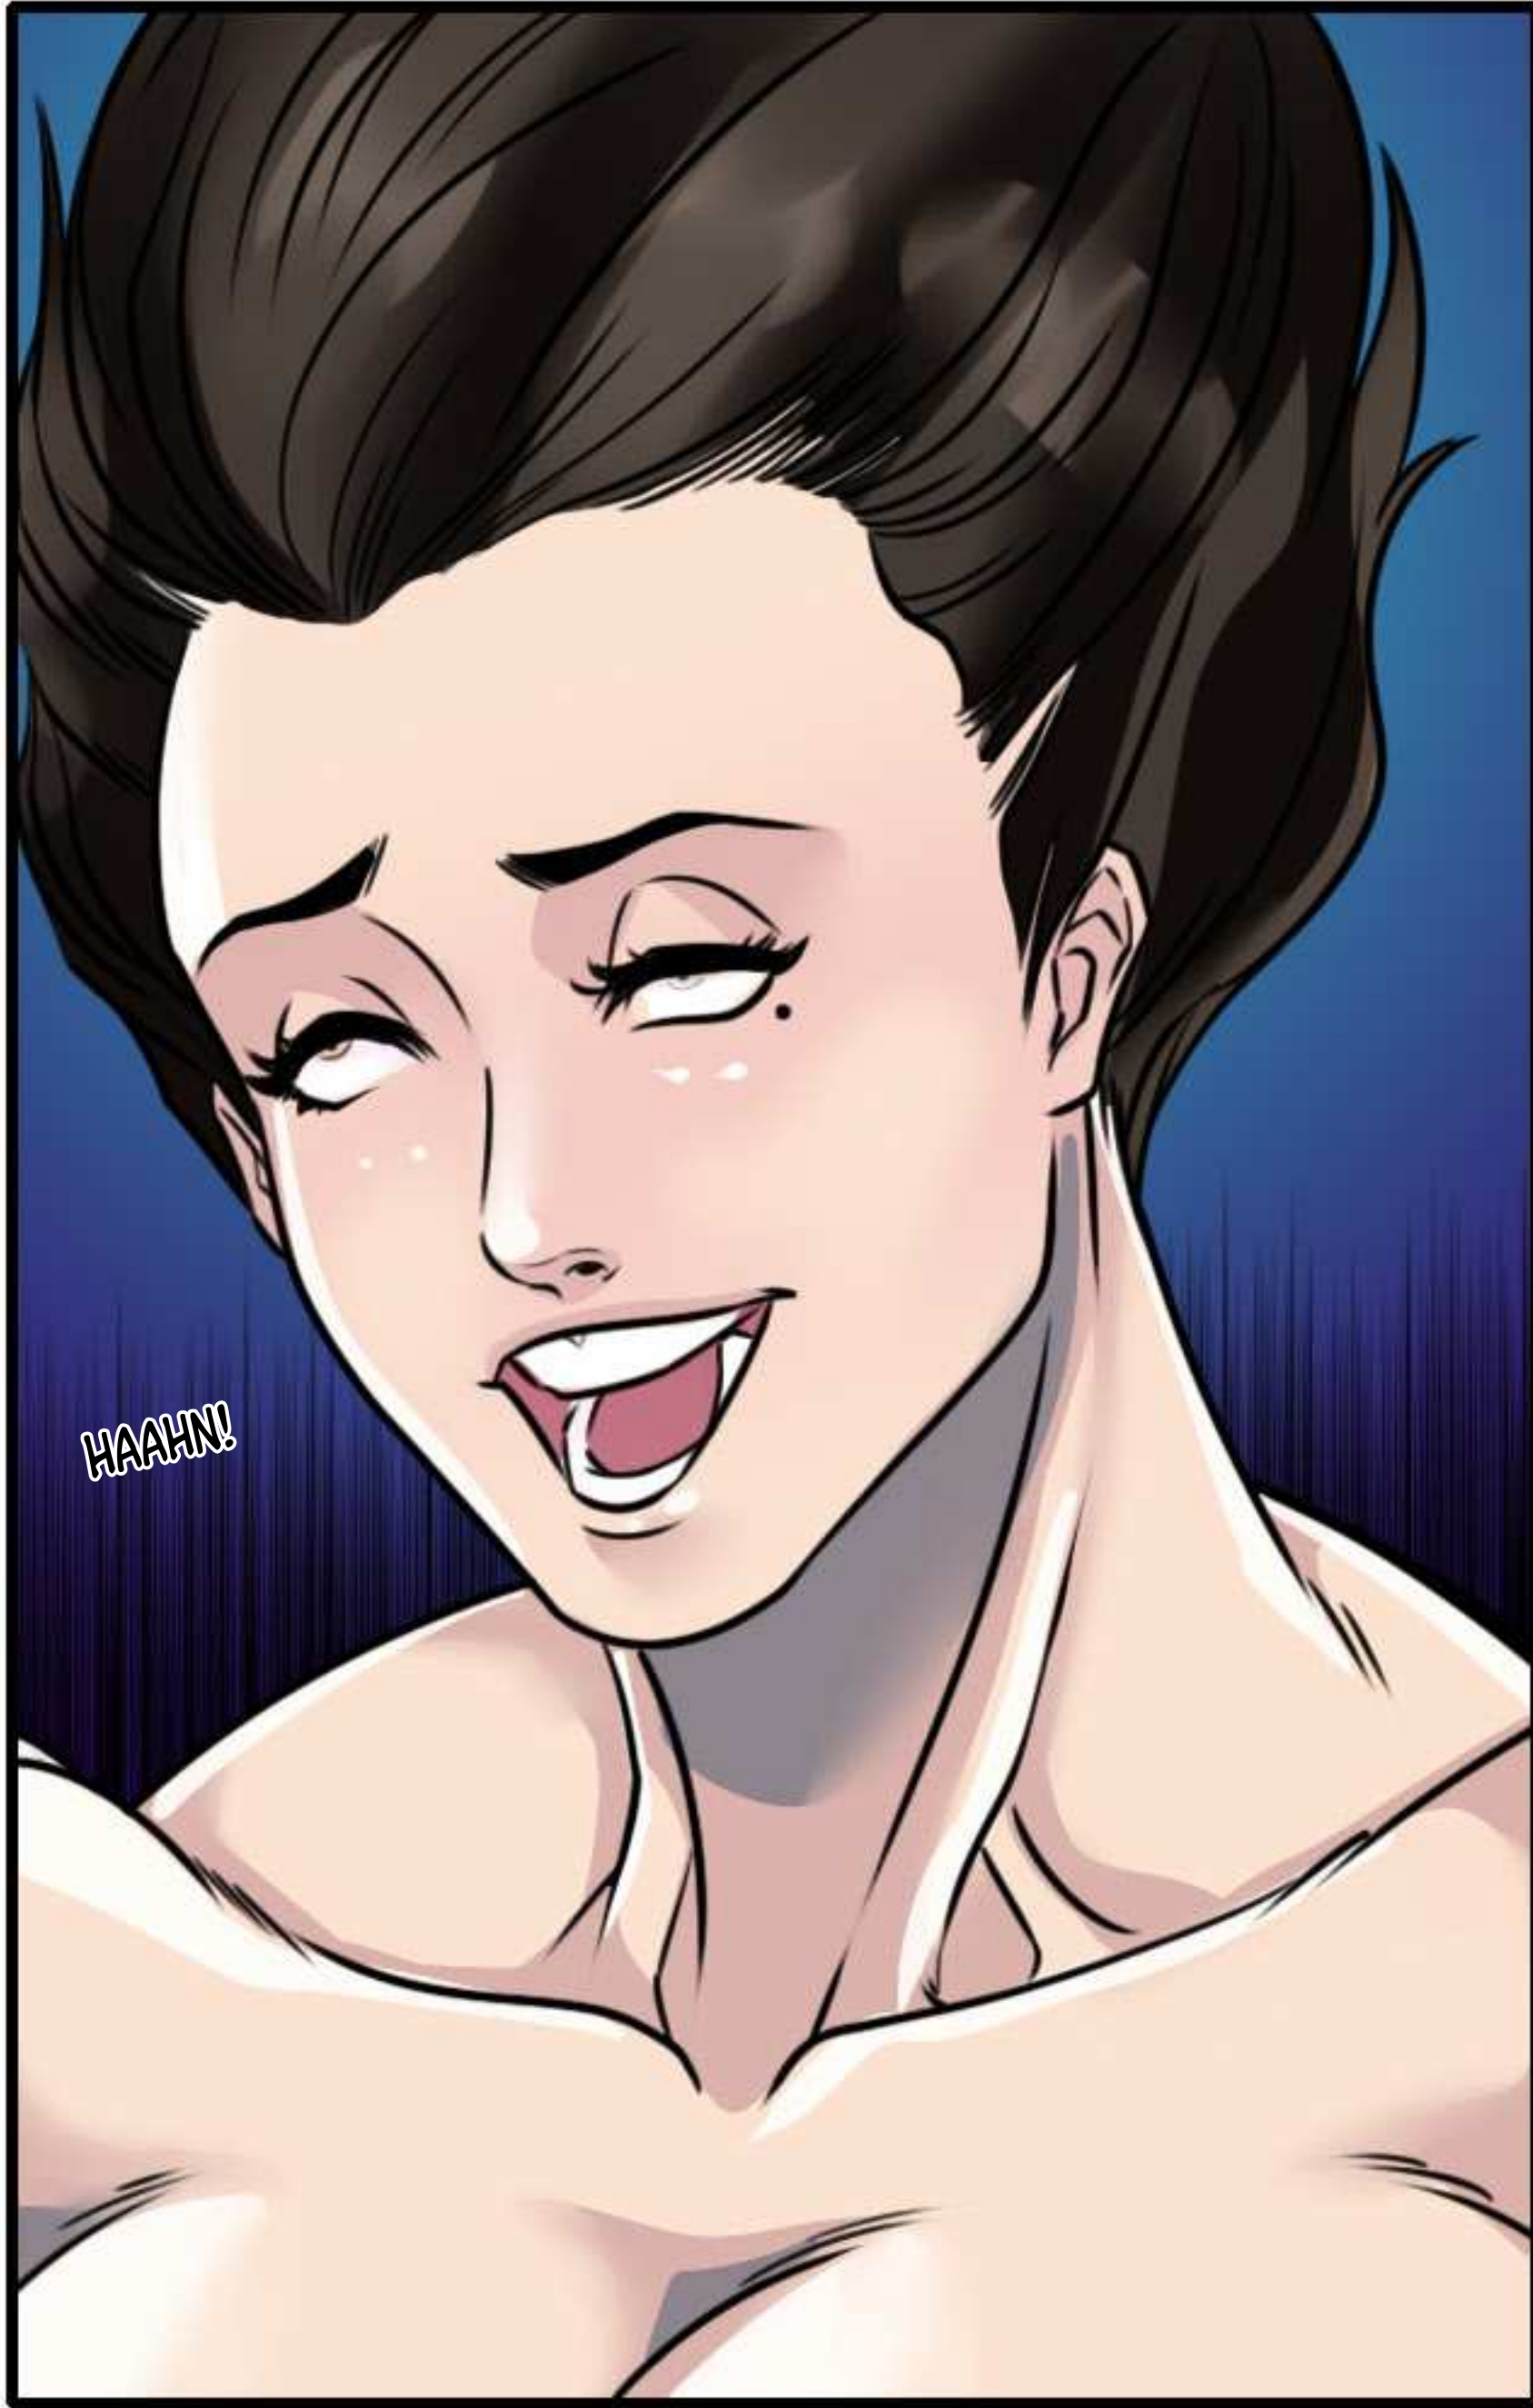

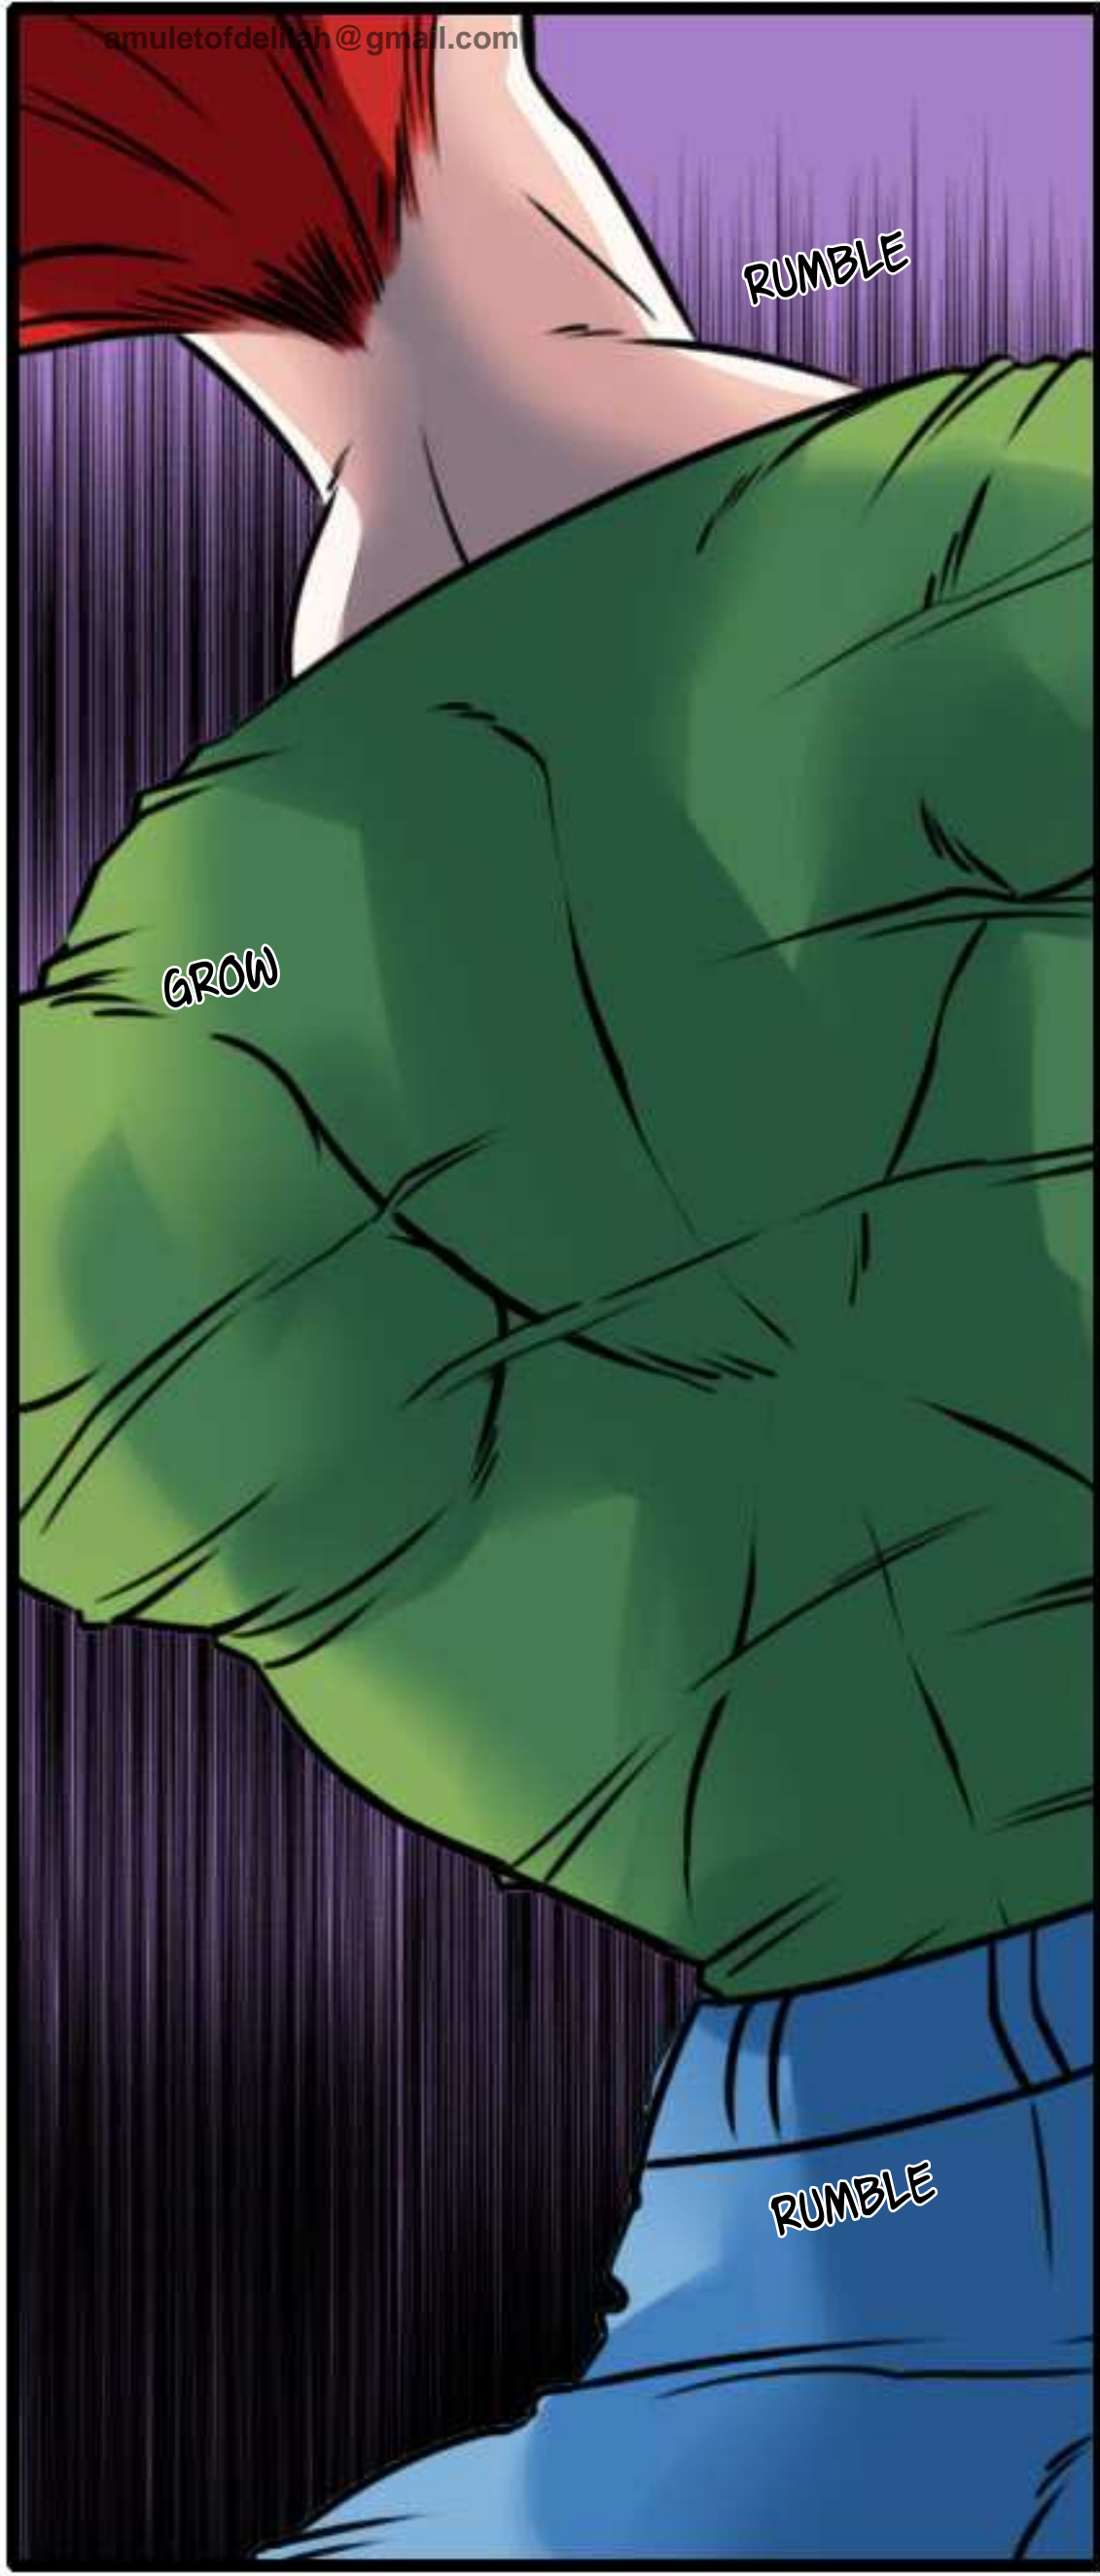

How odd, it's... glowing.

Wow!

SHING

Amazing!

