

I-I DONT UNDERSTAND

Let me explain. Think of your penis like a spring. Most of the time, it's coiled up, but sometimes it stretches and lengthens.

Does the spring itself get bigger? No. In your case, your genitals didn't necessarily shrink it's just that the spring has tightened, and your body has lost the ability to loosen it again.

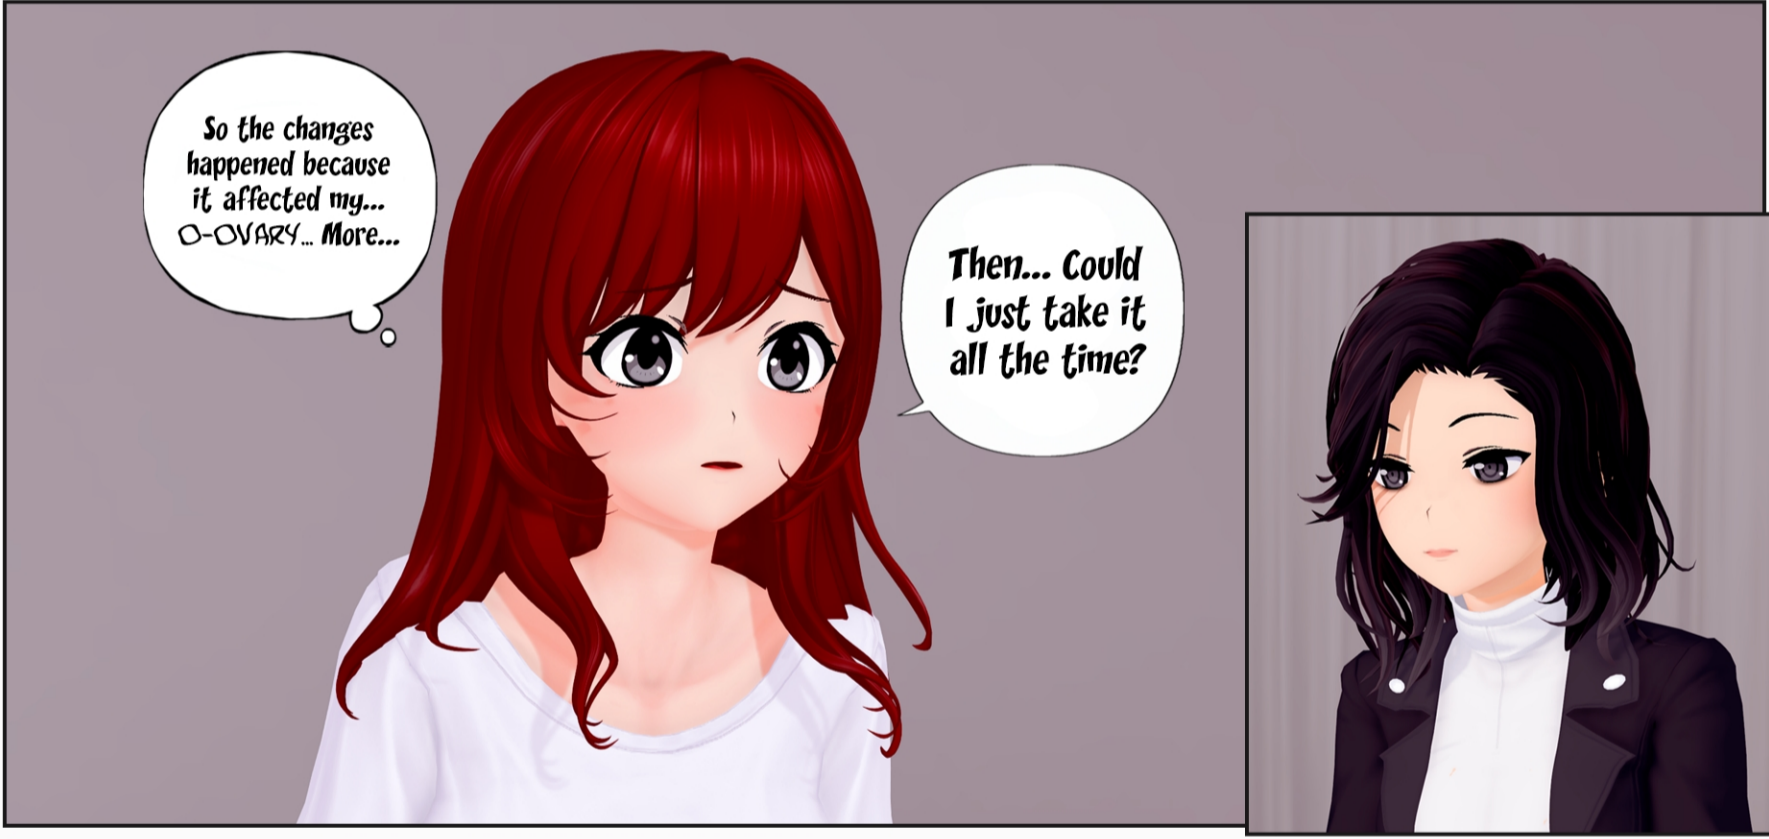

My initial treatment used testosterone from your own testicle to loosen it. However, it could also affect your ovary that's why I explained the risk.

That's not possible now, but I may no, I will be able to engineer something that works the same way.