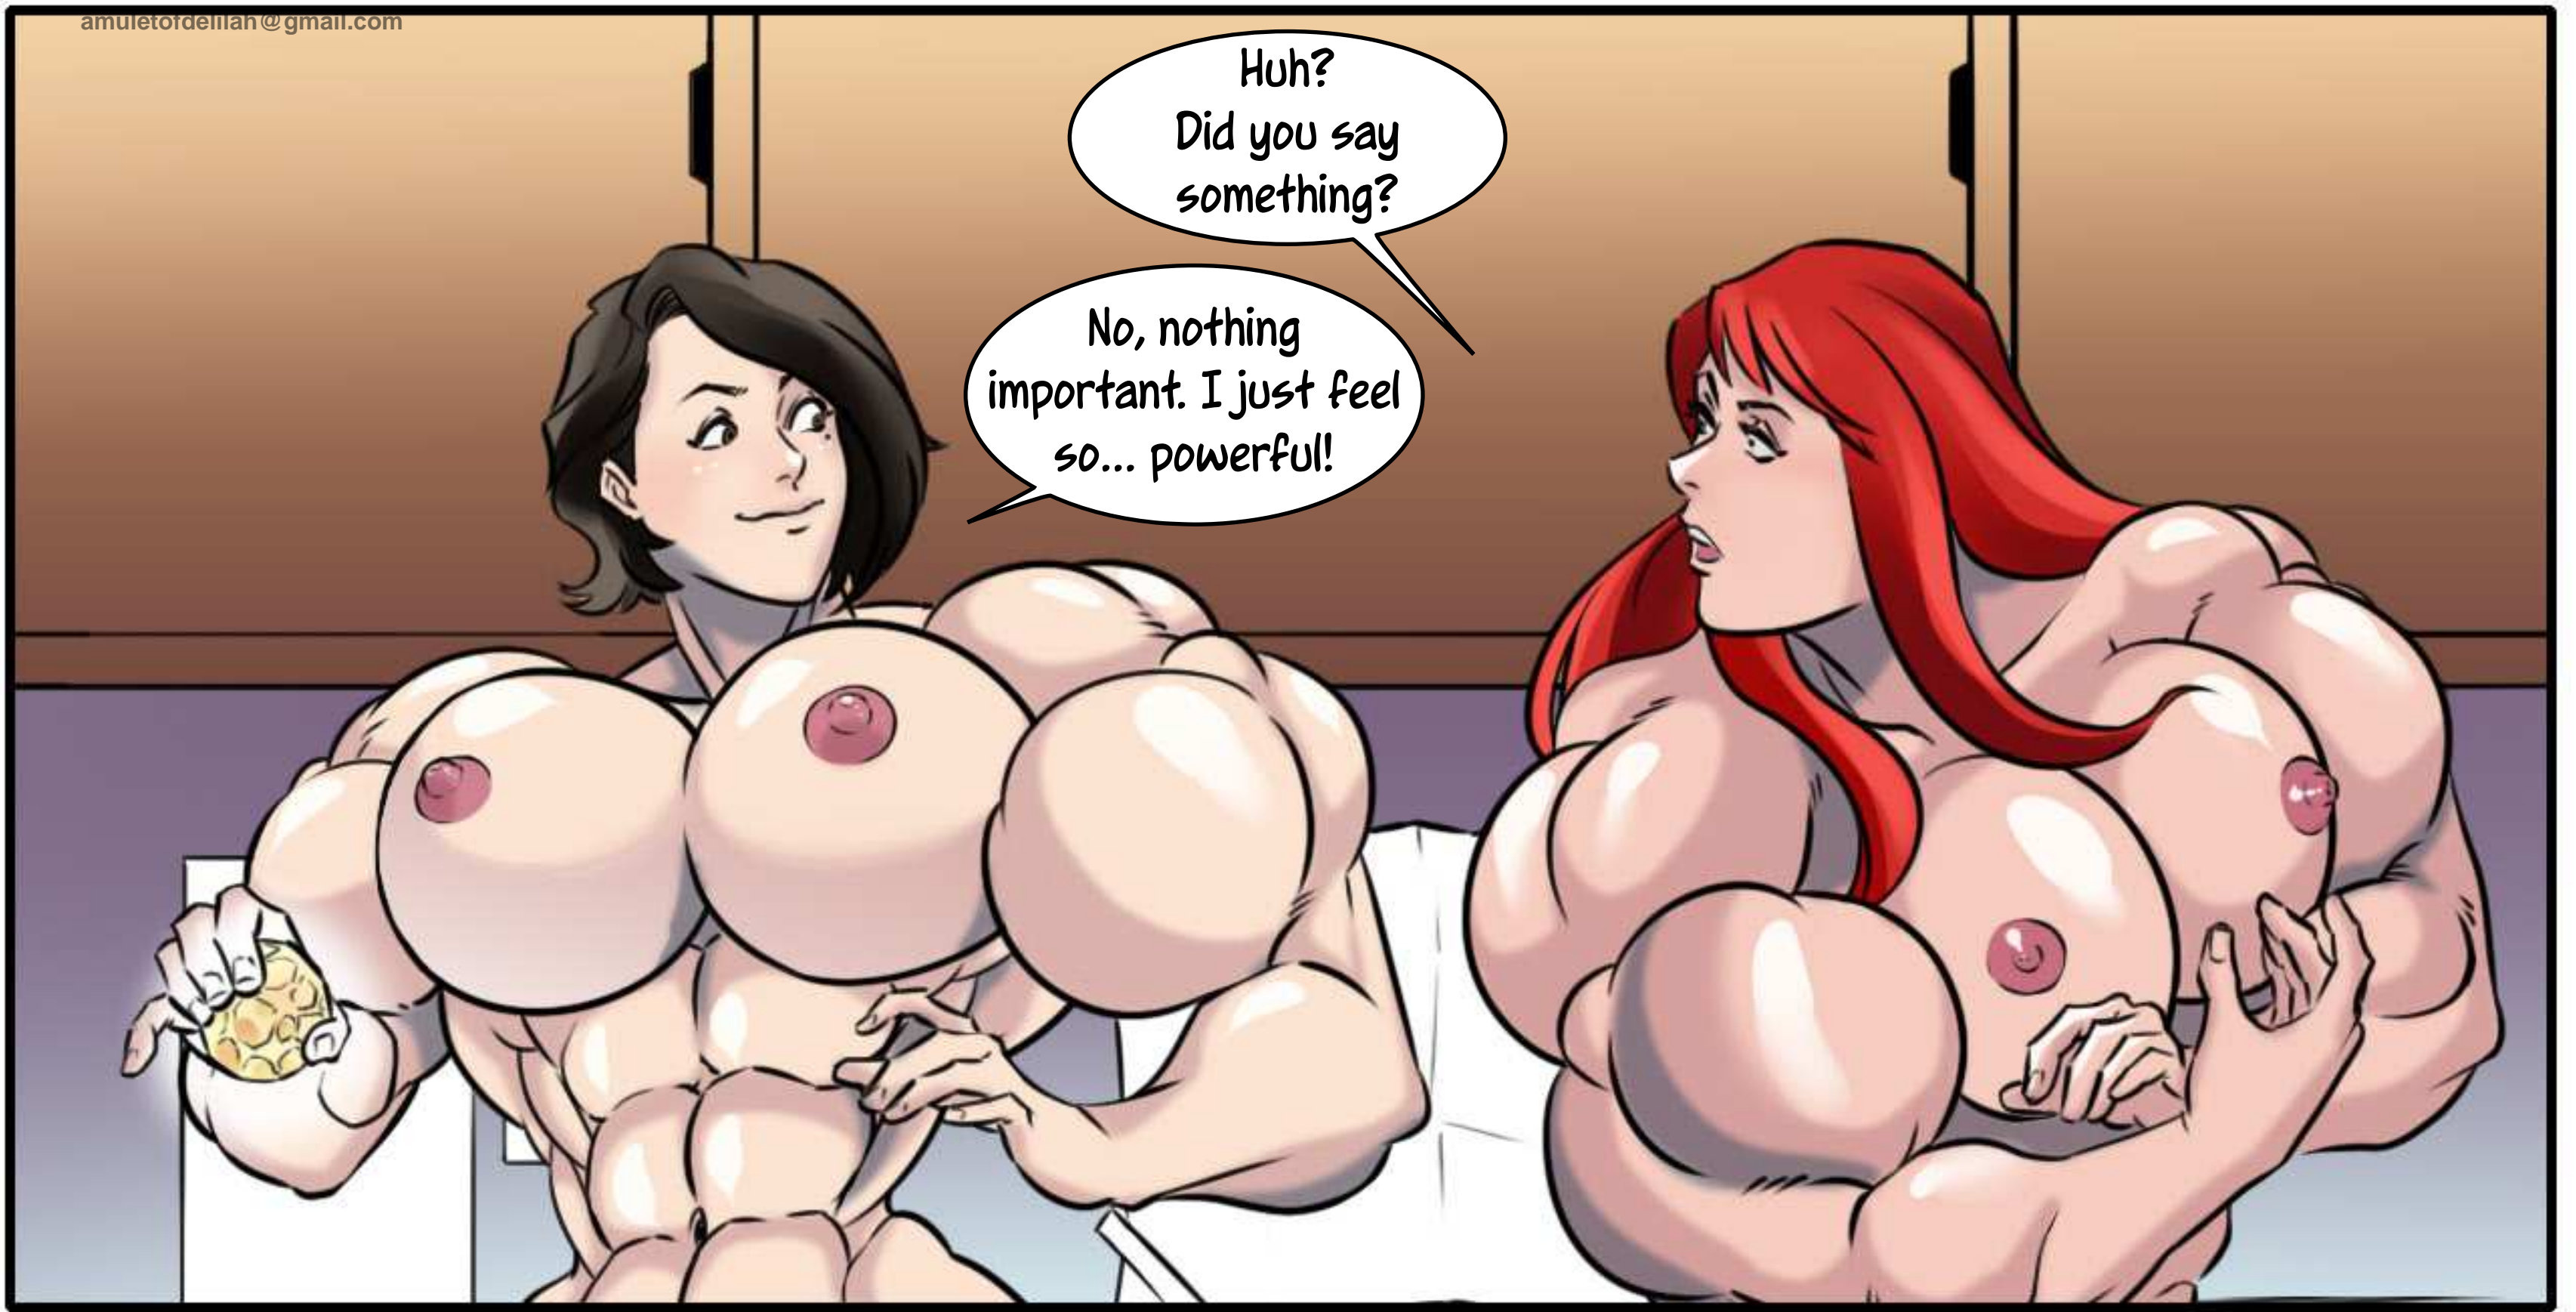

FLEX

FLEX

FLEX

Yes... I am.

FLEX

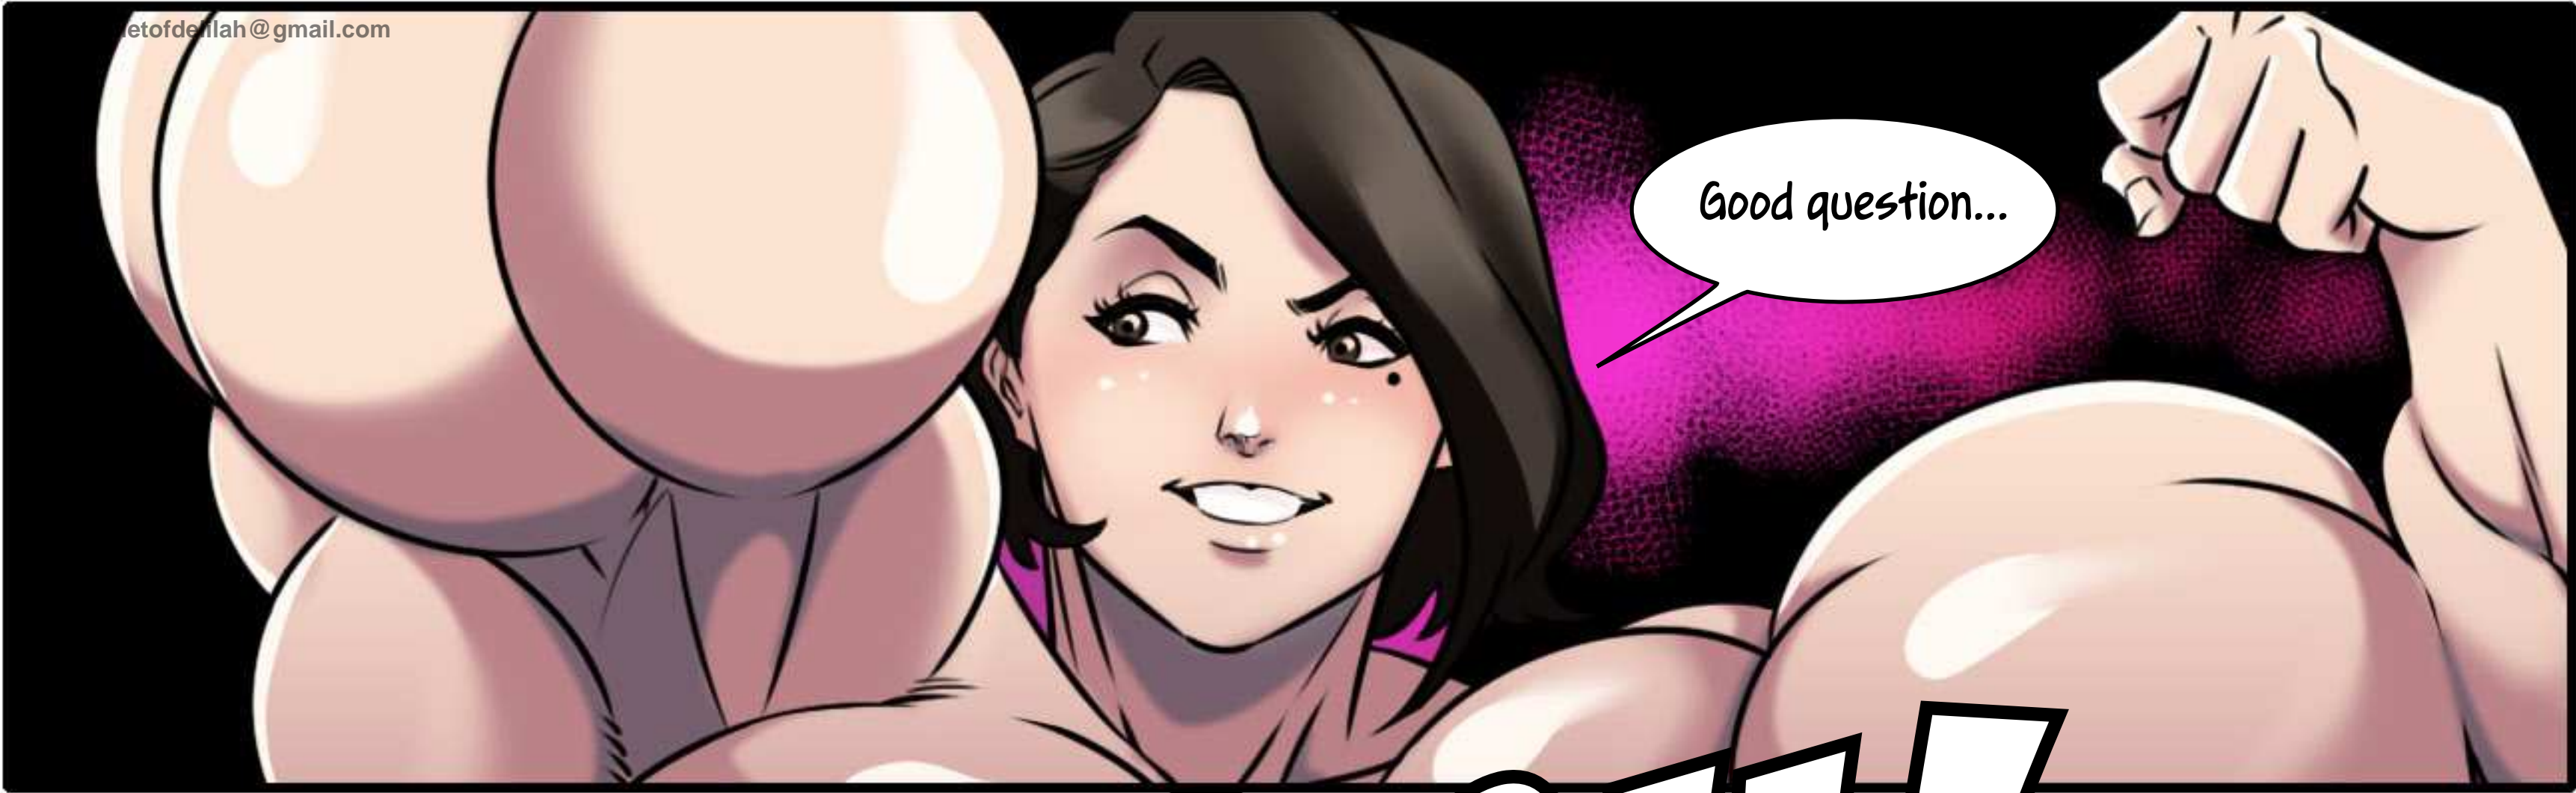

CRUUNK

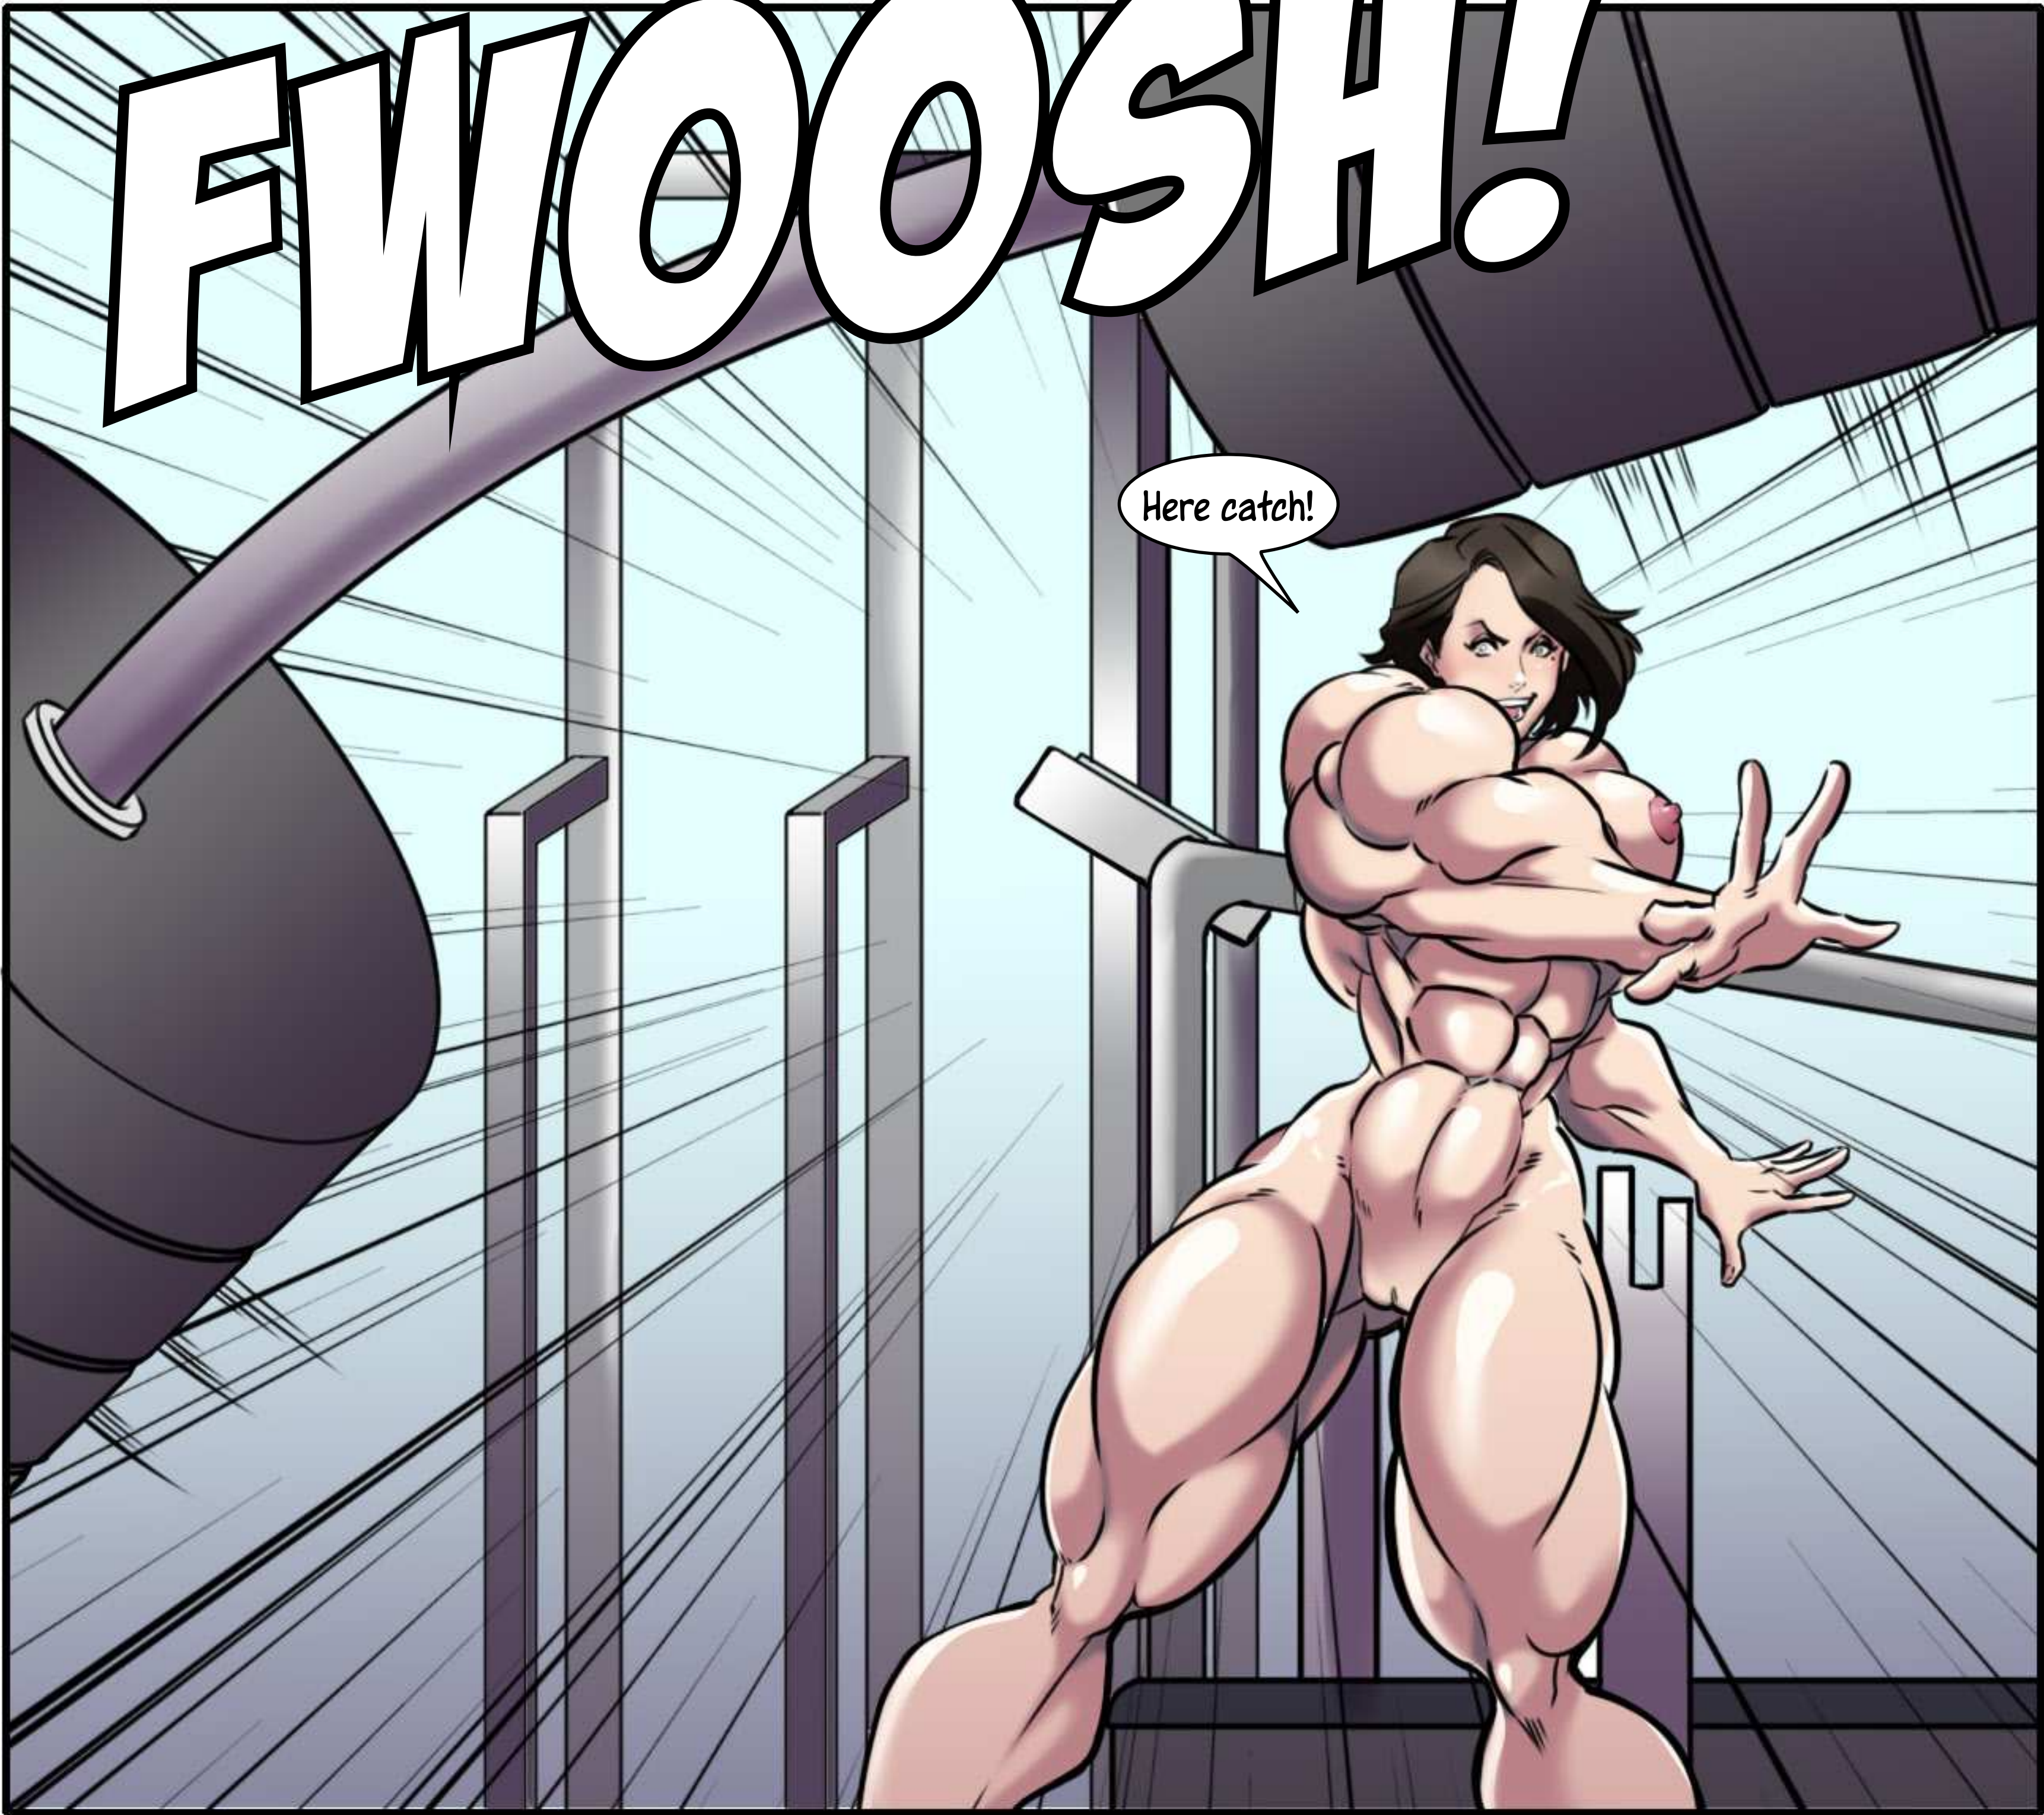

CRUUNK

Hahaha!
I was right! Look how
strong I am!

WOW!
I wonder if I'm as
strong as you!