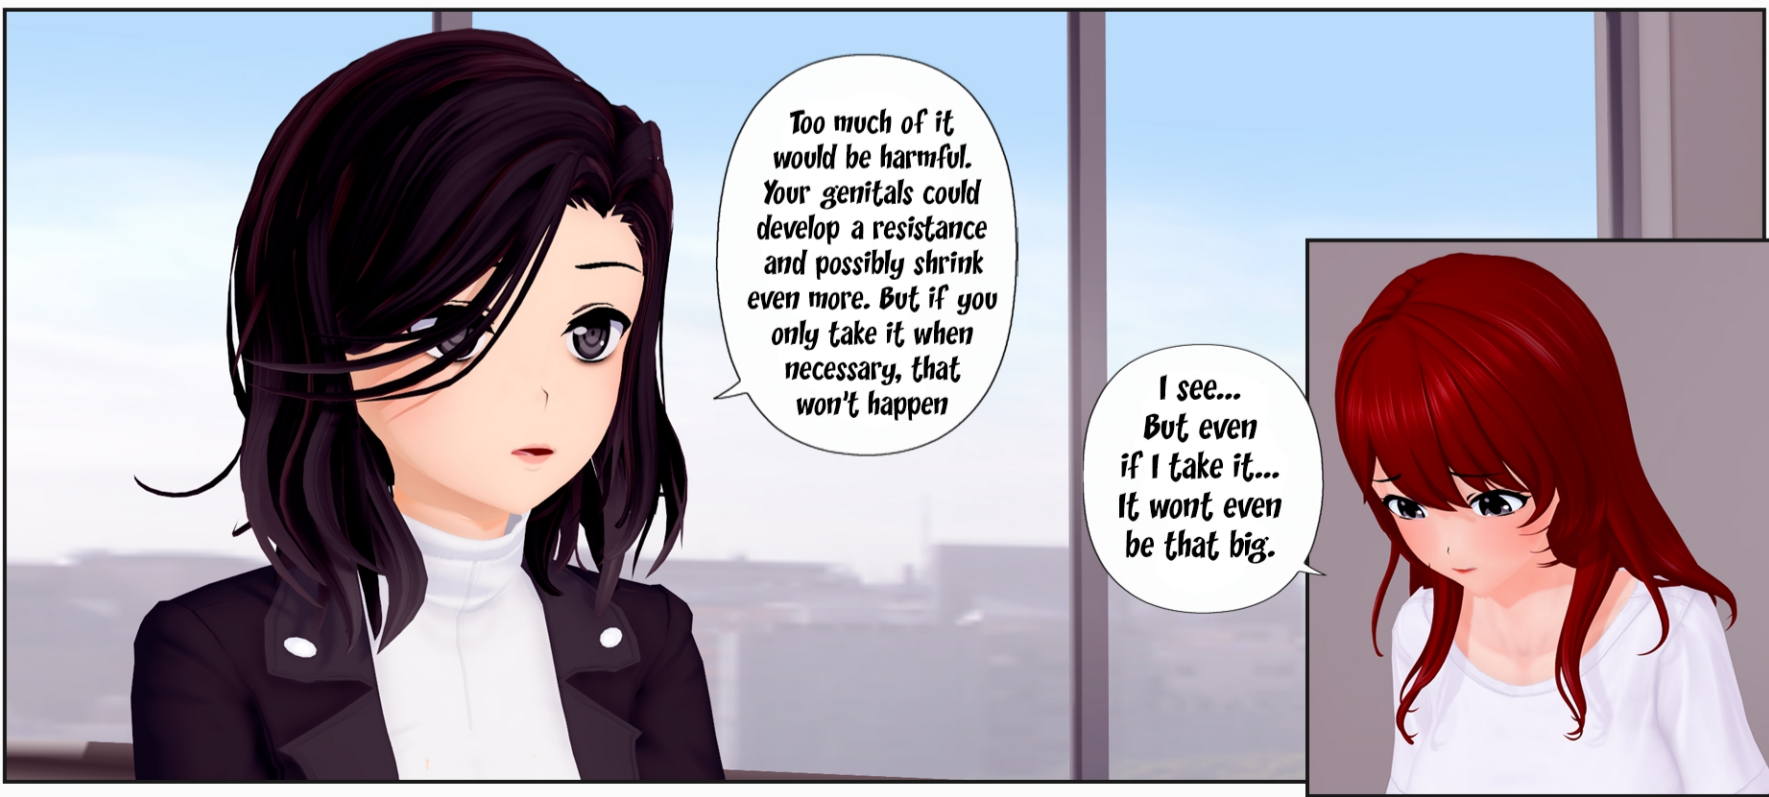

So the changes happened because it affected my... O-OVARY... More...

Then... Could I just take it all the time?

Too much of it would be harmful. Your genitals could develop a resistance and possibly shrink even more. But if you only take it when necessary, that won't happen

I see... But even if I take it... It won't even be that big.

That's not what I said. Why do you think that?

Because... even if I take it, won't it just go back to how it was before?