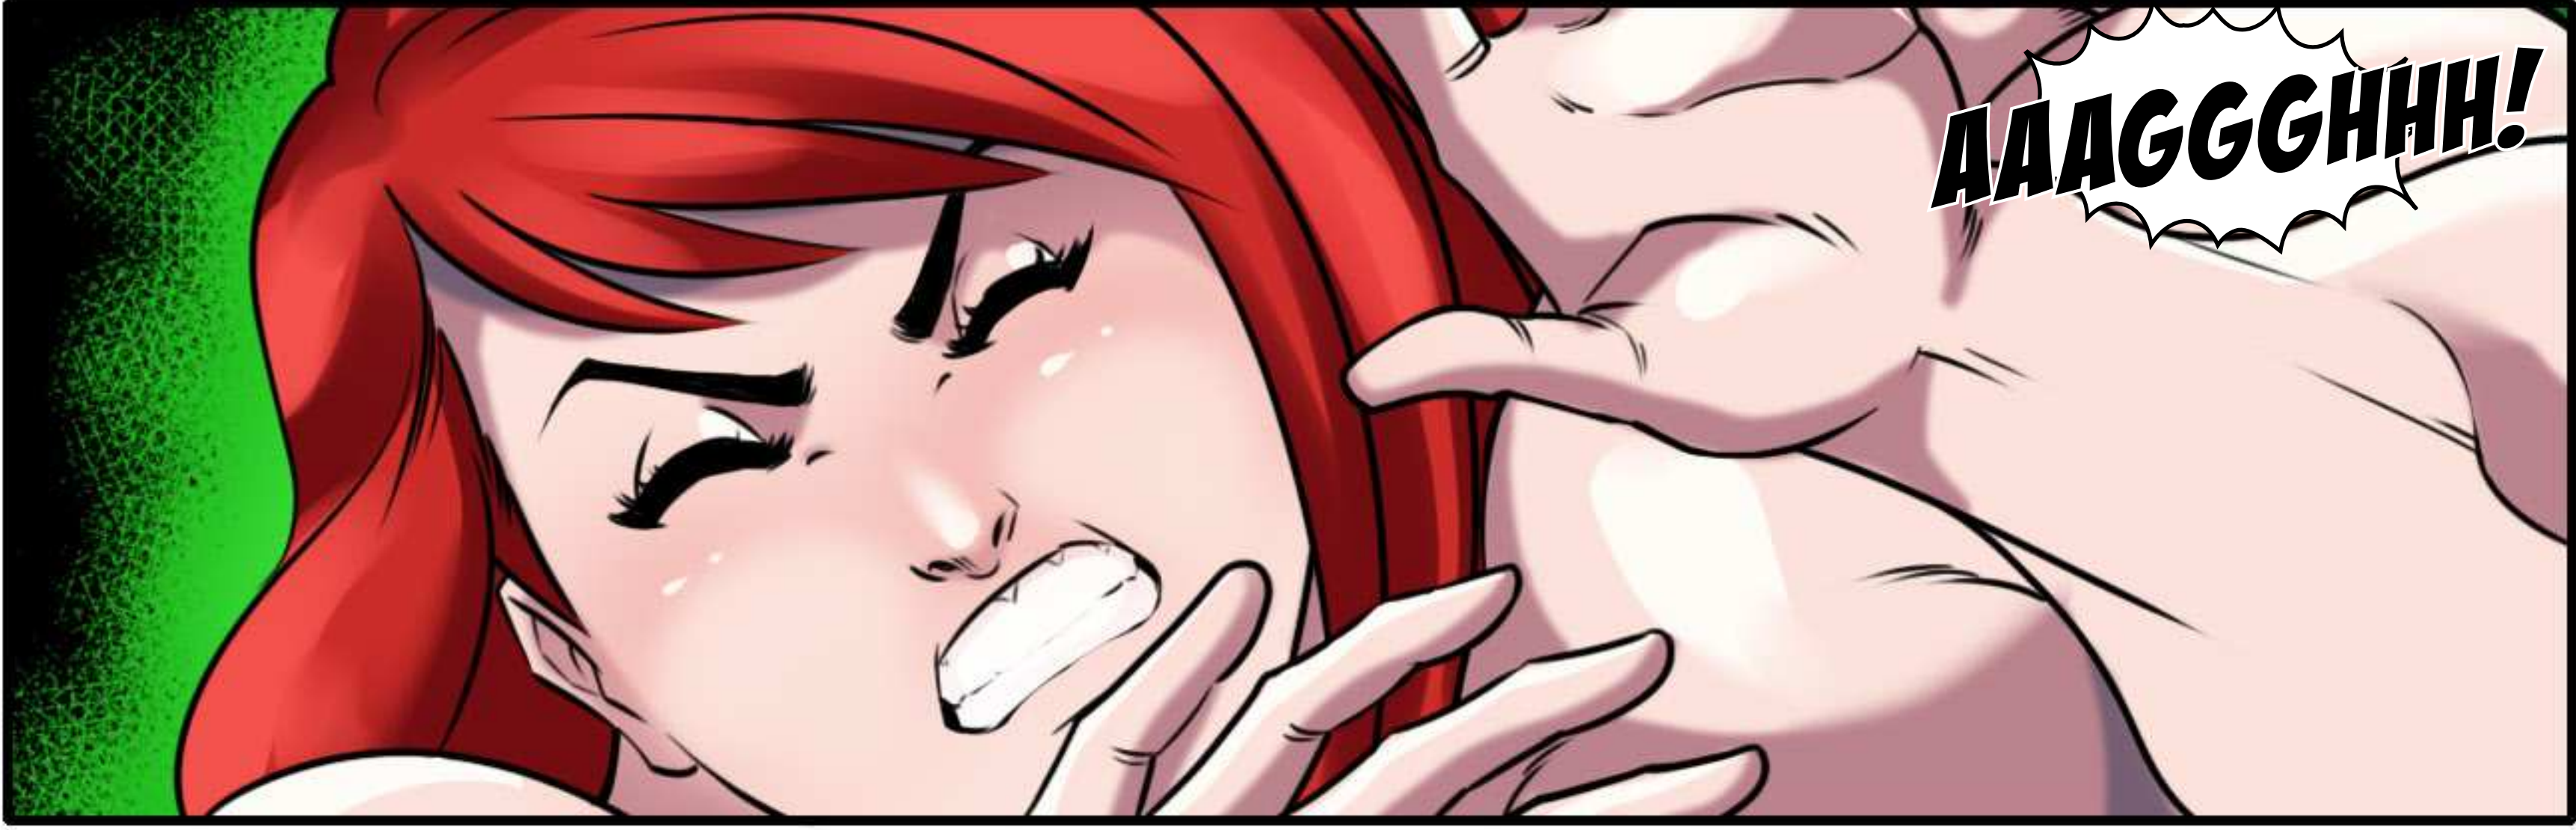

Good question...