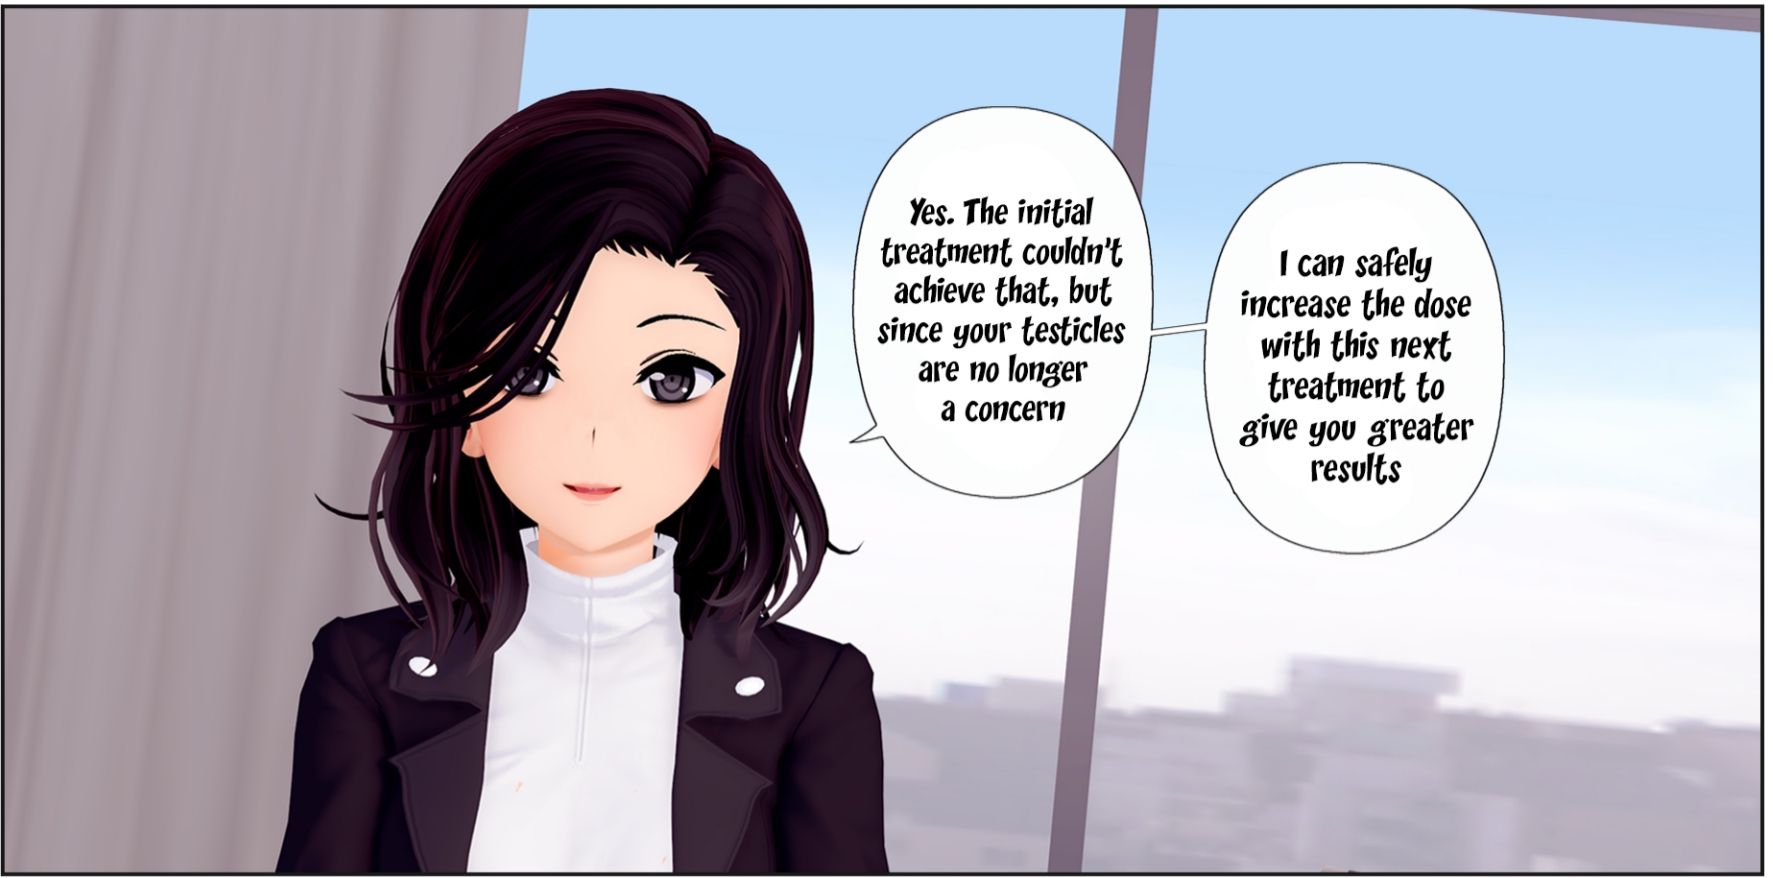

What a dense one... I guess this will cheer him up.

Yes it will go back to how it was before. And by "before", I don't mean before the treatment. I mean before it ever shrank... Its original size.

**B-BEFORE...
IT EVER
SHRANK?**

Yes. The initial treatment couldn't achieve that, but since your testicles are no longer a concern

I can safely increase the dose with this next treatment to give you greater results

Rub!

Rub!

Breathe...

Even if it's only temporary. I could get back to my original size. I thought I'd only gain a little... But... back to normal...