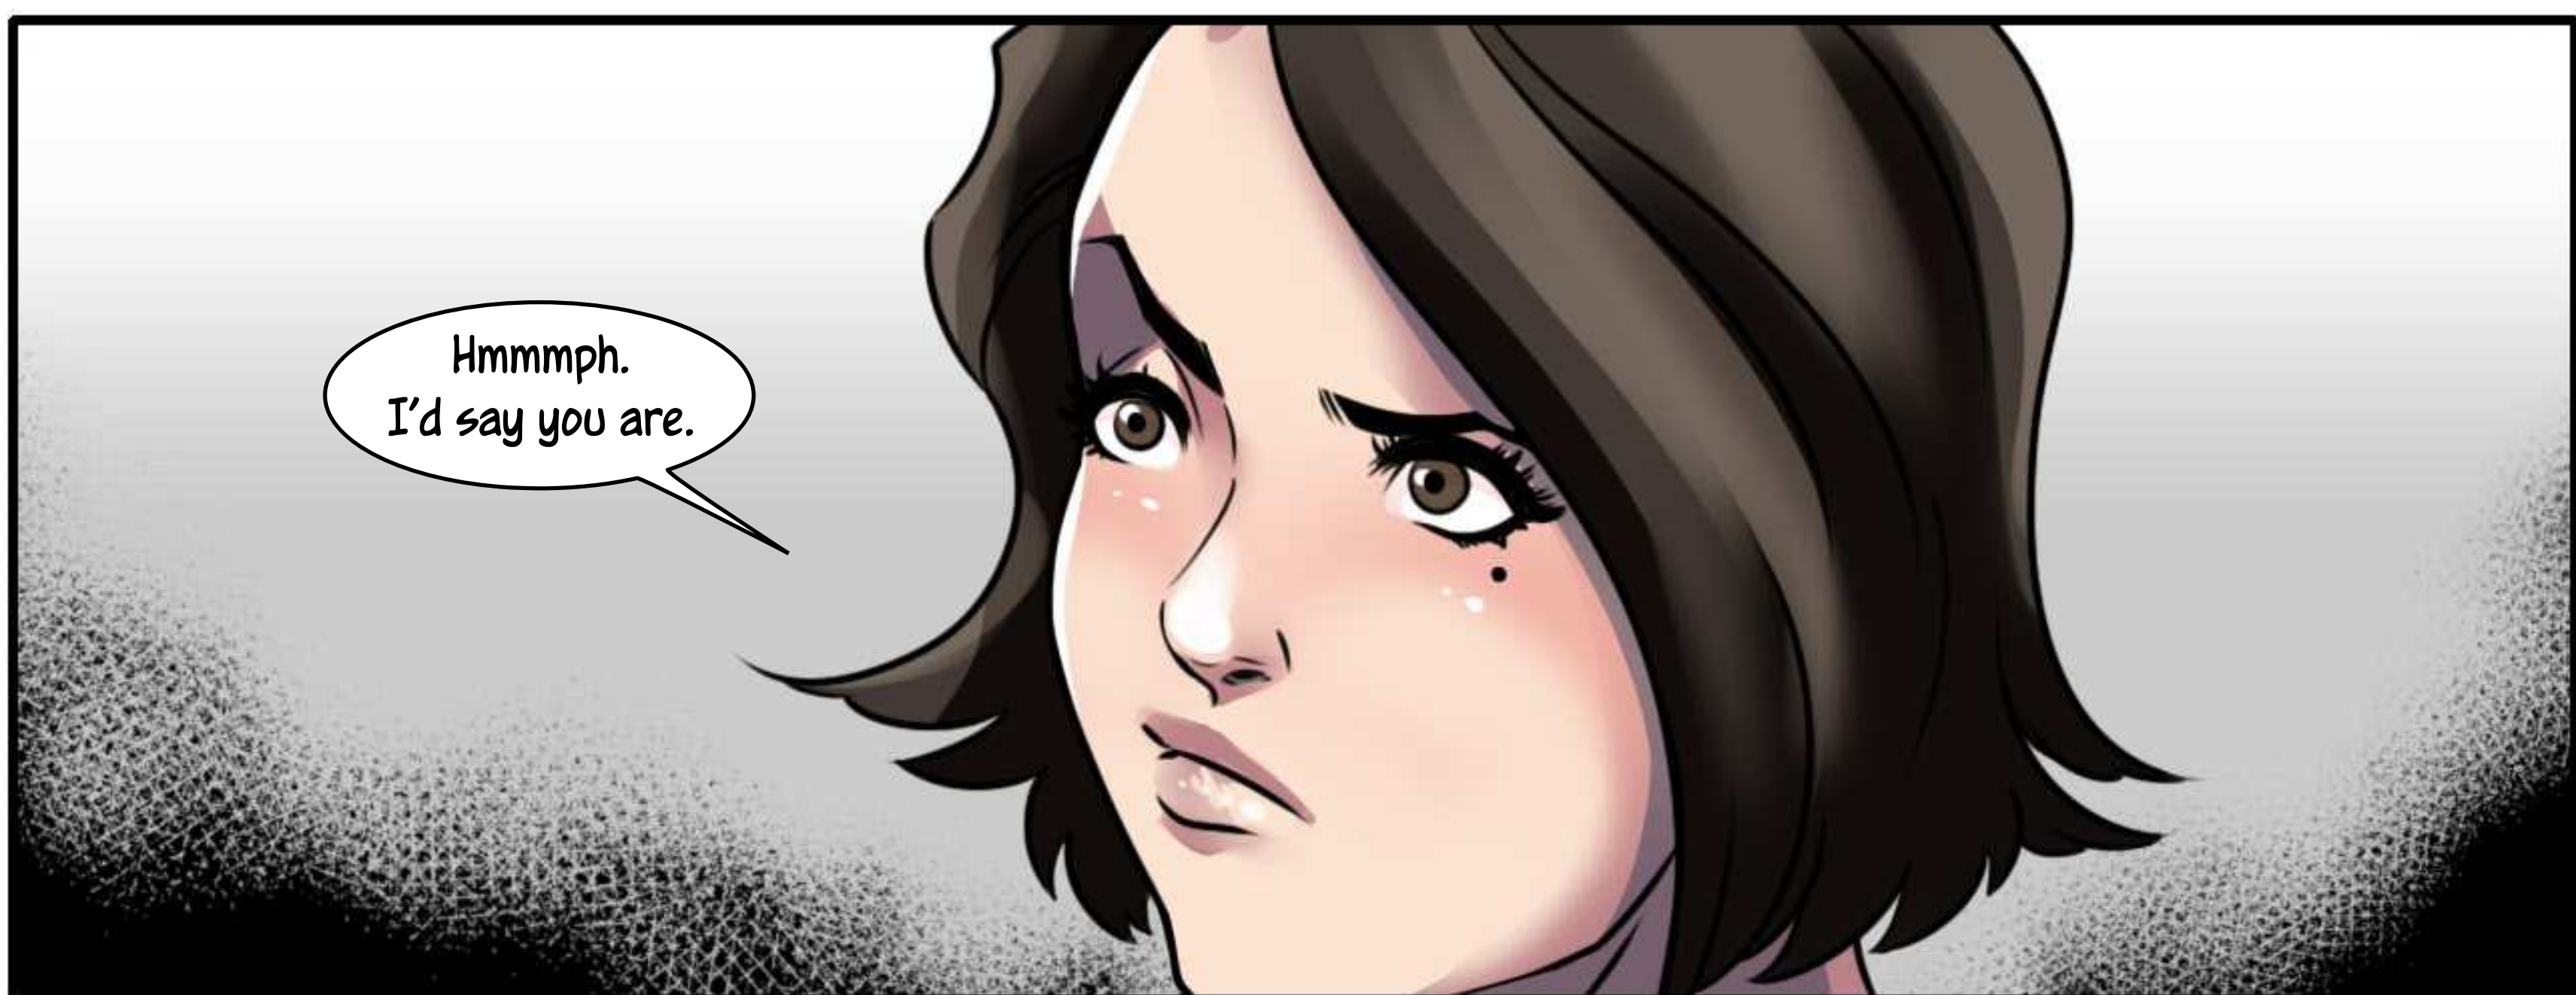

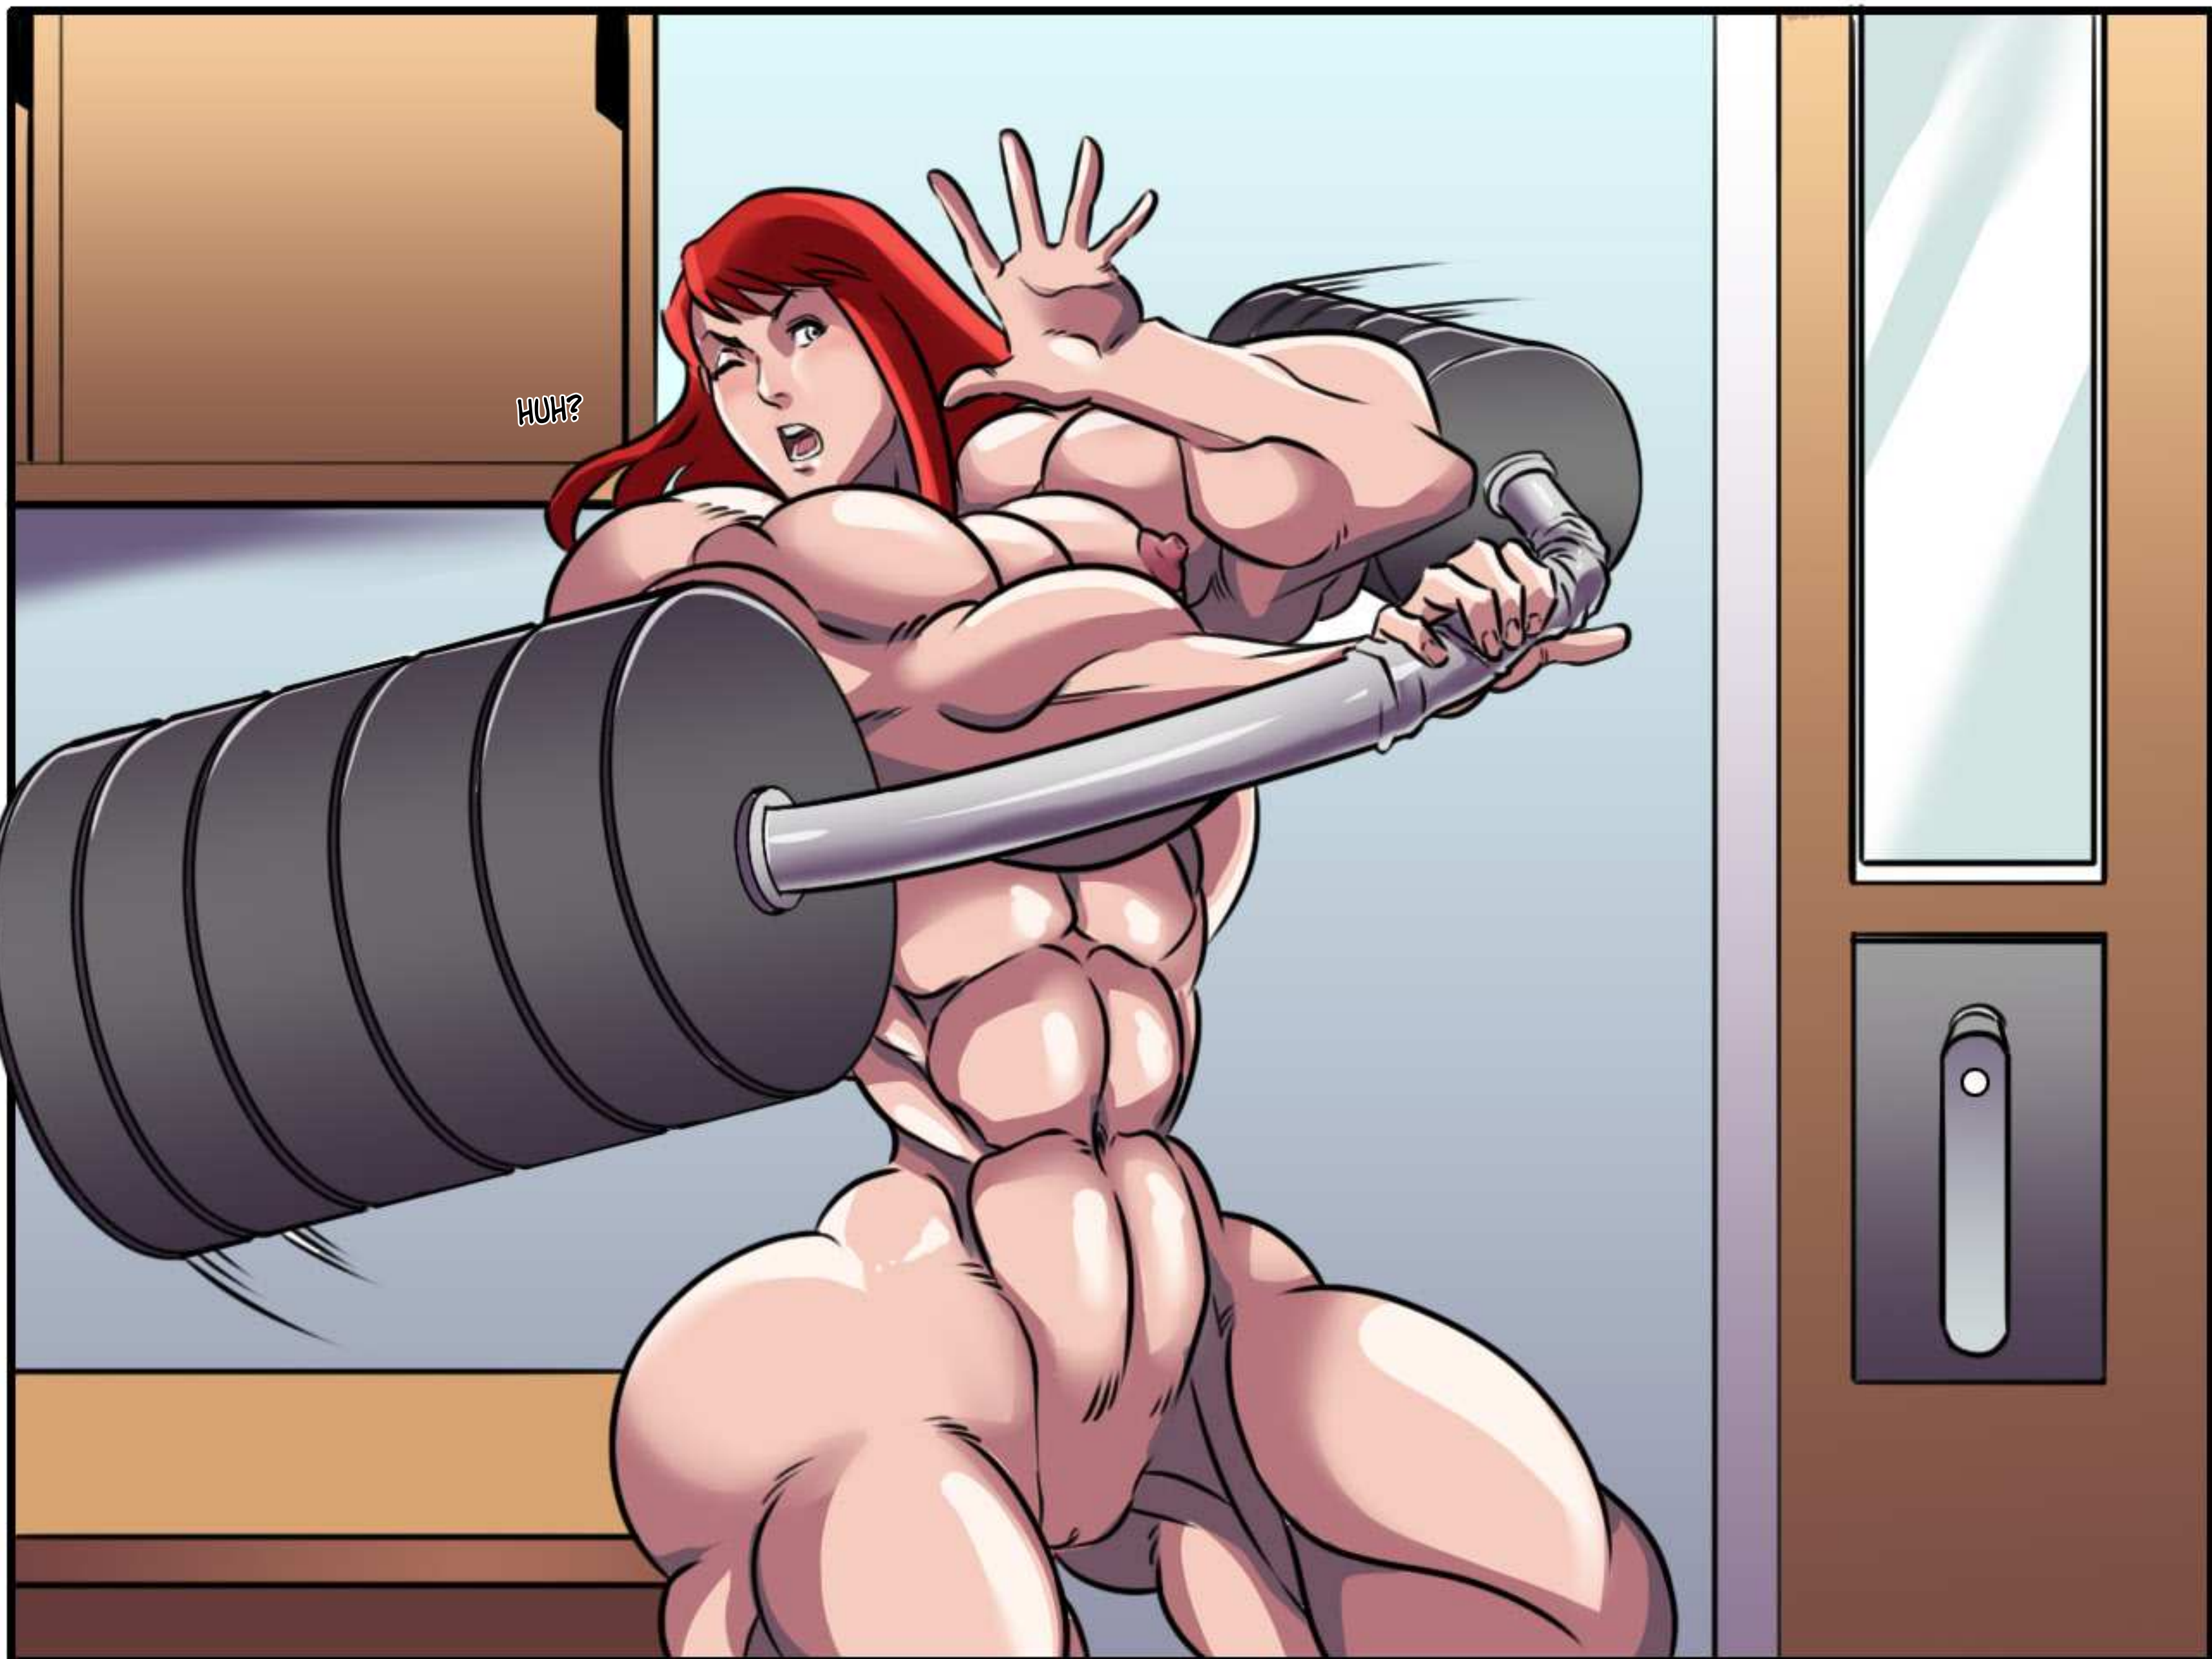

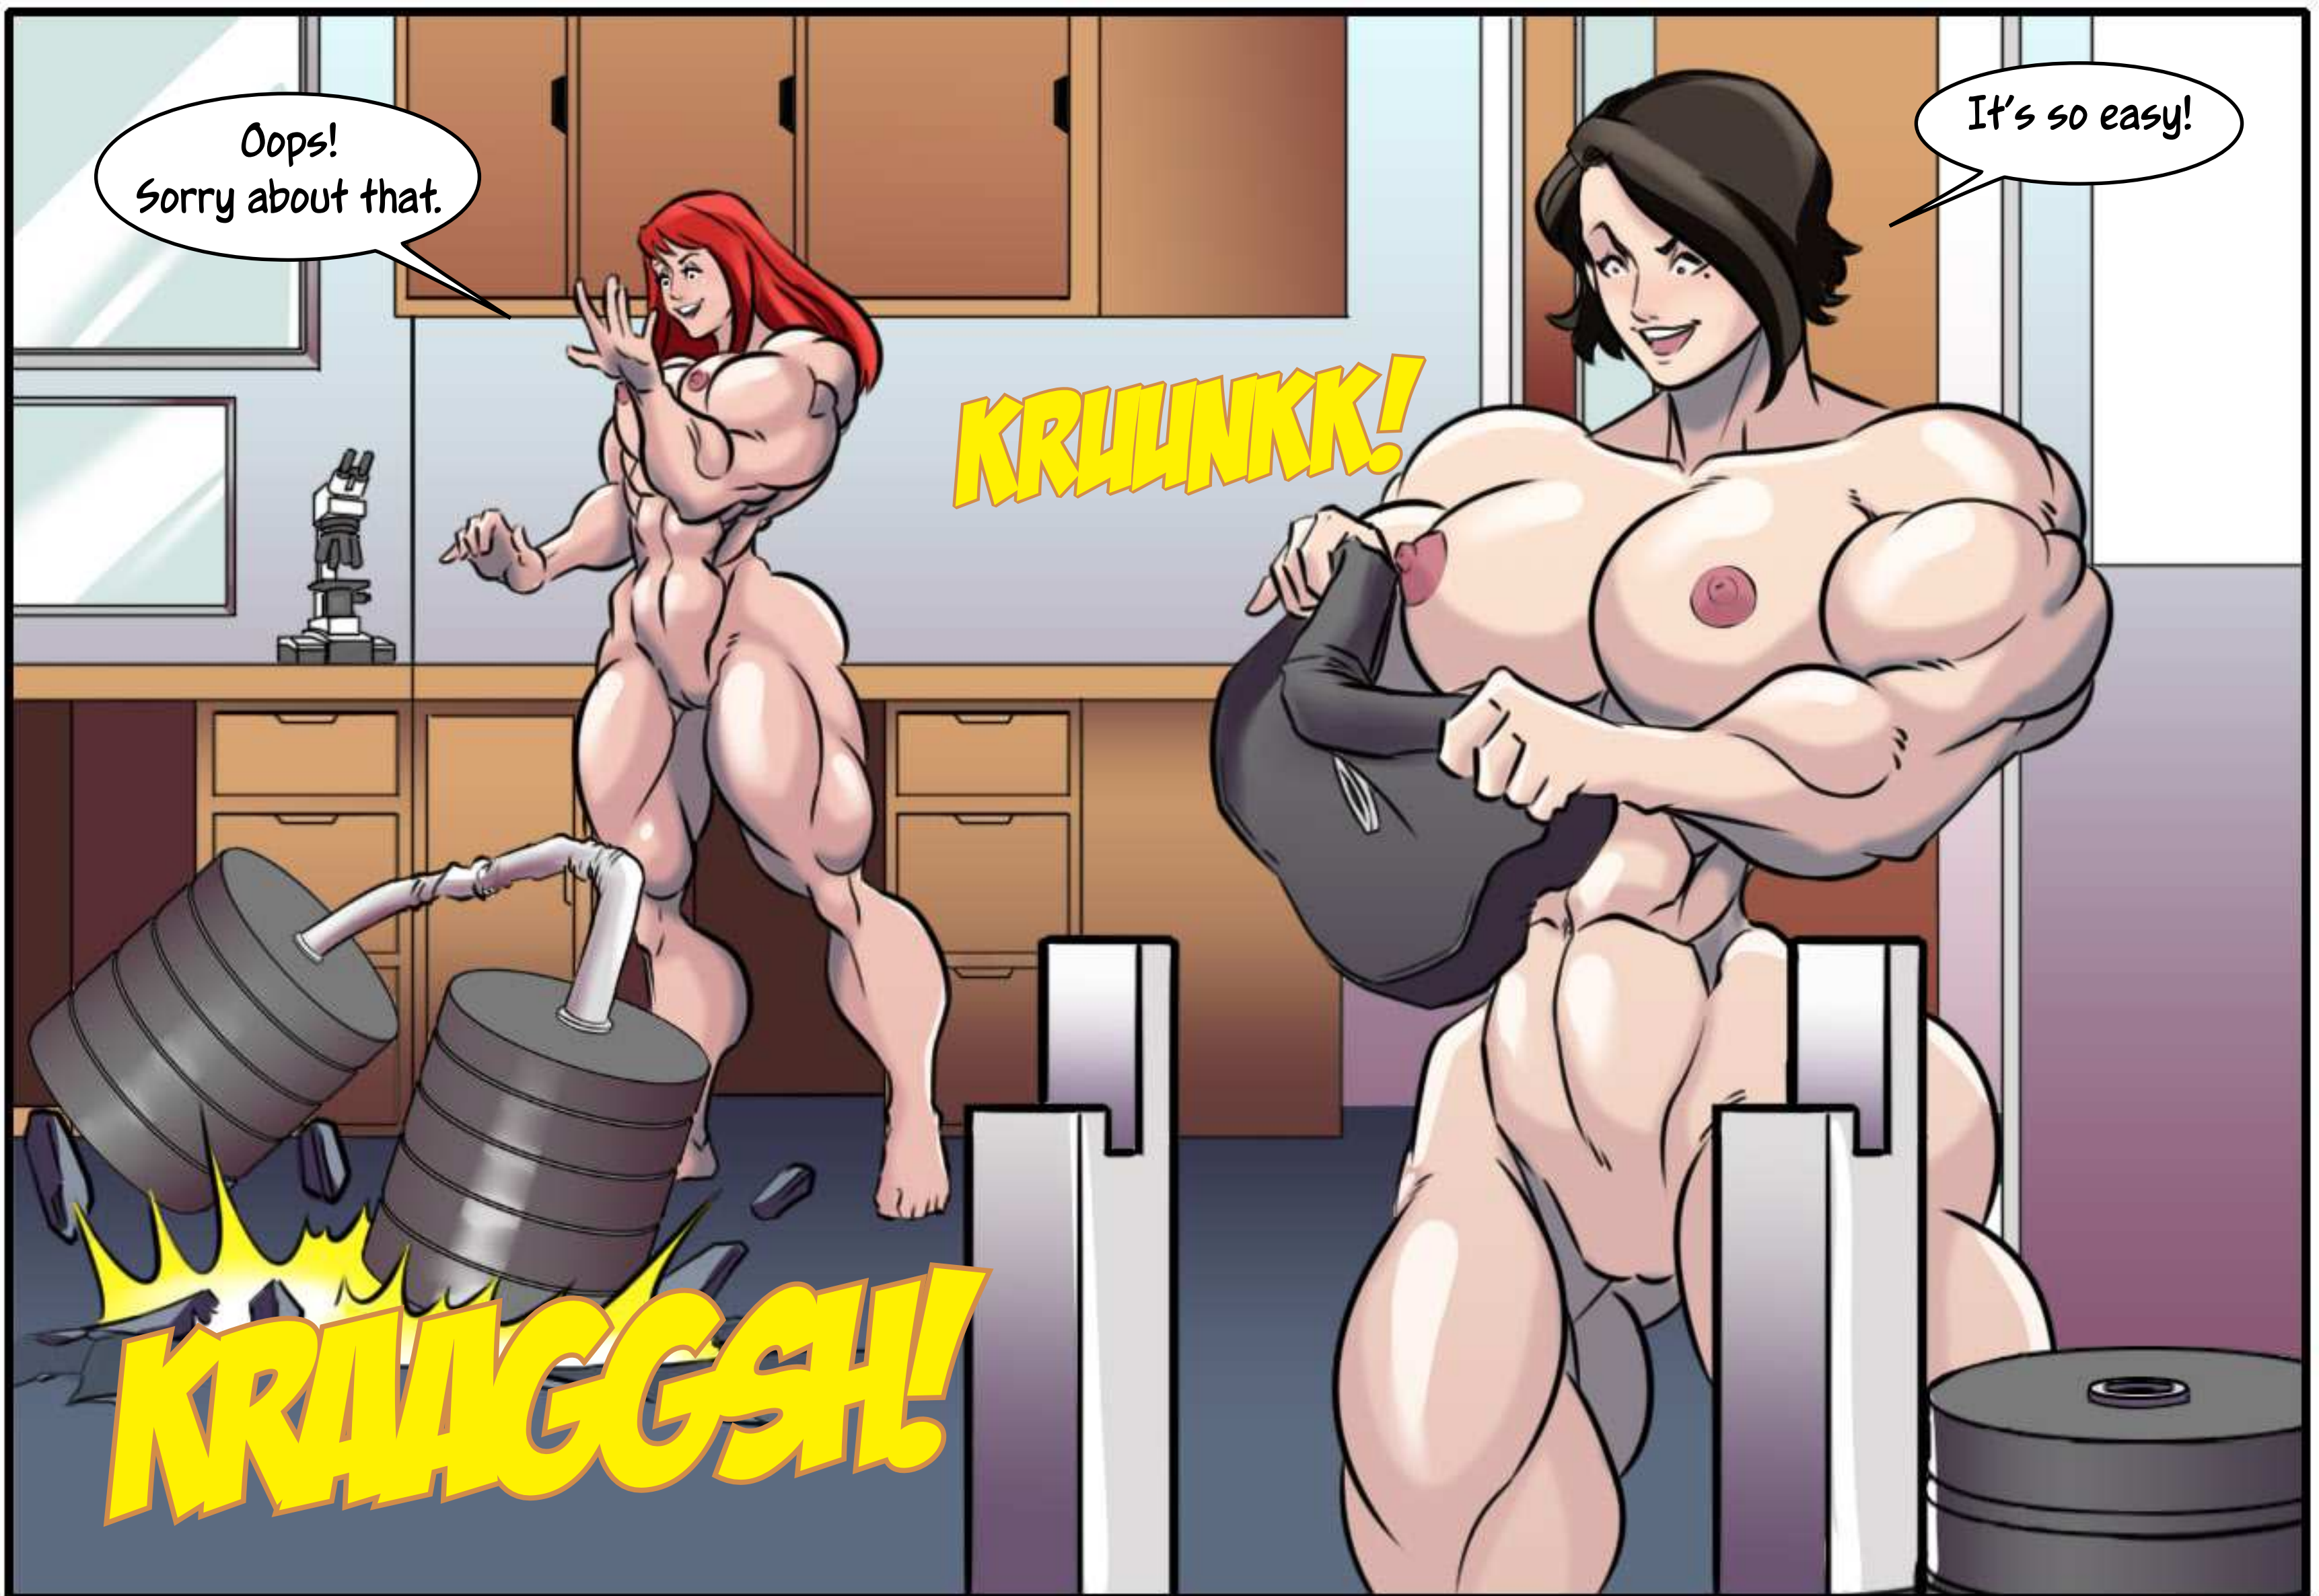

FWOOOSH!

Here catch!