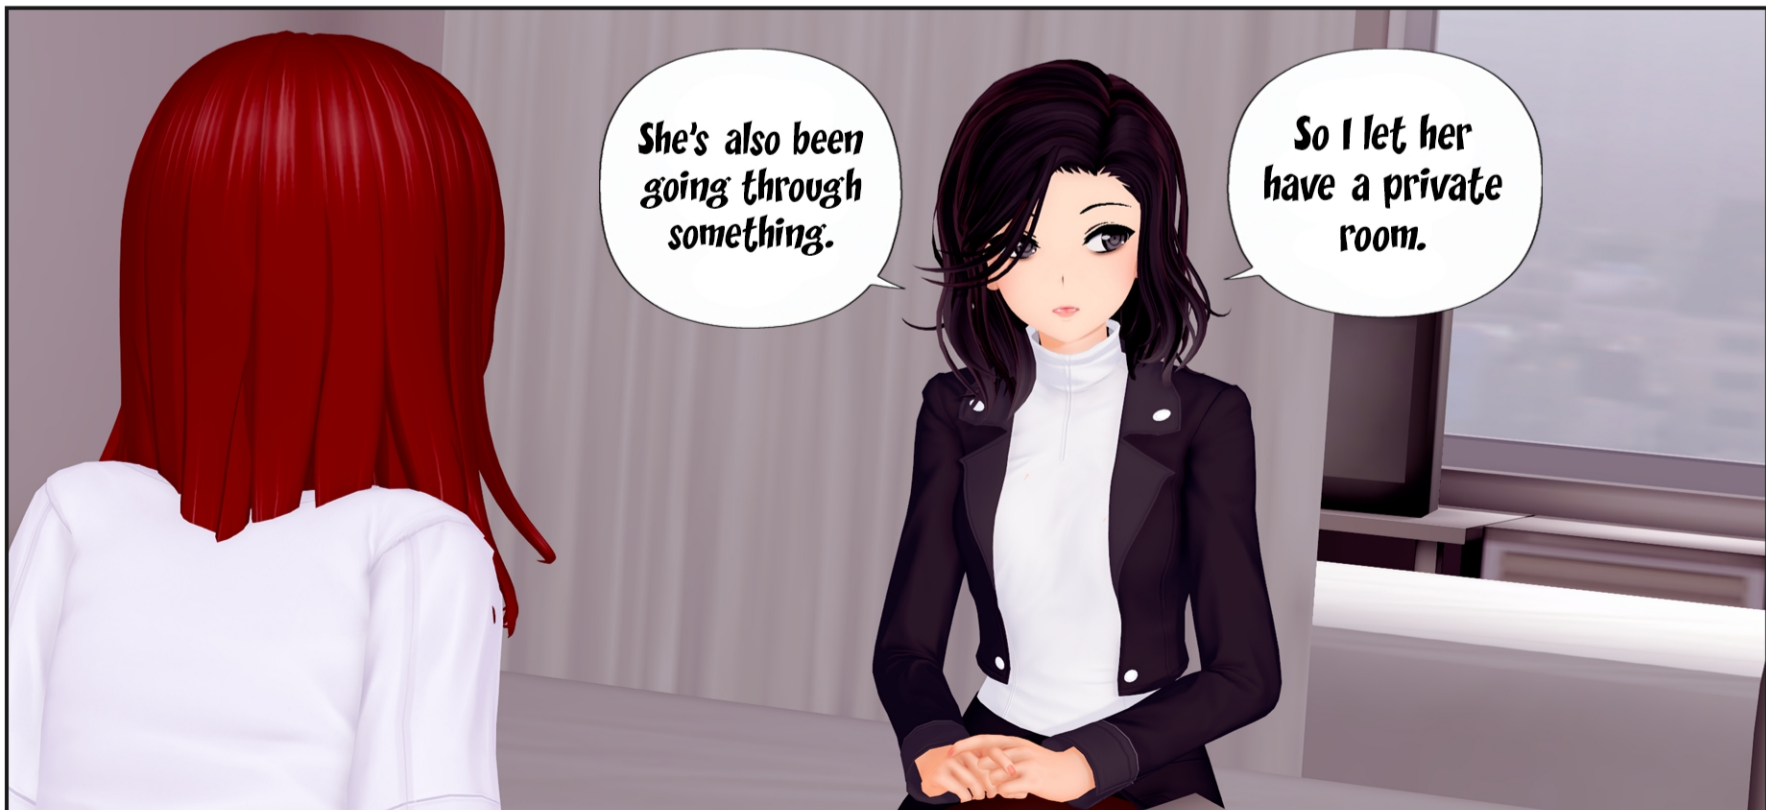

Please make it.

I'll begin work on it as soon as I can.

*By the way...
Where's Mei?
Shouldn't she be here?*

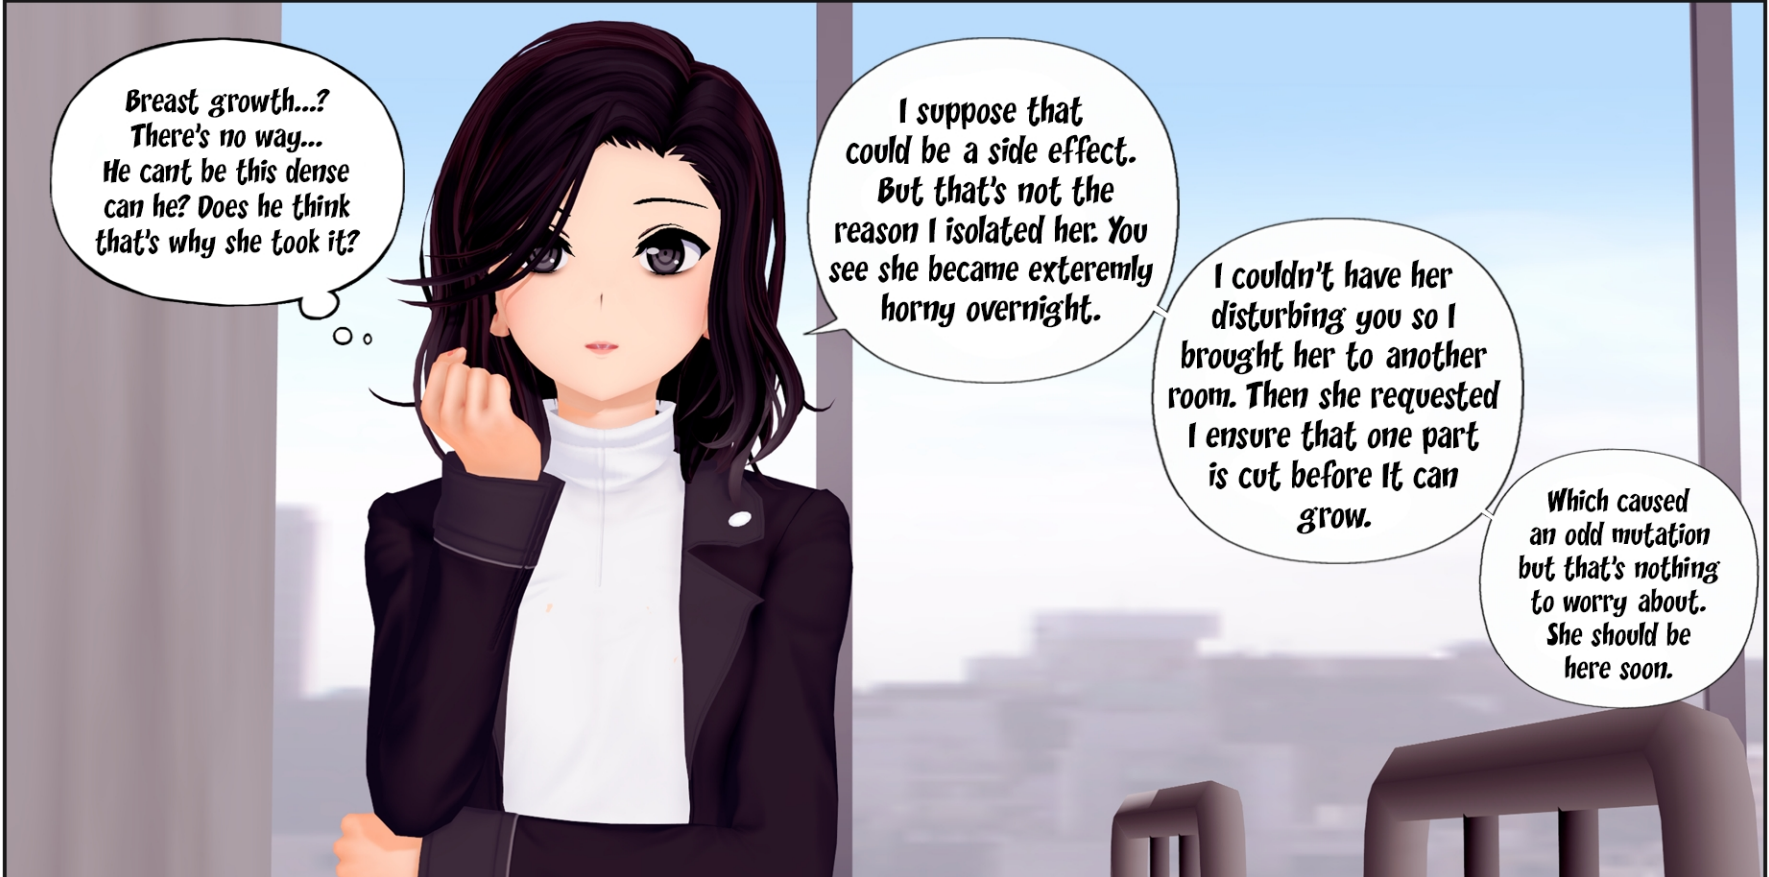

She's also been going through something.

So I let her have a private room.

Private room why? When my breasts... grew it was quick.

Is it slower for her because she's girl?

Breast growth...? There's no way... He cant be this dense can he? Does he think that's why she took it?

I suppose that could be a side effect. But that's not the reason I isolated her. You see she became extremely horny overnight.

I couldn't have her disturbing you so I brought her to another room. Then she requested I ensure that one part is cut before it can grow.

Which caused an odd mutation but that's nothing to worry about. She should be here soon.

...What? Side effect? But isn't that what she took it for? And what do you mean cut?

...I suppose you didn't understand what she told you last night. Well... I cant tell you. You will have to ask her.

If not her breasts... Then why did she risk taking it? Height? No that cant be... Her butt... No... She's only ever hinted at not liking her small breasts... I think they're cute though... I wonder what she wanted to change?

Meanwhile...

I should be fine for now... though I didn't expect it would increase my libido so much...

I suppose that being the only side effect is something to be thankful for..

Again? Really... I just... Just hold on until we get home.

Drip...