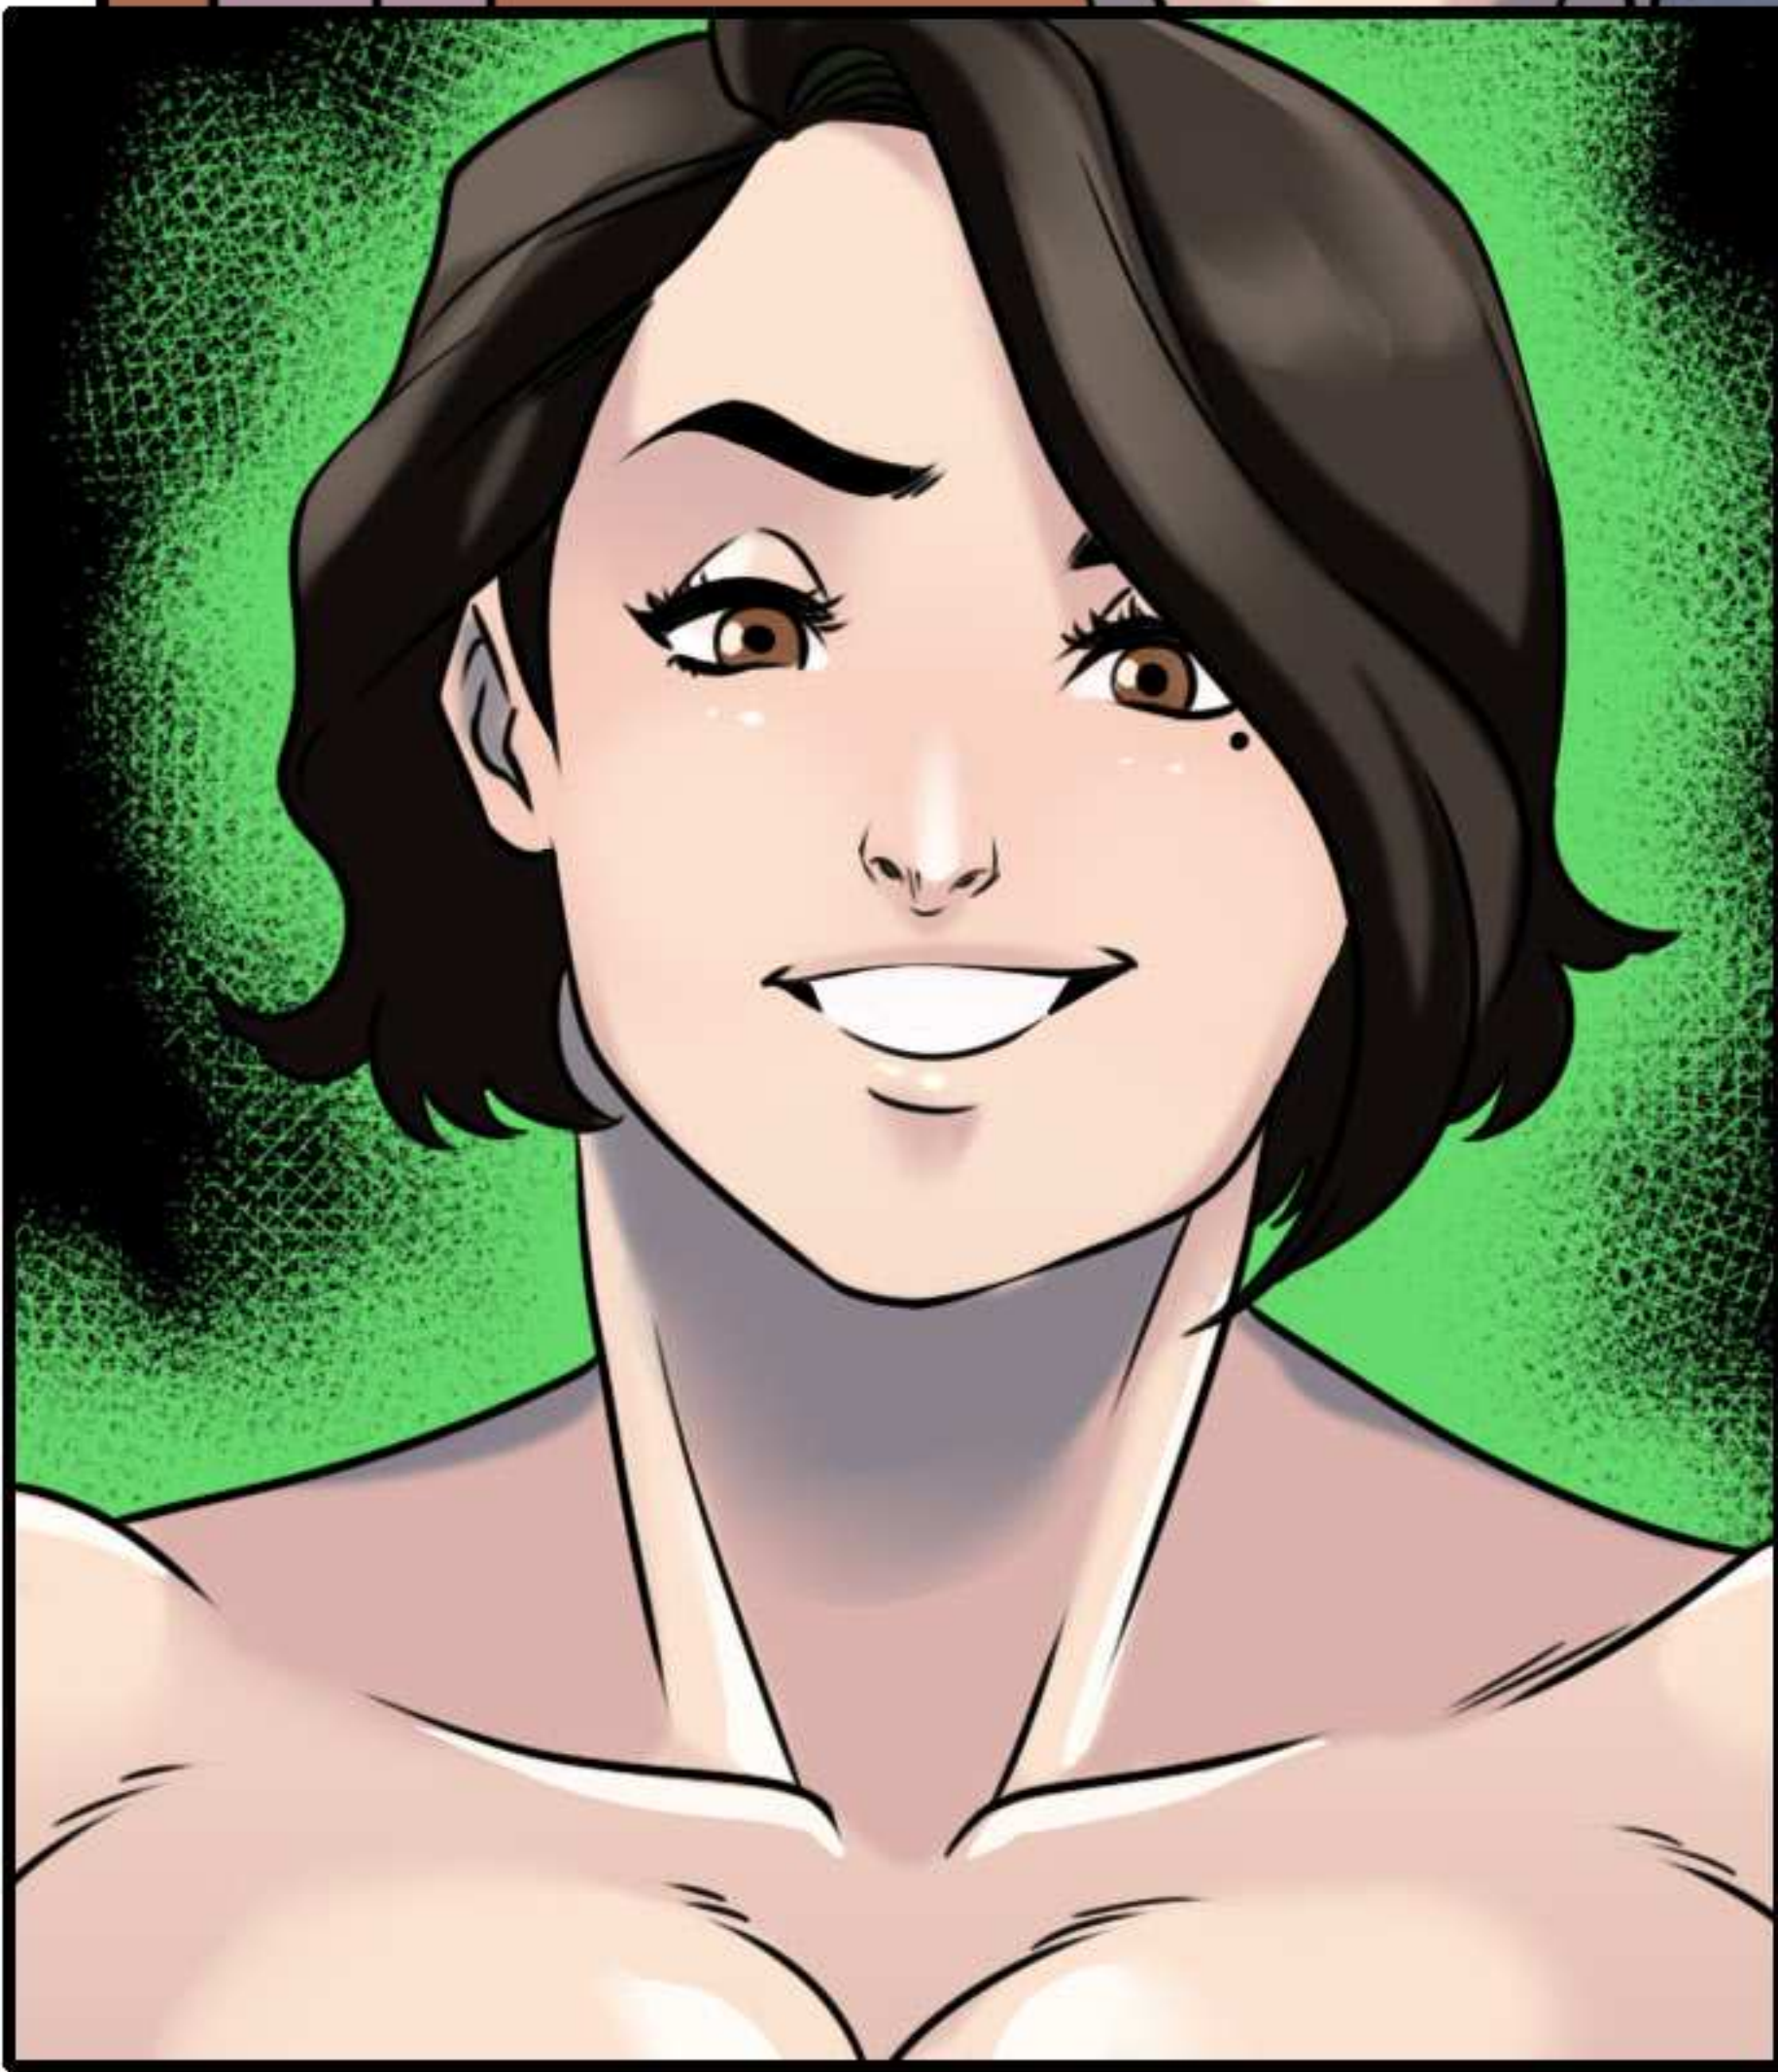

AAAGGGHHH!

KRAGOOSSH!

Hmmm, our size and strength increased right after we were exposed to the glow of that meteorite...

Um...

I wonder if it has had any other effects on us?

Dr. Mundy...
HELP!

Amazing!
How are you doing that?

I don't know!
I was just thinking about how light I feel and..

FLOAT

FLOAT

Ahhh,
I understand now... calm
yourself and focus your
mind on your body.

Um... ok.

THANK YOU!
But... how did you figure
that out so fast?

FLOAT

FLOAT

Hmmm, good
question.

Let me try something,
think hard and tell me what is
the square root of 436,188?

Um... I don't know.

Oddly enough I do...
an hour ago I wouldn't have
been able to answer that either.
But now... everything is so clear,
so easy to understand.

So... you're like
a genius now?

Actually I believe that
term to be inadequate... a
better description would be...
super genius.

Wow. Ok so can
you tell me exactly what
is going on? How did we
get like this?

In due time...
first I would like to find the
extent of our abilities. But
perhaps we should find new
clothes before...

Um...
Dr. Mundy...

To be continued...