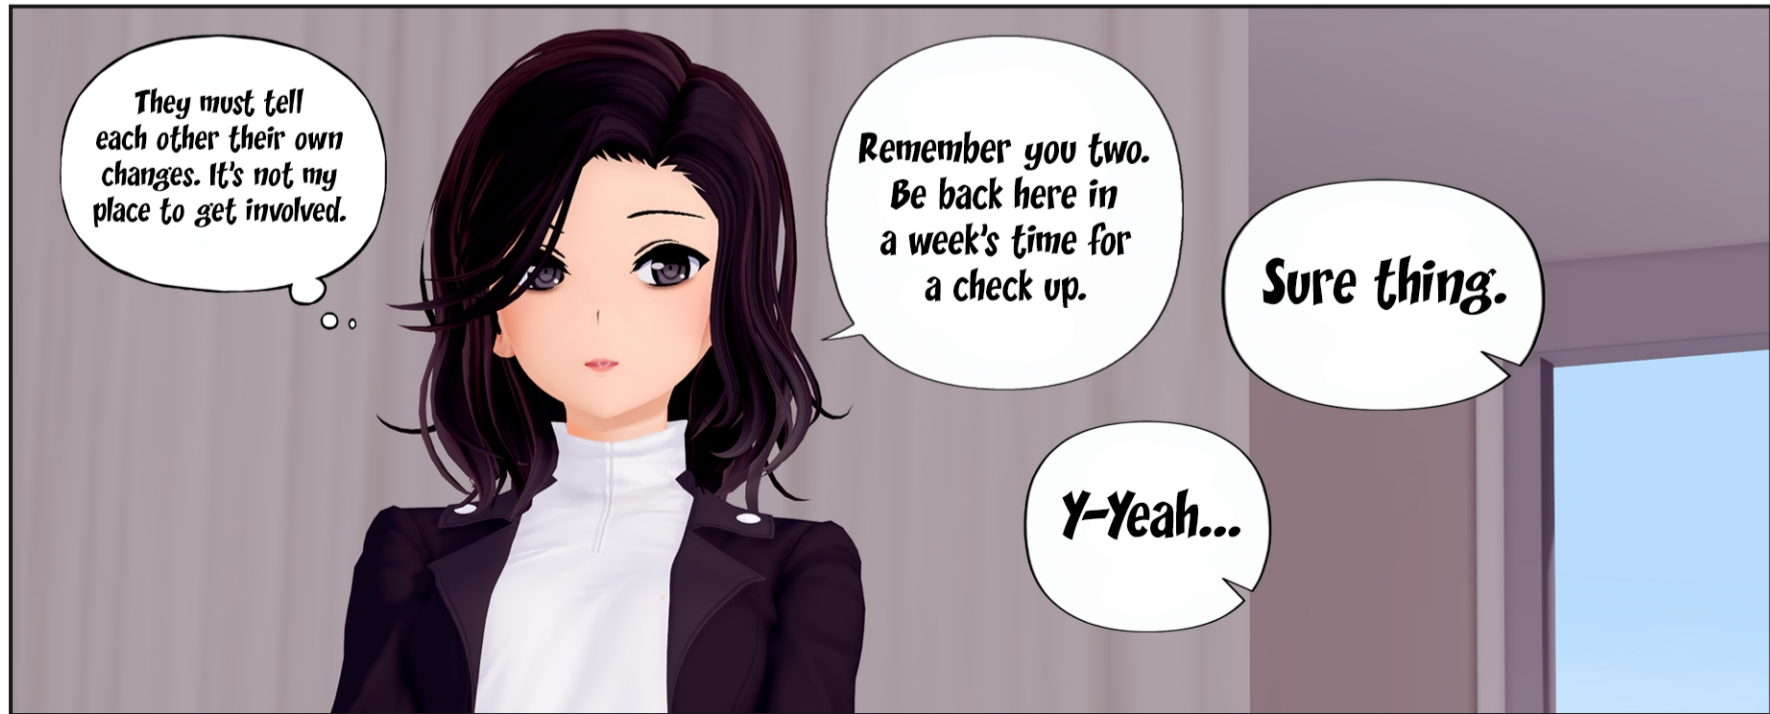

I suppose now that Leona's restored some of her size... We can finally go all the way. How poetic... For both of us to lose our virginities together~

Later...

Ready to go home Leona?

Yeah... She doesn't look different...

They must tell each other their own changes. It's not my place to get involved.

Remember you two. Be back here in a week's time for a check up.

Sure thing.

Y-Yeah...

She's... Not changed? I guess they might be bigger?

Oh..? I see that you've had some side effects. Hmm, she didn't say that could happen.

You noticed THAT huh...? I-I was wondering how I WOULD tell you at least it wont be as EMBARRASSING...

Of course I would and dont be embarrassed. They're nothing to be ashamed about.

Mei
I'd say they've grown a bit fuller and more shapely. The perfect breasts~ Your skin looks flawless, and your movements feel more natural.

W-What?! M-My breasts got BIGGER?! I-I didn't notice... T-THEY'RE not THAT bigger... Right?

I'm glad no bad side effects happened and now that your bigger~

It's time we crossed that line... together.
